Mr. WALSH. Mr. Speaker, during our consideration of the fiscal year 1978 appropriations for the Department of Transportation and Related Agencies Wednesday, I plan to offer an amendment which would prohibit the use of any of the moneys we appropriate in this bill for the modification of any sign relating to any speed limit, any distance, or any other measurement on any highway—as defined in section 101 of title 23, United States Code—for the conversion of such sign to the metric system of measurement—as defined in section 4 of the Metric Conversion Act of 1975 (15 U.S.C. 205c).

As many of my colleagues are aware, I have been extremely concerned about the Federal Highway Administration's proposal published in the Federal Register of April 27, to convert all of our highway signs to metric markings. On April 28 of this year, I introduced legislation to prevent the expenditure of Federal funds for this purpose without an express authorization by the Congress. I testified on this issue on May 17, 1977, before the House Committee on Public Works and Transportation's Subcommittee on Surface Transportation, and at the request of the subcommittee chairman and ranking minority member, I initiated a bipartisan letter which was signed by many of the members of the subcommittee, addressed to Secretary of Transportation Brock Adams, asking that he withdraw the notice of proposed rulemaking with respect to highway sign conversion as published in the Federal Register. A copy of that letter follows this statement.

The highway sign metrification effort proposed by the Federal Highway Administration could well result in a wasteful expenditure of our constituents' tax dollars. It is well known that the Federal Highway Administration has no estimate of the cost of the sign change or of the public education program which would have to precede the sign change. Aside from the fundamental issue of the cost of the project, I am concerned that the Federal bureaucracy is trying to "pull the wool over our constituents' eyes." As it stands now, the Federal Highway Administration could simply mandate that States draw the funds for highway sign metrification for Federal aid highways from their apportionments out of the highway trust fund. Since contract authority to draw against the highway trust fund is written into the authorization, there is no need for us in the Congress to appropriate money each year for the fund and thus specify how it is to be spent. The FHA can use vast numbers of taxpayer dollars without the taxpayer having anything to say about it.

We ought to also keep in mind, as pointed out in the subcommittee's letter to Secretary of Transportation Adams, that the FHA is overstepping its authority by claiming authorization to mandate highway sign metrification under the Metric Conversion Act of 1975. The legislative history of this law, and its specific language, emphasizes that metric conversion will be voluntary and not bound by a specific period of time for implementation.

I am extremely pleased to learn that Mr. GRASSLEY, Mr. WAGGONER, and a number of my other colleagues have also perceived the serious nature of this problem, and I welcome their interest and concern. Changing this country over to the metric system will have a direct and immediate impact on the daily lives of all of our constituents, and to allow this program to proceed without the careful guidance of the Congress would be a grave mistake. I therefore urge support of my amendment.

I include the following:

HOUSE OF REPRESENTATIVES,  
Washington, D.C., May 26, 1977.

HON. BROCK ADAMS,  
Secretary of Transportation, U.S. Department of Transportation, Seventh Street, SW., Washington, D.C.

DEAR MR. SECRETARY: In testimony before the Subcommittee on Surface Transportation, Representative William F. Walsh pointed out to the Subcommittee that the Federal Highway Administration has exceeded its authority by proposing the mandated conversion of all Federal highway signs to metric standards by September of 1982. At the request of the Chairman and the Ranking Minority Member of the Subcommittee, this letter was drafted to request that you immediately withdraw from consideration the regulations proposed by the Federal Highway Administration for this conversion.

We make this request because the proposed regulations are contrary to the intent of Congress in that:

Congress specified that the change to the metric system would be entirely voluntary in nature, whereas this regulation would make conversion mandatory by improper use of the Department's standards-setting authority over highway design and construction.

Congress specified that conversion to the metric system would proceed at a pace best suited to each segment of the economy, rather than completed by a mandated period as the regulation proposes.

The Metric Conversion Act provides that the U.S. Metric Board, and not any other Federal entity, will provide for appropriate procedures whereby various groups, under the auspices of the Board, may recommend specific programs for coordinating conversion in each industry or segment thereof.

The U.S. Metric Board is required to take into account metric conversion costs for various segments of the economy, including government agencies.

The required consultation and other powers delegated to the Metric Board to coordinate metric conversion in the U.S. cannot occur until the Board is appointed. Seventeen persons were nominated by the prior Administration but not acted on by the Senate for confirmation.

We would appreciate your prompt action and reply on this important matter because of the heavy and unauthorized financial drain it would impose on all highway departments throughout this country.

Sincerely,

JAMES J. HOWARD,  
Chairman, Surface Transportation Subcommittee.

BUD SHUSTER,  
Ranking Minority Member.  
WILLIAM F. WALSH,  
Member of Congress.  
THAD COCHRAN,  
Member of Congress.  
DON H. CLAUSEN,  
Member of Congress.  
JOHN G. FARY,  
Member of Congress.  
W. G. HEFNER,  
Member of Congress.

#### CATHERINE FILENE SHOUSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BRADEMAS) is recognized for 5 minutes.

Mr. BRADEMAS. Mr. Speaker, our Nation's enjoyment of the performing arts has been given a tremendous lift through the energy and generosity of one person. I speak of Catherine Filene Shouse.

For, Mr. Speaker, Mrs. Shouse's gift to the United States of Wolf Trap Farm Park for the Performing Arts offers the opportunity for the people of our country to enjoy performances of the finest in music and theater and dance.

Located in Vienna, Va., near the Nation's Capital, Wolf Trap serves not only the residents of the Washington, D.C., area but, through the Public Broadcasting Service and more than 250 stations, brings to the people of the entire Nation complete performances that have been videotaped live at Wolf Trap.

Mr. Speaker, the theater at Wolf Trap, the Filene Center, was given by Mrs. Shouse in honor of her parents, Mr. and Mrs. Lincoln Filene. It is a handsome theater, with seats for 3,500 people under its roof and for more than 3,000 on the lawn of its natural amphitheater.

Not only has Mrs. Shouse, through Wolf Trap, made possible outstanding performances but she has established the Wolf Trap Company as a training program for young performing artists. The company is designed to give young singers an opportunity to develop and strengthen their skills through study, practical training under professional directors, and participation in productions on the stage at Wolf Trap. Company members are selected through annual auditions held in major geographical regions of the country.

Mrs. Shouse's concept of a performing arts center in a natural setting also provides a quiet retreat for composers. There has been erected the first of several cottages that will enable artists to escape to a quiet, secluded spot for a period of 2 to 4 weeks to work on the music of the performing arts.

Mr. Speaker, Wolf Trap, America's first national park dedicated to the performing arts, begins its seventh season this year with programs of opera, dance, jazz, symphony, musical theater, and popular entertainment.

Mr. Speaker, for her faith and vision in the establishment of a performing arts center dedicated to the cultural enrichment of our country we owe much appreciation to Catherine Filene Shouse.

#### THE NEED FOR THE CONSUMER PROTECTION AGENCY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. MOSS) is recognized for 5 minutes.

Mr. MOSS. Mr. Speaker, I would like to bring to the attention of my colleagues a bill that is of critical importance to the more than 200 million consumers in this country. H.R. 6805, the Agency for Consumer Protection, is a measure that

is long overdue. American consumers have shown, through their consumer organizations, through letters and telegrams to their elected Members of Congress, and through a recent Louis Harris poll that they want an independent Federal agency to represent them.

A great deal of misunderstanding surrounds this bill. While opponents claim that the Agency represents uncontrolled Government growth and would create another layer of bureaucracy, nothing is further from the truth. The Consumer Agency is a lean operation with funding designated at \$15 million for the first year, surely a pittance compared to the budgets of other Federal agencies. The Defense Department, for example, spends \$15 million in less than 1 hour. Consumers are clearly willing to pay the price for this Agency, a bargain at 25 cents per year for the average taxpaying family.

Congress must act now to make this consumer mandate a reality.

The National Consumers League, the Nation's oldest consumer organization, is a vigorous supporter of the Agency for Consumer Protection. The following statement so clearly shows the need for such an agency that I include it in the RECORD:

(Testimony of Mary Gardiner Jones, President, National Consumers League Before the Governmental Affairs Committee United States Senate April 19, 1977; and Sandra L. Willett, Executive Director, National Consumers League Before the Legislation and National Security Subcommittee of the Committee on Government Operations, United States House of Representatives, April 20, 1977.)

Mr. Chairman, members of the Committee, the National Consumers League thanks you for the opportunity to address you regarding H.R. 6805 and S.1262 which will at long last establish the Agency for Consumer Protection.

The National Consumers League is the oldest consumer organization in the country. Founded in 1899, NCL for the past 78 years has fought for the health, safety and economic well being of the American worker and consumer. NCL's pioneering work has led to the end of abusive child labor, exploitatively low wages, and senseless safety risks in the workplace. In recent decades NCL has defended and promoted the rights and well being of the consumer—not only the purchaser of goods and services in the marketplace but also the recipient of services such as health care.

NCL's leadership is as distinguished as its legacy of action. Louis Brandeis and Felix Frankfurter served as the League's counsel. Eleanor Roosevelt served as Vice-President. With its notable history, the National Consumers League is particularly pleased to comment today on legislation urgently needed to benefit the consumer.

The National Consumers League regards H.R. 6805 and S. 1262 as the single most important consumer legislation to come before the Congress during the last decade. If enacted, it will provide the mechanism by which the views of American consumers can be represented and integrated, in a systematic regularized way, into the Federal governmental decisionmaking process.

The United States is facing a critical period. Wracked with inflation and unemployment, this country is also confronted with complex problems such as pollution, soaring health costs, lack of population planning, deteriorating quality of goods, decreasing levels of productivity, and inadequate secu-

city for the poor. Above all we have the new problem of severe energy shortages. Superimposed on these problems are both a deep sense of individual powerlessness and an unfortunately increasing sense of mistrust on the part of citizens toward all institutions, particularly government.

The Congress, and particularly the Members of this Committee, deserve praise and gratitude for your efforts over the past eight years to establish an independent agency to alleviate much of this distrust. Now, with bipartisan support and the full weight of President Carter behind this legislation, the prospects for passage of H.R. 6805 (S. 1262) are much brighter. However, prompt enactment will require all of our best thinking and full support. We are grateful for the leadership of Esther Peterson, Special Assistant to President Carter, who serves as Vice Chairperson to the League and who is devoting her wisdom and experience to establishing an effective Agency for Consumer Protection.

The Agency for Consumer Protection is needed now. Every day hundreds of Federal agency decisions are made which affect consumers. The decisionmaker has ample opportunity to hear from business, labor and the farm community who have been well represented in Washington for decades. But consumers have no institutionalized representative in the halls of government. Too often decisionmakers do not consider the impact of their actions on the consumer. They lack the incentive—since the consumer voice is not a full partner in the action—and they lack the data.

How many unnecessarily inflationary regulations or Federal programs have been perpetuated which inadequately reflected the consumers' priorities, needs and trade-offs? The 1974 FEO regulations, for example, are estimated to have cost consumers \$40 million in higher oil charges. How can consumers be expected to support such regulations unless the consumers of this country know that their interests were formally—and visibly—represented in the decisionmaking process and, most important, were seriously taken into account.

Similarly, the current issues with respect to clean air regulations could substantially benefit from consumer input. The impact of cleaner air on consumer health, on clothing and household cleaning bills, on the use of medical facilities and medication—all of this data reflecting consumer concerns and costs should be systematically presented and integrated into the larger picture of social impact, capital resource requirements and other factors which must be weighed in arriving at optimum solutions for the nation. Without an Agency for Consumer Protection, the multifaceted consumer interests in any single issue will not be identified, analyzed and available to the decisionmaker. The ultimate decision—and I truly believe the nation as a whole—will be the poorer.

Finally, drawing on the experience of the Federal Trade Commission, we understand that the FTC would have benefited from consumer expertise during the period when it was struggling with the very real credit and warranty problems plaguing consumers.

Government agencies should not have to depend on the fortuitous group to point out scene of skilled citizen groups to point out weaknesses and to articulate consumer concerns. Our democracy demands a more fundamental, structured approach to ensure that the consumer interest is integrated into government decisionmaking along with the other interest groups. Much of the current lack of confidence in governmental decisions and programs would disappear if, in fact, consumers knew their views were integrated into the policies and decisions along with those of other major interest groups.

At long last the Agency for Consumer Pro-

tection will provide consumers with a formal, institutionalized voice in the decisions made by their Federal government, affecting their pocketbooks and the quality of their lives. The ACP legislation restores consumers to their rightful position of equality alongside business and labor and other organized interests.

The National Consumers League is convinced that consumer viewpoints are as essential as business viewpoints for the government's effective decisionmaking. Consumer concerns are essential because the government must receive a balanced presentation of the issues in order to try and determine where the public interest truly lies. We do not equate the public interest with the consumer interest even though all of us frequently refer to consumers as the public. The public interest is made up of the business, the labor, the farm, the international and the consumer interests. All these interests overlap and inter-relate. They all have a right to call upon their government to hear and protect them. But if government is exposed to only one side of a problem, to only one set of viewpoints, to only one interpretation of the data, the resulting decision may well be a discriminating and destructive one, rather than balanced, thoughtful action taken on the basis of knowledge, sensitivity and compromise where delicate trade-offs must be made. The bill before us will eliminate the gross imbalances and will provide consumers with equal representation in our democratic system.

There are several aspects of the bill under consideration about which the National Consumers League feels adamant. There are certain crucial features of the bill which, in our judgment, are critical if we are to achieve the essential goal of providing the consumer with an effective voice in government.

The primary function of the ACP must be to "represent the interests of consumers before Federal agencies and courts." The bulk of the ACP's resources and time commitments should be devoted to this undeniably important function. To carry out this crucial function, the ACP must have the right to participate in Federal agency proceedings affecting the consumer, the right to intervene for the purpose of representing an interest of consumers, and the right to have certain Federal agency decisions, which the Administrator finds after careful examination did not consider or did not reflect the consumer's interest, reviewed by the Federal courts.

1. The right to participate and to have the Administrator's submission taken into full account in an agency's proceedings (as in Section 6) is essential for the orderly and regular representation of consumers. This right assures that as numerous policy and programmatic decisions are made on a daily basis, the decisionmakers are alerted to the consumer's concerns.

2. The right of the ACP to intervene and to be a party in the proceedings of Federal agencies (Section 6) which involve the consumer interest provides needed legal backing to consumer representation. Without this firmly established, definite right the ACP will not be listened to and the consumer interest will not, in fact, be treated on a par with other interests.

3. The right to initiate or participate (also Section 6) in a review or appeal of a decision made by another Federal agency which the ACP finds to have failed to treat the consumer interest properly is an essential integral part of the right to participate and to intervene. It is the consumer agency's right of appeal which will have the greatest positive impact on the government decisionmaking process and which will ensure effective consideration of the consumer interest, whether or not the agency actually participates in a specific proceeding. When all but one of the possible interests in a decision can appeal, the decisionmaker will, of neces-

sity, pay more heed to the arguments and data of the party who has the power to appeal and reverse the decision. By granting the Agency for Consumer Protection the right to appeal, Congress ensures the type of equitable weighing of all issues and balanced decisionmaking which government must pursue.

The ACP must be empowered to gather information "required to protect the health or safety of consumers or to discover consumer fraud or substantial economic injury to consumers." The right to obtain data from existing sources, or to develop specialized data where needed, is crucial if the ACP's representation of the consumer interest is to be effective and is to make a genuine, substantive, high-quality contribution to the decisionmaking process. Expertise based on analyzed data and considered judgment, rather than argumentation and advocacy alone, must distinguish the ACP and to this end, the agency must have data gathering powers.

Thus, what we believe Congress intends for the ACP and what we as the oldest consumer organization support is a small, effective, tightly organized agency which cuts through—not adds to—the bureaucratic layers and reaches the core issues affecting consumers.

The ACP is clearly not a regulatory agency; no one who reads your legislation can come to such a conclusion. It will not restrict the efficient working of any responsive organization, firm or agency in either the public or private sector. Instead, it is an innovation in regulatory reform, in careful and selective intervention, and in the long overdue opening up of government.

The ACP is small and its authorizing legislation provides only a bare minimum budget. In fact, this mechanism for consumer representation, this badly-needed consumer voice, this instrument of government reform will cost the average taxpaying family \$25—one quarter—per year. Surely, we can support such an investment to obtain essential balanced representation of the major interest group in our society.

In addition to the features and functions of the ACP which the National Consumers League finds to be essential, NCL would also like to comment on the need for each agency to establish citizen communication or citizen participation units at a high level within their agencies, subject to their control and charged with implementing specialized citizen outreach functions as required. During the past two years, some agencies have established internal consumer offices; others have created public participation offices which have taken on the tasks of handling communications with citizens.

These internal citizen communication or public participation units work from the inside on a full time, day-to-day basis to help their departments respond to citizen groups concerned with particular, individual agency programs. These units can provide important input to staff and can sensitize their agency to individual citizen concerns. They also can perform important outreach functions to ensure that citizen groups, including small businesses and farmers, are aware of the various departmental activities affecting them. These offices can serve the Agency for Consumer Protection in the same way by identifying the programs and decisionmaking stages of the proceedings within their departments in which the ACP may have an interest. Thus, these internal units in no way duplicate the purpose envisaged for the Agency for Consumer Protection which is to ensure that the consumer viewpoint is adequately represented in departmental and agency decisions on major programs.

Indeed, internal citizen units will make it possible for the Agency for Consumer Protection to remain a small, tightly organized

agency whose primary job will be to mount selected interventions and appeals in major government departmental proceedings.

In conclusion, we would like to stress that the bill to establish the Agency for Consumer Protection, H.R. 6805 (S. 1262) is, in our judgment, the capstone of the democratic process. It is the 1977 answer to the complexity of the technological society in which we find ourselves today. It provides the mechanism for ensuring that the views of our citizens are clearly heard, considered and acted upon in the Federal Executive Branch of the government.

The National Consumers League urges you to pass this crucial piece of legislation as quickly as possible.

# **BILL TO AUTHORIZE THE SECRETARY OF STATE TO ACCEPT A STATUE OR BUST OF GEORGE C. MARSHALL.**

The **SPEAKER** pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. CHARLES WILSON) is recognized for 5 minutes.

Mr. CHARLES WILSON of Texas. Mr. Speaker, Sir Winston Churchill wrote of the man who gave the Marshall Plan its name that:

There are few men whose qualities of mind and character have so impressed me as those of General George C. Marshall. He was a great American, but he was far more than that. In war he was as wise and understanding in counsel as he was resolute in action. In peace he was the architect who planned the restoration of our battered European economy and, at the same time, labored tirelessly to establish a system of Western Defence. He always fought victoriously against defeatism, discouragement and disillusion. . . . Succeeding generations must not be allowed to forget his achievements or his example.

To commemorate the 30th anniversary of Secretary of State Marshall's speech launching the Marshall Plan on June 5, 1947, at Harvard University, several of my colleagues and I are introducing a bill to authorize a statue or bust of General Marshall to be placed in the Department of State. The revolutionary philosophy Marshall introduced in his speech called for international economic cooperation, a policy as relevant in today's world as it was 30 years ago. Marshall's plan was not simply to have the United States give assistance to Europe, but to require constructive action from European countries who would work together on a program for the reconstruction of their economies, and then have the United States support such a program.

A massive campaign that Secretary of State Marshall launched to educate the public stimulated such support that the Marshall Plan aid reached \$22 billion over a 3-year period and resulted in a brilliant economic recovery.

Marshall took only 15 minutes to introduce his plan, and in that spirit I will not read his Harvard speech but insert it in the **RECORD** following my remarks. I do want to say that our bill authorizes only \$10,000, which is a small percentage of the cost of a statue, and that we need to generate private contributions to pay the major part of the cost. Many people who worked closely

with General Marshall while he was Secretary of State have indicated their willingness to come and testify in support of this legislation, and we hope the hearings will receive the publicity necessary to engender these contributions.

The speech follows:

SECRETARY OF STATE GEORGE C. MARSHALL'S ADDRESS AT THE COMMENCEMENT EXERCISES OF HARVARD UNIVERSITY, CAMBRIDGE, MASS., JUNE 5, 1947

I need not tell you that the world situation is very serious. That must be apparent to all intelligent people. I think one difficulty is that the problem is one of such enormous complexity that the very mass of facts presented to the public by press and radio make it exceedingly difficult for the man in the street to reach a clear appraisal of the situation. Furthermore, the people of this country are distant from the troubled areas of the earth and it is hard for them to comprehend the plight and consequent reactions of the long-suffering peoples, and the effect of those reactions on their governments in connection with our efforts to promote peace in the world.

In considering the requirements for the rehabilitation of Europe, the physical loss of life, the visible destruction of cities, factories, mines, and railroads was correctly estimated, but it has become obvious during recent months that this visible destruction was probably less serious than the dislocation of the entire fabric of European economy. For the past 10 years conditions have been highly abnormal. The feverish preparation for war and the more feverish maintenance of the war effort engulfed all aspects of national economies. Machinery has fallen into disrepair or is entirely obsolete. Under the arbitrary and destructive Nazi rule, virtually every possible enterprise was geared into the German war machine. Long-standing commercial ties, private institutions, banks, insurance companies, and shipping companies disappeared, through loss of capital, absorption through nationalization, or by simple destruction. In many countries, confidence in the local currency has been severely shaken. The breakdown of the business structure of Europe during the war was complete. Recovery has been seriously retarded by the fact that two years after the close of hostilities a peace settlement with Germany and Austria has not been agreed upon. But even given a more prompt solution of these difficult problems, the rehabilitation of the economic structure of Europe quite evidently will require a much longer time and greater effort than had been foreseen.

There is a phase of this matter which is both interesting and serious. The farmer has always produced the foodstuffs to exchange with the city dweller for the other necessities of life. This division of labor is the basis of modern civilization. At the present time it is threatened with breakdown. The town and city industries are not producing adequate goods to exchange with the food-producing farmer. Raw materials and fuel are in short supply. Machinery is lacking or worn out. The farmer or the peasant cannot find the goods for sale which he desires to purchase. So the sale of his farm produce for money which he cannot use seems to him an unprofitable transaction. He, therefore, has withdrawn many fields from crop cultivation and is using them for grazing. He feeds more grain to stock and finds for himself and his family an ample supply of food, however short he may be on clothing and the other ordinary gadgets of civilization. Meanwhile people in the cities are short of food and fuel. So the governments are forced to use their foreign money and credits to procure these necessities abroad. This process ex-

hausts funds which are urgently needed for reconstruction. Thus a very serious situation is rapidly developing which bodes no good for the world. The modern system of the division of labor upon which the exchange of products is based is in danger of breaking down.

The truth of the matter is that Europe's requirements for the next three or four years of foreign food and other essential products—principally from America—are so much greater than her present ability to pay that she must have substantial additional help or face economic, social, and political deterioration of a very grave character.

The remedy lies in breaking the vicious circle and restoring the confidence of the European people in the economic future of their own countries and of Europe as a whole. The manufacturer and the farmer throughout wide areas must be able and willing to exchange their product for currencies the continuing value of which is not open to question.

Aside from the demoralizing effect on the world at large and the possibilities of disturbances arising as a result of the desperation of the people concerned, the consequences to the economy of the United States should be apparent to all. It is logical that the United States should do whatever it is able to do to assist in the return of normal economic health in the world, without which there can be no political stability and no assured peace. Our policy is directed not against any country or doctrine but against hunger, poverty, desperation, and chaos. Its purpose should be the revival of a working economy in the world so as to permit the emergence of political and social conditions in which free institutions can exist. Such assistance, I am convinced, must not be on a piecemeal basis as various crises develop. Any assistance that this Government may render in the future should provide a cure rather than a mere palliative. Any government that is willing to assist in the task of recovery will find full cooperation, I am sure, on the part of the United States Government. Any government which maneuvers to block the recovery of other countries cannot expect help from us. Furthermore, governments, political parties, or groups which seek to perpetuate human misery in order to profit therefrom politically or otherwise will encounter the opposition of the United States.

It is already evident that, before the United States Government can proceed much further in its efforts to alleviate the situation and help start the European world on its way to recovery, there must be some agreement among the countries of Europe as to the requirements of the situation and the part those countries themselves will take in order to give proper effect to whatever action might be undertaken by the Government. It would be neither fitting nor efficacious for this Government to undertake to draw up unilaterally a program designed to place Europe on its feet economically. This is the business of the Europeans. The initiative, I think, must come from Europe. The role of this country should consist of friendly aid in the drafting of a European program and of later support of such a program so far as it may be practical for us to do so. The program should be a joint one, agreed to by a number, if not all, European nations.

An essential part of any successful action on the part of the United States is an understanding on the part of the people of America of the character of the problem and the remedies to be applied. Political passion and prejudice should have no part. With foresight, and a willingness on the part of our people to face up to the vast responsibility which history has clearly placed upon our country, the difficulties I have outlined can and will be overcome.

**JOINT HEARING BEFORE THE SUBCOMMITTEE ON CRIME OF THE HOUSE COMMITTEE ON THE JUDICIARY AND THE SELECT EDUCATION SUBCOMMITTEE OF THE HOUSE EDUCATION AND LABOR COMMITTEE ON THE SEXUAL EXPLOITATION OF CHILDREN**

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 5 minutes.

Mr. CONYERS. Mr. Speaker, I am pleased to announce that the Subcommittee on Crime of the House Committee on the Judiciary and the Select Education Subcommittee of the House Committee on Education and Labor will hold a joint hearing on Friday, June 10, 1977, at 9 a.m., in room 2175 of the Rayburn House Office Building on the issue of the sexual abuse and exploitation of children.

Bills to amend the criminal code to prohibit the sexual exploitation of children have been referred to the Crime Subcommittee, and we have already held 2 days of hearings on the proposed legislation. Congressman JOHN BRADEMAS' subcommittee has been referred bills to amend the Child Abuse Treatment Act with substantially the same language. He has held hearings in Los Angeles and New York on the subject.

The two subcommittees will join in a hearing to explore the legal issues involved. To that end, Attorney General Griffin Bell, Treasury Secretary Michael Blumenthal, and Postmaster General Benjamin F. Bailar have been invited to testify before the members at the joint hearing. In addition Mr. Kenneth Wooten will appear to discuss the nature of the problem. Members of Congress who have cosponsored bills before the subcommittees will also present testimony.

Those wishing to testify or submit a statement for the record should address their requests to the Committee on the Judiciary, 2137 Rayburn House Office Building, Washington, D.C. 20515.

**LEGISLATION AUTHORIZING SECRETARY OF AGRICULTURE TO PERMIT RECREATIONAL ACCESS AND GEOTHERMAL EXPLORATION WITHIN BULL RUN RESERVE**

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. AUCCOIN) is recognized for 5 minutes.

Mr. AUCCOIN. Mr. Speaker, today I have introduced a bill that is an interim measure but that will calm a storm over the Bull Run Reserve near Portland, Oregon, and allow hundreds of handicapped persons to enjoy the use of a nature trail within the reserve built just for them.

The entire Oregon House delegation joins in introducing this measure, which includes my able colleagues, Mr. DUNCAN, Mr. WEAVER, and Mr. ULLMAN.

The situation this legislation seeks to deal with stems from a U.S. district court ruling requiring to be strictly enforced the provisions of the 1904 Trespass Act

relating to the Bull Run Reserve, which contains a watershed that is Portland's only source of water. This has meant that there was to be no entry into the reserve except for purposes relating to preservation or improvement of water supply. Among other things, this has also meant the closure of the Lost Creek Nature Trail which is within the legal boundaries of the Reserve, but is well outside the geographical area of the crucial watershed.

Legislation has been introduced to install new, permanent management guidelines for the Bull Run Reserve and to redraw the boundaries.

Nearly everyone agrees that such legislation is needed. But not everyone agrees on what management practices should be allowed, what degree of influence should be afforded the city of Portland in setting management policies, and a host of other related issues. In fact, there are sharp differences of opinions on this issue that will take time for Congress to work out.

The Interior Subcommittee handling the "permanent" bill indicates it does not have room on its schedule to take up such complex legislation until later this summer.

In the meantime, however, the question is whether certain recreation users, particularly the handicapped, will be frozen out of their traditional recreation facilities while these broader issues—which do not involve them—are resolved.

I think it would be intolerable to let this occur.

This bill is designed to avoid this problem by redesignating the boundaries of the watershed and to allow the Secretary of Agriculture to manage a 42,500-acre portion of the reserve—which is not in the physical watershed or its buffer and which has been targeted for eventual exclusion from the reserve when its boundaries are redrawn—and to do so under the provisions of the Multiple Use-Sustained Yield Act of 1960, as well as other applicable laws pertaining to national timberlands. This special authority would last for only 6 months after the enactment of this act.

By taking this simple step, the handicapped would be able to use the Lost Creek Nature Trail this summer, and other hikers would be allowed to use trails within this special area.

Perhaps most important, the passage of this bill will remove the crisis atmosphere that has begun to surround this issue on the broader and deeper questions of management of the watershed itself. The emphasis no longer would be on doing something faster; rather, it would be on doing something well.

The watershed would not be damaged by passage of this bill. The issues of management of the watershed would not be prejudiced. And, consideration of those broader issues would not be delayed. No precedents would be established and no one would be punished.

With the helpful cooperation of the Interior Subcommittee, chaired by the distinguished gentleman from Wyoming (Mr. RONCALIO), hearings of this legis-

lation have been scheduled for tomorrow, June 7. It is hoped that subcommittee and full committee action can occur rapidly.

Some might regard this as an unnecessarily hasty procedure, but the effects of the bill are noncontroversial and I am confident reasonable persons will see it as a benevolent act by the Government in behalf of innocent citizens in need of rapid relief.

Mr. Speaker, for the benefit of my colleagues, I am having printed in the Record at this point the text of this bill:

H.R. —

A bill to authorize the Secretary of Agriculture to permit general recreational access and geothermal explorations for six months within a portion of the Bull Run Reserve, Mt. Hood National Forest, Oregon

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding 18 U.S.C. 1862 and without prejudice to any appeal pending or which may be taken from any decision based thereon, and in accordance with all other laws applicable to the National Forest System, the Secretary of Agriculture is authorized to manage under the provisions of the Multiple Use-Sustained Yield Act of 1960 (74 Stat. 215; 16 U.S.C. 528-531), for six months after the date of this Act, that area comprising approximately 42,500 acres depicted as the "Special Management Area, Bull Run Reserve, Mount Hood National Forest, Oregon" on a map dated June 1977, which is on file and available for public inspection in the Office of the Chief, Forest Service, U.S. Department of Agriculture.

**TOWARD A GREATER JUSTICE AND LOGIC IN PENSION PLANS**

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WOLFF) is recognized for 10 minutes.

Mr. WOLFF. Mr. Speaker, currently there is a significant and blatant injustice in the Internal Revenue Code with regard to pension plans. I would like to bring attention to this problem and urge support for H.R. 7587, which I have introduced and which I believe will deal effectively with this inequity.

This tax inequity has two aspects to it. First, under current law, if individuals are not covered by an employer-sponsored pension plan, then they can establish an Individual Retirement Account, IRA, plan as a substitute pension plan. The IRA plan presently enables single individuals to set aside the lesser of \$1,500 or 15 percent of their income per year and enables married couples to set aside the lesser of \$1,750 or 15 percent of their income per year. However, if these very same individuals are covered by an employer-sponsored pension plan, then they are currently ineligible to establish the IRA plan, even if the benefits ultimately available under the employer's plan are significantly less than would be ultimately available under the IRA plan.

In other words, it is now possible for an employer to sponsor a pension plan into which the joint contributions of the employer and employees are small and from which there will only be meager benefits, and, nevertheless, deprive the employees

of the opportunity to establish an IRA account, which would afford them far greater income protection and security upon retirement.

The second injustice applies to the contribution system of all pension plans regardless of how generous are their benefits. Simply stated, some individuals are covered by employer-sponsored pension plans and others are eligible for IRA plans. Both of these plans are designed to serve as pension plans. Justice and logic would seem to require that the individuals' contributions to either type of plan be treated the same by the Internal Revenue Code. However, this is not the case under the current law. Instead, presently, individuals who are eligible for an IRA plan, on grounds that they are not covered by an employer-sponsored pension plan, can take a deduction now for their contribution to the IRA plan and can pay a deferred tax on those contributions during their retirement years when they are presumably in a lower tax bracket than they were in when working.

However, if these same individuals are covered by an employer sponsored pension plan, then they would be unable to make current tax deductions and would be unable to take advantage of the lower tax bracket aspect of deferred taxation. Rather, the money which they contribute to the plan would, nevertheless, be treated currently as income of these individuals' and taxed as such.

H.R. 7587 would correct these two inequities. First, it would enable an individual to set up a modified IRA plan, even if covered by an employer sponsored plan, up to the point where the employer's plan plus the modified IRA plan would exceed \$1,500 or 15 percent of the individual's income per year. A similar provision would be available for married couples, with the limit being the lesser of \$1,750 or 15 percent. In this way the individual or couple would not be denied eligibility for an IRA plan merely because they are covered by an employer's plan, even though the employer's plan affords only meager benefits.

For example, if an employer contributes \$100 to a pension plan and the employee contributes \$50, then the employee can set up a modified IRA for \$1,350—\$100 plus \$50 equals \$150; \$1,500 minus \$150 equals \$1,350; \$1,350 plus \$150 does not exceed \$1,500.

Second, if there is an employer's plan, it is possible under H.R. 7587 to deduct from the gross income of the employee, the employee's contributions to the plan up to the point where the employer's contributions—which are already under current law not included in the income of the employee—plus the employee's contributions equal \$1,500 or 15 percent. In this way, an individual can contribute to a pension plan and will be able to have \$1,500 or 15 percent of income for a retirement plan set aside each year, yet will not be subjected to current taxation on it, without regard to if it is an IRA plan or an employer sponsored plan.

For example, if an employer contributes \$100 to a pension plan and an employee contributes \$50, then that em-

ployee can deduct all \$50 from gross income. Or, if the employer contributes \$1,000 and the employee contributes \$600, then the employee can deduct that part of the contribution which when combined with the employer's contribution does not exceed \$1,500. Therefore, the employee can deduct \$500 of the \$600 contribution.

Mr. Speaker, I, therefore, believe that justice demands and logic commands that we resolve the problems to which I have addressed myself today. I further trust that the House will seriously consider the solution embodied in H.R. 7587.

#### THE ASHBROOK AMENDMENT TO THE HATCH ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. ERTEL) is recognized for 5 minutes.

Mr. ERTEL. Mr. Speaker, I am very much concerned about an amendment which passed this House and relates to the proposed Hatch Act. This amendment, commonly called the Ashbrook amendment in my judgment, is unconstitutional and its constitutionality should have been explained on this floor. This amendment was offered by a member of the Judiciary Committee, but he at no time explained the constitutionality of the amendment. As to paragraph (D) (1), this language is only redundant as to other parts of the Criminal Code and adds nothing to existing law. The Federal Corrupt Practices Act plus the provisions of section 7323, sections 7324 and 7325 of H.R. 10 cover this proposal well.

The second portion of this amendment concerns me greatly. As an elected Member of the Congress, I, as well as the rest of my colleagues, took an oath to uphold the Constitution of the United States, yet at no time was the House of Representatives apprised as to the constitutionality of this amendment. This section of the amendment, in my judgment, is not only unconstitutional but also precedent to repress individual rights throughout the country. In an opinion by the American Law Division of the Library of Congress, serious doubt as to the constitutionality of this section is raised; however, even that opinion does not strike the heart of the matter. The amendment provides:

No portion of any dues, fees or assessments levied on the membership of any employee organization . . . shall be used by such organization for any political purpose or by any political education or action committee of such organization for any purpose. (CONGRESSIONAL RECORD, May 18, 1977, p. H4672.)

Initially, what is an employee organization? There is no definition but it appears that an association of postmasters—they are employees; an association of supervisors—they are employees; a civic group of Federal employees—all would fit within the definition as well as a union or collective bargaining group. If one of these groups had dues—as almost all civic groups or associations do—and they talked about

the plight of the handicapped or wrote on their stationery to other members of their group, they would be in violation of this section if it could be construed to have political overtones.

Not only is this section overbroad but it is poorly drafted as well. By putting in the words "for any purpose," the drafters have further confused the issue. How are they to be interpreted? Are the words "action committee" modified by the word "political" to mean political action committee or does it mean that no action committee can use the funds collected at all, that is, "for any purpose"? This means that they could not even hold a meeting, give to the Boy Scouts or any other organizations, et cetera. The ambiguity in this amendment affecting both freedom of speech and freedom of association is so broad that it would almost certainly be struck down as unconstitutionally vague by the first Federal court to review the operation of this provision.

If, as Mr. ASHBROOK states in the CONGRESSIONAL RECORD of May 25, 1977, this amendment is merely to prohibit labor organizations—which it does not say—from making a direct contribution or expenditure in Federal elections, as he points out, this activity is already prohibited and has been since 1947. In those comments, Mr. ASHBROOK says that the union—which the amendment is not limited to—can do as other unions on an informational basis in informing its members. He states:

The organization is free, for example, to use institutional funds to print a notice of an upcoming election just as it would be free to print in its regular internal communications selected votes showing the record of particular candidates on the issues. (CONGRESSIONAL RECORD, May 25, 1977, p. H5078.)

The amendment does not say this at all and it seems to be that after the fact, the author is now considering how to construct the amendment and retain it under the Constitution. If the amendment is limited as above, it has no new effect whatsoever and is superfluous in the code.

Apparently, politics is still politics in Washington, a politics that does not serve the interests of the American people. This amendment once again shows that the diversions from the Nation's business at the people's expense will be continued. As Representatives, it is time to consider our actions under the Constitution, consider amendments on their merits and their relationship to other code provisions.

This Congress, has enough to do without considering amendments which are meaningless or else patently unconstitutional.

#### LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. YOUNG of Florida (at the request of Mr. RHODES), for today, on account of official business.

Mr. PEPPER (at the request of Mr. WRIGHT), for Friday, June 3, on account of a death in the family.

Mr. BALDUS (at the request of Mr. WRIGHT), for June 6 through June 24, on account of official business.

Mr. DEVINE (at the request of Mr. RHODES), for today and the balance of the week, on account of medical reasons.

Mr. McHUGH (at the request of Mr. WRIGHT), for June 6 through June 24, on account of official business.

#### SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. PURSELL) to revise and extend their remarks and include extraneous matter:)

Mr. JEFFORDS, for 10 minutes, today.

Mr. RAILSBACK, for 5 minutes, today.

Mr. MARKS, for 10 minutes, today.

Mr. WALKER, for 10 minutes, today.

Mr. WALSH, for 10 minutes, today.

(The following Members (at the request of Mr. AMMERMAN) and to revise and extend their remarks and include additional matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. BRADEMAs, for 5 minutes, today.

Mr. MOSS, for 5 minutes, today.

Mr. CHARLES WILSON of Texas, for 5 minutes, today.

Mr. CONYERS, for 5 minutes, today.

Mr. AuCOIN, for 5 minutes, today.

Mr. WOLFF, for 10 minutes, today.

Mr. ERTel, for 5 minutes, today.

#### EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BEDELL, to include extraneous material on his remarks delivered in the Committee of the Whole, today.

(The following Members (at the request of Mr. PURSELL) and to include extraneous material:)

Mr. WHITEHURST in two instances.

Mr. DERWINSKI in three instances.

Mr. ABDNOR in two instances.

Mr. MARRIOTT.

Mr. MOORHEAD of California.

Mr. DEL CLAWSON in three instances.

Mr. HYDE in two instances.

Mr. COLEMAN.

Mr. RUDD.

Mr. ROUSSELOT in two instances.

Mr. MARTIN.

Mr. McDADE.

Mr. JOHN T. MYERS.

Mr. KETCHUM.

Mr. GOLDWATER.

Mr. BROOMFIELD.

Mr. GILMAN.

(The following Members (at the request of Mr. AMMERMAN) and to include extraneous matter:)

Mr. MAZZOLI.

Mr. ASPIN in 10 instances.

Mr. BARNARD in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.

Mr. FRASER.

Mr. BROWN of California in 10 instances.

Mr. ERTel.

Mr. EDGAR.

Mr. RICHMOND.

Mr. SIMON in three instances.

Mr. AuCOIN in two instances.

Mr. LEDERER.

Mr. McDONALD.

Mr. UDALL.

Mr. MOAKLEY.

Mr. BEARD of Rhode Island.

Mr. DANIELSON.

Mr. MILLER of California in three instances.

Mr. NOWAK in three instances.

Mr. KOSTMAYER.

Mr. BRADEMAs in five instances.

Mr. OTTINGER.

Mr. WOLFF.

Mr. GINN.

Mr. DODD.

Mr. BINGHAM in 10 instances.

Mr. CLAY.

#### ENROLLED BILL SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 2992. An act to authorize appropriations for fiscal year 1978 for carrying out the Comprehensive Employment and Training Act of 1973 as amended.

#### ADJOURNMENT

Mr. AMMERMAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 49 minutes p.m.) the House adjourned until tomorrow, Tuesday, June 7, 1977, at 12 o'clock noon.

#### EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1627. A letter from the Deputy Secretary of Agriculture, transmitting a draft of proposed legislation to amend title III of the Bankhead-Jones Farm Tenant Act, as amended, to eliminate the necessity of referring loans made with Resource Conservation and Development funds in excess of \$250,000 to congressional committees for approval; to the Committee on Agriculture.

1628. A letter from the Secretary of the Treasury, transmitting a progress report on the application of intermediate technology in the Inter-American Development Bank, pursuant to section 29 of the Inter-American Development Bank Act; to the Committee on Banking, Finance and Urban Affairs.

1629. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a report on loan, guarantee and insurance transactions supported by Eximbank during April 1977 to Communist countries; to the Committee on Banking, Finance and Urban Affairs.

1630. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2-42, "To provide for garnishment and similar proceedings against the government of the District of

Columbia for the enforcement of child support and alimony obligations," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1631. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

1632. A letter from the Director of Economic and Policy Research, Securities and Exchange Commission, transmitting the Commission's fifth report on the effect of the absence of fixed rates of commissions, pursuant to section 6(e)(3) of the Securities Exchange Act of 1934, as amended (89 Stat. 108); to the Committee on Interstate and Foreign Commerce.

1633. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation under the authority of section 244(a)(1) of the Immigration and Nationality Act, together with a list of the persons involved, pursuant to section 244(a) of the act (66 Stat. 214, 76 Stat. 1247); to the Committee on the Judiciary.

1634. A letter from the Comptroller General of the United States, transmitting a report on the military jury system (FPDC-76-48 June 6, 1977); jointly, to the Committee on Government Operations, and Armed Services.

1635. A letter from the Comptroller General of the United States, transmitting a report on two coproduction programs under the Foreign Military Sales program (ID-76-84, June 6, 1977); jointly, to the Committees on Government Operations, and Armed Services.

1636. A letter from the Comptroller General of the United States, transmitting a report on the Defense Department's use of appropriated funds to pay transportation costs of non-appropriated-fund activities (LCD-76-233, June 3, 1977); jointly, to the Committees on Government Operations, and Armed Services.

1637. A letter from the Comptroller General of the United States, transmitting a report on the Federal Deposit Insurance Corporation's financial disclosure system (FPDC-77-49, June 1, 1977); jointly, to the Committees on Government Operations, Banking, Finance and Urban Affairs, the Judiciary, and Post Office and Civil Service.

1638. A letter from the Comptroller General of the United States, transmitting a report on the results of the Third Law of the Sea Conference (ID-77-37 June 6, 1977); jointly, to the Committees on Government Operations, and International Relations.

1639. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to provide for an additional Assistant Secretary in the Department of the Treasury; jointly, to the Committees on Ways and Means, and Post Office and Civil Service.

#### REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. REUSS: Committee on Banking, Finance and Urban Affairs. Report on allocation of budget authority and outlays for fiscal year 1977 (Rept. No. 95-390). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Small Business. Report on allocation of budget totals to subcommittees for fiscal year 1978 (Rept. No. 95-391). Referred to the Commit-

tee of the Whole House on the State of the Union.

Mr. YATES: Committee on Appropriations. H.R. 7636. A bill making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1978, and for other purposes (Rept. No. 95-392). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDREWS of North Dakota (for himself, Mr. AuCOIN, Mr. CARTER, Mr. FINDLEY, Mr. HOLLAND, Mr. JOHNSON of Colorado, Mr. MARLENEE, Mr. NEAL, Mr. POAGE, Mr. ROSE, Mr. SIMON, Mr. WHITTEN, and Mr. ROBINSON):

H.R. 7605. A bill to amend the Internal Revenue Code of 1954 to provide that certain income from a nonmember telephone company is not taken into account in determining whether any mutual or cooperative telephone company is exempt from income tax; to the Committee on Ways and Means.

By Mr. AuCOIN (for himself, Mr. DUNCAN of Oregon, Mr. WEAVER, and Mr. ULLMAN):

H.R. 7606. A bill to authorize the Secretary of Agriculture to permit general recreational access and geothermal explorations for 6 months within a portion of the Bull Run Reserve, Mount Hood National Forest, Oreg.; to the Committee on Interior and Insular Affairs.

By Mr. BINGHAM (for himself and Mr. WEAVER):

H.R. 7607. A bill to provide benefits, training, and other forms of readjustment assistance to workers affected by the termination of major Government procurement programs, and to provide a tax credit for hiring certain retrained workers; jointly, to the Committees on Education and Labor and Ways and Means.

By Mr. DE LUGO:

H.R. 7608. A bill to make available certain funds under the Emergency School Aid Act to agencies, institutions, and organizations in the territories and possessions of the United States; to the Committee on Education and Labor.

By Mr. EILBERG (for himself and Mr. DE LUGO):

H.R. 7609. A bill to establish procedures for the granting of permanent residence to certain nonimmigrant aliens in the Virgin Islands of the United States; to the Committee on the Judiciary.

By Mr. HARRIS (for himself and Ms. MIKULSKI):

H.R. 7610. A bill to amend the Internal Revenue Code of 1954 to allow a tax credit on houses or apartments for a portion of the real estate taxes paid or incurred by their landlords; to the Committee on Ways and Means.

By Mr. HEFTTEL:

H.R. 7611. A bill to direct the Secretary of Health, Education, and Welfare to permit the use of saccharin as a food, food additive, drug, and cosmetic for 12 months; to the Committee on Interstate and Foreign Commerce.

By Mr. KASTENMEIER:

H.R. 7612. A bill to amend title 39 of the United States Code to prohibit the Postal Service from limiting regular daily mail delivery to fewer than 6 days each week, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. KETCHUM:

H.R. 7613. A bill to require the preparation

of written estimates for work to be performed on aircraft, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. MONTGOMERY:

H.R. 7614. A bill to amend the Federal Civil Defense Act of 1950 to allow Federal civil defense funds to be used by local civil defense agencies for natural disaster relief, and for other purposes; to the Committee on Armed Services.

By Mr. SIMON (for himself and Mr. COLLINS of Texas):

H.R. 7615. A bill to amend title 39, United States Code, to abolish the Postal Rate Commission and to index future postal rate increases with the Consumer Price Index, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. UDALL (for himself, Mr. KASTENMEIER, Mr. REUSS, Mr. THOMPSON, Mr. MITCHELL of Maryland, Mr. SIMON, Mr. AuCOIN, Mr. BADILLO, Mr. BEDELL, Mr. BLOVIN, Mr. BONIOR, Mr. CONYERS, Mr. DRINAN, Mr. EDWARDS of California, Mr. EILBERG, Mr. ETEL, Mr. FRASER, Mr. GORE, Mr. MURPHY of Pennsylvania, Mr. NEAL, Mr. OTTINGER, Mr. PATTISON of New York, Mr. PEASE, Mr. STARK, and Mr. VENTO):

H.R. 7616. A bill to establish a Commission to study the laws and policies of the United States and major industries for their effect on competition, and for other purposes; to the Committee on the Judiciary.

By Mr. UDALL (for himself, Mr. CHARLES WILSON of Texas, and Mr. WIRTH):

H.R. 7617. A bill to establish a Commission to study the laws and policies of the United States and major industries for their effect on competition, and for other purposes; to the Committee on the Judiciary.

By Mr. WHITEHURST (for himself and Mr. COUGHLIN):

H.R. 7618. A bill to require the Secretary of the Interior to make a comprehensive study of the wolf for the purpose of developing adequate conservation measures, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. CHARLES WILSON of Texas (for himself, Mr. FASCELL, Mr. BINGHAM, Mr. CONTE, Mr. BADILLO, Mr. BAUCUS, Mr. BLANCHARD, Mr. BOLAND, Mr. BUTLER, Mr. CARTER, Mr. DUNCAN of Tennessee, Mr. EILBERG, Mrs. FENWICK, Mr. FINDLEY, Mr. FISH, Mr. FRASER, Mr. GILMAN, Mr. HORTON, Mr. MAZZOLI, Mr. MIKVA, Mr. MURPHY of Pennsylvania, Mr. OTTINGER, Mr. PANETTA, Mr. REUSS, and Mr. SIMON):

H.R. 7619. A bill to authorize the Secretary of State to accept a statue or bust of George C. Marshall; jointly to the Committees on House Administration and International Relations.

By Mr. CHARLES WILSON of Texas (for himself, Mr. FASCELL, Mr. BINGHAM, Mr. CONTE, Mr. STRATTON, Mr. VENTO, and Mr. WAXMAN):

H.R. 7620. A bill to authorize the Secretary of State to accept a statue or bust of George C. Marshall; jointly to the Committees on House Administration, and International Relations.

By Mr. BARNARD:

H.R. 7621. A bill to amend the Federal-Aid Highway Act of 1973 in order to increase the Federal share of the cost of certain railroad highway crossing demonstration projects; to the Committee on Public Works and Transportation.

By Mr. CARNEY:

H.R. 7622. A bill to amend the Railroad Retirement Act of 1974 to eliminate deductions from supplemental annuities on account of private pensions; to the Committee on Interstate and Foreign Commerce.

By Mr. DOWNEY:

H.R. 7623. A bill to repeal the act entitled "An Act to express the intent of the Congress with reference to the regulation of the business of insurance"; to the Committee on Interstate and Foreign Commerce.

By Mr. DUNCAN of Tennessee:

H.R. 7624. A bill to amend the U.S. Housing Act of 1937 to provide that medicare taxes and premiums paid by any family assisted under such act may not be included in the income of such family for the purpose of determining the eligibility of such family for assistance under such act and the amount of such assistance; to the Committee on Banking, Finance and Urban Affairs.

By Mr. HYDE (for himself and Mr. IRELAND):

H.R. 7625. A bill to have an inscription and appropriate medals, ribbons, and tributes placed upon the crypt at the National Cemetery at Arlington, Va., reserved for an American soldier who lost his life in Southeast Asia during the Vietnam era, and whose identity is unknown; to the Committee on Veterans' Affairs.

By Mr. JEFFORDS:

H.R. 7626. A bill to amend section 504 of the Vocational Rehabilitation Act of 1973; to the Committee on Education and Labor.

By Mr. OBERSTAR:

H.R. 7627. A bill to amend the Railroad Retirement Act of 1974 to provide benefits for certain disabled spouses of railroad employees and for certain spouses of disabled railroad employees; to the Committee on Interstate and Foreign Commerce.

H.R. 7628. A bill to amend the Railroad Retirement Act of 1974 to assure that surviving parents receive benefits that are not less than those analogous surviving parents receive under the Social Security Act; to the Committee on Interstate and Foreign Commerce.

H.R. 7629. A bill to provide for the procurement of advanced photovoltaic energy devices for use in Government buildings; to the Committee on Public Works and Transportation.

By Mr. ST GERMAIN:

H.R. 7630. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income the entire amount of the gain from certain involuntary conversions of the principal residences of individuals who have attained age 65; to the Committee on Ways and Means.

By Mr. STAGGERS:

H.R. 7631. A bill to amend title 39, United States Code, to alter the organizational structure of the U.S. Postal Service, to revise the procedure for adjusting postal rates and services, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. TAYLOR:

H.R. 7632. A bill to amend title 5, United States Code, to provide that air traffic controllers entitled to immediate retirement annuities may not be entitled to training under section 3381, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. WON PAT:

H.R. 7633. A bill to provide for grants to States for the payment of compensation to persons injured by certain criminal acts and omissions, and for other purposes; to the Committee on the Judiciary.

By Mr. YATES:

H.R. 7636. A bill making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1978, and for other purposes.

By Mr. ADDABBO (for himself, Mr. BROYHILL, Mr. BAUCUS, Mr. BADILLO, Mr. BRADENAS, Mr. BONIOR, Mr. BLOVIN, Mr. CHAPPELL, Mr. CORMAN, Mr. CLEVELAND, Mr. D'AMOURS, Mr. EILBERG, Mr. EDWARDS of Oklahoma, Mr. ETEL, Mr. EVANS of Indiana, Mrs. FENWICK, Mr. FRENZEL, Mr. FLORIO, Mr. GUYER, Mr. GEPHARDT,

Mr. HORTON, Mr. HAMILTON, Mr. HUGHES, and Mr. IRELAND):

H.J. Res. 503. Joint resolution requesting the President to commemorate the 20th anniversary of the date of the enactment of the Small Business Act and the establishment of the Small Business Administration; to the Committee on Post Office and Civil Service.

By Mr. ADDABBO (for himself, Mr. LAGOMARSINO, Mr. KOSTMAYER, Mr. LOTT, Mr. LE FANTE, Mr. LLOYD of California, Mr. LENT, Mr. LaFALCE, Mr. MURPHY of Pennsylvania, Mr. MITCHELL of Maryland, Mr. MATTOX, Mr. MITCHELL of New York, Mr. MOFFETT, Mr. MANN, Ms. MIKULSKI, Mrs. MEYNER, Mr. OTTINGER, Mr. PICKLE, Mr. PANETTA, Mr. ROYBAL, Mr. RANGEL, Mr. RODINO, Mr. RAHALL, Mr. ROSENTHAL, and Mr. RICHMOND):

H.J. Res. 504. Joint resolution requesting the President to commemorate the 20th anniversary of the date of the enactment of the Small Business Act and the establishment of the Small Business Administration; to the Committee on Post Office and Civil Service.

By Mr. ADDABBO (for himself, Mr. STEED, Mr. SPENCE, Mr. SISK, Mr. SCHULZE, Mrs. SPELLMAN, Mr. WINN, Mr. WHITEHURST, Mr. WAGGONER, Mr. WHITLEY, Mr. WAXMAN, Mr. WEISS, Mr. ZEPERETTI, Mr. LEACH, and Mr. BENJAMIN):

H.J. Res. 505. Joint resolution requesting the President to commemorate the 20th anniversary of the date of the enactment of the Small Business Act and the establishment of the Small Business Administration; to the Committee on Post Office and Civil Service.

By Mr. BROOMFIELD:

H. Res. 613. Resolution to express the sense of the House of Representatives with regard to conditions under which the United States would establish diplomatic relations with the Government of Cuba; to the Committee on International Relations.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. STEERS:

H.R. 7634. A bill for the relief of Lucien S. Ficks, his wife Simone, and daughter Renata; to the Committee on the Judiciary.

H.R. 7635. A bill for the relief of Philip G. Kemp; to the Committee on the Judiciary.

By Mr. McDADE:

H.J. Res. 506. Joint resolution in recognition of a great Pennsylvanian, Fred Waring; to the Committee on the Judiciary.

By Mr. STEERS:

H. Res. 614. Resolution to refer the bill H.R. 7635 for the relief of Philip G. Kemp to the Court of Claims; to the Committee on the Judiciary.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

119. By the SPEAKER: Petition of the Registrars of Voters Association of Norfolk County, Medford, Mass., relative to election day registration proposals; to the Committee on House Administration.

120. Also, petition of the Long Island Federation of Women's Clubs, Inc., Jamaica, N.Y., relative to establishment of a maximum age for service in Congress; to the Committee on the Judiciary.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 10

By Mr. ALLEN:

Delete all of section 7325(d), beginning at line 10, page 36, through line 19, page 37, and substitute the following language so as to read:

"(d) (1) In addition to the prohibitions of subsection (a) of this section, an employee holding a restricted position may not take an active part in political management or political campaigns.

"(2) For the purpose of this subsection, 'an active part in political management or in political campaigns' means those acts of political management or political campaigning which were prohibited on the part of employees in the competitive service before July 19, 1940, by the determinations of the Civil Service Commission under the rules prescribed by the President."

Delete from section 7326 subsections (b) and (c) thereof, substituting therefor a new subsection (b), below and change the designation of subsection (d) to "(c)":

"(b) An employee who desires to become a candidate for any elective office must first obtain a leave of absence and shall not work and/or earn compensation or other privileges of employment for a period beginning with the last workday preceding the day said employee shall either qualify as a candidate or announce his or her candidacy for such elective office, and ending with the day after said election, or the day after said employee withdraws as a candidate for elective office, whichever is sooner; and no such employee shall be entitled to use, during this period, any entitlement to sick leave or any other form of leave, except that said employee may be entitled to be paid during the foregoing period of absence from his employment for any period of accrued annual leave or compensatory time to which he was entitled on the day the foregoing period of absence commences, at the election of said employee."

By Mr. BAUMAN:

An amendment to the amendment offered by Mr. CLAY on page 33 to the bill, H.R. 10: Strike out the words "which are not unlawful under that Act or such title".

Amendments to H.R. 10: Strike out the requisite number of words.

Strike out the necessary number of words. Strike out the penultimate word.

By Mr. CLAY:

(An amendment in the nature of a substitute to the amendment offered by Mr. RYAN.): Page 30, strike out section 7322(9) of title 5, United States Code, as proposed by the bill, beginning on line 13 and ending on line 3 of page 32 and insert in lieu thereof the following:

"(9) 'restricted position' means any position with respect to which there is in effect a determination by the Commission, by regulation, that—

"(A) the duties and responsibilities of such position require such employee—

"(i) as a substantial part of his official activities, to engage in foreign intelligence activities relating to national security;

"(ii) in the normal course of carrying out such duties and responsibilities, to make decisions binding on employees with respect to whom he is a superior with regard to who shall be the subject of any action which is to be taken by any such employee in connection with the enforcement of any civil or criminal law (including any inspection or audit under any such law); or

"(iii) in the normal course of carrying out such duties and responsibilities—

"(I) to make binding decisions on who shall be awarded contracts which are for the procurement of goods or services for the

Government and which have substantial monetary value, or who shall be awarded licenses, grants, subsidies, or other benefits, which involve funds or other interests having a substantial monetary value; or

"(II) to supervise individuals engaged in the awarding, administering, or monitoring of such contracts, licenses, grants, subsidies, or benefits; and

"(B) the restrictions on political activity imposed on such employee in such position are justified in order to insure the integrity of the Government or the public's confidence in the integrity of the Government."

Page 38, line 14, after "public office", insert "or who is in a restricted position".

(Amendment to H.R. 10, as reported): Page 33, immediately above line 19, insert the following:

"(3) Nothing in this subsection shall be construed to make lawful those activities by an employee organization, or any officer, employee, or agent thereof, which are unlawful under the Federal Election Campaign Act of 1971, as amended (2 U.S.C. 431 (et seq.), or under any provision of title 18, United States Code, or to make unlawful those activities by such organization, or any officer, employee, or agent thereof, which are not unlawful under that Act or such title."

Strike out the necessary number of words.

Strike out the requisite number of words.

Strike out the last word.

Strike out the next to the last word.

Strike out the third from the last word.

Strike out the first word.

Strike out the necessary number of words.

Strike out the requisite number of words.

Strike out the last word.

Strike out the next to the last word.

Strike out the third from the last word.

Strike out the first word.

By Mr. CRANE:

Strike out the requisite number of words.

Strike out the necessary number of words.

Strike out the penultimate word.

(An amendment to the amendment offered by Mr. CLAY on page 33 to the bill, H.R. 10): Strike out the words "which are not unlawful".

By Mr. DERWINSKI:

On page 28, line 8, strike out "or";

On page 28, line 11, insert "or" after the semicolon;

On page 28, immediately following line 11, insert:

"(E) a Congressional employee as defined under section 2107 of this title."

By Mr. ERTEL:

Page 40, strike out line 4 and all that follows down through line 9 and insert in lieu thereof the following:

"(D) advising the employee of the effect of a failure to answer, in writing and within the time allowed therefore, the charges set forth in the notice."

Page 41, line 2, after "final decision and order," insert the following: "In such case, any final decision that a violation has occurred under section 7323, 7324, or 7325 of this title may not be made unless there is a prima facie showing of such violation."

By Mr. LOTT:

Strike out the requisite number of words.

Strike out the necessary number of words.

Strike out the penultimate word.

By Mr. MICHEL:

Strike out the penultimate word.

By Mr. ROUSSELOT:

(An amendment to the amendment offered by Mr. CLAY on page 33 to the bill, H.R. 10):

Strike out all of the following and insert a period: ", or to make unlawful those activities by such organization, or any officer, employee, or agent thereof, which are not unlawful under that Act or such title."

(Amendments to H.R. 10): Strike out the requisite number of words.

Strike out the necessary number of words.

Strike out the penultimate word.

## SENATE—Monday, June 6, 1977

(Legislative day of Wednesday, May 18, 1977)

The Senate met at 12:30 p.m., on the expiration of the recess, and was called to order by Hon. HARRY F. BYRD, JR., a Senator from the State of Virginia.

## PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray.

Almighty God, who has given us minds to know Thee, hearts to love Thee and voices to serve Thee, grant us grace this week so to know Thee, to love Thee, and to serve Thee as to set forward Thy kingdom on Earth.

Grant Thy higher wisdom, O Lord, to the President, the Members of the Senate and House of Representatives in Congress assembled, that peace and justice may prevail at home, and that in concert with the rulers of all nations we may give our best efforts for an enduring peace with justice and righteousness for all people.

And to Thee shall be the praise and thanksgiving. Amen.

## APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,  
PRESIDENT PRO TEMPORE,  
Washington, D.C., June 6, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. HARRY F. BYRD, JR., a Senator from the State of Virginia, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,  
President pro tempore.

Mr. HARRY F. BYRD, JR., thereupon took the chair as Acting President pro tempore.

## JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Friday, May 27, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees be permitted to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield back my time.

## ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, we yield back our time.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Alabama (Mr. ALLEN) is recognized for not to exceed 15 minutes.

Mr. ALLEN. I thank the Chair.

## CONSUMER ADVOCACY AGENCY SHOULD BE GIVEN PROPER BURIAL

Mr. ALLEN. Mr. President, the Consumer Advocacy Agency, once called the Consumer Protection Agency, should be given a proper burial.

The Consumer Agency bill died last Congress, and we have not had the decency or good sense to give it a proper burial. Instead, we let it continue to fester and be disembodyed by a swarm of professional lobbyists for big business, big labor, big agriculture, big government, and big consumer organizations.

The lobbyists pull and tear at this discredited bill and at each other with little apparent concern for the real problems of consumers. It is indeed a shameful situation.

The bill is a loser. Support for this once popular proposal has become so marginal that outrageous political deals have to be made to appease favored special interests. I voted against these in the past and shall vote against them again if this year's version of the Consumer Advocacy Agency bill, S. 1262, is voted upon here. These hypocritical deals have contributed to the ever-growing dissatisfaction with Consumer Agency proposals.

In fact, I do not think that I have ever seen opposition to a bill grow so dramatically as it has to this bill over the years. The growth of opposition in the Senate has been astounding. This body was able to pass Consumer Agency bills only during the 91st and 94th Congresses, by a vote in the 91st Congress of 74 to 4. I am proud that I was one of those four who voted against this bill the first time it came up in the Senate. Senator Ervin of North Carolina, who is no longer here, was one of the four. Senator Ellender of Louisiana was one of the four, and the distinguished Senator from Arkansas (Mr. McCLELLAN) was the fourth Member of the Senate at that time who voted against the Consumer Protection Agency bill, as it was then called.

Then, in the 94th Congress, it passed by a vote of 61 to 28, showing a considerable increase in opposition.

Opposition votes in the Senate have increased by an astounding 700 percent, and will increase again if the bill is brought up here this Congress.

The growth of opposition to the consumer agency bill in the House of Representatives, since it first came up for

final passage there in the 92d Congress, has been remarkably rapid as well. The 352-percent increase in opposition in the other Chamber is shown in a table, Mr. President, which I ask unanimous consent be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

| Congress <sup>1</sup> | House vote <sup>2</sup> | Percent <sup>3</sup> |
|-----------------------|-------------------------|----------------------|
| 92d -----             | 344-44                  | 0                    |
| 93d -----             | 293-94                  | 114                  |
| 94th -----            | 208-199                 | 352                  |

<sup>1</sup> Congress in which final vote taken.

<sup>2</sup> House vote on passage of Consumer Agency bill (ayes-nays).

<sup>3</sup> Percent increase of opposition since 92d Congress.

Mr. ALLEN. Support for this bill has hit such a low point in the House that a switch of one vote in its originating committee would have buried it before it got to the Rules Committee there.

Why is the bill a loser? Ralph Nader once called the Consumer Agency concept the most important piece of consumer legislation ever to come before Congress. If this is so how could it become such a political loser? I think I know the principal reasons.

The underlying concept of this bill is that the interests of consumers should be represented and considered by all Federal agencies that take action substantially affecting those interests. I believe in that. I assume that every Member of the Senate would believe in that concept. But, the further away the bills get from what is needed to make that concept work, the greater the opposition to the bills.

Here I am talking about excesses to the left as well as to the right. These bills propose excessive powers which clearly are not needed for the Consumer Agency's mission. As our beloved former colleague, Senator Sam Ervin, stated about one of the similar bills which failed to pass the Senate during the 93d Congress—

What this bill does is to take the strongest advocacy powers available to regulatory agencies, and grant them to the (consumer agency) without delegating the responsibilities which go along with these powers; it then takes the strongest rights of private citizens available to no governmental unit, and blends them into the (consumer agency) recipe; next it adds a generous measure of rights never given to either a governmental unit or private person, and, finally, sprinkles this power pie with millions of dollars to make sure that the (consumer agency) will overwhelm all proponents of other viewpoints. . . .

We certainly do not need the arsenal of powers contained in the present bill or bills, if we take into account the bill pending in the House, to accomplish what supporters allege is the goal. Yet,

these proponents always insist on putting them in. Then, when it becomes clear that no bill with such powers would ever be acceptable, a deal is made with the special interests.

Now, what deals have been made? I will enumerate a few.

Instead of cutting back on the unnecessary powers, favored special interests are exempted from the bill in order to get votes for the bill. This appears to be a legislative protection racket, and it upsets me greatly. We are forced to the point where the very same proceedings originally cited by the sponsors of the bill as being in most need of consumer advocacy are specifically excluded from coverage in the bill, because the Agency for Consumer Advocacy is too powerful to be trusted.

The only reason that consumer agency bills were able to pass both Chambers last Congress was that special interest exemptions were traded for votes.

The bill originally was supposed to cover all consumer interests, but many agencies or interests did not want to be covered by the consumer agency bill. They had influence of a sort that was directed against the bill. Then in order to get votes, they would exempt these interests from the coverage of the bill.

Between the two bills, the following were specifically exempted from consumer agency advocacy:

1. Activities concerning the sale of firearms, antique firearms or ammunition;
2. Activities concerning the possession of firearms, antique firearms or ammunition;
3. Activities concerning the manufacture of firearms, antique firearms or ammunition,

They could not have any coverage by the consumer advocate agency as to those very important matters affecting consumers.

Then there was exemption from the bill in order to get votes:

4. Radio broadcast license renewal proceedings at the Federal Communications Commission;

This was where the consumer advocate might have an interest for consumers as to whether the radio station was performing in the public interest. That is exempt, because of the political power of radio stations.

5. Television broadcast license proceedings at the Federal Communications Commission;

They are exempt, and the reason they are exempt is that TV stations, as we know, have great political influence, far more than they should have. But in order to make sure they did not have the opposition of the TV station, they exempted the TV station in the license renewal proceeding before the Federal Communications Commission from coverage by the bill, something that has a very definite consumer interest.

6. Any activity related to labor disputes;

That was exempted from the bill in order to get big labor support.

7. Any activity related to labor agreements;
8. Any activity directly affecting producers of livestock;

They wanted to get the farm vote, so they started exempting various agricultural interests or phases.

9. Any activity directly affecting producers of poultry;

10. Any activity directly affecting producers of agricultural crops;

11. Any activity directly affecting commercial fishermen;

12. Commodity Credit Corporation price support programs;

13. Commodity Credit Corporation procurement programs;

14. Commodity Credit Corporation payment programs;

15. Any export program affecting farmers or fishermen;

16. The Food for Peace export program (P.L. 480);

That is exempt from the Consumer Advocacy Agency.

17. Any acreage allotment activity;

18. Any marketing quota activity;

19. Any Federal Crop Insurance program;

20. Any soil conservation program;

21. Any land adjustment program;

22. Any Farmers Home Administration loan activity;

23. Any Rural Electrification Administration loan activity;

24. Any agricultural marketing order activity;

25. Any program to prevent the spread of livestock disease;

26. Any program to prevent the spread of poultry disease;

27. Any program to prevent plant pests;

28. Any program to prevent noxious weeds;

29. Any activity related to a right-of-way authorization for an oil or natural gas pipeline system located in part in Alaska;

That was a special exemption that was granted in order, I assume, to get the vote of Alaska Senators and Alaska Representatives.

30. Any activity related to a permit for a natural gas and oil pipeline system which is in part in Alaska;

All these things have tremendous consumer interest, but they were exempted from the bill in order to get votes for the passage.

30. Any activity related to a lease for a natural gas and oil pipeline system which is in part in Alaska;

32. Any activity which relates to the routing or construction of any oil or natural gas pipeline system which is in part in Alaska;

They cannot have anything to do with choosing the route.

33. Any activity for enforcement of any environmental law relating to routing or construction of any oil or natural gas pipeline located in part in Alaska;

34. Any Nuclear Regulatory Commission activity;

35. Any activity of the Federal Bureau of Investigation;

36. Any activity of the Central Intelligence Agency, and also excluded was

37. Information from small businesses about their operation (estimated in debate to exclude 95 percent of all businesses in this country from being subject to consumer agency information requests).

It keeps them covered by the bill. But on answering questionnaires from the agency, they are exempted from that.

All of these things where they have definite consumer interest were exempted from the bill in order to get votes for a bill covering the consumer interests that are not exempt from the bill.

These are most, but not all, of the exemptions that were sold for support of the bills last Congress. The price is obviously too high. In the process, Congress lost sight of the goal of the bills.

A look at the bills of this year shows that these goals are still forgotten.

For example, NLRB proceedings were often among those originally referenced by bill sponsors as being in need of consumer agency intervention, as were export and marketing order activities within the Department of Agriculture. Now, of course, NLRB proceedings are exempted from consumer protection under this bill, and even Mr. Ralph Nader was quoted in the May 15, 1977, edition of the New York Times as acknowledging that a sweeping Agriculture Department exemption is necessary. The article went on to quote Mr. Nader as admitting that a consumer protection agency bill cannot be passed without such an exemption.

So they trade off that exemption seeking votes.

It makes me think back to the fall of 1971. That 92d Congress was the one in which a consumer agency bill received its biggest majority of support in the House. Yet, Ralph Nader called the bill there "a fraud on the consumer" and that bill's chief sponsor actually voted against it—Mr. ROSENTHAL in the House. I suspect that a very bad bill is vastly superior to what they would be willing to accept now.

I believe that the beginning of the end of this legislation came when its supporters decided to trade for power at the expense of scope. They lost sight of what real consumers need and want. Now the big question is whether we shall have a new consumer advocacy, not how powerful it is.

The point is whether we will have one at all, not one with all sorts of exemptions in it.

We have here a bill founded on political deals, not consumer ideals. Realists are right now looking at this bill's prospects, and I suspect that they will conclude that it is not the type of thing that they would wish to waste a political IOU on anymore.

In fact, Mr. President, if the trend in opposition continues as it has been, the bill will finally be put out of its misery in the other Chamber. Therefore, I would urge the leadership to seriously consider awaiting House action before forcing the many opponents of this bill here to explain at length why this bill is, as Senator Ervin aptly put it, "a bad idea whose time has come and gone."

Surely this must be the last time we will be forced to worry about this recurring bad dream. Defeat in five Congresses ought to indicate to even the most determined proponent that there is something wrong with this concept. I would hope that the Senate is not asked to suffer a final indignity. I would hope that we are not asked to go through the motions of considering this bill and possibly passing it in this Chamber in an attempt to reestablish its political momentum. There is no great movement for this bill. Its momentum has been lost. There is a clear possibility that the House will reject this bill.

Mr. President, the Consumer Agency Issue is going to be settled in the House of Representatives in all likelihood. It will not be settled in the Senate. We all know that. Let us not abide attempts to

turn his august body into a cheerleading club, designed to flag the waning enthusiasm for this legislation and to divert attention from the increasing doubts that have arisen about it in the House.

Lobbying and pep rallies, and timely releases of polls and surveys, and all the other tricks of the public relations game are one thing, Mr. President. But the use of this Chamber and the diversion of its resources and time for such a purpose should not be countenanced. It is unfair to our brethren in the House. It is unfair to the national interest.

#### ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 30 minutes with statements therein limited to 5 minutes.

Mr. ALLEN. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ALLEN). Without objection, it is so ordered.

#### CONSUMER ADVOCACY AGENCY

Mr. HARRY F. BYRD, JR. Mr. President, I commend the able Senator from Alabama (Mr. ALLEN) for the splendid address he just made to the Senate of the United States in regard to the Consumer Advocacy Agency legislation.

The facts and information which the Senator from Alabama brought out in his address to the Senate today should go a long way toward making clear to the people of the United States the nature of this legislation.

The entire Senate, I feel, is interested in protecting the consumer wherever it can wisely, properly, and appropriately be done. As the Senator from Alabama pointed out, there are a multitude of agencies in the Government now which have the responsibility in this field. The proposal which has been around the Congress for a long time now, to establish a Consumer Advocacy Agency, would merely pyramid on top of all the other programs a new bureau in this field.

This legislation almost certainly would add to the cost of living.

As the Senator from Alabama so eloquently pointed out, the proponents of this legislation have carefully eliminated from it many areas which, if we are going to have such an agency as this, should be included. One of the examples referred to by the Senator from Alabama was the demands of the leaders of the big labor unions that their operations be excluded from review should the new Consumer Advocacy Agency become law.

I feel the Senator from Alabama has rendered a great service to the Senate today and to the United States. His analysis today of the consumers advocacy legislation is but one example of the

fine service he is rendering the people of Alabama and in doing so he is rendering equally great service to the people of the 50 States of our United States.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will please call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### PRIVILEGE OF THE FLOOR—S. 1523

Mr. ZORINSKY. Mr. President, I ask unanimous consent that Pennie Bell, a member of my staff, be permitted the privilege of the floor during the consideration of the measure which will be pending before us, S. 1523.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ZORINSKY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will please call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ZORINSKY). Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that during the consideration of S. 1523 Nick Andrus and John I. Brooks of my staff be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CONTINUED APPROPRIATIONS FOR THE DRUG ENFORCEMENT ADMINISTRATION

Mr. ROBERT C. BYRD. Mr. President, there is a bill on the Consent Calendar that has been cleared by both sides for action. I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar Order No. 126.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1232) to amend the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801 et seq.) to extend for two fiscal years the appropriation authorizations for the administration and enforcement of that Act.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

There being no objection, the Senate proceeded to consider the bill.

Mr. BAYH. Mr. President, today we have before us S. 1232, a bill to amend the Comprehensive Drug Abuse Prevention and Control Act of 1970 to provide continuing appropriations to the Drug Enforcement Administration. This legislation, reported unanimously from the Committee on the Judiciary, recognizes that a new administration is currently carefully examining the Government's activity in drug control. This bill, now being considered would extend the life of DEA for only 2 years, which would provide appropriate time for the administration to fully develop its goals and standards for a drug control and prevention program. The existing 3-year authorization for this agency will expire at the end of the current fiscal year.

S. 1232 amends section 709(a) of the Comprehensive Drug Abuse Prevention and Control Act of 1970, as amended, to authorize appropriations for the carrying out of functions under this act for an additional 2 years in the amount of \$182 million for the fiscal year ending September 30, 1978, together with such additional amounts as may be necessary in each year for increases in salary, retirement, and other employee benefits authorized by law, and such sums as may be necessary for the fiscal year ending September 30, 1979.

Mr. President, I was pleased to introduce by request President Carter's proposal to extend the Drug Enforcement Administration for 2 years. The President has called for sound drug prevention and control policies. In his February message to the United Nations Commission on Narcotic Drugs he stressed that while we must curb traffic—

We must combine deep compassion for the victim of addiction with a vigorous attempt to eliminate the world supply of illicit drugs through international cooperation. Toward that end, I am making the curtailment of drug abuse a high priority in my administration.

I was especially pleased by the President's sensitivity to the special impact on our young people, he said that:

Much of this abuse occurs with young people and with this increased drug use comes the attendant family disruption and the sapping of strength from our youth.

President Carter concluded by indicating that he has designated his White House staff, under the guidance and direction of his very able assistant Dr. Peter Bourne, with whom my staff, as former chairman of the Subcommittee to Investigate Juvenile Delinquency, has worked for years on drug control policy matters, to give this problem "special attention" and that he intends to take a "personal interest in this program."

I am confident Dr. Bourne will work closely with the Attorney General in order to effectuate long overdue sensible drug control policies. Mr. Bell has already established a special task force to study ways in which to improve the Department's drug control effort. The bill we are considering today extends DEA for a sufficient period so as to facilitate policy decisions emanating from these activities.

Last summer we heard impressive and alarming testimony about our Nation's inability to focus our drug law enforcement apparatus and our criminal justice resources on even "kingpin" profiteers. While I am especially concerned that the constitutional rights of criminal defendants are fully secured, I am likewise concerned that within such a framework our citizens are fully protected. We must reallocate our resources and sharpen our prosecutorial tools and strengthen our criminal justice system so that it deters, disrupts, and detains these criminals.

A sound drug enforcement policy must reflect the reality that all drugs are not equally dangerous, and all drug use is not equally destructive. The Domestic Council White Paper on Drug Abuse stresses this theme when it concludes that enforcement efforts should therefore concentrate on drugs which have a high addiction potential, and treatment programs should be given priority to those individuals using high-risk drugs, and to compulsive users of any drugs.

Our priorities in drug law enforcement must reflect reasoned judgments based on the facts. The fact is that nationally, arrests for marihuana violations have escalated from 188,682 in 1970 to 450,000 in 1974. This is not nearly as dramatic as the 1,000-percent increase between 1965-70 from 18,815 to 188,682 but it is rather astonishing that this 4-year increase is more than 12 times the total marihuana arrests just 10 years ago.

The fact is that the number of marihuana arrests as a percentage of all drug arrests has increased substantially. In 1970 these arrests amounted to 45.4 percent of total drug arrests. During the 1970-73 period 1,127,389 of the total 2,063,900 drug arrests were for marihuana. And in 1974, the most recent year for which records are available, 70 percent of all drug arrests were for marihuana.

Mr. President, fortunately, I believe that such misplaced drug control policy has finally been rejected. Initially, I was quite pleased by then Attorney General-designate Griffin Bell's response to my inquiry regarding such policy during the confirmation hearings. I ask unanimous consent that the text of that January 11, 1977, exchange be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Senator BAYH. A moment ago you mentioned that you were thinking about taking DEA out of its present status and bringing it under the Justice Department.

Judge BELL. Bringing it into the FBI.

Senator BAYH. Yes, the FBI. One of the things that has been apparent and I think sad is that some people have on occasion yielded to the temptation to try to politicize the confrontation against drugs.

We are all against drugs. The question is how we solve them.

When we look at the studies that we conducted in our committee, we found out that last year about two-thirds of all the arrests and convictions in the area of narcotics were for people who possessed small amounts of marijuana.

I would like to ask you if you feel that in

light of the fact that we are going to have limited law enforcement resources and also considering State and local and Federal relationship in the area of criminal law enforcement, does it not make more sense in DEA and throughout Government that we focus our efforts on the major traffickers and the major conspiracy cases, the drugs of high abuse potential, that that is really where we ought to put the emphasis?

Judge BELL. The Federal emphasis.

Senator BAYH. The Federal emphasis.

Judge BELL. Exactly. Exactly.

We have got to get away from the idea of making statistics. We have got to find out what it is we want to do and do it. It would be the major traffickers that we would be after.

Mr. BAYH. Mr. President, I cannot agree more. The Federal drug agencies must get out of the business of generating headlines and statistics on lower level traffickers and addicts and focus their efforts on major traffickers of high-risk drugs. I am optimistic that any substantive Carter administration legislation reject the Nixon-Ford shotgun approach which reflected no priorities regarding particular drugs or levels of traffic, not to mention its provisions which repealed the cornerstone of our criminal justice system, the presumption of innocence.

I concur wholeheartedly with Dr. Bourne when he testified last month stressing that the criminal penalties for marihuana use do more damage to people than does the drug itself, but that the Carter administration position is to discourage the abuse of all drugs, including alcohol and tobacco, as a national policy. Coupled with the cost effectiveness of this policy, refocused last month by the LEAA-funded Peat, Marwick, Mitchell & Co. study released by the Governors' conference which found that States that have decriminalized marihuana possession have shown a "substantial" savings of tax dollars, there really are no other sound or humane Federal responses available.

The fact of the matter is that if the American public knew that more dollars are spent each year to prosecute marihuana cases than the Federal Government expends on its combined drug law enforcement and drug treatment program with the results I have outlined, I would speculate that rather than the near deadlock of opinion reflected in the most recent Harris poll—January 26, 1976—on decriminalization showing 43 percent in favor and 45 percent opposed a clear majority would support my approach. Concentrating our Federal drug enforcement resources on high-level heroin and dangerous drug traffickers is sound policy, but will call for a shift in the standards for measuring success.

We in Congress should deemphasize the number of arrests as a criterion of success. I am hopeful in the near future that Congress will take the lead in resolving this issue.

Mr. President, the measure before us today will provide appropriate time to develop the full Carter administration drug prevention and control program and the vehicle to help set the stage for its development. I am further pleased that the Carter administration is supportive of efforts to decriminalize the

personal use of small amounts of marihuana and hope, at the earliest possible date, the Senate will be able to consider such a proposal. I would encourage the appropriate House subcommittee to hold hearings on this topic so that Congress may, in the near future, proceed to deal with our Federal responses to the simple possession of marihuana.

During my 6 years as chairman of the Juvenile Delinquency Subcommittee, I especially appreciate the enthusiastic support of the Senate leadership for my efforts and invite my colleagues to assist us in the enactment of a sensible statutory response to high risk drugs and to major drug traffickers. It is about time and it is clear that the taxpayers of this country demand and deserve no less.

The PRESIDING OFFICER. If there be no amendment to be proposed the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 709(a) of part F of title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970, as amended (21 U.S.C. 904(a)), is amended by inserting in lieu thereof:

"(a) There are authorized to be appropriated \$182,000,000 for the fiscal year ending September 30, 1978, together with such additional amounts as may be necessary in each year for increases in salary, pay, retirement, and other employee benefits authorized by law, and for other nondiscretionary costs which arise subsequent to the date of enactment of this Act, and such sums as may be necessary for the fiscal year ending September 30, 1979."

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-151), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

#### EXCERPT FROM REPORT PURPOSE

The purpose of this bill is to extend the authorization for appropriations for the Drug Enforcement Administration for two years through fiscal year 1979. The existing 3-year authorization for this agency will expire at the end of the current fiscal year.

#### BACKGROUND

Upon introduction of the subject bill, which was introduced at the request of the administration, Senator Bayh commented as follows:

"The President has called for sound drug prevention and control policies. In his February message to the United Nations Commission on Narcotic Drugs he stressed that while we must curb traffic 'we must combine deep compassion for the victim of addiction with a vigorous attempt to eliminate the world supply of illicit drugs through international cooperation. Toward that end, I am making the curtailment of drug abuse a high priority in my administration.'

"I was especially pleased by the President's sensitivity to the special impact on our young people. He said:

"Much of this abuse occurs with young people and with this increased drug use

comes the attendant family disruption and the sapping of strength from our youth."

Public Law 91-513, the "Controlled Substances Act of 1970," which is being extended by this bill, was designed to improve Federal efforts toward the elimination of illegal drug traffic and the reduction of drug-related crime. At that time, the primary enforcement rule was under the aegis of the Bureau of Narcotics and Dangerous Drugs (BNDD) within the Department of Justice.

Reorganization Plan No. 2 of 1973 expanded substantially the role of BNDD. The plan was designed to place primary responsibility for Federal drug law enforcement in a single, new agency, the Drug Enforcement Administration (DEA), in the Department of Justice.

At the time, 10 Federal agencies in five Cabinet departments performed drug enforcement functions. Budgeting for these agencies in fiscal year 1974 was proposed at \$257 million, a sevenfold increase in funding from \$36 million in fiscal year 1969. Several other agencies had related functions. There was no overall coordination.

As specified in the reorganization plan, the new DEA assumed responsibility for the following activities:

(1) All functions of the Bureau of Narcotics and Dangerous Drugs (BNDD), which was abolished as a separate entity in Justice;

(2) All functions of the Customs Bureau related to drug investigations and intelligence, which were transferred from the Secretary of the Treasury to the Attorney General;

(3) All functions of the Office of Drug Abuse Law Enforcement (ODALE), which was abolished in Justice by Executive order; and

(4) All functions of the Office of National Narcotics Intelligence (ONNI), which was abolished in Justice by Executive order.

The Drug Enforcement Administration (DEA) of the Department of Justice is the primary agency to which is assigned the enforcement of the Federal statutes as contained in the Controlled Substances Act.

The initial period following DEA's creation was marked by the rapid development of illicit opium cultivation and processing in Mexico. Within 2 years heroin from Mexico was supplying 90 percent of the U.S. illicit market. The average retail purity of heroin reached 6.6 percent with a price of \$1.26 per milligram pure recorded early 1976. But since early 1976 several major changes have been instituted in DEA which are having a successful effect:

1. Implementation of more stringent criteria for classifying violators was accomplished to assure that the agency directed its efforts at the most important violators. While total arrests declined in 1976 over 1975, the arrests of class I and II violators, the major traffickers, increased 43 percent.

2. Centralized control of major investigations has been established. Operation Heroin B was a centrally directed effort targeted at six cities which had been identified as key distribution centers for brown heroin. These cities were Detroit, Chicago, San Antonio, Phoenix, Los Angeles, and San Diego. Five months of investigation resulted in the arrest of approximately 1,900 individuals, of which 30 percent were class I or II violators and the seizure of 600 pounds of heroin.

3. Interagency working relationships have been strengthened. Through mutual agreements with the Bureau of Customs and the Internal Revenue Service, and the creation of various interagency working groups, better utilization of resources and a reduction in duplication of effort has resulted.

The key indicators of heroin availability are reflecting the results of DEA efforts over the past year. By the end of December 1976, the average retail purity of heroin was down

to 6.1 percent as compared to the 6.6 percent of March 1976. Interim reports indicate that the March 1977 figure will continue the trend of decreasing purity. At the same time price has increased from \$1.26 per milligram pure to \$1.40.

Most important has been the dramatic decline in heroin-related deaths. In the most recently reported quarter, heroin-related deaths numbered 392 as compared to 546 for the previous quarter. This is a sharp decrease of 28 percent. This data is provided to DEA and the National Institute on Drug Abuse from reports of the chief medical examiners of 21 major metropolitan areas. The continuation of the present enforcement directions of DEA should further these accomplishments.

The Controlled Substances Act created mechanisms by which the legitimate commerce of controlled substances could be regulated to assure the availability of these substances for medical need and to prevent their diversion for abuse. DEA's administration of these regulatory provisions has proven to be most vigilant and effective. Since May 1971, DEA has controlled 28 drugs, moved 9 drugs to another schedule and has decontrolled 5 drugs. The most recent action, effective March 14, 1977, placed dextropropoxyphene under schedule IV controls.

DEA presently has registered more than 540,000 legitimate handlers of controlled substances in the United States. DEA has a specialized force of compliance investigators who perform on-site investigations of each registered manufacturer and distributor at least once every 3 years. During calendar year 1976, 1,643 compliance investigations were completed, 638 administrative actions of varying degrees were imposed, as well as 22 arrests. Because of DEA's efforts in the administration of the regulatory provisions of the act, diversion of controlled dangerous drugs at the manufacturing and wholesale levels has been virtually eliminated.

As a result of the Narcotic Addict Treatment Act of 1974, DEA conducted in-depth investigations of methadone clinics to assure their compliance with the regulations of that act. Approximately 875 methadone clinics are registered by DEA and each of these clinics is reaudited every 3 years.

DEA is also directing considerable effort to increase the abilities of the States to police the practitioner level of distribution. The total elimination of diversion of legitimate dangerous drugs will depend on the results of these efforts.

The committee is of the belief that the DEA should be continued in existence. It recognizes that a new administration is currently carefully examining the Government's activity in drug control. This bill which is now being reported by extending the life of the DEA for only 2 years will provide appropriate time for the administration to fully develop its goals and standards for a drug control and prevention program.

#### ANALYSIS OF THE BILL

S. 1232 amends section 709(a) of the Comprehensive Drug Abuse Prevention and Control Act of 1970, as amended, to authorize appropriations for the carrying out of functions under this act for an additional 2 years in the amount of \$182,000,000 for the fiscal year ending September 30, 1978, together with such additional amounts as may be necessary in each year for increases in salary, retirement, and other employee benefits authorized by law, and such sums as may be necessary for the fiscal year ending September 30, 1979.

Title 28, section 904, United States Code (Public Law 91-513, as amended).

#### COST OF LEGISLATION

The premise monetary amounts are specified above. The bill conforms with the appropriations requested by the President

in his budget message to the Congress for the next fiscal year.

MR. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### TRANSFER OF CERTAIN MEASURES TO THE UNANIMOUS CONSENT CALENDAR

MR. ROBERT C. BYRD. Mr. President, there are three measures on the calendar which may be passed by unanimous consent. They are Calendar Order Nos. 139, 210, and 211. I ask that the clerk transfer those measures to the Unanimous Consent Calendar for further action.

THE PRESIDING OFFICER. They will be so transferred.

MR. ROBERT C. BYRD. Mr. President, is there further morning business?

THE PRESIDING OFFICER. Is there further morning business?

#### PRIVILEGE OF THE FLOOR—S. 1523

MR. SCHMITT. Mr. President, I ask unanimous consent that Hayden Bryan of my staff have the privilege of the floor during the consideration of S. 1523.

THE PRESIDING OFFICER. Without objection, it is so ordered.

MR. MORGAN. Mr. President, I ask unanimous consent that Joey McConnell of my staff may have the privilege of the floor during the consideration, debating, and votes on the housing bill, S. 1523.

THE PRESIDING OFFICER. Without objection, it is so ordered.

MR. BAYH. Mr. President, I ask unanimous consent that Mr. Fred Williams of my staff be accorded the privilege of the floor during the consideration and voting on the housing measure.

THE PRESIDING OFFICER. Without objection, it is so ordered.

#### EXECUTIVE J, 95TH CONGRESS, 1ST SESSION—REMOVAL OF INJUNCTION OF SECRECY

MR. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the protocol, signed March 31, 1977, amending the convention with the United Kingdom for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income (Executive J, 95th Cong., 1st sess.), transmitted to the Senate today by the President, and that the treaty with accompanying papers be referred to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

THE PRESIDING OFFICER. Without objection, it is so ordered. The message from the President is as follows:

#### To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Protocol signed

at London on March 31, 1977, amending the Convention between the United States of America and the United Kingdom for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, signed at London on December 31, 1975, as amended by Notes exchanged at London on April 13, 1976, and by the Protocol signed at London on August 26, 1976. For the information of the Senate, I also transmit the report of the Department of State with respect to the Protocol.

The Convention, along with the amending Notes and the two Protocols, will effect important and necessary improvements in the imposition of taxes on individuals and corporations falling under both the United States and the United Kingdom taxation systems.

I urge the Senate to give early consideration and its advice and consent to ratification of this Protocol, as well as the Convention, the exchange of Notes, and the Protocol signed on August 26, 1976.

JIMMY CARTER.

THE WHITE HOUSE, June 6, 1977.

#### MESSAGES FROM THE PRESIDENT RECEIVED DURING THE RECESS— PM 85

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, received on June 2, 1977, during the recess of the Senate, which was referred jointly, pursuant to Public Law 94-265, to the Committee on Commerce, Science, and Transportation and the Committee on Foreign Relations:

#### To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94-265; 16 USC 1801), I transmit herewith a governing international fishery agreement for 1978-1982 between the United States and Japan, signed at Washington on March 18, 1977.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. It sets out the principles that will govern fishing by Japan for fisheries over which the United States exercises exclusive management authority. I urge that the Congress give favorable consideration to this Agreement at an early date.

JIMMY CARTER.

THE WHITE HOUSE, June 2, 1977.

PM 86

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States received on June 3, 1977, during the recess of the Senate, which was referred to the Committee on Finance:

#### To the Congress of the United States:

In accordance with section 402(d) (5) of the Trade Act of 1974, I transmit herewith my recommendation that the authority to waive subsections (a) and (b) of section 402 be extended for a further period of twelve months.

This recommendation sets forth the reasons for extending waiver authority and for my determination relating to continuation of the waiver applicable to the Socialist Republic of Romania, as called for by subsections (d) (5) (b) and (d) (5) (c) of section 402.

I include, as part of this recommendation, my determinations that further extension of the waiver authority, and continuation of the waiver applicable to the Socialist Republic of Romania, will substantially promote the objectives of this section.

JIMMY CARTER.

THE WHITE HOUSE, June 2, 1977.

#### MESSAGES FROM THE HOUSE RE- CEIVED DURING THE RECESS

Under authority of the order of May 27, 1977, the following messages from the House of Representatives were received during the recess of the Senate:

##### ENROLLED BILLS SIGNED

On June 1, 1977, a message stating that the Speaker had signed the following enrolled bills:

H.R. 4390. An act to authorize appropriations for continuation of construction of distribution systems and drains on the San Luis Unit, Central Valley project, California, to mandate the extension and review of the project by the Secretary, and for other purposes.

H.R. 5040. An act to authorize additional appropriations for the Department of State for fiscal year 1977.

H.R. 5306. An act to amend the Land and Water Conservation Fund Act of 1965, and for other purposes.

The enrolled bills were signed by the Deputy President pro tempore today, June 6, 1977.

On June 3, 1977, a message stating that:

The House has passed the bill (S. 1235) to further amend the Peace Corps Act, with amendments in which it requests the concurrence of the Senate.

The House insists upon its amendment to the bill (S. 602) to extend and revise the Library Services and Construction Act, and for other purposes; requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. Perkins, Mr. Brademas, Mr. Beard of Rhode Island, and Mr. Quile were appointed managers of the conference on the part of the House.

The House agrees to the amendment of the Senate to the bill (H.R. 2992) to authorize appropriations for fiscal year 1978 for carrying out the Comprehensive Employment and Training Act of 1973 as amended.

The House agrees to the amendment of the Senate to the bill (H.R. 6206) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out the Commercial Fisheries Research and Development Act of 1964.

The House agrees to the amendments of the Senate to the bill (H.R. 6774) to make certain technical and miscellaneous amendments to provisions relating to higher education contained in the Education Amendments of 1976.

The House disagrees to the amendment of the Senate to the bill (H.R. 6668) to amend the Age Discrimination Act of 1975 to extend the date upon which the United States Commission on Civil Rights is required to file its report under such Act, and for other pur-

poses; requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. Perkins, Mr. Brademas, Mr. Beard of Rhode Island, Mr. Miller of California, Mr. Kildee, Mr. Heftel, Mr. Hawkins, Mr. Blaggi, Mr. Quile, Mr. Jeffords, and Mr. Pressler were appointed managers of the conference on the part of the House.

##### ENROLLED BILL SIGNED

The Speaker has signed the following enrolled bill:

H.R. 6774. An act to make certain technical and miscellaneous amendments to provisions relating to higher education contained in the Education Amendments of 1976.

The enrolled bill was signed by the Deputy President pro tempore today, June 6, 1977.

#### MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirton, one of his secretaries.

#### EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

#### APPROVAL OF BILLS

A message from the President of the United States announced that he has approved and signed the following bills:

On June 1, 1977:

S. 853. An act to extend the Defense Production Act of 1950, as amended; and

S. 1443. An act to amend the Privacy Act of 1974 to extend the life of the Privacy Protection Study Commission to September 30, 1977.

On June 3, 1977:

S. 36. An act to authorize appropriations to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Non-nuclear Energy Research and Development Act of 1974, and for other purposes.

#### MESSAGES FROM THE HOUSE

At 12:34 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 6161. An act to amend the Clean Air Act, and for other purposes; and

H.R. 6970. An act to amend the Marine Mammal Protection Act of 1972 with respect to the taking of marine mammals incidental to the course of commercial fishing operations, and for other purposes.

The message also announced that the House has passed the bill (S. 826) to establish a Department of Energy in the executive branch by the reorganization

of energy functions within the Federal Government in order to secure effective management to assure a coordinated national energy policy, and for other purposes, with an amendment in which it requests the concurrence of the Senate.

At 1:20 p.m., a message from the House of Representatives announced that:

The House disagrees to the amendments of the Senate to the bill (H.R. 6370) to authorize appropriations to the International Trade Commission for fiscal year 1978, to provide for the Presidential appointment of the chairman and vice chairman of the Commission, to provide for greater efficiency in the administration of the Commission, and for other purposes; requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. ULLMAN, Mr. VANIK, Mr. GIBBONS, Mr. ROSTENKOWSKI, Mr. JONES of Oklahoma, Mr. CONABLE, and Mr. STEIGER were appointed managers of the conference on the part of the House.

The House has passed without amendment the bill (S. 1240) to extend the time of conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1978.

#### ENROLLED BILL SIGNED

The Speaker has signed the following enrolled bill:

H.R. 2992. An act to authorize appropriations for fiscal year 1978 for carrying out the Comprehensive Employment and Training Act of 1973 as amended.

The enrolled bill was subsequently signed by the Deputy President pro tempore.

#### COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-1412. A letter from the Deputy Secretary of Agriculture transmitting a draft of proposed legislation to amend Title III of the Bankhead-Jones Farm Tenant Act, as amended, to eliminate the necessity of referring loans made with Resource Conservation and Development funds in excess of \$250,000 to Congressional committees for approval (with accompanying papers); to the Committee on Agriculture, Nutrition, and Forestry.

EC-1413. A letter from the Administrator of the Environmental Protection Agency transmitting a draft of proposed legislation to amend the Federal Insecticide, Fungicide, and Rodenticide Act and for other purposes (with accompanying papers); to the Committee on Agriculture, Nutrition, and Forestry.

EC-1414. A letter from the Acting Administrator of the Rural Electrification Administration transmitting, pursuant to law, notice of the approval of an REA insured loan in the amount of \$8,250,000 to Chugach Electric Association, Inc., of Anchorage, Alaska (with accompanying papers); to the Committee on Appropriations.

EC-1415. A letter from the Acting Administrator of the Rural Electrification Administration transmitting, pursuant to law notice of the approval of an REA insured loan in the amount of \$2,465,000 to Coos-Curry Electric Cooperative, Inc., of Coquille, Oregon (with accompanying papers); to the Committee on Appropriations.

EC-1416. A letter from the Assistant Secretary of the Army, Research and Development, transmitting, pursuant to law, reports on Department of the Army Research and Development Contracts that were awarded during the period 1 October 1976 through 31 March 1977 (with accompanying reports); to the Committee on Armed Services.

EC-1417. A letter from the Deputy Assistant Secretary of Defense, Installations and Housing, transmitting, pursuant to law, notice of 23 construction projects to be undertaken by the Army National Guard (with accompanying papers); to the Committee on Armed Services.

EC-1418. A letter from the Director of the Securities and Exchange Commission transmitting, pursuant to law, the Commission's Fifth Report to Congress on the Effect of the Absence of Fixed Rates of Commissions for the period May 1, 1975 through December 31, 1976 (with an accompanying report); to the Committee on Banking, Housing and Urban Affairs.

EC-1419. A letter from the Vice President for Government Affairs for the National Railroad Passenger Corporation transmitting, pursuant to law, a report on the revenues and expenses for each train for the month of February 1977 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC-1420. A letter from the Vice President for Government Affairs for the National Railroad Passenger Corporation transmitting, pursuant to law, a report on the average number of passengers per day and the on-time performance for each train for the month of March 1977 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC-1421. A letter from the Chairman of the United States Railway Association transmitting, pursuant to law, the first annual report to Congress on the performance of the Consolidated Rail Corporation (Conrail) for 1976 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC-1422. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, the annual report with respect to the officers and employees of the Federal Energy Administration who perform any function or duty under EPCA and who have known financial interest in energy businesses or energy properties (with an accompanying report); to the Committee on Energy and Natural Resources.

EC-1423. A letter from the Acting Secretary of the Interior transmitting, pursuant to law, a report with respect to the public disclosures and actions taken with regard thereto for 1976 (with an accompanying report); to the Committee on Energy and Natural Resources.

EC-1424. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, a report on sales of refined petroleum products for January 1977 (with an accompanying report); to the Committee on Energy and Natural Resources.

EC-1425. A letter from the Chairman of the John F. Kennedy Center for the Performing Arts transmitting, pursuant to law, the annual report of the John F. Kennedy Center for the Performing Arts for fiscal year 1976 (with an accompanying report); to the Committee on Environment and Public Works.

EC-1426. A letter from the Secretary of Health, Education, and Welfare transmitting a draft of proposed legislation to extend for one year the provisions of P.L. 94-401 which permit increased funding for social services under title XX of the Social Security Act and for other purposes (with accompanying papers); to the Committee on Finance.

EC-1427. A letter, dated May 27, 1977, from the Assistant Legal Advisor for Treaty Affairs transmitting, pursuant to law, international agreements other than treaties entered into by the United States within the past sixty days (with accompanying papers); to the Committee on Foreign Relations.

EC-1428. A letter from the Secretary of the Treasury transmitting, pursuant to law, a report for 1976 on the progress being made with regard to the increased use of intermediate technologies in the operation of the Inter-American Development Bank (with accompanying paper); to the Committee on Foreign Relations.

EC-1429. A letter from the Assistant Secretary for Congressional Relations of the Department of State transmitting, pursuant to law, the Sixteenth Annual Report on the East-West Center (Center for Cultural and Technical Interchange Between East and West) in Honolulu, covering the period July 1, 1975 through September 30, 1976 (with an accompanying report); to the Committee on Foreign Relations.

EC-1430. A secret communication from the Comptroller General of the United States transmitting, pursuant to law, a report on the withdrawal of U.S. forces from Thailand: Ways to Improve Future Operations (LCD-77-402) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1431. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Certifying Workers for Adjustment Assistance—The First Year Under the Trade Act" (ID-77-28) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1432. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Examination of Financial Statements of Federal Prison Industries, Inc., Fiscal Year 1976" (FOD-77-03) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1433. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Drugs, Firearms, Currency, and Other Property Seized by Law Enforcement Agencies: Too Much Held Too Long" (GGD-76-105) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1434. A letter from the Administrator of the General Services Administration transmitting, pursuant to law, a report on a proposed altered system of records in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC-1435. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Space Transportation System: Past, Present, Future" (PSAD-77-113) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1436. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Accountability and Control of Warheads in the Custody of the Department of Defense and the Energy Research and Development Administration" (PSAD-77-115) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1437. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Personnel Ceilings—A Barrier to Effective Manpower Management" (FPCD-76-88) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1438. A letter from the Comptroller General of the United States transmitting,

pursuant to law, a report entitled "The Federal Deposit Insurance Corporation's Financial Disclosure Regulations Should be Improved" (FPCD-77-49) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1439. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Results of the Third Law of the Sea Conference, 1974 to 1976," Department of State (ID-77-37) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1440. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Unauthorized and Questionable Use of Appropriated Funds to Pay Transportation Costs of Non-Appropriated-Fund Activities, Department of Defense" (LCD-76-233) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1441. A letter from the Administrator, General Services Administration transmitting, pursuant to law, a new version of proposed public access regulations implementing Section 104 of Title I of the Presidential Recordings and Materials Preservation Act, P.L. 93-526 (with an accompanying report); to the Committee on Governmental Affairs.

EC-1442. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Improving Military Solid Waste Management: Economic and Environmental Benefits, Department of Defense" (LCD-76-345) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1443. A letter from the General Counsel of the National Study Commission on Records and Documents of Federal Officials transmitting, pursuant to law, the final version of the Alternate Report of the Minority Members of the National Study Commission on Records and Documents of Federal Officials (with an accompanying report); to the Committee on Governmental Affairs.

EC-1444. A letter from the Acting General Counsel of the Office of Telecommunications Policy, Executive Office of the President, transmitting, pursuant to law, a report on the administration of the Freedom of Information Act for the calendar year 1976 (with an accompanying report); to the Committee on the Judiciary.

EC-1445. A letter from the Commissioner of the Federal Prison Industries, Inc., Department of Justice, transmitting, pursuant to law, a report on the administration of the Freedom of Information Act for the calendar year 1976 (with an accompanying report); to the Committee on the Judiciary.

EC-1446. A letter from the Secretary of the Aviation Hall of Fame, Inc. transmitting, pursuant to law, a report on examination of Financial Statements for years ended December 31, 1976 and 1975 (with an accompanying report); to the Committee on the Judiciary.

EC-1447. A letter from the Acting Director of the United States Water Resources Council transmitting, pursuant to law, a report on the administration of the Freedom of Information Act for the calendar year 1976 (with an accompanying report); to the Committee on the Judiciary.

EC-1448. A letter from the Chairman of the Federal Election Commission transmitting, pursuant to law, a copy of correspondence concerning the 1976 Privacy Act Annual Report which the Commission has sent to the Office of Management and Budget (with accompanying papers); to the Committee on Rules and Administration.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BARTLETT, from the Select Committee on Indian Affairs:

With an amendment:

S. 947. A bill to declare certain federally owned land known as the Yardeva School land to be held in trust for the Creek Nation of Oklahoma (Rept. No. 95-238).

With amendments:

S. 1291. A bill to declare that certain lands of the United States situated in the State of Oklahoma are held by the United States in trust for the Cheyenne-Arapaho Tribes of Oklahoma (Rept. No. 95-239).

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Richard N. Cooper, of Connecticut, to be U.S. Alternate Governor of the International Bank for Reconstruction and Development for a term of 5 years; U.S. Alternate Governor of the Inter-American Development Bank for a term of 5 years; U.S. Alternate Governor of the Asian Development Bank and U.S. Alternate Governor of the African Development Fund.

Sam Young Cross, Jr., of Virginia, to be U.S. Executive Director of the International Monetary Fund for a term of 2 years.

Jean Price Lewis, of Virginia, to be an Assistant Administrator of the Agency for International Development, vice Denis M. Neill, resigned.

Abelardo Lopez Valdez, of Texas, to be an Assistant Administrator of the Agency for International Development, vice Eugene N. Girard II, resigned.

Herbert Salzman, of the District of Columbia, to be the representative of the United States of America to the Organization for Economic Cooperation and Development, with the rank of Ambassador.

Thomas Byron Crawford Leddy, of Virginia, to be U.S. Alternate Executive Director of the International Monetary Fund for a term of 2 years expiring October 22, 1979.

Marvin L. Warner, of Ohio, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Switzerland.

Melissa F. Wells, of New York, a Foreign Service officer of class 2, to be the representative of the United States of America on the Economic and Social Council of the United Nations, with the rank of Ambassador.

Albert W. Sherer, Jr., of Connecticut, a Foreign Service officer of the class of career minister, for the rank of Ambassador while serving as the head of the U.S. delegation to the preparatory meeting in Belgrade of the Conference on Security and Cooperation in Europe (CSCE) commencing June 15, 1977, and thereafter as a member of the U.S. delegation and head of the delegation's working group at the main CSCE meeting in the autumn.

Arthur W. Hummel, Jr., of Maryland, a Foreign Service officer of the class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Pakistan.

Richard K. Fox, Jr., of Minnesota, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Trinidad and Tobago.

(The above nominations were reported with the recommendation that they be

confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

## POLITICAL CONTRIBUTIONS STATEMENT

The undersigned nominee, Marvin L. Warner, hereby submits the following report of contributions made by the undersigned and members of his immediate family, including their spouses, during the period beginning on January 1, 1973 and ending on the date of nomination of nominee.

Nominee: Marvin L. Warner.

Post: Ambassador to Switzerland.

Contributions by, amount, date, and donee:

1. Marvin L. Warner—see Schedule 1 attached hereto.
2. Spouse—not applicable.
3. Children and Spouses Names: Marlin (Warner) Arky and Stephen W. Arky. See Schedule 2 attached.
4. Alyson (Warner) Kuppin and Herbert R. Kuppin, Jr.
5. Marvin L. Warner, Jr. (Mark) none.
6. Parents Names: Mrs. Rose Warner—none.
7. Grandparents Names: Deceased.
8. Brothers and Spouses Names: None.
9. Sisters and Spouses Names: Betty (Warner) Glazer and Harry Glazer—none.

## Schedule 1

Donor: In all cases Marvin L. Warner; Amount, date, and to:

\$2,000, 10-21-73, Wallace Campaign (for deficit).

\$500, 6-30-74, Burton for Congress.

\$500, 8-31-74, Senator Birch Bayh.

\$3,000, 9-30-74, Citizens for Glenn.

\$1,000, 10-31-74, Ford for Senate.

\$200, 10-31-74, James V. Stanton.

\$1,000, 1-7-75, Stone Campaign.

\$120, 2-4-75, Citizens for John Glenn.

\$500, 5-22-75, Committee for Hart.

\$1,000, 6-10-75, Jackson for President.

\$500, 9-5-75, Durkin for Senate.

\$1,000, 10-7-75, Birch Bayh for President.

\$1,000, 10-7-75, James Stanton Committee.

\$3,500, 12-16-75, Citizens for Glenn.

\$250, 2-10-76, Robert Byrd for President.

\$250, 2-19-76, Church for President.

\$500, 3-2-76, Senator Hart Constituent Service.

\$100, 3-11-76, Congressman St Germain Campaign.

\$1,000, 3-22-76, Metzenbaum for Senate.

\$100, 3-24-76, Rhodes for Congress.

\$200, 4-1-76, Frank Mankiewicz.

\$500, 4-6-76, Zumwalt for Senate.

\$500, 5-17-76, Zumwalt for Senate.

\$1,000, 5-18-76, Bowen for Senate.

\$1,000, 4-9-76, Jimmy Carter for President.

\$100, 7-19-76, Jim Guy Tucker Campaign for President.

\$1,000, 8-6-76, Tunney for U.S. Senate.

\$1,000, 9-1-76, Senator Bowen Committee.

\$1,000, 9-1-76, Metzenbaum for Senate.

\$250, 10-12-76, Harnes for Senate.

\$5,000, 12-9-76, Metzenbaum Post Campaign Committee.

\$100, 3-22-73, National Democratic Committee.

\$2,500, 5-24-73, National Democratic Committee.

\$100, 5-29-73, National Democratic Committee.

\$100, 8-1-73, National Democratic Committee.

\$5,000, 8-21-73, National Democratic Committee.

\$4,100, 11-1-73, Democratic Executive Committee.

\$1,000, 10-74, Democratic Committee.

\$2,000, 3-31-74, Democratic Congressional Dinner.

\$1,500, 5-75, Democratic Congressional Dinner.  
 \$30, 7-75, Democratic National Committee.  
 \$1,000, 10-75, Democrats United.  
 \$1,000, 8-29-76, Democratic Natl. Committee, Natl. Finance Council.  
 \$10,000, 10-8-76, Democratic National Committee.

## Schedule 2

Donor, amount, date, and to:

Stephen Arky, \$100, 10/73, Democratic National Party Telethon.

Stephen Arky, \$1,000, 5/10/74, Richard A. Pettigrew Testimonial Reception Committee.  
 Marlin Arky, \$1,000, 8/19/74, People for Pettigrew—U.S. Senate.

Stephen Arky, \$500, 6/20/75, Henry Jackson for President.

Marlin Arky, \$500, 6/20/75, Henry Jackson for President.

Stephen & Marlin Arky, \$10, 1975, Lawton Chiles—U.S. Senate.

Stephen Arky, \$200, 9/17/75, Democratic National Telethon.

Stephen Arky, \$200, 12/9/75, Jimmy Carter Campaign.

Stephen & Marlin Arky, \$1,000, 4/5/76, Jimmy Carter Campaign.

Stephen & Marlin Arky, \$2,000, 9/22/76, Metzenbaum for Senate.

Stephen & Marlin Arky, \$1,000, 5/2/76, Stanton for Senate.

Stephen & Marlin Arky, \$20, 9/76, Lawton Chiles—U.S. Senate.

Marlin Arky, \$50, 12/28/76, Carter Inaugural Party.

Marlin Arky, \$15, 12/18/76, Jimmy Carter Book.

## Schedule 3

Donor, amount, date, and to:

Herbert Kupp, Jr., \$250, 11/17/75, John Glenn.

Herbert Kupp, Jr., \$250, 2/11/76, Robert Byrd.

Herbert Kupp, Jr., \$500, 2/18/76, Senator Church for President.

Herbert Kupp, Jr., \$1,000, 10/18/76, Robert Taft, Jr.

Alyson Kupp, \$250, 2/14/76, Robert Byrd.

## POLITICAL CONTRIBUTIONS STATEMENT

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee, Melissa Wells.

Post, U.S. Representative to UN Ecosol.

Contributions and amount:

1. Self, none.
2. Spouse, none.
3. Children and Spouses names: Alfred (husband), Christopher and Gregory, none.
4. Parents names: Mme. Milliza Korjus Spector (mother), father deceased, none.
5. Grandparents names, deceased.
6. Brothers and Spouses names: Ernest and Jacques Foelsch, Richard Foelsch, none.
7. Sisters and Spouses names, none.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

MELISSA WELLS.

Subscribed and sworn (or affirmed) before me this 18th day of March A.D. 1977, at New York, New York.

SOL KUTTNER.

Notary Public—State of New York.

Commission expires March 30, 1978.

## POLITICAL CONTRIBUTIONS STATEMENT

Contributions are to be reported for the period beginning on the first day of the

fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee, Albert W. Sherer Jr.

Post, Chief Delegation Preparatory Meeting CSCE in Belgrade.

Contributions:

1. Self, none.
2. Spouse (Carroll R. Sherer), none.
3. Children and spouses, none; names, Peter and Hollis Sherer, Susan and Peter Osoy, Anthony Sherer.
4. Parents names, Albert W. Sherer and Linda Van Noshen Sherer, none.
5. Grandparents names, deceased long ago, none.
6. Brothers and Spouses names, none.
7. Sisters and spouses names, Mr. and Mrs. Stanley R. Morton, none.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

ALBERT W. SHERER, JR.

## POLITICAL CONTRIBUTIONS STATEMENT

Nominee: Herbert Salzman.

Post: Ambassador and U.S. Representative (Chief of Mission) to the Organization for Economic Cooperation and Development.

Federal Campaign Contributions—No. 5:

Amount, Date, and Donee:

1. Herbert Salzman:  
 \$2,500, 2/4/74, Javits Dinner Committee.  
 \$2,500, 5/10/74, Javits in 1974.  
 \$500, 8/7/74, Senator Birch Bayh.  
 \$250, 9/29/75, Bayh for President.  
 \$250, 5/5/76, Committee to Re-Elect Senator Edward M. Kennedy.
2. \$100, 5/17/76, Les Aspin for Congress.  
 \$1,000, 5/11/76, Citizens for Carter.  
 \$500, 7/8/76, Committee for Birch Bayh in '76 (deficit).  
 \$1,000, 8/3/76, McGee for Senate Committee.
3. \$250, 7/12/76, Gloria Schaeffer.  
 \$250, 12/3/76, Church for President Committee (deficit).
4. Rita Salzman:  
 \$750, 8/22/74, Scheuer for Congress.  
 \$250, 8/30/75, Shriver for President.  
 \$1,000, 6/29/76, Citizens for Carter.  
 \$250, 12/3/76, Church for President Committee (deficit).
5. Anthony Salzman (son), none (no spouse), Jeffrey Salzman (son), (no spouse);  
 \$25, 2/76, Carter for President.  
 \$100, 4/9/76, Carter for President.  
 \$40, 9/13/76, Jeff Peterson for Congress.
6. William and Minnie Salzman (parents) (deceased).
7. Grandparents (deceased).
8. Alexander and Betti Salzman (brother and spouse):  
 \$300, 2/1/74, Javits Dinner Committee.  
 \$500, 6/12/74, Javits Finance Committee.  
 \$100, 8/9/74, Scheuer for Congress.  
 \$500, 1/1/74, Javits Finance Committee.  
 \$100, 1974, People for Abraham Ribicoff.  
 \$15, 1976, Democratic National Committee.  
 \$250, 1976, Scheuer for Congress.
9. Sara F. Pepper (sister) (no spouse):  
 \$25, 1973, Citizens for Bella Abzug.  
 \$100, 1974, Committee for Jacob Javits.  
 \$100, 1974, People for Abraham Ribicoff.  
 \$50, 1974, Citizens for Fred Richmond.  
 \$100, 1975, National Roosevelt Day Dinner.  
 \$1,500, 1974, Loan to Scheuer for Congress (subsequently repaid).  
 \$100, 1976, Scheuer for Congress.

I have listed above the names of each member of my immediate family, including their spouses. I have asked each of these persons to inform me of the pertinent con-

tributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

HERBERT SALEZMAN.

Subscribed and sworn (or affirmed) before me this 20th day of April, A.D., 1977, at Washington, D.C.

STELLA MAKARA.

Commission expires 7/31/77, Notary Public.

## POLITICAL CONTRIBUTIONS STATEMENT

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee, Arthur W. Hummel Jr.

Post, Philippines.

Contributions, amount, date, and donee: (If none, write none)

1. Self, None.
2. Spouse, \$15.00, 1972, dollars for Democrats.
3. Children and Spouses names, none.
4. Parents names, none.
5. Grandparents names, none.
6. Brothers and spouses names, none.
7. Sisters and spouses names, none.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

ARTHUR W. HUMMEL, JR.

Subscribed and sworn (or affirmed) before me this 7th day of April A.D. 1977, at Washington, D.C.

STELLA MAKARA.

Commission expires July 31, 1977 Notary Public.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

## POLITICAL CONTRIBUTIONS STATEMENT

Nominee Richard K. Fox, Jr.

Contributions, Amount, Date, and Donee: (If none, write none)

1. Self, none.
2. Spouse, \$20.00, October 10, 1973, Democratic Nat. Comm.
3. Children and spouses names, none.
4. Parents names, none.
5. Grandparents names, none.
6. Brothers and spouses names, none.
7. Sisters and spouses names, none.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

RICHARD K. FOX, JR.

Subscribed and sworn (or affirmed) before me this 13th day of April A.D. 1977, at Washington, D.C.

STELLA MAKARA.

Commission expires July 31, 1977, Notary Public.

Mr. SPARKMAN, Mr. President, as in executive session, I report favorably from the Committee on Foreign Relations sundry nominations in the Foreign Service which have previously appeared in the CONGRESSIONAL RECORD and, to save the expense of printing them on the Executive Calendar, I ask unanimous consent that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of May 25, 1977, at the end of the Senate proceedings.)

#### HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H.R. 6161. An act to amend the Clean Air Act, and for other purposes; placed on the Calendar.

H.R. 6970. An act to amend the Marine Mammal Protection Act of 1972 with respect to the taking of marine mammals incidental to the course of commercial fishing operations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

#### INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. McGOVERN:

S. 1623. A bill to amend section 107 of the Energy Reorganization Act of 1974 (42 U.S.C. 5817) to delegate power to State legislatures to veto Energy Research and Development Administration site selection for radioactive waste storage, and to provide for a referendum of the people of a State on the question of locating a radioactive waste storage facility in that State; to the Committee on Environment and Public Works.

By Mr. RIBICOFF (by request):

S. 1624. A bill to authorize an additional Assistant Secretary of Commerce; to the Committee on Governmental Affairs.

S. 1625. A bill to amend title 5, U.S.C.; to the Committee on Governmental Affairs.

S. 1626. A bill to amend title 5, U.S.C.; to the Committee on Governmental Affairs.

By Mr. HATHAWAY:

S. 1627. A bill to authorize a career education implementation incentive program; to the Committee on Human Resources.

#### STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. McGOVERN:

S. 1623. A bill to amend section 107 of the Energy Reorganization Act of 1974 (42 U.S.C. 5817) to delegate power to State legislatures to veto Energy Research and Development Administration site selection for radioactive waste storage, and to provide for a referendum of the people of a State on the question of locating a radioactive waste storage facility in that State; to the Committee on Environment and Public Works.

##### THE NUCLEAR WASTE PROBLEM

Mr. McGOVERN. Mr. President, for many years, we have been told that nuclear power will provide the Nation's energy needs far into the future. The "peaceful atom," we have been told, will be safe, and it will be clean.

But the evidence is mounting up that, environmentally, the nuclear industry might be the dirtiest of them all.

In February of 1976, the National Jour-

nal reported that a solution to the problem of nuclear waste disposal was "nowhere in sight." This is no less true today than it was more than a year ago, and yet we are still receiving assurances from the nuclear industry that we have nothing to worry about.

Some wastes last for 1,000 years, while other kinds of radioactive wastes remain lethal for over 200,000 years. And the different types of wastes cannot be separated out. Perhaps it is true that "we" do not have anything to worry about, but when you are talking about materials which pose a threat to mankind for hundreds of subsequent generations, we are playing with one of the most malignant cancers ever wrought.

Millions of gallons of nuclear wastes are sitting in temporary storage tanks around the country, waiting for technology to come up with a solution. Such is the consequence of leaving this matter entirely in the hands of the nuclear industrialists and their supporters in the Federal Government. As one of the Nuclear Regulatory Commission's own task forces reported last October, resistance to public input has led to some of the more horrifying results in our waste management history:

Two themes run through the history of the nation's development of a waste management policy. The first, still widely prevalent, is that technological expertise is alone sufficient to solve the waste management problem. The second is that the consideration of nontechnological problems is not only irrelevant, but in many cases is actually a hindrance to technological progress. There seems to have been an underlying belief that a waste management system would be self-implementing or automatically implemented when needed.

The problem grows as we continue to produce these wastes. As the problem grows, and as we get more desperate for a solution, I fear that our criteria for such a solution will be less stringent than if we felt we had more time to test the current proposals. We must be protective of our standards in this case where the nuclear industry has billions of dollars riding on our professed ability to solve the nuclear waste problem immediately.

The history of nuclear waste disposal presents a sorry picture, indeed. The Government and the industry have constantly tossed the issue back and forth—like a radioactive potato—with the responsible parties constantly ducking the issue. The 500,000 gallon accident, comprised of more than 20 separate leaks, at the Hanford Reservation near Richland, Wash.; the 700-gallon leak of high level wastes at the Savannah plant near Aiken, S.C.; and the countless low-level leaks—at Maxey Flats, Ky.; near Ocean City, Md.; near San Francisco—all point to the truth in a 1966 National Academy of Sciences report on nuclear wastes, that "considerations of long-range safety are in some instances subordinate to regard for economy of operation."

Such a pathetic history demands that the States now being considered for potential permanent waste repositories be

given extra assurances that the solutions now being suggested will actually solve the problem, and that they will not simply be another in the series of permanent solutions which led to disaster or near disaster—only to be relabeled "temporary" and "interim" solutions.

Of course, the Energy Research and Development Administration considers its current efforts in this area to be adequate. Just what are they? ERDA is conducting geological studies around the country in search of a permanent nuclear waste repository and a backup site just in case the first one does not work out. The major criterion here seems to be that the site should be geologically stable. But what ERDA seems to forget is that this site is going to have to remain stable for at least 200,000 years.

Meanwhile, the pressure is building for a repository. The current interim and temporary facilities are supposed to run out of room by 1985, which is when the new, permanent, geologically stable repository will take over. And that is if there are no unforeseen problems and construction goes right on schedule. Further, there will not be any time to test the facility; its initial use will be the actual test period. Not much of a dry run for a repository which is supposed to come with at least a 200,000-year guarantee.

I am offering a bill today which will do the following. When ERDA states that it has come up with a "permanent solution," it will have to convince more than a handful of industrialists with billions of dollars invested in an affirmative answer. This bill will allow a State legislature to veto site selection within that State, and it will provide a similar power to the people by statewide referendum.

We must do something to counteract the possibility that site selection and waste treatment will be based on expediency rather than on a thorough review of the possible dangers to a local population. If the Energy Research and Development Administration's plans are as safe as they are claimed to be, then there should be no problem convincing State legislatures and local populations that this is so.

This bill would in no way interfere with ERDA as it continues its studies which should lead to a suitable solution. However, ERDA's decision should be subject to question and, ultimately, to veto if justified, by either the people of a State or their elected representatives.

After more than 30 years of our nuclear agencies ignoring their own advice with regard to public health and safety, I think that the public is owed a bit more than the calm assurances from those who will not have to live with these wastes.

By Mr. RIBICOFF (by request):

S. 1624. A bill to authorize an additional Assistant Secretary of Commerce; to the Committee on Governmental Affairs.

Mr. RIBICOFF. Mr. President, at the request of the administration I am introducing legislation to authorize an additional Assistant Secretary of Com-

merce. The Secretary of Commerce advises that this position is required in order to establish the position of Assistant Secretary for Economic and Statistical Affairs.

I ask unanimous consent that the text of the bill and the accompanying statement of the purpose and need be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1624

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That there shall be in the Department of Commerce, in addition to the Assistant Secretaries provided by law as of the date of the enactment of this Act, one additional Assistant Secretary of Commerce who shall be appointed by the President, by and with the advice and consent of the Senate. Such Assistant Secretary shall receive compensation at the rate prescribed by law for Assistant Secretaries of Commerce, and shall perform such duties as the Secretary of Commerce shall prescribe.

SEC. 2. Section 5315 of title 5, United States Code, is amended by striking out paragraph (12) and inserting in lieu thereof:

"(12) Assistant Secretaries of Commerce (8)."

#### STATEMENT OF PURPOSE AND NEED

The attached bill authorizes an additional Assistant Secretary of Commerce.

This position is required in order to establish the position of Assistant Secretary for Economic and Statistical Affairs. The Assistant Secretary would be the principal advisor to the Secretary and to other officials within the Department on economic and statistical affairs; would serve as the Department's liaison with the Council of Economic Advisers and with other high-level economic and statistical officials of the Government; and would exercise policy direction and general supervision over the Bureau of the Census and the Bureau of Economic Analysis.

These functions are currently assigned to the Chief Economist of the Department. Experience with this arrangement has shown, however, that effective performance of these functions requires a top official who has the confidence of the Secretary and the Administration, and who has been appointed by the President, by and with the advice and consent of the Senate. An individual in such a position will be better able to participate in and have an impact upon departmental and government-wide economic and statistical policy decisions.

Subsection (b) of the draft bill would amend 5 USC 5315 (12) to place eight Assistant Secretaries at Level IV. 5 USC 5315 (12) presently specifies six Assistant Secretaries, although the Department is in fact authorized seven by law. Both Public Law No. 91-469 and Public Law No. 91-477, which were approved October 21, 1970, amended title 5, USC to change section 5315 (12) to read "(12) Assistant Secretaries of Commerce (6)" although each law established an additional Assistant Secretary position. Accordingly, subsection (b) actually would increase the number of Assistant Secretaries of Commerce by one.

MAY 19, 1977.

HON. WALTER M. MONDALE,  
President of the Senate,  
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed are six copies of a draft bill:

"To authorize an additional Assistant Secretary of Commerce," together with a statement of purpose and need in support thereof.

This proposed legislation has been reviewed by the Department in the light of Executive Order No. 11821 and has been determined not to be a major proposal requiring evaluation and certification as to its inflationary impact.

We have been advised by the Office of Management and Budget that there would be no objection to the submission of our draft bill to the Congress from the standpoint of the Administration's program.

Sincerely,

JUANITA M. KREPS.

By Mr. RIBICOFF (by request):  
S. 1625. A bill to amend title 5, U.S.C.; to the Committee on Governmental Affairs.

Mr. RIBICOFF. Mr. President, at the request of the Department of Defense, I am introducing legislation to amend section 5519 of title 5, United States Code, relating to crediting amounts received for certain reserve or National Guard service.

At present, Federal employees who are members of the National Guard or Reserve receive both civil service pay and military pay when on annual active duty for training, in a military leave status. This legislation would eliminate such dual compensation by providing that such Federal employees would receive active duty pay for their 15 days of annual military leave, plus any difference between the military pay and their civil service pay for that period.

I ask unanimous consent that the text of the bill and correspondence from the Department of Defense setting forth the purpose and need for the legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1625

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 5519 of title 5, United States Code, is amended by inserting "(a)," following "section 6323".

SEC. 2. This Act is effective on the first day of the first month after the date of enactment.

APRIL 20, 1977.

HON. ABRAHAM A. RIBICOFF,  
Chairman, Governmental Affairs Committee,  
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Reference is made to a Department of Defense legislative proposal that was submitted to the Congress on January 18, 1977 and referred to your committee. The draft legislation amends section 5519 of title 5, United States Code, relating to crediting amounts received for certain reserve or National Guard service. It concerns the problem of dual compensation.

I am taking this opportunity to reaffirm the Department's support for this proposal, which was submitted to the Congress by the previous Administration. The Office of Management and Budget has advised its enactment would be in accord with the program of President Carter. It is recommended that

the dual compensation proposal be enacted by the Congress.

Sincerely,

L. NIEDERLEHNER,  
Acting General Counsel.

JANUARY 18, 1977.

HON. NELSON A. ROCKEFELLER,  
President of the Senate,  
Washington, D.C.

DEAR MR. PRESIDENT: Forwarded herewith is draft legislation to amend section 5519 of title 5, United States Code, relating to crediting amounts received for certain reserve or National Guard service.

This proposal would provide the authority to assist in carrying out the provisions contained in the President's budget for Fiscal Year 1978. On January 17, 1977, the Office of Management and Budget advised that there is no objection to the presentation of this proposal to the Congress and that its enactment would be in accord with the program of the President. It is recommended that the proposal be enacted by the Congress.

#### PURPOSE OF THE LEGISLATION

Existing law entitles Federal employees who are members of the National Guard or Reserve to receive both Civil Service pay and military pay while on annual active duty for training with the Guard or Reserve in a military leave status.

The purpose of the proposed legislation is to eliminate such dual compensation by amending section 5519 of title 5, United States Code, so that these Federal employees will receive active duty pay for their 15 days of annual military leave, plus any difference between that military pay and their Civil Service pay for that period. The crediting of military pay against civilian pay would be administratively handled in the same manner as currently applies to those members of a Guard or Reserve Component who are ordered to active duty to enforce the laws of the United States under the provisions of 5 U.S.C. 6323(c). Under current authority, in excess of 100,000 Federal employees who are Guardsmen or Reservists are entitled to receive both Federal civilian and Reserve military pay for 15 days active duty for training annually.

#### COST AND BUDGET DATA

The enactment of this proposal would result in an estimated savings of \$30.0 million for Fiscal Year 1978. The exact savings would depend on the numbers and salaries of Federal employees performing annual active duty for training in the Guard or Reserve in a military leave status.

Sincerely,

L. NIEDERLEHNER,  
Acting General Counsel.

By Mr. RIBICOFF (by request):  
S. 1626. A bill to amend title 5, United States Code; to the Committee on Governmental Affairs.

Mr. RIBICOFF. Mr. President, at the request of the Library of Congress, I am introducing legislation to exempt the position of Librarian of Congress from the provisions of the Annual and Sick Leave Act of 1951, as amended.

A recent opinion of the Comptroller General, issued at the request of the Assistant Librarian of Congress involving a related matter, held that the Librarian of Congress for purposes of pay is the head of an agency. Heads of agencies and departments of the executive branch, and employees of the Congress, are excluded from the Leave Act, either

by statute or Executive order. However, since the Librarian of Congress is the head of an agency in the legislative branch, and not an employee thereof, the present statutory exclusion does not apply to him.

This bill would amend the Leave Act so as to add the Librarian of Congress to the list of those excluded from the provisions of the act. Thus, the Librarian of Congress will be treated for both pay and leave purposes as the head of an agency.

I ask unanimous consent that the text of the bill, the letter from the Assistant Librarian of Congress requesting this legislation, and the opinion of the Comptroller General be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1626

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6301(2)(B) of title 5, United States Code, relating to annual and sick leave is amended by adding:*

(XIII) THE LIBRARIAN OF CONGRESS

SEC. 2. The amendment made by this Act shall take effect on the date of the enactment of this Act.

WASHINGTON, D.C.,  
April 25, 1977.

HON. ABRAHAM A. RIBICOFF,  
Chairman, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR SENATOR RIBICOFF: I am requesting on behalf of the Library of Congress that remedial legislation be enacted to exempt the position of Librarian of Congress from the provisions of the leave act (5 U.S.C. 6301). I have enclosed draft language to effect such a change.

During the past year, I requested an opinion from the Comptroller General of the United States with respect to payments made to the Librarian of Congress, the Deputy Librarian of Congress, and the Director of the Congressional Research Service during 1973 that were in excess of the statutory pay limits. In that year all employees of the Federal Government who were paid biweekly were paid for 27 pay periods rather than the normal 26 pay periods.

The decision of the Comptroller General (a copy of which is enclosed) was based on whether these individuals are "employees" as defined in 5 U.S.C. 5504 or are agency heads whose compensation is governed by 5 U.S.C. 5505. The Comptroller General ruled that the Librarian of Congress as head of the agency should have his pay computed under 5 U.S.C. 5505 and that the other two Library officials were paid properly. Prior computation of his pay under the computation methods prescribed in 5 U.S.C. 5504 was in error. Computation of pay for employees under this statute is "... deemed payment under this payment during 52 basic administrative work weeks of 40 hours."

The definition of employee under 5 U.S.C. 6301 is inconsistent with respect to the Comptroller General's decision relating to the Librarian of Congress and his salary administration. The leave act (5 U.S.C. 6301 (x)) provides that the President may exclude "an officer in the executive branch" from being included under the leave act. The position of Librarian of Congress, however, is that of an officer in the legislative branch, but not "an employee of either House of Congress or

of the two Houses," as excluded under the leave act by 5 U.S.C. 6301 (vi).

The Librarian of Congress, Daniel J. Boorstin, understands the purpose and effects of this change and supports it. We would be happy to answer any questions you or your staff may have on this subject.

Sincerely yours,

DONALD C. CURRAN,  
The Assistant Librarian of Congress.

File: B-120604. AUGUST 30, 1976.  
Matter of Library of Congress—Pay computation.

Digest 1. Deputy Librarian of Congress and Director of Congressional Research Service, whose compensation was computed and paid on biweekly pay period basis, received 27 payments in calendar year 1973. Although they were paid total in excess of their annual salary rates, they were properly paid since their compensation was correctly computed and paid under 5 U.S.C. 5504 and an employee may receive 27 compensation payments in calendar year under that statute.

Digest 2. Compensation of Librarian of Congress was computed and paid on biweekly basis under 5 U.S.C. 5504. Payment in excess of Librarian's annual pay rate in 1973 was overpayment since Librarian is head of agency and his compensation must be computed on monthly basis as provided under 5 U.S.C. 5505. However, overpayment is waived under provisions of 5 U.S.C. 5584.

This decision is issued in response to a letter dated May 25, 1976, from Mr. Donald C. Curran, the Assistant Librarian of Congress, concerning the computation of pay for certain Library of Congress personnel in the calendar year 1973. Mr. Curran specifically asks whether the Librarian of Congress, the Deputy Librarian of Congress, and the Director of the Congressional Research Service (CRS) were overpaid that year because there was an extra pay period. If so, Mr. Curran requests that the overpayments to those individuals be waived under 5 U.S.C. 5584.

The Library of Congress normally pays its employees for 26 biweekly pay periods in a calendar year. However, due to the fact that a calendar year consists of 52 weeks and 1 or 2 days employees are paid 27 times in certain years. Hence, in calendar year 1973, employees received 27 salary payments, the total of which was, therefore, higher than their regular annual rate of pay.

The statutory provisions setting the per annum rates for the Librarian, the Deputy Librarian, and the Director of the CRS for 1973 read as follows:

"The compensation of the Librarian of Congress shall be at the rate of \$38,000 per annum." 2 U.S.C. 136a (1970).

"The compensation of the Deputy Librarian of Congress shall be at the rate of \$36,000 per annum." 2 U.S.C. 136a-1 (1970).

"After consultation with the Joint Committee on the Library, the Librarian of Congress shall appoint the Director of the Congressional Research Service. The basic pay of the Director shall be at a per annum rate equal to the rate of basic pay provided for Level V of the Executive Schedule contained in Section 5316 of Title 5." 2 U.S.C. 166(c) (1) (1970).

In 1973 the annual rate of basic pay for Level V of the Executive Schedule was \$36,000.

Because of the additional salary payment that year, the Librarian, the Deputy Librarian, and the Director of the CRS were paid \$39,463.20, \$37,389.60 and \$37,389.60, respectively.

Section 5504 of title 5, United States Code (1970), states in pertinent part the following regarding the method to be used to

calculate the compensation for "employees" as defined therein:

"(a) The pay period for an employee covers two administrative workweeks. For the purpose of this subsection, 'employee' means—

(2) an employee in or under \* \* \* the Library of Congress \* \* \*

but does not include—

(B) an employee or individual excluded from the definition of employee in section 5541(2) of this title.

"(b) For pay computation purposes affecting an employee, the annual rate of basic pay established by or under statute is deemed payment for employment during 52 basic administrative workweeks of 40 hours. When it is necessary for computation of pay under this subsection to convert an annual rate of basic pay to a basic hourly, daily, weekly, or biweekly rate, the following rules govern:

(1) To derive an hourly rate, divide the annual rate by 2,080.

(2) To derive a daily rate, multiply the hourly rate by the number of daily hours of service required.

(3) To derive a weekly or biweekly rate, multiply the hourly rate by 40 or 80, as the case may be.

Rates are computed to the nearest cent, counting one-half and over as a whole cent. For the purpose of this subsection, 'employee' means—

(C) an employee in or under \* \* \* the Library of Congress, for whom a basic administrative workweek is established under section 6101(a) (5) of this title,

But does not include an employee or individual excluded from the definition of employee in section 5541(2) of this title."

Under the compensation method prescribed above the hourly, weekly, or biweekly rate of compensation is fixed by the employee's per annum rate, but the actual compensation received in a calendar year is not necessarily equal to the employee's annual compensation rate. This is so since the actual amount paid is determined by the computation rules on a biweekly pay period basis instead of on a calendar year basis. Therefore, when an employee's compensation is for computation in accordance with section 5504, it is proper for him to receive 27 compensation periods in a calendar year.

However, section 5504 excludes from its scope any individual excluded from the definition of "employee" under 5 U.S.C. 5541(2) (1970). That definition applies to personnel in the Library of Congress as follows:

"'employee' means—

(C) an employee in or under \* \* \* the Library of Congress \* \* \*

but does not include—

(ii) the head of an agency other than the government of the District of Columbia \* \* \*"

Because heads of agencies are excluded from the provisions of 5 U.S.C. 5504, we have long held that 5 U.S.C. 5505 governs the computation of their salaries. 47 Comp. Gen. 485 (1968).

Section 5505 which prescribes the pay computation rules for those individuals whose compensation is not governed by the provisions of section 5504, reads as follows:

"The pay period for an individual in the service of the United States whose pay is monthly or annual covers one calendar

month, and the following rules for division of time and computation of pay for services performed govern:

(1) A month's pay is one-twelfth of a year's pay.

(2) A day's pay is one-thirtieth of a month's pay.

(3) The 31st day of a calendar month is ignored in computing pay, except that one day's pay is forfeited for one day's unauthorized absence on the 31st day of a calendar month.

(4) For each day of the month elapsing before entering the service, one day's pay is deducted from the first month's pay of the individual.

This section does not apply to an employee whose pay is computed under section 5504(b) of this title."

The actual pay received by an individual whose pay is computed in accordance with the above should, in a calendar year, equal his annual pay rate because the computation is made on the basis of a calendar year rather than on the biweekly pay computation method prescribed by section 5504. While an individual paid under this section should ordinarily be paid on a monthly basis, an agency may pay him on a semi-monthly basis as long as the actual rate is calculated on the monthly basis. 47 Comp. Gen. 485 (1968). However, we find no authority to pay such individuals biweekly. Accordingly, if an individual paid under section 5505 is paid compensation for a calendar year which exceeds 12 times his monthly rate, then he is overpaid.

Therefore, whether the Librarian, the Deputy Librarian, and the Director of the CRS were overpaid due to the additional payday in 1973 depends on whether those individuals are "employees" within the purview of the 5 U.S.C. 5504 or are agency heads whose compensation is governed by the monthly salary limitations in 5 U.S.C. 5505.

The Library of Congress is defined as an "agency" for purposes of pay administration in 5 U.S.C. 5541 (1970). Section 136, title 2 of the United States Code (Supp. III, 1973), establishes the Librarian as the administrative head of the Library of Congress as follows:

"The Librarian of Congress shall be appointed by the President, by and with the advice and consent of the Senate. He shall make rules and regulations for the government of the Library."

Since the Librarian is a head of an agency his compensation is for computation under 5 U.S.C. 5505. 47 Comp. Gen. 485, *supra*. In accordance with 5 U.S.C. 5505, the annual compensation of the Librarian, as the head of his agency, may not exceed 12 times his monthly rate, which should have been \$3,166.67 based on the per annum rate of \$38,000 in 1973. Accordingly, the Librarian of Congress was overpaid \$1,463.16 in the calendar year 1973.

Both the Deputy Librarian and the Director of the Congressional Research Service are appointed by the Librarian and their authority is established as subordinate to his throughout Chapter 5, title 2 of the United States Code (1970). Although 2 U.S.C. 166 (1970) states that the Congressional Research Service is to be maintained in the Library of Congress as a separate department with the "maximum practicable administrative independence consistent with \* \* \* its objectives," the Librarian still retains ultimate authority by virtue of the requirement that he assist in the performance of the CRS's objectives and his power to appoint and dismiss employees of the CRS under 2 U.S.C. 166(c). Since neither the Deputy Librarian nor the Director of the CRS can be considered a "head of an agency,"

and are not excluded from the definition of an "employee" in 5 U.S.C. 5504 or by any other applicable provision, their compensation must be in accordance with the computation method prescribed therein. Therefore, they were entitled to the 27 biweekly compensation payments received in 1973 and were not overpaid.

Our authority to waive collection of the overpayment to the Librarian of Congress under 5 U.S.C. 5584 (Supp. IV, 1974), is contingent on whether the conditions for a waiver of a claim of the United States arising out of an erroneous payment of pay or allowances exist. Section 91.5(c), title 4 of the Code of Federal Regulations (1975), states, in pertinent part, that claims may be waived whenever:

"Collection action under the claim would be against equity and good conscience and not in the best interests of the United States. Generally these criteria will be met by a finding that the erroneous payment of pay or allowances occurred through administrative error and that there is no indication of fraud, misrepresentation, fault or lack of good faith on the part of the employee or member or any other person having an interest in obtaining a waiver of the claim. Any significant unexplained increase in pay or allowances which would require a reasonable person to make inquiry concerning the correctness of his pay or allowances, ordinarily would preclude a waiver when the employee or member fails to bring the matter to the attention of appropriate officials."

There is nothing in the record indicating fraud or lack of diligence on the Librarian's part in this matter. Moreover, under the circumstances we cannot conclude that a reasonable individual, even if charged with the knowledge and responsibility of the Librarian of Congress, would suspect that his salary alone should be computed on a monthly basis rather than a biweekly basis. Accordingly, we hereby waive the collection of the \$1,463.16 overpaid to the Librarian of Congress in 1973.

R. F. KELLER,

Acting Comptroller General of the United States.

#### ADDITIONAL COSPONSORS

S. 514

At the request of Mr. RIBICOFF, the Senator from Wyoming (Mr. HANSEN) was added as a cosponsor of S. 514.

S. 551

At the request of Mr. HUMPHREY, the Senator from Delaware (Mr. BIDEN) was added as a cosponsor of S. 551.

S. 555

At the request of Mr. RIBICOFF, the Senator from Wisconsin (Mr. PROXMIER) was added as a cosponsor of S. 555.

S. 807

At the request of Mr. McINTYRE, the Senator from Maine (Mr. HATHAWAY) was added as a cosponsor of S. 807.

S. 972

At the request of Mr. NELSON, the Senator from Rhode Island (Mr. CHAFFEE) was added as a cosponsor of S. 972.

S. 1120

At the request of Mr. HUMPHREY, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 1120.

S. 1116

At the request of Mr. MCGOVERN, the Senator from Arizona (Mr. DeCONCINI) was added as a cosponsor of S. 1116.

S. 1177

At the request of Mr. CHILES, the Senator from Kansas (Mr. DOLE) was added as a cosponsor of S. 1177.

S. 1361

At the request of Mr. HELMS, the Senator from California (Mr. HAYAKAWA) was added as a cosponsor of S. 1361.

S. 1614

At the request of Mr. HAYAKAWA, the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 1614.

AMENDMENT NO. 316

At the request of Mr. GARN, the Senator from Utah (Mr. HATCH) was added as a cosponsor of amendment No. 316.

AMENDMENT NO. 344

At the request of Mr. HAYAKAWA, the Senator from Idaho (Mr. McCURE), the Senator from Utah (Mr. HATCH), and the Senator from Wyoming (Mr. WALLOP) were added as cosponsors of amendment No. 344.

AMENDMENT NO. 353

At the request of Mr. HATHAWAY, the Senator from Vermont (Mr. LEAHY) and the Senator from Arkansas (Mr. BUMPERS) were added as cosponsors of amendment No. 353.

#### AMENDMENTS SUBMITTED FOR PRINTING

#### ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION AUTHORIZATIONS—S. 1340

AMENDMENT NO. 357

(Ordered to be printed and to lie on the table.)

Mr. MELCHER. Mr. President, for myself, the Senator from Mississippi (Mr. EASTLAND), and the Senator from Pennsylvania (Mr. HEINZ), I am today submitting a needed amendment to S. 1340 to increase the authorization for the magnetohydrodynamics — MHD — program to \$125 million. It is needed because the energy, research, and development capabilities for this national coal conservation and utilization program is much greater than either the administration budget or the committee's modest increase.

The MHD process, when perfected, will save electric consumers billions of dollars, conserve coal through greatly increased efficiency, and solve air pollution problems in coal-fired electrical generation plants across the country.

MHD is a technology whose time has come—and which at the present research and development pace will pass us by without fulfilling its potential of being a true cornerstone of our energy policy. However, if we would fund at a level to use our engineering capabilities, we can have the blueprints for commercial plants within 6 years' time.

The basic MHD process itself is simple. An extremely hot gas derived from burning coal—or other fuel—is turned into an electrical conductor by "seeding" it with another material such as potassium or cesium. The gas moves at very high speed through a channel enclosed by a magnet.

Electricity is produced and tapped by electrodes in the wall of the channel.

I ask you today to consider these points:

MHD promises 40 percent greater electrical generation efficiency for every ton of coal burned than is possible in conventional steam-generating electrical plants;

MHD ends air pollutant emissions; in the case of sulfur dioxide one-twenty-fifth of present EPA standards, nitrogen oxides to less than one-third, and in the case of particulates, one-half of EPA standards to enhance the air quality wherever electricity is being generated;

MHD requires little water and there is no resulting thermal water pollution;

MHD research and engineering is shortchanged in the bill with a loss of its near- and long-term benefits, unless Congress acts to fund ERDA's efforts in this area at a realistic level.

We could have MHD commercially available to utilities in the mid-1980's. The basic scientific and technical information on the process was developed by private industry in the early 1960's, but a lack of Government funding prevented developing a pilot plant.

But the Russians have gone forward and have a pilot plant which has achieved 20 megawatts of electricity. The Soviet Union will have a 500-megawatt commercial demonstration plant operating in the early 1980's.

Efforts in the United States have been miserably slow. ERDA asked for \$86 million for this fiscal year and that is a bare bones budget for the national MHD program. The Ford administration budget request of \$50 million, acquiesced in by President Carter, allows ERDA to build a component development and integration facility—CDIF—in Butte, Mont., but it does not provide the component parts for integrated coal combustion channel operations.

Work must be accelerated in areas such as combustors, magnets, and other components crucial to MHD development and to allow engineering tests of this technology. This means bringing together and combining efforts of General Electric at Valley Forge, Fluidyne Engineers Corp. in Minneapolis, AVCO, Rocketdyne, TRW, Pittsburgh Energy Research Center, Westinghouse, University of Tennessee, MIT, Stanford, Mississippi State University, and several other universities across the country.

Nor is the committee's recommendation of \$75 million adequate which is the amount in S. 1340. The effort to move the national MHD program forward for this fiscal year requires \$125 million.

This program promises better use of our most abundant fossil fuel—coal. It has efficiencies far above any existing technology or program efforts now underway within the Fossil Energy Division of ERDA. It is environmentally sound in terms of air and water pollution and water use.

I hope the Senate will approve this amendment to S. 1340 to authorize \$125 million and to allow us to capture the potential MHD has to offer to help solve our energy problems.

I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

#### AMENDMENT NO. 357

On page 19, line 11, strike out "\$70,800,000" and insert in lieu thereof "\$106,800,000".

On page 24, line 3, strike out "\$7,200,000" and insert in lieu thereof "\$18,200,000".

On page 24, beginning on line 3, strike out "\$12,200,000" and insert in lieu thereof "\$23,200,000".

#### HOUSING AND COMMUNITY DEVELOPMENT ACT—S. 1523

##### AMENDMENT NO. 358

(Ordered to be printed and to lie on the table.)

Mr. CHAFEE (for himself, Mr. HUMPHREY, Mr. CRANSTON, and Mr. JAVITS) submitted an amendment intended to be proposed by them to the bill (S. 1523) to amend the Housing and Community Development Act of 1974, to extend certain housing assistance and mortgage insurance programs, and for other purposes.

##### AMENDMENT NO. 361

(Ordered to be printed and to lie on the table.)

Mr. MUSKIE. Mr. President, S. 1523, the Housing and Community Development Act of 1977, now pending before the Senate, would authorize and extend a broad range of housing and community development programs. These programs, and the problems they address, have been of particular concern to me throughout my tenure in the Senate. Providing decent housing for all Americans and improving the quality of life in our cities are goals that must be high on our national agenda.

Mr. President, it is as a supporter of these goals that I must express my deep concern that one provision of this bill, section 208, removes tens of billions of dollars of federally assisted housing programs from congressional control by amending the Budget Act to hide the future year costs of these programs. For this year alone, some \$34 billion in housing contract obligation would show as less than \$60 million in the budget.

The distinguished ranking member of the Senate Banking Committee, Senator BELLMON, has joined me in expressing his concern with respect to section 208, and we intend to propose an amendment tomorrow to strike section 208 in order to preserve the congressional budget process.

Senator BELLMON and I are deeply concerned that this bill would hide the true budget impact of these long-term Federal obligations through cosmetic shifts in accounting that would obscure the real costs of these programs. The administration also has voiced its strong opposition to this change in accounting which violates sound budgetary practice.

Under present practice, which is required by law and supported by the administration and Comptroller General, the full cost of these 15- to 40-year contract obligations is shown in the budget for the year in which the contracts are signed. Under S. 1523 only the first year costs of these long-term obligations

would appear in the budget in the year the obligation is incurred. The remainder of the contract costs would appear as uncontrollable costs in future years.

The distortion which flows from the proposed change can be vividly demonstrated. For fiscal years 1976 through 1978, over \$75 billion in budget authority will have been approved for these programs by the Congress in appropriation acts. Under S. 1523, this \$75 billion would have been disguised as barely \$5 billion in budget authority. Under the current method, the full amount of all these commitments would have been subject to prior congressional review and vote in the budget resolutions and appropriation acts before the contracts were signed.

At the current rate, Federal obligations for assisted housing programs will amount to as much as \$1 trillion by the year 2005. Under the accounting change S. 1523 would impose, almost none of these obligations would have appeared as controllable budget authority in the year in which the contracts were signed. But the obligation would already have occurred and would have to be paid.

In recommending that the actual costs of Federal housing obligations be obscured, the Banking Committee argues that housing programs suffer because large numbers in the budget scare away potential supporters. The evidence is to the contrary. Indeed, for fiscal 1978, amendments to the first budget resolution to increase housing programs by over \$6 billion—to the full administration request of \$32.8 billion—were approved by a 57-to-39 margin in the Senate. The more than \$75 billion these programs will have received by fiscal 1978 belie any claim that reflecting the full cost of these programs as required by sound accounting practices has driven away support.

Under the Budget Act, the Senate has consistently faced up to the hard choices presented by the true cost of new Federal obligations. Although we support the objectives of S. 1523, we are compelled to oppose the accounting change contained in section 208. It would mark the first retreat by the Senate from its clear commitment to honesty in budgeting.

Only through full disclosure of program costs can Congress expect to maintain control over Federal expenditures. Were each authorizing committee to devise a new method of accounting for its programs to hide the true impact on future years of decisions taken now, the result would signal the end of the budget process—and pure chaos. We should not abandon the truth-in-budgeting principles the Senate has pursued thus far. We should not create this new multi-billion-dollar loophole. We should instead be moving to eliminate whatever anomalies now exist. Accordingly, we intend to offer an amendment to strike section 208 from the Housing bill and urge your support.

Mr. President, the administration is also opposed to section 208 and I ask unanimous consent that letters from OMB Director Lance and Housing and Urban Development Secretary Harris be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

OFFICE OF MANAGEMENT AND BUDGET,  
Washington, D.C., June 2, 1977.

HON. EDMUND S. MUSKIE,  
Chairman, Senate Budget Committee,  
Washington, D.C.

DEAR MR. CHAIRMAN: Last week, the Senate Banking, Housing, and Urban Affairs Committee completed action on S. 1523—the "Housing and Community Development Act of 1977." Section 208 of that bill would change the way budget authority is defined under HUD's subsidized housing programs. In my judgment, this provision poses a serious threat to the congressional budget process as well as to the public's ability to understand and influence the setting of national priorities. I believe this matter warrants your personal attention.

Another result of the Committee's action also has disturbing implications for the budget process. I will comment on this as well.

#### BUDGET AUTHORITY UNDER ASSISTED HOUSING

At the present time, both the legislative and executive branches of the Federal Government recognize as budget authority under HUD's assisted housing programs the maximum Federal payments that could be required pursuant to contractual obligations approved by the Congress in appropriation acts. Such treatment is required by section 3(a)(2) of the "Congressional Budget Act of 1974" which defines "budget authority" to mean authority provided by law to enter into obligations which will result in immediate or future outlays involving Government funds. . . .

Clearly, housing subsidy contracts are legal "obligations" of the Federal Government, and result in the outlay of Government funds. . . .

Section 208 of the Committee's bill would establish a different concept of budget authority for housing subsidy programs, only, and require its use by both the legislative and executive branches. In effect, section 208 would define as budget authority only the payments required to liquidate housing assistance contracts in a given year. Thus, rather than providing a basis for contractual obligations, budget authority would be recognized after such obligations were made—sometimes as long as forty years afterwards. This was the approach taken to budget authority prior to the enactment of the Congressional Budget Act.

Special treatment for the housing subsidy programs in this manner would have the following unfortunate consequences:

1. It would destroy one of the important bases for budget scorekeeping, on which both the Congress and the executive branch depend. If we are to keep track of actions that affect budget outlays now and in the future, we must have a reliable measure of authority to enter into obligations. Establishing different measures for different programs would greatly impair our ability to plan and implement sound budget policies over time.

2. It would seriously mislead the public. The definition of budget authority implied by section 208 would allow the executive branch to propose and the Congress to provide major subsidies for housing without having to acknowledge the taxpayers' legal obligation to finance these subsidies over a 15-40 year period.

3. It would undermine the process of establishing priorities among competing national needs by understating the budget consequences of selected programs.

I can appreciate the concern of those who are bothered by the large sums that must be shown as budget authority for the subsidized cepts. However, arbitrarily changing the definition of budget authority to make the numbers smaller will not make the housing subsidy programs any less costly, or change in any way the nature of the Government's legal obligation to pay these subsidies.

In sum, while the Congress clearly has the right to change the definition of budget authority for any program, I believe it would be most regrettable if the Senate approved legislation containing a provision along the lines of section 208. The requirements set forth in this section are totally inconsistent with both the spirit and letter of the Congressional Budget Act, and would only serve to conceal from the public the financial burden to which it is being committed by its elected representatives.

#### FEDERAL GUARANTEES FOR TAX-EXEMPT BORROWING

A second feature of S. 1523 that warrants your attention is section 107 which would amend an existing provision of law authorizing HUD to guarantee loans for certain purposes in connection with community development grant programs. These amendments would pave the way for a major expansion in the volume of tax-exempt borrowing backed by a Federal guarantee.

It would not be appropriate for me to comment on the objectives that section 107 is intended to achieve. I do wish to comment on the means for achieving them, and its implications for the budget process and debt management.

Increasing the volume of federally guaranteed tax-exempt securities would:

1. Make it more difficult to manage the national debt by significantly increasing a class of securities superior even to Treasury's own debt issue.
2. Increase Treasury borrowing costs and Federal outlays—through the backdoor—by raising the yield that Treasury would have to offer in order to attract funds.
3. Increase the budget still further—again through the backdoor—as defaults occur.
4. Add to the upward pressure on the budget by allowing block grant recipients to, in effect, get future year grants now by borrowing against them.

In the name of helping central cities, section 107 would commit additional Federal resources to a form of subsidy that is widely recognized to be highly inefficient since it costs the Treasury more in revenue than the borrower saves in interest costs. The difference becomes a subsidy for high-bracket taxpayers.

For these reasons, guarantees of tax-exempt obligations have been opposed by each of the last four administrations. I urge that section 107 of the bill be modified to avoid the problems noted above, or deleted.

Your assistance in bringing these concerns to the attention of your colleagues in the Senate would be appreciated.

Sincerely,

BERT LANCE,  
Director.

THE SECRETARY OF HOUSING AND  
URBAN DEVELOPMENT,  
Washington, D.C.

HON. EDMUND S. MUSKIE,  
Chairman, Senate Budget Committee, U.S.  
Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for your inquiry regarding the position of the Department of Housing and Urban Development on certain provisions contained in S. 1523 relat-

ing to the way in which budget authority is defined under specified HUD subsidized housing programs. This letter will address two such provisions of S. 1523: Section 208, relating to budget authorization under assisted housing, and the proposed treatment for Section 202 housing for the elderly and handicapped.

This Department opposes Section 208 of the Committee's bill, which would define as budget authority only those payments for assisted housing required to liquidate housing assistance contracts in a given year.

In part, the Committee's action may reflect a view which I have stated publicly that, in the case of subsidized housing programs, reliance on the concept of budget authority alone can be misleading. For internal HUD purposes, and as an additional presentation to the Appropriations Committees, the Department has continued to use the concept of appropriations as a useful way to measure the amount the Department is actually asking to be provided from the Treasury.

Because of the scorekeeping procedure required for budget authority under the Congressional Budget Act of 1974, however, and the basic definitions set forth in that Act, I do not support a change in the present method of computing budget authority. Since the payments obligate the Federal government to pay annual outlays over the life of the contract, the current definitions would appear to be necessary.

We are also opposed to the action taken by the Committee in not putting the Section 202 program back on-budget as was requested by the Administration. There is no difference between this direct loan program and other direct loan programs in HUD and elsewhere. We continue to believe, therefore, that the revenues and outlays of this program should be included in the budget totals and not arbitrarily excluded.

The Office of Management and Budget has advised that there is no objection to the presentation of these views from the standpoint of the Administration's program.

Sincerely,

PATRICIA ROBERTS HARRIS.

#### AMENDMENTS NOS. 362 AND 363

(Ordered to be printed and to lie on the table.)

MR. BARTLETT submitted two amendments intended to be proposed by him to the bill (S. 1523), supra.

#### FINANCIAL ASSISTANCE TO EDUCATIONAL INSTITUTIONS—S. 701

##### AMENDMENT NO. 359

(Ordered to be printed and to lie on the table.)

MR. HATHAWAY submitted an amendment intended to be proposed by him to the bill (S. 701) to provide Federal financial assistance to educational institutions in order to assist such institutions to meet the emergency caused by the high cost of fuel and fuel shortages and harsh weather conditions, and for other purposes.

#### CLEAN AIR ACT—S. 252

##### AMENDMENT NO. 360

(Ordered to be printed and to lie on the table.)

MR. RIEGLE (for himself, Mr. GRIF-FIN, Mr. BARTLETT, Mr. BELLMON, Mr. DANFORTH, Mr. GARN, Mr. HATCH, Mr.

LUGAR, Mr. SASSER, and Mr. TOWER) submitted an amendment intended to be proposed by them to the bill (S. 252) to amend the Clean Air Act, as amended.

Mr. RIEGLE. Mr. President, I am pleased to insert in today's RECORD a section-by-section summary of the mobile source emissions control amendment that Senator GRIFFIN and I and others will offer to title II of the Clean Air Act amendments (S. 252). The amendment itself is also printed in today's RECORD.

Our amendment has as its base S. 919, which we introduced on March 4 with the support of Leonard Woodcock and the UAW. It includes the same auto emissions schedule, antitampering section, and warranty and parts certification language that was in S. 919. To strengthen our amendment we have added a production line test and a mandatory inspection and maintenance program.

Mr. President, I ask unanimous consent that the bill and this analysis be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

#### AMENDMENT No. 360

On page 93, strike out line 24 and all that follows down through line 10 on page 95 and insert in lieu thereof the following:

Sec. 20. (a) Subparagraph (A) of section 202(b) (1) of the Clean Air Act is amended to read as follows:

"(A) The regulations under subsection (a) applicable to emissions of carbon monoxide and hydrocarbons from light-duty vehicles and engines manufactured during model year 1977 through 1979 shall contain standards which provide that such emissions from such vehicles and engines may not exceed 1.5 grams per vehicle mile of hydrocarbons and 15 grams per vehicle mile of carbon monoxide. The regulations under subsection (a) applicable to emissions of carbon monoxide from light-duty vehicles and engines manufactured during or after the model year 1980 shall contain standards which provide that such emissions do not exceed 9 grams per vehicle mile. The regulations under subsection (a) applicable to emissions of hydrocarbons from light-duty vehicles and engines manufactured during or after model year 1980 shall contain standards which require a reduction of at least 90 per centum from emissions of such pollutant allowable under the standards under this section applicable to light-duty vehicles and engines manufactured in model year 1970."

(b) Subparagraph (B) of section 202(b) (1) of such Act is amended to read as follows:

"(B) The regulations under subsection (a) applicable to emissions of oxides of nitrogen from light-duty vehicles and engines manufactured during model years 1977 through 1981 shall contain standards which provide that such emissions from such vehicles and engines may not exceed 2.0 grams per mile. The regulations under subsection (a) applicable to emissions of oxides of nitrogen from light-duty vehicles and engines manufactured after the model year 1981 shall contain standards which provide that such emissions from such vehicles and engines may not exceed 1.0 grams per mile except in the case of a revision or waiver by the Administrator under paragraph (5) or (6)."

(c) Section 202(b) of such Act is amended by striking out paragraph (5) thereof and substituting the following:

"(5) (A) Upon the petition of any manufacturer or on his own motion, the Admin-

istrator, after notice and opportunity for public hearing, shall revise the standard required under subparagraph (B) of paragraph (1) with respect to light-duty vehicles and engines manufactured during any period of two or more model years beginning after the model year 1981 if he determines that such standard should be revised due to (i) the lack of available, practicable, emission control technology to meet such standard during such period, (ii) the cost of compliance with such standard, and (iii) the impact of such standard on motor vehicle fuel consumption. No such revision may be made if the Administrator determines that such revision would endanger public health.

"(B) A revised standard established under this paragraph shall provide for such reduction of emissions of oxides of nitrogen from light-duty vehicles and engines as the Administrator deems appropriate based on (i) technology which is available and practicable during the period for which such standard applies, (ii) the cost of compliance, (iii) the impact on motor vehicle fuel consumption, and (iv) the need to protect public health. No such standard shall permit emissions of oxides of nitrogen in excess of 2.0 grams per vehicle mile.

"(C) A revised standard promulgated under this paragraph shall apply for a period of not less than two model years.

"(D) A revised standard established under this paragraph shall take effect beginning with the third model year which begins after the model year during which it is promulgated. In the case of a petition submitted by a manufacturer under this paragraph within such period as may be appropriate for purposes of this subparagraph, the Administrator shall promulgate a revision, or refuse to promulgate such a revision, within ninety days after the receipt of such petition.

"(6) (A) Upon the petition of any manufacturer, the Administrator, after notice and opportunity for public hearing, may waive the standard required under subparagraph (B) of paragraph (1) for any class or category of light-duty vehicles and engines manufactured by such manufacturer during any four or more model years beginning after the model year 1981 if he determines that such waiver is necessary to permit the use of an innovative power train technology in such class or category which use can produce a substantial energy saving for such class or category as compared to conventional power trains incorporating spark ignited, gasoline, internal combustion engines. No such waiver may be granted if the Administrator determines that such waiver would endanger public health.

"(B) Upon granting a waiver under this paragraph respecting any class or category of vehicles or engines, the Administrator shall promulgate an interim standard applicable to such class or category such as will (i) permit the use of the innovative power train technology on the basis of which such waiver was granted and (ii) take into account the need to protect public health. No such interim standard shall permit emissions of oxides of nitrogen in excess of 2.0 grams per vehicle mile.

"(C) A waiver under this paragraph shall apply for a period of not less than four model years.

"(D) An interim standard promulgated under this paragraph shall take effect beginning with the third model year which begins after the model year during which it is promulgated. In the case of a petition submitted by a manufacturer under this paragraph within such period as may be appropriate for purposes of this subparagraph, the Administrator shall grant a waiver or refuse to grant such a waiver within ninety days after the receipt of such petition.

"(7) (A) Following each model year, the Administrator shall report to the Congress respecting the motor vehicle fuel consump-

tion consequences, if any, of the standards applicable for such model year in relationship to the motor vehicle fuel consumption associated with the standards applicable for the immediately preceding model year.

"(B) The Secretary of Transportation and the Federal Energy Administration shall each submit to Congress, as promptly as practicable following submission by the Administrator of the fuel consumption report referred to in subparagraph (a), separate reports respecting such fuel consumption.

"(8) The Administrator shall undertake a study and, not later than June 30, 1980, submit a report to Congress respecting whether or not a standard for emissions of oxides of nitrogen from light duty vehicles and engines which provides for a lower level of emissions than the level otherwise required under this section is necessary in order to protect public health."

And renumber the following sections accordingly.

Page 97, strike out line 9 and all that follows down through line 6 on page 98 and insert in lieu thereof the following:

Sec. 26. (a) Section 203(a) (3) of the Clean Air Act is amended by inserting "(A)" after "(3)" and by adding the following new subparagraph (B) at the end thereof:

"(B) for any person engaged in the business of repairing, servicing, selling, leasing, or trading motor vehicles or motor vehicle engines, or who operates a fleet of motor vehicles, knowingly to remove or render inoperative any device or element of design installed on or in a motor vehicle or motor vehicle engine in compliance with regulations under this title following its sale and delivery to the ultimate purchaser, or."

(b) Section 203(a) of such Act is amended by adding the following at the end thereof: "Nothing in paragraph (3) shall be construed to require the use of manufacturer parts in maintaining or repairing any motor vehicle or motor vehicle engine. For the purposes of the preceding sentence, the term 'manufacturer parts' means, with respect to a motor vehicle engine, parts produced or sold by the manufacturer of the motor vehicle or motor vehicle engine."

(c) Section 205 of such Act is amended to read as follows:

#### "PENALTIES"

"Sec. 205. Any person who violates paragraph (1), (2), or (4) of section 203(a) or any person, manufacturer, or dealer who violates paragraph (3) (A) of section 203(a) shall be subject to a civil penalty of not more than \$10,000. Any person who violates paragraph (3) (B) of such section 203(a) shall be subject to a civil penalty of not more than \$2,500. Any such violation with respect to paragraph (1), (3), or (4) of section 203 (a) shall constitute a separate offense with respect to each motor vehicle or motor vehicle engine."

Page 98, strike out line 7 and all that follows down through line 20 and insert in lieu thereof the following:

Sec. 27. (a) Section 207(b) (2) of the Clean Air Act is amended by adding the following at the end thereof: "No such warranty shall be invalid on the basis of any part used in the maintenance or repair of a vehicle or engine if such part was certified as provided under subsection (a) (2)."

(b) Section 207(a) of such Act is amended by striking out "(1)" and "(2)" and inserting in lieu thereof "(A)" and "(B)" respectively, by inserting "(1)" after "(a)" and by adding the following new paragraph at the end thereof:

"(2) In the case of a motor vehicle part or motor vehicle engine part, the manufacturer or rebuilder of such part may certify that use of such part will not result in a failure of the vehicle or engine to comply with emission standards promulgated under section 202. Such certification shall be made only under

such regulations as may be promulgated by the Administrator to carry out the purposes of subsection (b). The Administrator shall promulgate such regulations no later than two years following the date of the enactment of this paragraph."

(c) Section 207(b) of such Act is amended by striking out "its useful life (as determined under section 202(d))" in each place it appears and inserting in lieu thereof "a period of eighteen months or eighteen thousand miles (or the equivalent), whichever first occurs".

(d) Section 207(c)(3) of such Act is amended by inserting after the first sentence thereof the following: "The manufacturer shall provide in boldface type on the first page of the written maintenance instructions notice that maintenance, replacement, or repair of the emission control devices and systems may be performed by any automotive repair establishment or individual using any automotive part which has been certified as provided in subsection (a)(2)."

(e) Section 207 of such Act is amended by adding the following new subsection at the end thereof:

"(g) Nothing in this section shall be construed to provide that any labor required to be provided at the cost of the manufacturer pursuant to warranty under regulations under subsection (b)(2) may be performed by any persons other than persons specified by the manufacturer or that any part required to be provided at the cost of the manufacturer under such warranty may be other than a part specified by the manufacturer."

(f) Section 214 of such Act is amended by adding the following new paragraph at the end thereof:

"(7) The term 'emission control device or system' means, for purposes of section 207, a catalytic converter, thermal reactor, or other component installed on or in a vehicle for the sole or primary purpose of reducing vehicle emissions. Such term shall not include those vehicle components which were in general use prior to model year 1968."

Page 98, strike out line 25 and all that follows down through line 18 on page 99 and substitute:

"(B) The Administrator shall by regulation prescribe an inspection or testing procedure applicable to a representative sample of new motor vehicles in various classes or categories. Such inspection or testing procedure shall be consistent with the regulations of the Administrator under section 215, and shall be applicable to new light-duty vehicles and engines manufactured during and after model year 1980.

Page 100, strike out line 16 and all that follows down through line 13 on page 104 and renumber the following sections accordingly.

Page 127, strike out line 13 and all that follows down through line 7 on page 128 and renumber the following sections accordingly.

Page 104, strike out line 14 and all that follows down through line 22 and renumber the following sections accordingly.

Page 104, strike out line 23 and all that follows down through line 12 on page 105 and renumber the following sections accordingly.

Page 130, after line 22 insert the following:  
Sec. 49. (a) Section 110(a)(G) of the Clean Air Act is amended by inserting the following before the semicolon at the end thereof: ", and it complies with applicable provisions of section 215 respecting the annual inspection and maintenance of motor vehicles registered in such State".

(b) Part A of title II of the Clean Air Act is amended by inserting the following new section after section 214:

#### "INSPECTION AND MAINTENANCE"

"Sec. 215. (a)(1) Each applicable implementation plan which, as in effect on June 30, 1975, contained transportation con-

trol measures applicable to any air quality control region in a State, shall provide for the annual inspection and maintenance, and may provide for the testing of all light-duty vehicles (other than new vehicles) to which this section applies which are registered in such region by any person whose residence or principal place of business (or both) is located in such air quality control region. Such program of inspection, and maintenance (and, if applicable, testing) shall be conducted in accordance with regulations of the Administrator which—

"(A) shall require that emission control systems and devices are properly installed and operative,

"(B) may require that the vehicle or engine components which are necessary for the proper operation of such systems and devices are restored to the settings specified by the manufacturer, and

"(C) may require that inoperative or malfunctioning parts which are necessary for the proper operation of such systems and devices are replaced.

Such plan shall, except as permitted under subparagraph (A) or (B) of paragraph (2), prohibit the registration and operation of vehicles (other than new vehicles) subject to such inspection and maintenance (and, if applicable, testing) in such State unless such vehicles comply with such program.

"(2) The regulations of the Administration shall—

"(A) provide for the exemption from the inspection and maintenance (and, if applicable, testing) required under this section of such antique and other vehicles as the Administrator deems appropriate, and

"(B) authorize the operation of vehicles which have not met the requirements of regulations under paragraph (1) for such temporary period as may be appropriate to repair or adjust the vehicle in order to meet such requirements.

"(b) For purposes of complying with the provisions of subsection (a), the plan may require testing for emissions using testing procedures and equipment approved by the Administrator and shall permit the use of existing State motor vehicle inspection and testing facilities and procedures so long as they are consistent with such requirement. The Administrator shall approve testing procedures and equipment for purposes of this paragraph only if he determines that such procedures and equipment comply with such standards respecting calibration, instrumentation, and maintenance as he deems appropriate.

"(c)(1) Each applicable implementation plan required under subsection (a) to prohibit the registration and operation of noncomplying vehicles may permit the registration and operation of any such vehicle if—

"(A) following the inspection and maintenance (and, if applicable, testing) by reason of which such vehicle was determined to be a noncomplying vehicle, any measures required under the regulations promulgated under subsection (a)(1) have been taken with respect to such vehicle.

"(B) with respect to such vehicle, any nonconformity covered by section 207 (a), (b), or (c) has been remedied,

"(C) such vehicle has (for purposes of providing statistical information only) been reinspected and, if testing was originally required, retested under this section following the actions referred to in subparagraphs (A) and (B) of this paragraph.

Nothing in the preceding sentence shall be construed to prohibit the Administrator from approving any implementation plan which contains any requirement prohibiting the registration and operation of any noncomplying vehicles.

"(2) The requirements or authority contained in this section shall not be deemed

to affect or impair any requirement contained in any other provision of this Act.

"(d) Regulations of the Administrator under this section shall provide for retest of any vehicle which initially was tested and failed to meet applicable requirements of the program."

(c) Section 210 of such Act is amended by adding the following at the end thereof: "Grants may be made under this section by way of reimbursement in any case in which amounts have been expended by the State before the date on which any such grant was made. Any grant under this section may be reduced or suspended by the Administrator upon his determination, following notice and opportunity for a public hearing, that a State vehicle inspection and maintenance program is not equal to or more stringent than the requirements established pursuant to section 215".

(d) Not later than six months after the date of enactment of this Act, the Administrator shall notify each State which will be required to revise the applicable implementation plan to include an inspection and maintenance program for purposes of compliance with the amendments made by this section, and each such State shall submit to the Administrator a revision of such plan as provided by section 110(h)(2)(F) as amended by section 7 of this Act. In any event the requirements of this section shall be implemented no later than 30 months after the date of enactment of this Act.

And renumber the following section accordingly.

#### SECTION BY SECTION SUMMARY: RIEGLE-GRIFFIN MOBILE SOURCE EMISSION CONTROL AMENDMENT TO BE OFFERED TO TITLE II OF THE CLEAN AIR ACT AMENDMENTS—S. 252

##### LIGHT-DUTY MOTOR VEHICLE EMISSIONS

The schedule of emission standards in this section, already adopted by the House of Representatives, May 26, in a 255 to 139 vote on the Dingell-Broyhill substitute to H.R. 6161, reflects the agreement reached by Representatives Dingell and Broyhill and Senators Riegle and Griffin, and Mr. Leonard Woodcock and Mr. Douglas Fraser of the United Auto Workers.

This agreement provides that automobiles manufactured during model years 1978 and 1979 meet the same emission standards applicable for model year 1977, that is: 1.5 grams per mile hydrocarbons, 15.0 gpm carbon monoxide, and 2.0 gpm oxides of nitrogen. For 1980 and subsequent model years the hydrocarbon standard requires a full 90 percent reduction from the levels emitted in model year 1970, or .41 gpm hydrocarbons. For 1980 and subsequent model years the carbon monoxide standard is 9.0 gpm. For 1980 and 1981 the oxides of nitrogen standard is 2.0 gpm.

For 1982 and subsequent model years the NO<sub>x</sub> standard is 1.0 gpm which the EPA Administrator is permitted to revise up to 2.0 gpm for periods of two or more model years if he determines in a suspension proceeding that such standard should be revised due to (1) the lack of available, practicable, emission control technology to meet such standard during such period, (2) the cost of compliance with such standard, and (3) the impact of such standard on motor vehicle fuel consumption. No such revision may be made if the Administrator determines that it would endanger public health.

Additionally, the Administrator may waive the standard of 1.0 gpm NO<sub>x</sub> up to 2.0 gpm during any period of four or more model years beginning with the model year 1982 if he determines that a waiver is necessary to permit the use of an innovative power train technology that can produce a substantial energy saving compared to conventional power trains. No waiver may be granted if the Administrator determines it would endanger public health.

## Auto emissions schedule, Riegle-Griffin/Fraser-Woodcock (UAW)

|                     | HC (gpm) | CO (gpm) | NO <sub>x</sub> (gpm) |
|---------------------|----------|----------|-----------------------|
| 1978-79             | 1.5      | 15.0     | 2.0                   |
| 1980-81             | .41      | 9.0      | 2.0                   |
| 1982 and thereafter | .41      | 9.0      | 1.0-2.0               |

<sup>1</sup> Suspension or waiver for NO<sub>x</sub> based on EPA Administrator decision, if public health would not be endangered.

This auto emission schedule provides certainty in the industry and job certainty. It is environmentally balanced with the energy conservation demands of the nation and provides savings for consumers while improving air quality and protecting public health.

The Riegle-Griffin auto emission amendment will replace Sections 20, 21, and 22 of S. 252.

## ANTI-TAMPERING PROVISION

This section of the amendment, taken from S. 919, extends existing prohibition against knowing removal or tampering with automotive emission controls to cover independent repair and service businesses, and selling, leasing, trading, and fleet operations. A civil penalty of up to \$2500 per vehicle is established for violations of this prohibition. It has been adopted by the House. It replaces Section 26 of S. 252.

## WARRANTIES AND MOTOR VEHICLE PARTS CERTIFICATION

This provision, which the automotive aftermarket, small business parts industry, describes as critical to their continued existence as a viable force in the free marketplace, would do the following: (It is contained in S. 919, Riegle-Griffin, and H.R. 6161, the House-passed bill.)

1. Reduce the current federally mandated performance warranty from 5 years to 50,000 miles to 18 months or 18,000 miles.

2. Provide for a self-certification program under regulations to be promulgated by EPA, through which the independent parts manufacturer or rebuilder may continue to serve its traditional role in the automotive aftermarket.

3. Require the motor vehicle manufacturer to prominently disclose in its maintenance instructions "notice that maintenance, replacement, or repair of the emission control devices and systems may be performed by any automotive repair establishment or individual using any automotive part which has been certified . . ."

4. Provide a meaningful and rational definition of the term "emission control device or system" as a catalytic converter, thermal reactor, or other component installed on or in a vehicle for the sole or primary purpose of reducing vehicle emissions, excluding those vehicle components which were in general use prior to model year 1968.

This warranty section replaces the aftermarket provisions of S. 252, sections 27, 28, 30, 31, 32, 33, and 45.

## PRODUCTION LINE TESTING

This section amends S. 252, Section 28, and requires the Administrator to prescribe regulations which would require automobile manufacturers to implement a program of inspection or testing of a representative sample of the various classes or categories of new motor vehicles. In order to allow the Administrator sufficient time to develop meaningful and workable regulations in this area and in order to allow the manufacturers sufficient lead time to adequately comply with such regulations, the requirements of this provision would be applicable to vehicles manufactured during model year 1980 and thereafter. The inspection or testing program prescribed by the Administrator is required to be consistent with the require-

ments for inspection or testing under the State programs for emission control inspection and maintenance. The use of a representative sample will give a clear indication of whether cars are actually meeting the required standards without imposing upon consumers the needless costs that would be attendant to an unnecessary requirement of testing all new motor vehicles.

## PRESALE TESTING BY STATES

Section 34 of S. 252 grants authority to require the testing of new motor vehicles by the automobile dealer prior to sale. The Riegle-Griffin amendment strikes this section inasmuch as it would require unnecessary, costly, repetitive, and burdensome responsibilities on our thousands of automobile dealers. The Riegle-Griffin amendment already provides for this type of test at the end of the production line and it would be disservice to our consumers to require them to bear the costs of a repetitive test even before the car has ever been sold. This type of regulatory overkill is clearly unnecessary and unwise as a matter of national policy.

## PREEMPTION

Section 35 of S. 252, which provides that the States may require that model year 1979 automobiles meet the more stringent 1980 standards, is clearly unworkable. Realistically, this bill will not be enacted into law until July of this year or later. By the time the States would have an opportunity to conclude their decision-making process and develop and compile the data and information necessary to make the required showings to the Administrator, and allow adequate time for the Administrator to render a decision, it would be October at best and probably later. Inasmuch as the year-long EPA certification process for the 1979 model cars begins in midsummer of this year, there is already an inadequate lead time for designing, planning, engineering, building of prototypes, testing and retooling for 1979 models if standards are changed for that year. If the automobile manufacturers are required to change their production patterns that late in the year, full production would become impossible. Such a situation will result not only in disruption within the automobile industry, but may also result in substantial unemployment to automotive workers. As we have recently observed, the effect of such an occurrence is to produce significant adverse impacts throughout our national economy. It is just not worth the risk.

## VEHICLE INSPECTION AND MAINTENANCE

This section would add to and considerably strengthen S. 252 by requiring an annual emission inspection of light duty vehicles which are registered to persons who live or maintain their principal place of business in an area where transportation control measures were required as of June 30, 1975. This provision allows flexibility to the EPA Administrator to structure an inspection program that is workable, effective, and requires only necessary adjustments to vehicles. These programs shall be implemented not later than 30 months after date of enactment of this Act.

## NOTICES OF HEARINGS

## CIVIL RIGHTS OF INSTITUTIONALIZED PERSONS—S. 1393

Mr. BAYH. Mr. President, the Subcommittee on the Constitution has scheduled hearings on S. 1393, a bill to grant the U.S. Justice Department standing to initiate and to intervene in suits brought to enforce constitutional and Federal statutory rights of persons confined in State institutions, on the following dates:

Friday, June 17, at 10 a.m., in room 2228 Dirksen;

Wednesday, June 22, at 10 a.m., in room 2228 Dirksen;

Thursday, June 23, at 10 a.m., in room 1202 Dirksen;

Thursday, June 30, at 10 a.m., in room 2228 Dirksen;

Any persons wishing to submit written statements for the hearing record should send them to the Subcommittee on the Constitution, room 102B Russell Senate Office Building, Washington, D.C. 20510.

## FOREIGN INTELLIGENCE SURVEILLANCE ACT OF 1977

Mr. McCLELLAN. Mr. President, I wish to announce that the Subcommittee on Criminal Laws and Procedures of the Committee on the Judiciary will hold open hearings on S. 1566, a bill to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information, on June 13 and 14, 1977.

The hearings will begin on June 13 at 2 p.m., and on June 14 at 10 a.m., in room 2228, Dirksen Senate Office Building.

Additional information on the hearings is available from the subcommittee staff in room 2204-DSOB, telephone AC 202-224-3281.

## COMMITTEE ON GOVERNMENT AFFAIRS

Mr. RIBICOFF. Mr. President, I wish to announce that on June 7 and June 9, 1977, the Committee on Governmental Affairs will hold hearings on blind trusts, related conflict of interest matters, and S. 695, the "Defense Production Act Amendments of 1977." The hearings on Tuesday, June 7, will begin at 10:30 a.m. in room 3302 Dirksen Senate Office Building. The hearings on Thursday, June 9, will begin at 10 a.m. in room 3302, Dirksen Senate Office Building.

## HUMAN RESOURCES SUBCOMMITTEE ON ALCOHOLISM

Mr. HATCH. Mr. President, I wish to announce that a field hearing will be held by the Subcommittee on Alcoholism and Drug Abuse of the Human Resources Committee on June 20, 1977, pertaining to the impact of alcoholism on the family.

The hearing will commence at 9 a.m. in the Governor's board room located in the Utah State Capitol in Salt Lake City.

Further information can be obtained from the subcommittee's minority counsel, Mr. Robert P. Hunter, in room 6317, Dirksen Office Building, telephone 224-5251.

ASSOCIATE ADMINISTRATOR FOR WOMEN'S  
ENTERPRISE

Mr. NELSON. Mr. President, I wish to announce that the Senate Small Business Committee will hold a hearing on S. 1526, a bill to establish an Associate Administrator for Women's Business Enterprise within the Small Business Administration on June 16 in room 424, Russell Senate Office Building, beginning at 10 a.m.

Senator BARTLETT of Oklahoma has been designated as chairman of this hearing. A representative of the Small Business Administration as well as representatives of various small businesses and association have been invited to testify.

Further information can be obtained from the committee offices, room 4244, Russell Senate Office Building, telephone 224-5175.

## COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. JACKSON. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Committee on Energy and Natural Resources.

The hearing is scheduled for Wednesday, June 15, beginning at 10 a.m., in a room to be announced.

The subject of the hearing will be:

H.R. 6550—To authorize certain appropriations for the territories of the United States, to amend certain acts relating thereto, and for other purposes.

S. 1033—To amend section 2 of the act of June 30, 1954, providing for the continuance of civil government for the Trust Territory of the Pacific Islands, and for other purposes;

S. 950—To authorize the appropriation of \$12,400,000 for rehabilitation and resettlement of Enewetak Atoll, Trust Territory of the Pacific Islands, and for other purposes;

S. 1192—To provide for the relief of certain residents of the Trust Territory of the Pacific Islands;

S. 1193—To authorize \$15,000,000 for the Government of Guam;

S. 1032—To authorize a program of grants to the government of Guam for capital improvements of public facilities, and for other purposes;

S. 1327—To amend section 2 of the act of June 30, 1954, as amended, providing for the continuance of civil government for the Trust Territory of the Pacific Islands, and for other purposes.

For further information regarding the hearing you may wish to contact Mr. James P. Beirne of the committee staff on 224-2564. Those wishing to submit a written statement for the hearing record should write to the Committee on Energy and Natural Resources, Dirksen Senate Office Building, Washington, D.C. 20510.

## SUBCOMMITTEE ON MONOPOLY

Mr. NELSON. Hearings by the Senate Small Business Committee, Subcommittee on Monopoly, on the safety and efficacy of the over-the-counter sleep-aids and daytime sedatives, of which 2 days were held on October 29 and 30, 1975, will be concluded on June 14 and 21. The 2 days of hearings will be in room 6202 Dirksen Building at 9:30 a.m. each day. Witnesses will be announced at a later date.

## ADDITIONAL STATEMENTS

SINGLAUB FIRING A WARNING TO  
JOINT CHIEFS ON SALT?

Mr. HATCH. Mr. President, it seems only yesterday that the military were criticized for allowing themselves and the country to be sold out in Vietnam by civilian politicians in Washington. The question was asked whether the military people in the know expressed themselves loudly and clearly enough that the civilian decisionmakers understood. Or did they put their careers first, thereby allowing politicians to put politics first?

General Singlaub, until recently Chief of Staff in the U.S. Forces Korea headquarters, is obviously in the know. He is, also, obviously a man of integrity, who put the interests of world peace ahead of his military career, although he perhaps underestimated the personal risk by taking too seriously President Carter's rhetoric about candor and openness.

General Singlaub went public with the same message that his commander in chief, General Vessey, expressed directly to President Carter and Defense Secretary Brown: withdrawal of U.S. troops in Korea is a mistake that will end in war. He went public after the advice of the military people in the know was ignored by politicians, apparently for political reasons. It cost him his job. So much for the candor and openness of the Carter administration.

What is the political reason for which world peace is being endangered? The leftwing of American politics has worked hard to set up South Korea to be sold out. Is Carter fulfilling a campaign promise to the leftwing of his party? Is that the politics that is overruling the advice of the military men in the know?

Mr. President, to sell out another ally is a serious business. Those who remain are no doubt wondering who is next. To have the military muzzled by inexperienced civilian politicians is also serious business. And it is a serious business to punish a distinguished military man for abiding by the tenets of post-Watergate morality.

But what is really ominous about the harsh action taken against General Singlaub is that it may be a warning to the Joint Chiefs about SALT. If so, the message of intimidation is clear: Politics comes before national security, so do not blow the whistle on SALT. Have General Singlaub's concerns about Korea played into the administration's hands, and has he been used to send a message to the military: if you value your career, do not worry about the Nation's security.

The Wall Street Journal raises these questions in a thoughtful editorial. I ask unanimous consent for the Wall Street Journal's editorial of May 24 to be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

## BEYOND GENERAL SINGLAUB

The public humiliation of Maj. Gen. John K. Singlaub seems at first glance a curious presidential overreaction. Over the last decade hundreds of generals have complained about Washington in interviews with thousands of journalists. General Singlaub voiced his complaints more candidly than most,

and no doubt should have been told not to do it again. But why the show of presidential force majeure, why the trans-Pacific flight, why the public meeting? Why the media event?

General Singlaub's prediction that war would result from withdrawing U.S. forces from Korea of course came at an awkward moment, just as other U.S. officials were arriving there to negotiate the planned withdrawals. President Carter has demonstrated considerable ability to tolerate such embarrassments when they are perpetrated by his Ambassador to the United Nations. But with the general, he chose to turn the matter into a MacArthur case, which it surely is not. General MacArthur disobeyed a direct order to clear policy statements; General Singlaub pledged "enthusiastic" execution of the orders despite any personal disagreement.

Both cases do raise, though, the broad question of the role of military experts in a democratic system of government. We certainly do want civilian control and a chain of command. We do not want military men trying to sabotage a President's foreign policy or leading a political campaign against it. On the other hand, the ultimate sovereign is not the President but the public. And if generals on the scene really do believe a President's policy would lead to war, this is certainly something the public has a right to know.

These principals do not rest easily together, but some balance needs to be struck. In practice, the American error has not been on the side of military intrusion into politics. Even General MacArthur faded away. The practical problem, rather, has been political intrusion into the military.

In the early days of Vietnam, the enthusiasts tended to be Pentagon whiz kids, the skeptics career officers. Even as late as 1965 the generals were not taken seriously on their estimates of the size of the commitment needed to succeed; the estimates suggested too large a war to suit political convenience. In more recent years, generals privately distressed about the growing Soviet threat have allowed themselves to be paraded before Congress to testify that U.S. defenses are adequate. The effect has been to free Presidents to follow the dictates of domestic politics, and to blame the generals if things go wrong.

General Singlaub's offense was to take this option away from President Carter in the case of Korea. While in no meaningful sense insubordination, his public expression of the military view does force Mr. Carter to take responsibility for his own decision, which after all was made not after deliberating on military advice but to please a particular constituency at a particular point in a political campaign. If war does come in the Korean peninsula, Mr. Carter cannot plead that his best military advice was that the withdrawals were safe.

The massive retaliation against General Singlaub will close down the one avenue military men had for edging their views into the public domain. For the duration of the Carter Presidency, journalists can forget about interviewing generals. Even if an officer is willing to risk an interview, no candor can be expected. Secretary of Defense Brown declared on Sunday that once a policy is set, an officer is expected "to support that policy publicly if he plans to stay in the military," even if he has advised against it and in fact privately dissents. So the journalists, and for that matter the public and the Congress, will be dealing with officers who may be facing the blunt choice: Resign or lie.

And it is by no means merely a matter of the Korean withdrawals. In the most recent round of strategic arms talks in Geneva, the Joint Chiefs representative was excluded until the final day. The Chiefs themselves learned of some U.S. initiatives only after the

Russians had. Yet if a treaty is reached, the Chiefs will be paraded once again to say that it is militarily acceptable.

Suddenly the extent of the fuss over General Singlaub makes sense. It is not a flap over one general in Korea; it is about imposing a gag on the entire officer corps. Indeed, about turning the officers into pawns to advance policies they oppose. In the interests of the generals, and in the interests of the public, there is only one answer. The generals will have to show some exceptional courage. They will have to take up Secretary Brown's advice, and for the first time start a tradition of resignation over points of principle.

Mr. HATCH. Mr. President, other editorials have raised the question of the wisdom of withdrawing our troops from Korea in the face of contrary military judgment. It has been asked if it is worth the risk of war to appease the American left-wing. Others wonder if American foreign policy is now operating on the basis of a widened "Sonnenfeldt doctrine." Sonnenfeldt, a top aide to Henry Kissinger, expressed the doctrine that European stability would be furthered by the Russians exercising tighter control over Eastern Europe. Mr. Young, our Ambassador to the U.N. has now extended this doctrine to Africa where he says the Communists have brought stability to Angola. Is the Carter administration now counting on the Communists to bring stability to Korea in the way they brought it to Indo-China? Where next shall we have this stability? Taiwan? Japan? Western Europe?

In his speech at Notre Dame University, a speech that was sharply criticized by the Detroit News, the President said that we can now go forward as a nation free of our old "inordinate fears" of communism. What does this mean? Does it mean that we no longer pay any attention to military facts? Does it mean that General Singlaub and his commander, General Vessey, are expressing "inordinate fears" of communism and not the facts of the Korean military situation? Is General Ellis, a NATO commander, expressing "inordinate fear" when he points out, as he recently did, that the Soviet Union's military capacity far outweighs its defensive requirements? Does it mean that we do not need the Mark 12A warhead, the B-1, the Trident?

Mr. President, Soviet leaders speak of their military forces as the most powerful ever assembled on Earth. What are they assembled for? Is it President Carter, or just his speech writers who are out of touch with reality?

Perhaps a moralistic foreign policy can be effective if our opponents share the moral tenets that it is built upon. But if they believe, as they show every indication of believing, that violence is the only effective force in history, then a moralistic foreign policy may be just another name for selling out our people and other peoples who do not want to be dominated by the Communists. Idealism detached from realities is dangerous, particularly for a nation that may have to face the most powerful military forces ever assembled on Earth.

I ask unanimous consent for editorials from the Wall Street Journal and the

Columbus Dispatch to be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, May 31, 1977]

#### REVIEW KOREA PULLOUT

We're glad to see that the House subcommittee that heard Maj. Gen. John Singlaub last week focused less on the prerogatives involved in his firing than on the substance of his views. Will in fact the planned withdrawal of U.S. troops from Korea lead to a war?

While we hesitate over anything so definite as General Singlaub's statement that war "will" result, it does seem to us that an American withdrawal would significantly increase that likelihood. Beyond that, even without a new war on the Korean peninsula, Mr. Carter's withdrawal plans are likely to do considerable damage to the American position in the world.

South Korea is of course scarcely a popular nation in current American opinion, and for no small reasons, given bribery in this country and the Park regime's violations of human rights at home. But while the withdrawal promises appeal to a certain sector of Mr. Carter's constituency, they seem a strange way to retaliate for bribery and human rights violations, for they put the entire South Korean population at a military and psychological disadvantage against a well-armed neighbor that consistently threatens invasion, and pays even less respect to human rights. Opposition leaders and other Korean critics of the Park regime are also strongly opposed to a U.S. troop pullout.

Withdrawal of U.S. ground troops would remove an important psychological deterrent to North Korea. Under the Carter plan American airpower would remain, but as one U.S. source in Korea told the Washington Post, "War-planes are like geese. They can honk and fly away." If that should happen, North Korea would add air superiority to its growing list of military advantages over its southern neighbor.

The North, which has undertaken a massive military buildup during the past year, already leads in tanks, armored personnel carriers, artillery pieces, multiple rocket launchers, submarines and naval coastal vessels. South Korea lags in all these areas precisely because U.S. defense policy has been to integrate Seoul's conventional forces beneath a U.S. defense umbrella. That is, Washington has deliberately limited the ROK's offensive capability, while the Soviets and Chinese have practiced no such restraint in arming the North.

The spectacle of the U.S. withdrawing in the face of these risks would reach beyond the Korean peninsula. In particular, it would greatly unnerve Japan. The Japanese government is paying lip service to the Carter plan, because of pressure from Washington. But the nation's real feelings were expressed in a recent resolution sponsored by seven Japanese cabinet ministers and more than 235 legislators from the nation's two leading political parties. The resolution declared that a pull-out would be "an invitation to instability in the Korean peninsula . . . and northeast Asia as a whole."

Mainland China, somewhat similarly, publicly supports North Korean ambitions. But its foreign policy, and above all its relations with the U.S., are dominated by the need for a counterweight to the Soviet Union. A unilateral U.S. withdrawal from Korea, on the heels of the American flight from Vietnam, could scarcely be a good omen as seen from Peking. The show of American irresolution might even nudge a reluctant China back toward the Soviets.

The Carter administration is making a mistake to treat our 1954 mutual defense

treaty with South Korea as something that can be altered without risk by applying the proper cosmetic. The purpose of that treaty is not to keep U.S. troops in Asia forever but to keep them as long as necessary to curb Communist aggression, maintain the regional balance of power and give South Korea the chance to work out its own political system free from outside domination. It is the same reason U.S. troops have been in Europe for more than 30 years, not out of habit but because they are an anchor of stability that serves American interests.

[From the Columbus Dispatch, May 25, 1977]

#### EDITORIAL

White House policy to withdraw American ground troops from South Korea deserves a careful and impartial congressional review.

President Carter's decision to sack Maj. Gen. John Singlaub for public statements critical of administration policy may tighten military discipline, but the episode raises several issues about the wisdom of U.S. policy.

The general, third-ranking U.S. Army official in Korea, believes, as do a number of other military leaders, that the planned withdrawal of 33,000 U.S. ground troops "will lead to war," inviting another North Korea invasion of the South.

Although the White House would retain air support for the South Korean government and renew its defense commitment, U.S. Army officers evidently think these measure inadequate.

And, so do the South Koreans who recall how withdrawal of American ground troops from Indochina brought reduced U.S. support for the South Vietnamese government.

The presence of American Army forces, it is argued, serves as a trip wire, assuring that Washington will assist the Koreans to repulse another attack from the North.

Since the Korean War in 1950, a U.S. military presence has brought stability to the region, preventing war and permitting the economic recuperation of both Korea and Japan.

Circumstances change, however, and some Defense Department planners think this country can maintain peace in Asia without the need for a permanent ground presence.

And, while Congress is reviewing this defense commitment, it should explore another Korean issue.

Majority Democrats, eager to investigate Republican wrongdoing, have exhibited little interest in probing charges of illicit gifts to congressmen from South Korea sources.

This matter, too, deserves a full airing.

#### PAUL GRASS WINS ESSAY CONTEST ON GOOD CITIZENSHIP

Mr. STENNIS. Mr. President, a young Mississippian, Mr. Paul Grass, of Clarksdale, Miss., recently won an essay contest on the subject of good citizenship. The contest was held among high school students and was sponsored by the Civitan Club. Paul's essay shows an exceptional knowledge and appreciation of the founding ideals and principles of America, as well as the rights and responsibilities of our citizens. This understanding is rarely so well stated, especially by someone of this young man's age. Mr. President, I ask unanimous consent that Mr. Paul Grass' essay on American citizenship be printed in full in the RECORD.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

# PAUL GRASS CAPTURES CIVITAN ESSAY CONTEST (By Paul Grass)

A citizen of the United States of America lives in an environment of almost boundless freedom. He enjoys numerous rights and liberties and is under the protection of a Constitution which guarantees him freedom of speech, press, and religion. He is granted the opportunity to take part in government by electing persons to represent him in making the nation's decisions or by running for a government position himself. His native land, known around the globe as the "land of opportunity," is recognized as the leader of the free world. Throughout her history, America has stood firmly for individual liberty against colonial empires, totalitarian dictators, and communist aggressors. She has been subjected to trials both from within and without and has consistently emerged triumphant as the stronghold of freedom.

However, a well-worled Constitution and a noble heritage have not made the United States the greatest nation in the world. America has become great through the willingness of the people to pay the price of democracy, to fulfill basic responsibilities, to preserve the ideals of liberty. The fortitude of the people throughout the history of America has raised the United States from a set of colonies to a world power. America has had great leaders and outstanding statesmen, but her strength lies in the fundamental readiness of the common man to perform certain duties in his own home town to "secure the blessings of liberty for ourselves and our posterity." My generation of America's youth must be willing to assume these responsibilities if we want to keep our country proud, free, and strong.

At the age of eighteen, the young citizen of the United States acquires the right to vote, the basic power which makes America a "government by the people." Frequently public officials are elected by a very narrow margin simply because only a fraction of the qualified voters bother to cast a ballot. If every citizen does not vote or does not register to vote, the outcome of the election does not reveal the attitude of all the people. If the people are to remain sovereign in America, we must exercise our right to vote; therefore, each of us is obligated to vote in every election.

The Constitution assures all Americans freedom of speech and press. Thus we must be willing to speak out to protest our freedom and to stand for what we believe is right in the face of what is wrong. A strong America is one in which the voice of the people, young and old, is the voice heard and obeyed. When the government is in a state of indecision, it is the duty of the governed to correct the mistake or to make the proper decision through free speech and press. Only in exercising our freedom can we keep free speech and a free press.

Television, radio, and the newspaper are amazing devices which few American homes lack; yet the basic purpose of the media is too frequently overlooked. These inventions are methods of communication meant to keep us informed of what goes on beyond our daily scope of events. Many youth misuse radio and television by showing indifference to newscasts, and a large number do not read newspapers at all. We, the youth of the United States, must keep ourselves aware of happenings at home and abroad in order to safeguard our precious freedom from all forms of assault. President Franklin Roosevelt once said, "The only sure bulwark of continuing liberty is a government strong enough and well enough informed to maintain its sovereign control over its government." Around the world, tyrannous governments refuse to tell the people what they are doing; but in America, we are informed sev-

eral times a day of events in the Capitol, the White House, and foreign lands. This is a privilege that all Americans should cherish and use to the fullest.

Many young people today feel that they are free to do anything that makes them feel good. The result is a shocking number of teenage alcoholics, an increase in drug abuse, and a so-called "new morality" in regard to sex. Although the Constitution does not forbid such behavior, it does not include freedom for self-destruction. The German philosopher Immanuel Kant once said that "morality is not properly the doctrine of how we make ourselves happy, but how we make ourselves worthy of happiness." Is a proud nation one in which the citizens have immoral habits? On the contrary, "Righteousness raises a people to honour; to do wrong is a disgrace to any nation." One of the most valuable gifts that we, the youth of America, can give our country is pure minds and lives for her service.

The Constitution provides Americans with freedom of religion. Every person in the United States is free to worship as he pleases, but it pleases too many Americans not to worship at all. The present generation of young Americans prefer not to worship at all. The present generation of young Americans must return to God if we are to continue to be blessed with a strong, free land. The greatest contribution we can make to the future of America is to live by our national motto, "In God We Trust."

The first Amendment to the United States Constitution is the foundation of our American liberty; but it is not worth the sacrifices of the Founding Fathers if we do not fully practice every freedom it grants. We, the youth of the United States, are obliged to unite in exercising our liberties at all times if we are to remain "one nation, under God, indivisible, with liberty and justice for all."

## HUCK BOYD

Mr. DOLE. Mr. President, on Sunday, May 29, the town of Phillipsburg, Kans., turned out to honor their long time friend, community leader, and local newspaper publisher, McDill "Huck" Boyd.

Last week's celebration was designed to honor his contributions to Phillipsburg—he has been responsible for an increase in the number of local doctors and growth in local industrial development. However, it would be impossible for me to talk about Huck Boyd without acknowledging his contributions to our State of Kansas and to national Republican politics.

Huck was a member of the Kansas Board of Regents for 4 years and served as its chairman in 1958. He served on the board of directors of the National Association for Mental Health and has worked to expand the family doctor program in Kansas. In 1975, he was cited by the Kansas Press Association for his work in reforming rural Kansas health care.

Currently our Republican National Committeeman from Kansas, Huck has worked in countless political campaigns. He was twice a candidate for Governor and served as executive secretary to Gov. Edward Arn and as executive secretary to Kansas Republican State Committee.

I have outlined a few of Huck's contributions and accomplishments this far in his life—I have no doubt that there will be many more.

I also want to mention the element of

Huck Boyd best known to the people of Phillipsburg and to me—a very dear friend. He has had an immeasurable impact on my life as well as my political career. He has helped me learn about people and the needs of people.

Huck exemplifies the highest in personal service toward unselfish goals and he symbolizes the best in politics.

I ask unanimous consent that an article about Huck Boyd Day by Laura Scott of the Kansas City Star be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Kansas City Star, May 30, 1977]  
PHILLIPSBURG, KANS., TURNS OUT TO HONOR A FRIEND, "HUCK" BOYD  
(By Laura Scott)

PHILLIPSBURG, KANS.—In this small northwestern Kansas town yesterday one thing was very evident: They love McDill (Huck) Boyd, publisher, longtime Republican and Phillipsburg's friend.

Traditional Memorial weekend activities honored this town's most famous living son, who is known throughout the State for his contributions to the Republican party and to Phillipsburg.

About 500 persons turned out in the bright sunshine yesterday at Phillipsburg High School to give Boyd what one resident termed "a living memorial." They ranged from some of the big names in state political circles, including Sen. Bob Dole (R-Kan.) and former Gov. Frank Carlson, to the local residents who made cookies for a reception.

Although Boyd probably is best known for his work in Republican politics, including his own two unsuccessful races for governor, Phillipsburg people made it clear they were honoring their local publisher for what he has done for them. His contributions most recently have meant five new doctors for a town which several years ago was short of medical personnel.

It was their chance to say thanks to Boyd, 70, a native son whose parents, Frank and Mamie Boyd, started the newspaper which he now publishes, the Phillips County Review. After many failures to convince the modest Boyd to let them honor him, the townspeople finally went ahead without asking him.

"Huck has done more than anyone else for his community and we thought we should do something for him," said Louis Prohaska, business manager for the newspaper and a member of the arrangements committee for "Huck Boyd Day."

Besides being a candidate for governor, Boyd has worked in many Kansas political campaigns, including most of Dole's. Long active in Republican politics, he was executive secretary to former Gov. Edward Arn, executive secretary to the Republican state committee and is a Republican national committeeman.

Boyd was a member of the Kansas Board of Regents for one 4-year term and was chairman in 1958. He has served on the board of directors of the National Association for Mental Health. In 1975 he was named Kansan of the Year by the Kansas State Society in Washington and was cited by the Kansas Press Association for bringing about reforms in rural Kansas health care.

He has directed media operations for three national political conventions, including the Republican National Convention last August in Kansas City.

Professionally, he has won the William Allen White Foundation Award for journalistic merit in Kansas.

Phillipsburg residents know him best for his work for their community, including his

campaign recently to expand the family doctor program in Kansas. His work resulted in solving the physician shortage for the community.

The observation yesterday included a dinner for the Boyd family at the Vista Room of Martha's Cafe; speeches by friends, politicians and newspapermen at the high school; and a punch and cookies reception at the school. The city also had the local welcome flags out for Huck Boyd Day.

The event was organized by Phillipsburg residents, including employees at the newspaper. Mayor Bud Broun, one of the organizers, served as master of ceremonies. He read a proclamation designating yesterday as Huck Boyd Day in Phillipsburg.

Broun sounded the keynote of the day's events when he told the audience that "the Phillipsburg community has been interwoven with the Huck Boyd story."

Dole, who arrived with his wife, Mrs. Elizabeth Dole, credited Boyd with keeping him informed about problems back in Kansas.

"I never looked upon Huck Boyd as a Republican," Dole said. "We talk about people and the needs of people."

"Huck exemplifies the highest. He symbolizes the best in politics. He symbolizes what the rest of us strive to do—serve the people."

Carlson, a former governor and U.S. senator, told the audience he was indebted to Boyd because of the Phillipsburg man's past political help. Carlson recalled that at the 1968 G.O.P. convention Carlson's name was put in nomination for President "with Huck's engineering."

Longtime Boyd friends who reminisced included Gene Henderson, now of Scott City, who recalled Boyd's support of a new city park for Phillipsburg several years ago. The city got its new park, Henderson said, and then lightheartedly pointed out that Boyd "now has gotten a refinery located there."

Townpeople cited Boyd's work to get a site for a major office of Kansas-Nebraska Natural Gas Company as another of Boyd's contributions to the city.

Boyd, dressed in a powder-blue suit and sitting next to his wife, Mrs. Marie Boyd, at the speaker's table, grinned when a joke was told about him. And he seemed touched by the community interest. But Huck Boyd Day organizers revealed that he was a reluctant honoree. In the past, friends have asked Boyd's permission to have an event in his honor and he has declined every time. Mrs. Grace Brown, a former society editor at the newspaper, said, "We just went ahead this time without asking his permission," she said.

When it was Boyd's turn to talk, he told the audience, "It seems about incredible that my family, friends and associates to whom I already owe so much could have planned and carried out such an occasion."

Then, in what friends said was typical of his desire not to grab the spotlight, Boyd talked about his family—his father and mother; his wife; his brother, "Bus" Boyd, now deceased, and his staff—calling them "the highlights of my life."

"It is obvious I would have been disowned if I hadn't achieved something in community affairs," he said.

Attending the ceremonies yesterday were the Boyds' two daughters, Mrs. Patricia Hiss, of Palo Alto, Calif., and Mrs. Marcia Krauss, of Phillipsburg, and Boyd's five grandchildren.

Residents of Phillipsburg presented the Boyds with a scrapbook containing letters from friends and professional colleagues, including former President Gerald Ford; Gov. Robert Bennett; Ronald Reagan, and Mrs. Mary Louise Smith, former Republican national chairwoman.

## STUDY EMPHASIZES NEED FOR SPINAL CORD INJURY REHABILITATION

Mr. HUMPHREY. Mr. President, earlier this year I proposed an amendment to the Rehabilitation Act of 1973, S. 1120, to increase funding for support of spinal cord injury research and rehabilitation.

At that time, I stressed the value of investing in a system that has proven effective in demonstration projects authorized under the Rehabilitation Act. The model regional centers to be expanded under my bill provide early and comprehensive rehabilitation services to victims of spinal cord injuries.

A recent independent study dramatically illustrates the huge, measurable, direct and indirect losses both to society and to the individuals affected, of spinal cord injuries which result from motor vehicle accidents alone.

This study, "The Costs of Motor Vehicle Related Spinal Cord Injuries," was prepared by Charles N. Smart and Claudia R. Sanders of Policy Analysis, Inc., Boston, an organization that specializes in health economics. It was sponsored by the Insurance Institute for Highway Safety.

Mr. President, I ask unanimous consent that the foreword to this book, and a summary of its findings, be printed in the RECORD.

There being no objection, the foreword and summary were ordered to be printed in the RECORD, as follows:

### THE COSTS OF SPINAL CORD INJURIES

#### FOREWORD

Our brains maintain most of their communications with the rest of our bodies through the thousands of tiny circuits contained in our spinal cords. Many of these circuits carry incoming sensory information that lets us know how our bodies feel, what postures they are in, and whether they are operating properly. Many other circuits carry outgoing, "motor" information by which we signal our bodies what to do, such as which muscles to relax, and which to contract. It is small wonder that injuries to this remarkable communications pathway are among the most devastating that we can sustain, especially since most are permanent, being repairable neither by our bodies themselves, nor by the most advanced medical science of our day.

Physicians and others who care for persons with paraplegias and similar results of damage to the spinal cord have known for decades that large proportions of such injuries are produced in motor vehicle crashes, a fact which has not, however, been widely appreciated outside the medical community. Moreover, although improving greatly in recent decades, statistical information concerning many aspects of this field has remained inadequate, especially from the standpoint of its suitability for use as the basis of governmental and private decisions related both to the allocation of relevant resources and to the actions, such as requiring better vehicle "crashworthiness," which would decrease the number of new cases.

Since we in the Insurance Institute for Highway Safety work to identify the kinds of losses that burden the public as a result of motor vehicle use, and the steps that can be taken to reduce their frequency, severity and cost, it was logical for us to address the spinal cord injury problem, and in ways that would build on and augment the extensive

work already done in the United States and other countries. Consequently, in 1971, we first arranged with the Departments of Community Health and Orthopaedic Surgery, School of Medicine, University of California, Davis, to marshal all practical resources to determine the incidence, sources, and many other characteristics of new spinal cord cases in 18 contiguous but highly diverse northern California counties with a combined population of nearly six million people.

This has resulted in an increasing number of important additions to knowledge in this field, the reports of which are identified in the Selected Bibliography of this volume. Especially noteworthy are rates of occurrence of spinal cord injuries per capita by age and sex, counting both those who reach hospital care alive and the many who die before such care is reached. The California work also confirmed that the spinal cord injuries produced in motor vehicle crashes do indeed far outnumber those produced in any other way, a pattern that holds among both males and females of all ages.

Among the many additional results of this work to date are detailed data on survival. These confirm that spinal cord injury patients who survive the early post-injury period may be expected, typically, to survive for many years. As is well known to specialists, this reflects the great advances made in recent decades in the care of persons with such injuries, and especially in the prevention and treatment of infection.

When the results of the work in California were sufficiently available, we next contracted with Policy Analysis, Incorporated, an organization specializing in health economics, to estimate the losses our society sustains each year from the spinal cord injuries produced in motor vehicle crashes, both in relation to individual cases and in relation to all cases combined. The resultant estimates have used both conservatively modified data from the California work and the best information that could be obtained from the many other specialized sources.

The conclusions are staggering.

Each year the spinal cords of some five thousand three hundred Americans are severed, crushed, or otherwise seriously injured in motor vehicle crashes. Of these damaged people, two-thirds are less than thirty-six years of age, and more than two-thirds are male. A large majority, more than six out of ten, do not die, but only a small minority of these ever functionally recover. Most, some two thousand six hundred each year, further increase the already huge number of other Americans with similar injuries. The process continues year after year.

Yet from an economic standpoint, it is noteworthy that the costs of this damage to people remain largely external to the balance sheets of many whose actions, of both commission and omission, substantially influence the numbers of Americans whose spinal cords will be injured in some of the millions of motor vehicle crashes that occur, for all sorts of reasons, in the United States each year. Such costs cannot therefore, be expected to directly produce, through the medium of balance sheets, much corrective, dampening influence on the occurrence of such injuries.

In illustration, when an intersection or curve is designed and built in such a way that serious crashes are produced, those responsible only rarely suffer an economic penalty. The situation is the same in the case of organizations and individuals that line roads with utility poles (which would be recognized instantly as likely to produce very serious injuries if placed closely along runways for aircraft) that each year convert thousands of off-road mishaps from minor events into disasters. Similarly, manufac-

turers of motor vehicles suffer no substantial penalty from an economic standpoint when they do not provide the greatly improved levels of automatic crash injury protection that have long been practical. Analogous points can be made concerning many others whose actions either needlessly augment, or fail to help reduce, such injuries among vehicle occupants, pedestrians, cyclists and other travelers.

Among its many analyses and conclusions, this work very strongly supports the longstanding emphasis of specialists on bringing persons with spinal cord injuries very early into thoroughly modern centers specializing in the expert care and rehabilitation of such cases. It is well known that patients in these centers do far better, and are more likely to receive and profit from suitable rehabilitative therapy. Moreover, since the authors believe that such care is probably less costly in the long run, and find that a substantial fraction of the societal cost is in foregone productivity, such handling has very strong economic as well as humanitarian justification.

The authors of this report have made a major contribution to knowledge of the human tragedy of spinal cord injuries. Let us hope that it will aid in bringing the forces to bear that will both greatly reduce the incidence of such injuries and improve the care and rehabilitation of those that still cannot be prevented.

#### SUMMARY

Spinal cord injury (SCI) provides a graphic example of a low incidence catastrophic disease resulting in extreme physical and emotional deprivation to the afflicted individual. From an economic perspective it also accounts for unusually large direct and indirect costs that must be borne both by the individual and by society in general. Typical SCI patients may be expected to generate high initial hospitalization costs, often followed by substantial annual maintenance charges that continue over their remaining lifetimes. While forced to cope with new physical limitations, the spinal cord injured may also have to accept social and vocational constraints that will radically change and, perhaps, seriously limit their former contribution to society as homemakers, students, or productive members of the labor force.

#### Motor vehicle injuries

Approximately 50 percent of the spinal cord injuries suffered annually in the United States occur in motor vehicle crashes, making this by far the principal source of such injuries. The purpose of the analysis described in this report was to estimate the annual incidence of SCI occurring as a result of motor vehicle crashes for a recent year (1974) and to project both the total direct and indirect costs associated with those injuries. The findings of the analysis provide valuable insights into the dimensions of this aspect of motor vehicle crashes.

In 1974, an estimated 5,315 spinal cord injuries occurred in motor vehicle crashes in the United States; this corresponds to an average annual incidence rate of 25.1 per million population. Of the 5,315 SCI cases, 1,938 were classified as dead either at the crash scene or upon arrival at an emergency medical facility (DOA), while the remaining 3,377 survived to hospital admission.

#### Hospital admissions

The 3,377 hospital admissions were subclassified into the following impairment categories: 1,091 quadriplegics with permanent impairment, including both complete and incomplete lesions; 1,501 paraplegics with permanent impairment, including both com-

plete and incomplete lesions; 447 in-hospital fatalities; and 338 patients who were functionally recovered at discharge.

TABLE 27.—SUMMARY OF TOTAL EXPECTED SOCIETAL COSTS OF MOTOR VEHICLE RELATED SCI: UNITED STATES, 1974

| Cost category                         | Present value of societal costs <sup>1</sup> |                          |
|---------------------------------------|--|--------------------------|
|                                       | Discounted at 6 percent                      | Discounted at 10 percent |
| <b>Direct costs:</b>                  |  |                          |
| Initial hospitalization.....          | \$69,578,460                                 | \$69,578,460             |
| Institutional and attendant care..... | 66,761,170                                   | 47,144,840               |
| Rehospitalization.....                | 45,543,930                                   | 31,648,020               |
| Drugs and medical supplies.....       | 26,352,440                                   | 18,065,240               |
| Miscellaneous services.....           | 15,759,010                                   | 10,760,180               |
| Home modifications.....               | 9,892,260                                    | 9,892,260                |
| Medical equipment and appliances..... | 8,950,410                                    | 6,158,100                |
| Vocational rehabilitation.....        | 3,703,870                                    | 3,569,200                |
| Emergency assistance.....             | 2,087,240                                    | 2,087,240                |
| <b>Subtotal.....</b>                  | <b>248,628,790</b>                           | <b>198,903,540</b>       |
| <b>Indirect costs:</b>                |  |                          |
| Foregone productivity.....            | 558,399,440                                  | 340,366,370              |
| Legal and court services.....         | 15,581,220                                   | 15,581,220               |
| Insurance administration.....         | 4,848,270                                    | 3,878,640                |
| <b>Subtotal.....</b>                  | <b>578,828,930</b>                           | <b>359,826,230</b>       |
| <b>Total societal costs.....</b>      | <b>827,457,720</b>                           | <b>558,729,770</b>       |
| Number of patients.....               | 5,315  | 5,315                    |
| Average cost per patient.....         | 155,680                                      | 105,120                  |

<sup>1</sup> Costs are in 1974 dollars.

#### Societal costs

Table 27 provides a summary overview of the total societal costs resulting from the 5,315 SCI cases. The present value of total expected societal costs was approximately \$28 million at a 6 percent discount rate and \$559 million at a 10 percent rate. Table 28 summarizes the average societal costs per case, both for the 5,315 SCI cases and for the 2,592 permanently impaired survivors. The relatively high value obtained for overall societal costs compared to the relatively low number of patients in the incidence sample generating these costs emphasizes the enormity of the expected costs associated with an individual occurrence of spinal cord injury—approximately \$156,000 at 6 percent and \$105,000 at 10 percent.

#### Direct costs

The direct costs of SCI include a variety of treatment expenditures paid for by the patient, the patient's family, and in many cases by third party reimbursement agencies. Direct costs analyzed in this report include the costs of emergency assistance following the crash, initial hospitalization, home modifications, vocational rehabilitation, institutional and attendant care, medical equipment and appliances, special drugs and medical supplies, rehospitalization care, and miscellaneous services and supplies. For 1974, the estimated present value of these direct costs measured over lifetimes of all patients was approximately \$249 million, based on a 6 percent discount rate and \$199 million at a 10 percent rate. This translates into an average cost per patient of \$47,000 at 6 percent at 10 percent.

#### Indirect costs

The indirect costs of SCI are not directly tied to the treatment of the injury but are related nevertheless to its occurrence. As a proportion of total societal costs, indirect costs dramatically outrank direct costs. Furthermore, the overwhelming majority of indirect costs consists of losses attributable to the net foregone productivity of SCI patients. For 1974, the estimated present value of these indirect costs was approximately

\$579 million when discounted at 6 percent and \$360 million at 10 percent. This corresponds to an average loss of about \$109,000 per patient at 6 percent and \$68,000 at 10 percent.

TABLE 28.—SUMMARY OF AVERAGE SOCIETAL COSTS PER PATIENT OF MOTOR VEHICLE RELATED SCI: UNITED STATES, 1974

| Cost category   | Present value of societal costs <sup>1</sup> |                          |
|---|--|--------------------------|
|   | Discounted at 6 percent                      | Discounted at 10 percent |
| Number of patients.....   | 5,315  | 5,315                    |
| Average direct costs per patient.....                                     | \$46,780                                     | \$37,420                 |
| Average indirect costs per patient.....                                   | 108,900                                      | 67,790                   |
| <b>Average total societal costs per patient.....</b>                      | <b>155,680</b>                               | <b>105,120</b>           |
| Number of permanently impaired patients.....                              | 2,592  | 2,592                    |
| Average direct costs per permanently impaired patient.....                | \$92,410                                     | \$73,230                 |
| Average indirect costs per permanently impaired patient.....              | 88,910                                       | 57,710                   |
| <b>Average total societal costs per permanently impaired patient.....</b> | <b>181,320</b>                               | <b>130,940</b>           |

<sup>1</sup> Costs are in 1974 dollars.

#### Demographic trends

Several demographic trends common to SCI populations were reflected in the 1974 motor vehicle crash group. Males predominated over females in the ratio of 2.2 to 1. Approximately 55 percent of the injured were between the ages of 16 and 35 while this age group comprises only 32 percent of the general population. This emphasizes the disproportionately high SCI incidence rates among young people. The economic ramifications of high incidence rates among young people in general, and males in particular, are significant. Since the expected lifetime costs of SCI are strongly influenced by both the direct and indirect costs accruing to the patient during the years following onset of injury, younger patients with relatively longer life expectancies may be expected to generate larger societal costs. In addition, for the indirect costs due to a patient's foregone productivity, the average male currently accounts for a far greater loss than the corresponding female.

#### Patient mortality

In general, patients with spinal cord injuries have higher mortality rates and, hence, lower average life expectancies than individuals of similar age and sex in the general population. The reasons for the patients' increased mortality lies primarily in their greater susceptibility to complications such as urinary tract infections and decubitus ulcers that can lead to more serious complications and death. Not surprisingly, patients with more severe impairments such as complete quadriplegia are found to have average life expectancies that are noticeably lower than those of members of the general population of equivalent age and sex. Even in the case of paraplegics, a less severely injured group, the life expectancies remain lower than those of the general population.

The reduction in value of life expectancies has both human and economic consequences. From a human perspective, the increased likelihood of premature death and the unpleasant medical complications leading to death constitute a tremendous physical and emotional burden for the patient and his family. From an economic standpoint, the

decrease in life expectancy reduces the span of time over which many injury related costs may accrue and certain costs, such as those associated with expected foregone productivity, may be recouped.

#### *The permanently impaired*

In the assessment of total direct costs, the contribution made by permanently impaired quadriplegics and paraplegics assumes great significance since these patients generated close to 95 percent of all such costs. When the approximately 5 percent of overall direct costs generated by DOAs, in-hospital fatalities, and the functionally recovered is excluded, permanently impaired SCI patients average about \$92,400 per patient in direct costs discounted at 6 percent, compared to \$47,000 for the complete sample.

It is important to recognize that some indirect costs of spinal injury that are conceptually important, such as those associated with the pain and emotional suffering experienced by the patient and the patient's family, are not measured in the analysis. Furthermore, the information base used to estimate both direct and indirect costs included in the analysis was limited and tended to yield conservative approximations of these costs. Hence, from a cost-benefit perspective, the cost estimates presented in this study, although very large, should be considered as only first order approximations of the total economic benefits that could be obtained by reducing the magnitude, severity and consequences of motor vehicle related spinal cord injuries.

#### SENATOR NUNN WARNS OF SOVIET OFFENSIVE CAPABILITY IN EUROPE

Mr. HATCH. Mr. President, our distinguished colleague, SAM NUNN, who is widely recognized as a military expert has published an article in a recent issue of the *Conservative Digest*. Senator NUNN outlines changes in NATO defenses that are needed if Europe is to be prepared to withstand a Soviet blitzkrieg attack.

The article is noteworthy also for two wider issues. How does such extraordinary Soviet offensive capability relate to defense of the homeland? A blitzkrieg force structure reveals a great deal that we seem content to ignore. We also seem content to ignore that détente and "the end of the cold war" have done nothing to shorten the Soviet shadow over Europe.

I ask unanimous consent that Senator NUNN's article be printed in the *RECORD*.

There being no objection, the article was ordered to be printed in the *RECORD*, as follows:

#### THE SOVIET SHADOW OVER EUROPE

(By Senator SAM NUNN)

NATO today could not resist a Soviet blitzkrieg attack on Central Europe without using nuclear weapons. Our forces in that region are numerically inferior, and we are geared for a long war rather than a Soviet blitzkrieg.

Soviet blitzkrieg-type forces and strategy are designed to overwhelm NATO forces before reinforcements, which are widely dispersed through Europe and America and are less battle-ready than Soviet troops, can arrive on the scene.

Here's the evidence of Soviet commitment to blitzkrieg tactics:

The sheer magnitude of Soviet forces in Eastern Europe, ready to move into Western Europe on short notice.

Concentration of these forces—some 20 crack divisions—in East Germany, astride the North German Plain and within comparatively easy reach of critical objectives in the NATO Central Europe region.

Almost total reliance on mobile armor and mechanized infantry divisions for ground maneuvering.

Seven airborne divisions ready to move (compared with our one airborne division).

An unsurpassed ability to ford rivers and other water obstacles.

A high ratio of combat-to-support personnel (a blitzkrieg requires many combat troops, since there will be heavy losses, but relatively fewer support personnel, since the war will be short).

Frequent military exercises featuring preparatory missile and tactical air strikes followed by rapid exploitation by armor and mechanized infantry forces.

Preparation for advancing an extraordinary 70 miles per day for a week against the enemy (at the height of his offensive, Patton moved 35 miles per day).

Ignoring this overwhelming evidence of Soviet blitzkrieg plans, NATO war plans assume sufficient warning time to mobilize against a Soviet attack. We have a comparatively low ratio of combat-to-support troops and a shortage of ammunition and other war materiel. And our troops are positioned so far back from the border between East and West Germany that a Soviet attack would have reached the Rhine by the time our troops were functioning effectively.

Soviet power relative to ours is expanding. Their forces in Eastern Europe have substantially increased in the last five years, while NATO forces immediately available for combat in Central Europe have remained comparatively static.

#### MASSIVE LOSSES

Soviet weapons are becoming as sophisticated as our own. The spread of "smart" electronic-guided bombs and artillery shells makes the communists' superior numbers even more important, since smart bombs will mean massive losses of men and materiel in combat.

A major revision of NATO strategy and capabilities is therefore in order. Most importantly, we must rethink the timing of a European war. The Defense Department now projects 23 days warning time before a Soviet attack, followed by a war of 30 days to six months. This should probably be cut to a few days' warning time and an intense war of two or three weeks.

Second, NATO must move its troop concentration further north and forward, to be directly opposite the bulk of communist troops, located in the North German Plain. We now expect to lose much of Germany to a Soviet attack before launching a successful counterattack.

But is it realistic to imagine that retreating NATO forces, which had suffered the agony of defeat, could successfully halt, regroup, and drive back a vastly larger enemy flushed with victory? Trading space for time works only if one has abundant space to trade and plenty of time to trade it. NATO has neither.

Moving our troops forward would force the communists to wage the main battle along the East and West Germany border. This would preserve German territory and eliminate the need to mount a major counterattack to expel Soviet forces from the Ruhr and along the Rhine.

It would also compel communist forces to deploy for battle before crossing the West German border and would thereby permit NATO ground forces to launch local counterattacks across that border.

NATO must also increase fire-power avail-

able to its ground forces—artillery, antitank and air defense systems, and ammunition stockpiled at the front. We should consider further shift of U.S. Army personnel in Europe from support to combat units. This would require U.S. troops to rely on European troops for logistical support.

Finally, standardization of arms and equipment within NATO must be pushed. In this regard, the Defense Department should be commended for delaying the selection of the new main battle tank, in order to give time for standardizing more parts with the new West German main battle tank.

#### INADEQUATE DETERRENT

In sum while NATO's nuclear arsenal can deter Soviet strategic and tactical nuclear warfare, and while our vast industrial and manpower resources can deter a long war fought with conventional weapons, we do not have an adequate deterrent to a short, intense war fought with conventional weapons.

The changes outlined above would go far towards correcting this problem. While they do guarantee an ability to "git thar fustest with the mostest," they would enhance NATO's capacity to get there in time with enough.

#### IS THERE STILL A NEED FOR THE GENOCIDE CONVENTION?

Mr. PROXMIRE. Mr. President, it has been over 15 years since the Genocide Convention was first presented to the Senate. It has been over 20 years since the U.S. Ambassador to the United Nations helped to draft that convention. During the past two decades, has this issue lost its urgency? Is there still a need to take a stand against genocide?

To evaluate the need for the Genocide Convention, we must explore the reasons for which it was proposed and ask whether those reasons remain valid. The convention was composed in the aftermath of World War II. The extermination of over 6 million Jews by Hitler during that global conflict dramatized the need to commit all nations, for all time, to oppose genocide. But the drafters of the convention did not only have in mind the slaughter of the Jewish people when they composed their document. The convention's authors also recalled the extermination by the Turkish Government of over 1.5 million Armenians between 1915 and 1916. The convention sought to forever prevent a recurrence of such atrocities.

Is the massacre of Jews by Hitler's Reich and of Armenians by Turks during the First World War to be considered aberrations in world history? Has a world conscience evolved which will prohibit genocide? I think not. Mr. President, as long as organizations exist which can implement programs of extermination and as long as there may be individuals willing to do so, genocide will remain a possibility. The abuses of Uganda's Idi Amin should remind us that genocide continues to be a threat, now as much as ever before.

Our past failure to condemn genocide is deplorable. Let us hesitate no longer to attack this crime against humanity by ratifying the Genocide Convention.

## ROLLA CLYMER

Mr. DOLE. Mr. President, my State of Kansas suffered a great loss Saturday with the death of Rolla Clymer, a distinguished newspaperman, accomplished historian, and valiant political activist.

Rolla Clymer began his journalism career as a student reporter for the Emporia Gazette working under the famous editor William Allen White. He remained there from 1907 until 1914, the latter years as city editor. In 1918, he merged two rival newspapers to form the El Dorado Times, continuing as its outspoken editor until his death last week.

Mr. President, 88 years of outstanding accomplishment and contribution to his community and his State cannot be easily summarized. However, Mr. Clymer's stature as journalist and as civic leader was well recognized and much honored throughout Kansas. He received the William Allen White Foundation Award for Journalistic Merit in 1957. The Native Sons and Daughters of Kansas named him Kansan of the Year in 1960. He was the past president of the Kansas Press Association.

Rolla Clymer also was a respected historian of the Blue Stem area of Kansas. He did more than any other individual to celebrate the colorful history of that scenic region of Kansas.

We live in an age when fiercely independent newspaper editors who do their own thinking are sorely needed. William Allen White was just such a valuable servant of democracy. The many great newspapermen who learned their standards of integrity seated at his elbow are about gone now. Rolla Clymer, son of Kansas, was just such an editor. He will be missed by all of us.

## FOOD AND AGRICULTURE ACT OF 1977

Mr. BAYH. Mr. President, the farm bill which the Senate has passed this year is an extremely important piece of legislation. On balance, I am pleased with the bill. While there are a few measures in the bill about which I have some questions, overall, the bill is a great improvement over prior and existing legislation. It represents a healthy step in the right direction in the interest of farmers, consumers, and the health of the American economy.

I was gratified during the course of debate on the bill to hear the number of remarks by my colleagues in the Senate acknowledging the vital, central role that American agriculture and our American family farms serve in our economy. Those of us who grew up on farms and know farming first hand find great satisfaction in knowing that many other persons now realize the value and worth of the farmer's work.

Farming is a demanding business, in terms of time, energy, resources, and risk. Over the course of the past several years the demanding nature of farm work has increased. Farmers have faced skyrocketing increases in the cost of production, including fertilizer, chemicals

for pesticides and herbicides, and farm equipment. The cost of farmland has skyrocketed—a whopping 30 percent in the last year alone in my home State of Indiana. Yet the prices that farmers may expect to receive for their crops and livestock products are very insecure. The market for farm products is weak. There have been some good years for some farmers recently, but even for those who benefited from the farm economy boom, there now is a threatened bust.

Mr. President, neither our farmers nor the rest of the American people can tolerate a boom or bust economy in agriculture. Our Nation's agricultural produce is the central element of our entire international export economy as well as the central feature of our domestic economy. We must have stability and predictability. We must be assured that our efficient family farmers can operate in a relatively free economy with an assurance that their hard work and effective management will bring a decent living for them and their families. Only with that kind of expectation can we expect the American farmers to continue to produce the quality and abundance of farm products that our country must have.

The Food and Agriculture Act of 1977, as passed by the Senate, represents a sound foundation for establishing and maintaining a stable agriculture economy. Farm loan prices and support prices in the bill, in general, are set at reasonable and fair rates. Rates that will not offer a windfall to farmers, but will give enough security in light of burgeoning production costs that farmers will be able to make production decisions with confidence that their hard work and planning offers a reasonable prospect of a fair return.

A major disappointment in the bill is that it fails to provide a reasonable and, I believe, necessary increase in the corn support price for the current crop year. While producers of other crops benefit from target price increases this year, our corn farmers must survive this year of increased production costs and the threat of drastically reduced market prices this fall without any increase whatsoever in the 1977 target price. I supported the amendment offered by Senator CLARK to increase the 1977 target price for corn from \$1.70 to \$1.85. I regret that the majority of the Senate failed to recognize the needs of corn farmers.

Mr. President, an item in the bill of which I am particularly pleased is title X, dealing with grain reserves. For many years I have urged the creation of a system of strategic grain reserves. Finally we in the Senate have taken the first major step in this direction. Title X permits the creation of grain reserves of as much as 300 million to 700 million bushels. The grain will be stored by farmers on their home farms under loan programs supervised by the Secretary of Agriculture. This provision, which is limited to wheat but which we may see fit to extend to other important grains in the future, provides for loans of not less than 3 or more than 5 years to cover the cost of storage. Redemption of the loans will

occur regardless of their maturity whenever the market price reaches a specified level between 140 and 160 percent of the then current wheat price support level. This is a good step in providing a storage system that will increase price stability without threatening farmers with the dumping of Government-held reserves.

Importantly, title X also authorizes the President to negotiate a system of food reserves for humanitarian food relief and to maintain such a reserve of food commodities as a contribution of the United States to the system. The Secretary of Agriculture is directed to build stocks of food of 2 million tons or to the levels which may be established under an international agreement but not greater than 6 million tons. Important safeguards have been added so that this important international emergency food reserve program will not be used to depress domestic farm product prices. In light of shortfalls in world grain production during recent years, without such grain and food reserve systems, we have been perilously approaching vulnerability where a domestic shortfall in grain production could cause a crisis of inadequate grain—at any price—to satisfy all of our food needs.

I will be looking at these grain reserve proposals very carefully as they are implemented by the Department of Agriculture. We must be sure that all of our goals are being pursued: assuring security and stability of farm product prices, establishing protection for domestic shortfalls in production, and satisfying the humanitarian need to provide food to as many as possible of the hungry people of the world.

Mr. President, the food and agricultural research provisions of the bill also signal an important forward-looking development in our agricultural policy. Title XIII would provide an opportunity for food and agricultural research grants to promote the research partnership between the Department of Agriculture and land-grant colleges and State agricultural experiment stations. It would direct the Secretary of Agriculture to develop and implement a national human nutrition research and extension program—a long needed area of emphasis. It would specifically authorize the Secretary of Agriculture, in cooperation with States, to carry out animal health research programs. Research of animal health has been too long neglected under the last administration, as evidenced by the very small amount of research on such animal diseases and pseudorabies, TGE, and brucellosis. I have been urging increased appropriations for this kind of animal health research which is so important to the continuing vitality of our food production economy and our family farms.

Title XIII also provides for small farm research and extension programs, a matter of great importance in light of the continuing crisis that is posed to our family farm system by outside concentrations of economic power. This research effort is consistent with my long-time support programs to benefit the family farmer. I hope this research will

lead to solutions to the threats of farm land buy-out programs by nonfarm economic interests, the threats of skyrocketing capital requirements which make it extremely difficult for young farmers to get a start, and the threats that are posed by vertical integration in some critical parts of our agricultural economy. While it is extremely important, this research should not be seen as a substitute for important and necessary legislation in these areas, and I intend to continue fighting for important legislation on the behalf of family farmers.

I have studied the numerous other provisions in the farm bill, including changes in the food stamp program, Public Law 480, rural development and conservation and the restrictions on USDA advisory committees. While there are specific items on which I would have preferred different conclusions, on balance the bill is a satisfactory compromise. It clearly is a step in the right direction. As the Senate and House conferees work out differences between the House bill and the Senate bill, I hope the healthy compromise can be preserved in a final bill that the President also finds satisfactory.

#### PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

Mr. HUMPHREY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of \$25 million or, in the case of major defense equipment as defined in the act, those in excess of \$7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that such notifications were received on May 17, and May 20, 1977.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, room S-116, in the Capitol.

#### TAX CREDITS FOR COLLEGE TUITION

Mr. RIBICOFF. Mr. President, earlier this year Senator ROY and I introduced legislation to provide tax relief to parents who pay college tuition for their children. This tuition tax credit would provide assistance to middle-income families who are "too wealthy" for scholarship aid but who find themselves squeezed by arising tuition costs.

Recently the Wall Street Journal pub-

lished an article detailing this burden on middle-income families. I should like to share this column with my colleagues.

I ask unanimous consent that the article by Mitchell Lynch be printed in the RECORD.

There being no objection, the article was ordered to be printed in the Record, as follows:

[From the Wall Street Journal, May 25, 1977]

#### AS COLLEGE COSTS SOAR, MIDDLE-CLASS FAMILIES ARE CAUGHT IN SQUEEZE

(By Mitchell C. Lynch)

Harvey and Dorothy Doss, a Michigan couple making about \$26,000 a year, thought they had a formula for sending their four children through college. With scholarship aid and other financial assistance, they figured that their own outlays could be held to \$3,000 a year per child.

Barbara, their oldest, went off to Kenyon College in Gambier, Ohio, where she now is a sophomore. Tuition, room, board and other fees total about \$5,700. She got enough scholarship and other aid to bring her parents' bills down to \$3,650, including spending money. "That's more than we figured on," Dorothy Doss said, "but we think we can still do it."

Now, however, the Dosses have run into trouble. Their next oldest, Jean, has been accepted for admission next fall to Syracuse University. Tuition, room, board and fees there total \$5,770. Like her sister, Jean applied for enough financial help to bring the family's expense down to \$3,000. Syracuse said no. It wouldn't come close to what the Dosses wanted.

The reason: At \$26,000 a year, the Dosses have too big an income to qualify for so much aid from Syracuse. But they figure that without that much aid, they can't afford to send Jean to Syracuse.

#### COSTS UP 70 PERCENT SINCE 1970

Like millions of other American families making from \$12,000 to say, \$40,000 a year, the Dosses are caught in a tightening squeeze in higher education. Because of the skyrocketing costs of college, these families need help. Because of their incomes, they can't get it—at any rate, not enough of it.

Since 1970, total costs of college, not counting spending money, have climbed more than 70 percent to a median of \$2,790 a year at state-run schools and \$4,568 at private colleges, according to the College Scholarship Service, the branch of the College Entrance Examination Board that establishes the generally accepted standards on financial-aid eligibility. Parents usually file income and savings statements with the service, which makes the statements available to the colleges.

There are a variety of college, state, federal and company aid programs designed to help meet the soaring costs. They are based on need, which means that the lion's share goes to students from lower-income families, with little left over for the middle class. (It is assumed that upper-income families don't need any help.)

Generally, bright students with grades of B-minus and up from families making less than \$12,000 a year are eligible for enough scholarship aid, low-interest loans and straight grants to carry them through all four years without dipping into the family wallet. Starting at about \$12,000, the higher your income the harder it is to get help. The crunch really begins at \$20,000 a year. Those making at least \$30,000 can rely on little outside help at all, except for the local Rotary, Kiwanis or Woman's Club scholarship, which usually isn't based on need.

An exception to all the difficulty should be noted: The straight A student active in school affairs can get plenty of aid, no mat-

ter what his family's income, authorities say. "Those kids don't apply to college; they get recruited by the colleges," a high-school guidance counselor says.

But for the families of most college-bound students, the already tight financial situation is likely to get worse. Oakland Financial Group Inc., a personal-finance consulting firm, estimates that the higher-education bill for today's 14-year-old high-school freshman will be \$5,522 a year at a state college and \$9,665 at a private university. For today's 8-year-old, the firm calculates, the annual cost will be \$7,677 at a state college and \$12,662 at a private one. These projections don't include pin money and they assume no increase in the inflation rate.

#### "ADMIT-DENY" FORMULA

Clearly, college-financing problems have reached "worrysome proportions," says John Kemeny, president of Dartmouth College. He says that most schools, unable to provide all the help that families seek, end up adopting what he calls a destructive "admit-deny" formula; that is, they admit the students but deny them the required financial assistance. "It's tantamount to denying admission in the first place," he says.

Dartmouth, Harvard and some other colleges are trying to do something about this. Dartmouth has a "custom-tailored" financial aid program intended to make sure that any student admitted for academic reasons won't have to opt out for financial reasons. "It's the opposite of the admit-deny formula," Mr. Kemeny says.

After seeing a 10 percent drop in middle-income students last year, Harvard started a pilot program of low-interest loans—8 percent, compared with about 12 percent for conventional loans—to families earning between \$15,000 and \$50,000 a year. The loans are repayable over six years.

At least five other schools are phasing in loans similar to Harvard's and carrying interest rates of 8 percent to 3 1/2 percent. They are Amherst, Bryn Mawr, Cornell University's School of Hotel Administration, Pomona College and Stanford. Yale has come up with a program it calls "tuition postponement option," which allows a student to repay loans after college at a rate based on his income.

One reason that more people are feeling the higher-education squeeze is simply that more people are demanding a college education. The Conference Board, a nonprofit economic-research organization, estimates college enrollment at 11 million and climbing, compared with just three million in 1960. "More people expect to send their children, so more people are aware that it is costly," says Michael McPherson, an economist at Williams College who studies higher-education costs.

William Brennan of Longmeadow, Mass., is more than aware of the situation; he is bitter about it. "Sometimes I think my kids would be better off if I made less money," he says. Mr. Brennan, the father of three children, is a section manager at a roller-chain plant in nearby Springfield. He makes between \$30,000 and \$35,000 a year. By most people's reckoning, that's a good paycheck. Mr. Brennan says, "I may be a good manager at the plant, but I must be a poor manager at home." He has little savings in the bank.

After paying federal and state taxes, the Brennans are hit with more than \$2,000 a year in mortgage payments, another \$2,000 for property taxes and "one heck of a lot of money" for such necessities as food, heating fuel and insurance. (The Brennans own two cars—a 1966 Chevrolet and a 1971 Oldsmobile, both paid for.) Indeed, a rundown of the Brennan family ledger shows little surplus, "and we don't live the high life," Mr. Brennan says.

Still, his income precludes any state, federal or college financial aid for the Brennan's son, Bill, completing his second year at Holy Cross College in Worcester, Mass. The tab for tuition, room, board and "pocket money, which really builds up," is more than \$5,000 a year, Mr. Brennan says. Last summer Bill made about \$1,200 as a clerk in a bookstore and used some of his meager savings. This brought the Brennan family's tab down to \$3,600.

Mr. Brennan borrowed this from his company's credit union at 10% interest to be paid in one year, in monthly installments of about \$320. The crunch, though, will come next year when the Brennans' daughter, Sheila, an honor student in high school, also tries to attend Holy Cross. If she can't get financial aid and if costs rise as expected, Mr. Brennan could be facing a monthly bill of well over \$750, or more than \$9,000 a year, for the two collegians.

"What really gets me is Sheila gets good marks in school because she wants to get scholarships," Mr. Brennan says. "But if she can't get a scholarship because of my income, then what kind of incentive is that for a kid to study hard?"

#### A CASE OF OVERREACH?

While many may sympathize with the plight of the Dosses and Brennans, some others don't. Many college administrators and other authorities say the situation isn't nearly so bad as it's often painted. For one thing, they say, some parents could be suffering a classic case of middle-class overreach by trying to send two or more of their children through college at the same time, without being willing to make such personal sacrifices as remortgaging their homes or selling one of the family cars.

"I'm alarmed at the changing attitude in this country," says Jonathan D. Pife, associate director of a higher-education study group at George Washington University in Washington. "People in the middle class used to be willing to give up anything to help, but today they won't give up anything."

Richard Z., a \$25,000-a-year store manager outside Los Angeles, bemoaning the high cost of putting his two sons through college, says he can't contribute anything from his personal savings account because "we finally have enough to renovate our basement." The renovation includes transforming the basement into a 1920s-style speakeasy. "We entertain a lot," Mr. Z. says.

Parents who have conscientiously saved money for college are frequently jarred to find the savings taken into account by college-aid administrators. The savers are entitled to less assistance than families who haven't salted away a penny.

"I was really surprised when I found that out," says Mrs. Victoria Lodoly of St. Louis, whose two sons commute to St. Louis University. She says she and her husband, George, a brewer for Anheuser-Busch, "always tried to put a little away because we knew our children would be going to college some day." One of her sons received a small scholarship, but neither was entitled to other help, principally because the Lodolys' income is around \$30,000 a year and they have a savings account.

Some observers discount the talk of overreach and unwillingness to sacrifice. "We're talking about the term liquidity," says William Cavanaugh, an official of the College Scholarship Service. "People appear to be richer, but their resources aren't liquid, they're tied up with bills and other payments." What's more, the term "middle class" covers a wide area, says Nicholas Ryan, financial aid director at Grinnell College, situated amid cornfields outside Des Moines. "What about the farmer? What's he supposed to do, sell a couple of acres a year to put his children through college?"

#### DECLARATIONS OF INDEPENDENCE

One way to fight back is to declare your children independent. A student who lives away from home can use his own income, not his parents', as the basis for seeking financial aid. This technique hasn't spread much. The College Scholarship Service says the percentage of students declared self-supporting has risen—but only slightly, and mainly because more people in their middle or late 20s are beginning college these days.

Cutting the apron strings can pay off, says John McGrath of Springfield, Mass. His daughter Sherry wasn't eligible for financial aid when she entered Framingham (Mass.) State College three years ago. She married a student at the school, and now, her father says, "she can get financial help from the school or state if she wants."

Most authorities agree that, severe or not, the middle-class squeeze is forcing parents to become more selective—and realistic—about the colleges their children can attend. Typical of such families are the Dosses of Michigan. After denial of aid from Syracuse, daughter Jean has decided to go to the University of Michigan, which is in her home town of Ann Arbor and has a tuition of \$904 a year for state residents. Still, her parents, Harvey Doss, a pilot for an air-freight carrier, and Dorothy, a nurse, say they are "a little crushed."

Michigan is a good school, "but we always felt that part of the education process was to live away from home, to meet new people in a different environment," Mrs. Doss says. "I guess we'll have to give that up."

#### THE SPECTER OF DEREGULATION: TO THINK IT WILL WORK IS NONSENSE

Mr. McGOVERN. Mr. President, the continuing discussion over airline deregulation has surfaced a number of thoughtful articles on both sides of this issue which is so basic to our commercial airline service.

Writing as a guest editor in the May 1977 edition of *Air Transport World*, Mr. Morten S. Beyer, president of Avmark, Inc., presents a compelling case against airline deregulation. I ask unanimous consent that his article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

#### THE SPECTER OF DEREGULATION: TO THINK IT WILL WORK IS NONSENSE

(A guest editorial by Morten S. Beyer, president of Avmark Inc. and one of the industry's most astute appraisers of airline costs.)

The specter of deregulation has cast a pall of doubt, uncertainty and fear over the U.S. airline industry.

Investor confidence has been seriously undermined. Financial institutions are cold to new debt and equity funding for modern aircraft. The aggressive and confident spirit that sparked the growth of the airline industry has been all but snuffed out. New high-technology aircraft promising greater economy, lower energy consumption and a quieter environment languish on manufacturers' drawing boards.

Promising the public a pie-in-the-sky 25% to 50% reduction in air fares, the deregulators (or reformers if one prefers to call them that) simply don't know what they are talking about. The basic premise they advance is that deregulation will bring lower fares to the public and higher load factors (and profits) to the airlines.

They repeatedly cite the example of Texas

and California intrastate airlines which operate outside Civil Aeronautics Board control and which offer their passengers fares that are 35% to 50% lower than those of the CAB-regulated trunks and local service carriers. On the surface their case makes sense: If PSA, Air California and Southwest can do it, why can't TWA, United or Allegheny?

This simplistic comparison has been eagerly and unquestioningly accepted as gospel by the advocates of deregulation. It has been rejected equally emphatically as economic heresy by the airline industry.

No one has bothered to determine the answers to two basic questions:

How do the unregulated intrastate carriers do it?

Can the trunks and locals achieve the same fares and profits if they are deregulated?

Avmark Inc. has just completed a comparison of the operations of two of the major unregulated intrastate carriers, Air California and Southwest, with those of the regulated local and Hawaiian carriers.

The operations of Southwest and Air California are not dissimilar to those of the local and Hawaiian airlines. True, the former do not have the responsibility of serving small communities, but the locals receive some \$75 million in subsidy annually to finance this service.

Both groups of carriers use the same aircraft types—Boeing 737s and McDonnell Douglas DC-9s. Fuel, maintenance and financing costs are comparable, as are expenses for landing fees and airport charges. Both groups provide ticketing and reservations, and offer minimal inflight service. Air California is strongly unionized. So why the big discrepancy in operating costs and fares?

There are three major areas of difference between the two groups of carriers:

The intrastate operators install 15–20 more seats than the locals in similar aircraft.

The intrastates have average load factors of 68.75% compared to 53.45% for the locals.

Employee wages on the intrastates are 19.3% lower while productivity is 40% higher.

These factors combine to give the intrastates a seat-mile cost of 4.33¢ compared to 6.47¢ for the locals. Revenue passenger-mile cost differs even more dramatically—6.29¢ for the intrastates vs. 12.10¢ for the locals.

Significantly, aircraft-mile cost for the two groups is substantially the same: \$4.92 for the intrastates, \$5.30 for the locals. By what alchemy will deregulation bring about major reductions in costs for presently regulated operators?

#### SEATING CAPACITY

The trunks and locals could, if they wanted, install as many seats in their aircraft as the intrastates do—or more. Aloha and Hawaiian have 115 seats in their DC-9-30s and 737-200s, the same number as Air California and Southwest. The locals, on the other hand, configure their DC-9s and 737s with between 94 and 104 seats. Piedmont even uses only five-abreast seating in its 737-200s—and probably is the only one in the world to do so.

The locals feel these low densities are necessary to meet trunkline competition. Their reasoning is condoned by CAB's economists in subsidy and ratemaking computations. The locals aggressively promote their "Wide Ride" and "First-Class Legroom" in their advertising.

But DC-9-30s and 737-200s are certificated for up to 125 or 130 passengers, and are operated in this configuration in Europe and other parts of the world.

#### FIRST-CLASS MUST GO!

Similarly, the trunks generally utilize space that would accommodate 30 or more seats on a Boeing 727-200 (and up to 120–150 seats on a 747, DC-10 or L-1011) for such ameni-

ties as first-class sections, coatrooms, carry-on baggage racks, galleys and so forth. To match intrastate seating densities, these amenities would have to go—particularly first-class sections, which contributed more than \$1.5 billion to trunk revenues in 1976.

But to the extent that the regulated carriers can see their way clear to increase seating densities, costs per seat-mile can be comparably reduced.

#### LOAD FACTOR

The reformers seem to believe that the magic wand of deregulation will somehow result in a 25% jump in load factor. But nothing could be further from the truth in the highly competitive markets of the locals and trunks. History has shown that increased competition brings lower load factors, not higher.

The highest load factors in the regulated part of the airline industry are achieved by the Hawaiian carriers. These load factors, ranging in the mid-60s, are achieved because Aloha and Hawaiian share their market and practice an oligopolistic restraint in their scheduling. Neither seeks to put the other out of business.

In the California and Texas intrastate markets, PSA, Air California and Southwest have what amounts to monopolies, carrying virtually all of the local traffic in the markets they serve. The California Public Utilities Commission, which regulates that state's intrastate carriers, has been careful to protect them from each other, and trunks and locals have long since abandoned more than token competition.

Prior to CAB sanction of capacity limitation agreements, the trunks drove load factors in the major multicompetitor transcontinental markets below 40%. Today we are witnessing the start of a new low-fare battle among American, United and TWA aimed at filling excessive numbers of empty seats on these same routes.

To the degree that deregulation will create more competition and bring new entrants into the marketplace, history tells us to expect lower load factors—at least until the weakest carriers are driven out and schedule restraint (if not monopoly) takes over.

#### WAGES AND PRODUCTIVITY

Wages and related costs comprise 40% of the scheduled airlines' expenses. These carriers are all heavily unionized, and the individual wages of airline employees are higher than those in any other major industry in the U.S.

Larger, more efficient aircraft, coupled with fare increases, have blunted the impact of rising wage scales and increasingly restrictive union work rules.

But the fact remains that the major economic advantage enjoyed by the relatively new intrastates arises from their lower wage scales and the higher productivity of their employees. While locals as a group pay their employees an average of \$18,533 a year, the intrastates pay only \$14,882. A pilot for Southwest flies 775 hours a year, while his counterpart at Allegheny flies only 579 hours. A Hughes Airwest flight attendant serves 6805 passengers a year while an Air California attendant serves 12,554. All of these figures are as of mid-1976.

In summary, Avmarks analysis indicates that intrastate airline employees produced 88% more revenue ton-miles, handled 101.7% more passengers and serviced 56.8% more weighted departures than their local service counterparts.

Some of this higher productivity is due to route structure and equipment as well as management effectiveness. The intrastates must operate at this level of efficiency in order to survive.

However, the bulk of the difference comes from labor contract conditions.

The only trunk whose labor costs approach those of the intrastates is Northwest

Airlines. In 1975, 29.71% of Northwest's total operating expense was for labor, a figure which compares favorably with the 28.10% estimated for Southwest. If the other trunks emulated Northwest's example, they would have approximately 67,000 fewer employees and their annual wage costs would be reduced by \$1.4 billion.

#### HOW TO REDUCE COSTS

What would happen to the costs of the local service airlines if they were to match the seating density, load factors and wages of Air California or Southwest?

Assuming that revenue passenger-miles stayed the same and that aircraft miles, employment and wages were reduced in order to bring about desired improvements in costs, Avmark has concluded that:

Increased seating density would reduce local service costs 10%, from 12.10 cents per passenger-mile to 10.89 cents.

An increase to intrastate levels in load factors would cut costs per passenger-mile 13.3%, to 10.49 cents.

Higher density seating and higher load factors together would reduce operating costs by a total of \$298 million for local industry, dropping passenger-mile cost to 9.62 cents.

A 40% improvement in employee productivity among the locals would eliminate 8541 of the present 29,975 jobs.

Reducing wages to intrastate levels would cut average salary and related costs by \$4381 per employee. Total cost reduction for the local industry would be \$276.4 million, and passenger-mile costs would drop 20%.

The lower wage costs which give the intrastate carriers such a large economic advantage really have nothing to do with regulation or its absence.

Additional seats and/or higher load factors must assume either a sharp curtailment of scheduled miles flown or a substantial increase in passengers to fill the added capacity.

Most of this won't happen. Higher seating density can reduce seat-mile costs, and lower fares will probably stimulate additional traffic. But some increase in airline income is needed just to stay ahead of inflation, higher wages and increased fuel costs.

Improved load factors can be realized only through more capacity limitations and more monopoly markets—an obvious anathema even in today's regulated industry.

Finally, it is grossly unrealistic to expect deregulation to turn back the clock. Airline labor unions, their members, and management alike would be loathe to give up hard-won wage benefits and work rules to satisfy reformers' dreams of a deregulated industry. Not surprisingly, labor is solidly opposed to deregulation.

Although today the risk seems minimal that knowledgeable investors will put large amounts of financing at the disposal of new entrants into the airline business, it is possible that the country will again be swept by the "airline fever" that emerged after World War II. In this case, new deregulated airlines could spring up like mushrooms to challenge incumbents with low-cost, non-union operations.

Half of the fare cuts promised by reformers would be possible only if wages were to be rolled back. The other half is dependent on wildly unrealistic dreams of higher load factors, as well as on the increased seating density which already is needed just to absorb continually rising costs.

It is nonsense to think that deregulation will work.

#### ELECTION DAY REGISTRATION

Mr. HUMPHREY. Mr. President, among the recommendations for election reform submitted by the President to Congress in March, perhaps the most uncertainty has surrounded the opera-

tion and results of election day registration. I personally believe this measure would strengthen and invigorate our political institutions by increasing participation. Because the voice of experience is often our most reliable guide, I ask unanimous consent that a letter from the Board of Hennepin County Commissioners be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BOARD OF HENNEPIN COUNTY COMMISSIONERS,

Minneapolis, Minn., May 23, 1977.

Senator HUBERT HUMPHREY,  
Senate Office Building,  
Washington, D.C.

DEAR SENATOR HUMPHREY: Hennepin County has found that election day and postcard registration substantially increase voter registration and voting. After eight elections in which these methods were used, election day registration was found essential to maintaining a high level of voting.

Local government registration officials elsewhere have expressed concern over whether these methods work well and they question the possibility of fraud. Fears about registration fraud have not been proven to be real and the increased vote indicates that it is not citizen apathy that keeps voting down but the barriers which are put in the way of citizens who might otherwise come to the polls. The strength of local government and democracy are in question when less than half the constituency vote. When pre-registration closes 20 days prior to the election it is a denial of citizenship rights and as unjust as the poll tax and literacy tests.

While election day registration does generate minimal additional costs, the increased turnout and constituent satisfaction are considered worthwhile. Our nation is only as strong as its citizen participation in its elections.

On the basis of the success of the program in Hennepin County we strongly recommend that Congress approve election day and postcard registration.

Sincerely,

JEFF SPARTZ,  
Commissioner.  
NANCY OLKON,  
Commissioner.  
THOMAS E. TICEN,  
Commissioner.  
SAM S. SIVANICH,  
Commissioner.  
JOHN DERUS,  
Chairman of the Board.

#### CHILES DISCLOSES INCOME TAX RETURN AND FINANCIAL STATEMENT

Mr. CHILES. Mr. President, when I came to the Senate in 1971, I adopted a policy of making public my financial status so that anyone who desired could be aware of my financial interests and could utilize that information in judging my performance as a Senator.

I felt then—and do now even more strongly—that such personal financial disclosure by public officials is vitally important to regaining public confidence in the integrity of those who conduct the people's business. Therefore, I have each year voluntarily made public the finances of my wife and myself. In addition, I have sponsored and cosponsored financial disclosure legislation since early 1971. I continue to hope such legislation will gain congressional approval soon.

At this time, Mr. President, I am again voluntarily submitting a statement of the financial status of my wife and myself. This includes our joint income tax return for 1976 and a statement of holdings.

I ask unanimous consent to have printed in the RECORD the statement of financial status for my wife and myself and our joint income tax return for 1976.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,  
May 25, 1977.

HON. STAN KIMMITT,  
Secretary of the Senate,  
The Capitol,  
Washington, D.C.

DEAR MR. SECRETARY: My purpose in writing is to send to you a copy of the joint income tax return filed by my wife and myself for the year 1976 and a statement of financial status. This statement includes holdings and liabilities and is compiled as of the end of December, 1976.

#### ASSETS

Cash in checking and savings accounts approx. \$3,000.00  
Stocks and other securities (See Schedule A).  
Real Estate (See Schedule B).  
Miscellaneous Assets (See Schedule C).

#### LIABILITIES

Accounts payable \$500.00  
Notes payable \$130,000.00  
Most sincerely,  
LAWTON CHILES.

#### SCHEDULE A

#### SCHEDULE C

##### MISCELLANEOUS ASSETS

##### Furnishings.

##### U.S. INDIVIDUAL INCOME TAX RETURN

Lawton M. Jr. & Rhea G., Federal Building, Lakeland, Florida 33801.

Last name: Chiles.

Your social security number: 265-36-4818.

Spouse's social security no: 265-40-0431.

Occupation: Yours and spouse's, U.S. Senator; Housewife.

2. Married filing joint return (even if only one had income).

6a. Regular: Yourself and spouse: 2.

b. First names of your dependent children who lived with you: Rhea Gay, Edward: 2.

d. Total (add lines 6a, b, and c): 4.

f. Total (add lines 6d and e): 4.

8. Presidential Election Campaign Fund: Do you wish to designate \$1 of your taxes for this fund? Yes.

If joint return, does your spouse wish to designate \$1? Yes.

9. Wages, salaries, tips, and other employee compensation: \$44,600.

10a. Dividends: \$3,551; 10b. less exclusion, \$200. Balance: \$3,351.

11. Interest income: \$2,705.

12. Income other than wages, dividends, and interest (from line 37): \$101,685.

13. Total (add lines 9, 10c, 11 and 12): \$152,341.

14. Adjustments to income (such as moving expense, etc. from line 42): \$5,290.

15a. Subtract line 14 from line 13: \$147,051.

c. Adjusted gross income. Subtract line 15b from line 15a, then complete Part III of back. (If less than \$8,000, see page 2 of Instructions on "Earned Income Credit.")

16. Tax, check if from: Schedule G: \$50,205.

17a. Multiply \$35.00 by the number of exemptions on line 6d: \$140; b. Enter 2% of line 47 but not more than \$180 (\$90 if box 3 is checked): \$180: \$180.

18. Balance. Subtract line 17c from line 16 and enter difference (but not less than zero): \$50,025.

20. Balance. Subtract line 19 from line 18 and enter difference (but not less than zero): \$50,025.

22. Total (add lines 20 and 21): \$50,025.

23a. Total Federal income tax withheld: \$11,451.

b. 1976 estimated tax payments: \$30,100.

d. Amount paid with Form 4868: \$13,449.

24. Total (add lines 23a through e): \$55,000.

26. If line 24 is larger than line 22, enter amount overpaid: \$4,858.

28. Amount of line 26 to be credited on 1977 estimated tax: \$4,858.

Part 1: Income other than Wages, Dividends and Interest:

30a. Net gain or (loss) from sale or exchange of capital assets (attach Schedule D): (\$1,000).

31. Net gain or (loss) from Supplemental Schedule of Gains and Losses (attach Form 4797): \$1,913.

32. Pensions, annuities, rents, royalties, partnerships, estates or trusts, etc. (attach Schedule E): \$100,572.

36. Other (state nature and source—see page 11 of Instructions) Reader's Digest: \$200.

37. Total (add lines 29 through 36). Enter here and on line 12: \$101,685.

Part II: Adjustments to Income:

39. Employee business expense (attach Form 2106), see attached schedule: \$5,290.

42. Total (add lines 38 through 41). Enter here and on line 14: \$5,290.

change of capital assets (attach Schedule D): (\$1,000).

31. Net gain or (loss) from Supplemental Schedule of Gains and Losses (attach Form 4797): \$1,913.

32. Pensions, annuities, rents, royalties, partnerships, estates or trusts, etc. (attach Schedule E): \$100,572.

36. Other (state nature and source—see page 11 of Instructions) Reader's Digest: \$200.

37. Total (add lines 29 through 36). Enter here and on line 12: \$101,685.

Part II: Adjustments to Income:

39. Employee business expense (attach Form 2106), see attached schedule: \$5,290.

42. Total (add lines 38 through 41). Enter here and on line 14: \$5,290.

Part III: Tax Computation:

43. Adjusted gross income (from line 15c). If you have unearned income and can be claimed as a dependent on your parent's return, check here, and see page 9 of Instructions: \$147,051.

44a. If you itemize deductions, check here, and enter total from Schedule A, line 40, and attach Schedule A:

2 or 5, enter the greater of \$2,100 or 16% of line 43—but not more than \$2,800: \$35,669.

45. Subtract line 44 from line 43 and enter difference (but not less than zero): \$111,382.

46. Multiply total number of exemptions claimed on line 6f by \$750: \$3,000.

47. Taxable income. Subtract line 46 from line 45 and enter difference (but not less than zero): \$108,382.

SCHEDULES A AND B—ITEMIZED DEDUCTIONS AND DIVIDEND AND INTEREST INCOME

Lawton M. Jr. and Rhea G. Chiles. Your social security number: 265-36-4818.

Schedule A—Itemized deductions (Schedule B on back)

Medical and Dental Expenses (not compensated by insurance or otherwise) (See page 13 of Instructions):

1. One half (but not more than \$150) of insurance premiums for medical care. (Be sure to include in line 10 below): \$150.

10. Total (add lines 1 and 9). Enter here and on line 34: \$150.

12. Real estate: \$967.

13. State and local gasoline (see gas tax tables): \$298.

14. General sales (see sales tax tables): \$475.

15. Personal property: \$169.

16. Other (itemize) Sales tax auto \$152.

17. Total (add lines 11 through 16). Enter here and on line 35: \$2,061.

Interest Expense (See page 14 of Instructions):

18. Home mortgage: \$7,411.

19. Other (itemize) Gulf Life: \$1,568.

Internal Revenue Service: \$57.

County Bank: \$846.

Gulf Place: \$4,194.

First National Bank of Lakeland: \$8,640.

Casa Del Mar: \$299.

Charge Accounts: \$41.

20. Total (add lines 18 and 19). Enter here and on line 36: \$23,056.

Contributions (See page 15 of Instructions for examples.):

21. a. Cash contributions for which you have receipts, cancelled checks or other written evidence \$5,889.

Church: \$160.

24. Total contributions (add lines 21a through 23). Enter here and on line 37: \$6,049.

Miscellaneous Deductions (See page 15 of Instructions):

32. Other (itemize):

Dues \$336.

Business gifts: \$174.

Entertainment: \$3,823.

Political contribution: \$20.

\*Penalty for underpayment: \$117 (Form 2210).

33. Total (add lines 30 through 32). Enter here and on line 39: \$4,353.

#### Summary of itemized deductions

34. Total medical and dental—line 10: \$150.  
35. Total taxes—line 17: \$2,061.  
36. Total interest—line 20: \$23,056.  
37. Total contributions—line 24: \$6,049.  
39. Total miscellaneous—line 33: \$4,353.  
40. Total deductions (add lines 34 through 39). Enter here and on Form 1040, line 44: \$35,669.

#### Part I: Dividend Income:

Anchor Investment: \$473.  
Founders Financial: \$158.  
American Home Products: \$300.  
A.T. & T.: \$740.  
Royal Trust: \$13.  
Mobil Oil: \$292.  
Marcor Corp.: \$1,575.  
2. Total of line 1: \$3,551.  
6. Dividends before exclusion (subtract line 5 from line 2). Enter here and on Form 1040, line 10a: \$3,551.

#### Part II: Interest Income:

Leider-Skipper: \$247.  
Mobil Oil: \$1,409.  
Phil Holland: \$873.  
Prudential Insurance Co.: \$83.  
Lawyers Guaranty Fund: \$25.  
County Bank: \$68.  
8. Total interest income. Enter here and on Form 1040, line 11: \$2,705.

#### Part III: Foreign Accounts and Foreign Trusts:

1. Did you, at any time during the taxable year, have any interest in or signature or other authority over a bank, securities, or other financial account in a foreign country (except in a U.S. military banking facility operated by a U.S. financial institution)? No.

2. Were you the grantor of, or transferor to, a foreign trust during any taxable year, which foreign trust was in being during the current taxable year, whether or not you have any beneficial interest in such trust? If "Yes," attach Form 4683 (For definitions, see Form 4683): No.

#### CAPITAL GAINS AND LOSSES

Part I: Short-term Capital Gains and Losses—Assets Held Not More Than 6 Months:  
4. Short-term capital loss carryover attributable to years beginning after 1969 (see instruction 1): (\$30,000).

5. Net short-term gain or (loss), combine lines 3 and 4: (\$30,000).

#### Part II: Long-term Capital Gains and Losses—Assets Held More Than 6 Months:

6. 1020 shares Marcor, Inc.: \$20,749.  
1965 installment sale—1976 collections at 84.13%: \$134.

1971 installment sale—1976 collections at 88.13%: \$3,597.

8. Enter gain, if applicable, from Form 4797, line 4(a)(1) (see instruction A): \$25,505.

11. Net gain or (loss), combine lines 6 through 10: \$49,985.

12. Long-term capital loss carryover attributable to years beginning after 1969 (see instruction 1): (\$34,722).

13. Net long-term gain or (loss), combine lines 11 and 12: \$15,263.

Part III: Summary of Parts I and II (If You Have Capital Loss Carryovers From Years Beginning Before 1970, Do Not Complete This Part. See Form 4798, Parts III, IV and V.):

14. Combine lines 5 and 13, and enter the net gain or (loss) here: (\$14,737).

16. If line 14 shows a loss—

a. Enter one of the following amounts: (iii) If line 5 and line 13 are net losses, enter amount on line 5 added to 50% of amount on line 13: (\$14,737).

b. Enter here and enter as a (loss) on Form 1040, line 30a, the smallest of: (iii) Taxable income, as adjusted (see instruction J): (\$1,000).

#### Part IV: Computation of Alternative Tax (See Instruction S to See if the Alternative Tax Will Benefit You):

Note: Enter your capital loss carryovers from 1976 to 1977: Short-term (from Form 4798, Part II or Part V): Post-1969: \$13,737.

#### SUPPLEMENTAL INCOME SCHEDULE

##### Part II: Rent and Royalty Income:

Have you claimed expenses connected with your vacation home rented to others? Yes.  
8. Net rental income or (loss) (from Form 4831): (\$3,785).

10. Total rent and royalty income (add lines 7, 8, and 9): (\$3,785).

##### Part III: Income or Losses From Partnerships, Estates or Trusts, Small Business Corporations:

Chiles & Ellsworth: (P) 59-6232705: \$104,357.

11. Totals: \$104,357.

12. Income, or (loss). Total of column (d) less total of column (e): \$104,357.

13. Total (add lines 5, 10, and 12). Enter here and on Form 1040, line 32a: \$100,572.

#### INCOME AVERAGING

##### Taxable Income and Adjustments:

1. Taxable income (see Specific Instructions on page 4):

(a) Computation year 1976: \$108,382.

(b) 1st preceding base period year 1975: \$93,189.

(c) 2nd preceding base period year 1974: \$85,182.

(d) 3rd preceding base period tax year 1973: \$76,035.

(e) 4th preceding base period year 1972: \$68,313.

4. Adjusted taxable income (line 1 less line 3). If less than zero, enter zero: \$108,382.

(a) Computation year 1976: \$108,382.

5. Base period income (line 1 plus line 2). If less than zero, enter zero:

(b) 1st preceding base period year 1975: \$93,189.

(c) 2d preceding base period year 1974: \$85,182.

(d) 3rd preceding base period year 1973: \$76,035.

(e) 4th preceding base period year 1972: \$68,313.

6. Adjusted taxable income from line 4, column (a): \$108,382.

7. 30% of the sum of line 5, columns (b), (c), (d), and (e): \$96,816.

8. Averagable income (line 6 less line 7): \$11,566.

##### Computation of Tax:

9. Amount from line 8: \$96,816.

10. 20% of line 8: \$2,313.

11. Total (add lines 9 and 10): \$99,129.

13. Total (add lines 11 and 12): \$99,129.

14. Tax on amount on line 13: \$44,657.

15. Tax on amount on line 11: \$44,657.

16. Tax on amount on line 9: \$43,270.

17. Difference (line 15 less line 16): \$1,387.

18. Multiply the amount on line 17 by 4: \$5,548.

19. Tax (add lines 14 and 18). Enter here and on Form 1040, line 16. Also check Schedule G box on Form 1040, line 16: \$50,205.

#### SALE OR EXCHANGE OF PERSONAL RESIDENCE

1(a) Date former residence sold: 1-16-76.

(b) Have you ever deferred any gain on the sale or exchange of a personal residence? No.

(c) Have you ever claimed a credit for purchase or construction of a new principal residence? (If you answered "Yes," see Form 5405, Part II.): No.

(e) Were any rooms in either residence rented or used for business purposes at any time? (If "Yes," explain on separate sheet and attach.): No.

\*If the amount on which the tax is to be computed is \$20,000 or less use the Tax Table: if more than \$20,000 use Tax Rate Schedule X, Y, or Z.

(f) If you were married, do you and your spouse have the same proportionate ownership interest in your new residence as you had in your old residence? (If "No," see the Consent on other side.): Yes.

2(a) Date new residence bought: 11-26-75.

(b) If new residence was constructed for or by you, date construction began: N/A.

(c) Date you occupied new residence: 1-16-76.

(d) Were both the old and new properties used as your principal residence? Yes.

3(a) Were you 65 or older on date of sale? (If you answered "Yes," see Note below.): No.

#### Computation of Gain and Adjusted Sales Price

4. Selling price of residence. (Do not include selling price of personal property items.): \$110,000.

5. Less: Commissions and other expenses of sale (from Schedule I on other side): \$6,706.

6. Amount realized: \$103,294.

E. Less: Basis of residence sold (from Schedule II on other side): \$78,114.

8. Gain on sale (line 6 less line 7). If line 7 is more than line 6, there is no gain, so you should not make further entries on this form: \$25,180.

9. Fixing-up expenses (from Schedule III on other side): \$118.

10. Adjusted sales price (line 6 less line 9): \$103,176.

#### Computation of Gain to be Reported and Adjusted Basis of New Residence—General Rule

11. Cost of new residence: \$110,899.

13. Gain on which tax is to be deferred (line 8 less line 12): \$25,180.

14. Adjusted basis of new residence (line 11 less line 13): \$85,719.

#### Schedule I—Commissions and Other Expenses of Sale (Line 5):

Commission: \$6,600.

Settlement Fee: \$50.

Document Preparation: \$56.

Total: \$6,706.

#### Schedule II—Basis of Old Residence (Line 7):

Purchase Price: \$72,200.

Expenses of Purchase: \$936.

Improvements: \$4,678.

Total: \$78,114.

#### Schedule III—Fixing-up Expenses (Line 9):

Miscellaneous: Date work performed: 12-75. Date paid: 12-75: \$118.

1. 1976 tax (from Form 1040, line 22): \$50,025.

9. Balance (line 1 less line 8): \$50,025.

10. Enter 80% of the amount shown on line 9: \$40,020.

11. Divide amount on line 10 by the number of installments required for the year (see instruction B). Enter the result in appropriate columns: Apr. 15, 1976: \$10,005; June 15, 1976: \$10,005; Sept. 15, 1976: \$10,005; Jan. 15, 1977: \$10,005.

12. Amounts paid on estimate for each period and tax withheld (see instruction E): Apr. 15, 1976: \$2,862; June 15, 1976: \$17,913; Sept. 15, 1976: \$2,863; Jan. 15, 1977: \$17,913.

13. Overpayment of previous installment (see instruction F): Sept. 15, 1976: \$765.

14. Total (add lines 12 and 13): Apr. 15, 1976: \$2,862; June 15, 1976: \$17,913; Sept. 15, 1976: \$3,628; Jan. 15, 1977: \$17,913.

15. Underpayment (line 11 less line 14) or Overpayment (line 14 less line 11): Apr. 15, 1976: \$7,143; June 15, 1976: \$7,908; Sept. 15, 1976: \$6,377; Jan. 15, 1977: \$7,908.

Exceptions Which Avoid the Penalty (See instruction D):

16. Total amount paid and withheld from January 1 through the installment date indicated: Apr. 15, 1976: \$2,862; June 15, 1976: \$20,775; Sept. 15, 1976: \$23,638; Jan. 15, 1977: \$41,551.

17. Exception 1.—Prior year's tax. 1975 tax: \$40,756.

25% of 1975 tax: \$10,189.

25% of 1975 tax: \$10,189.

50% of 1975 tax: \$20,378.

75% of 1975 tax: \$30,567.

100% of 1975 tax: \$40,756.

How to Figure the Penalty (Complete lines 21 through 25 for installments not avoided by an exception):

21. Amount of underpayment (from line 15): \$7,143; and \$6,377.

22. Date of payment or April 15, 1977, whichever is earlier (see Instruction G): 6/15/76, and 10/12/76.

23. Number of days from due date of installment to date shown on line 22: 61 and 27.

24. Penalty (7 percent a year on the amount shown on line 21 for the number of days shown on line 23): \$4 and \$3.

#### SUPPLEMENTAL SCHEDULE OF GAINS AND LOSSES

Part I: Sales or Exchanges of Property Used in Trade or Business, and Involuntary Conversions (Section 1231):

Section A.—Involuntary Conversions Due to Casualty and Theft (See Instruction E):

1. Jewelry: a. Date acquired (mo., day, yr.), 1954; c. Date sold (mo., day, yr.), 1976; d. Gross sales price: \$18,000; f. Cost of other basis, cost of subsequent improvements (if not purchased, attach explanation) and expense of sale: \$5,953; g. Gain or loss (d plus e less f): \$12,047.

2. Combine the amounts on line 1. Enter here, and on the appropriate line as follows: \$12,047.

Section B.—Sales or Exchanges of Property Used in Trade or Business and Certain Involuntary Conversions (Not Reportable in Section A) (See Instruction E):

3. From line 2: \$12,047.

Gain from Part III, Line 23: \$13,458.

4. Combine the amounts on line 3. Enter here, and on the appropriate line as follows: \$25,505.

Part II: Ordinary Gains and Losses:

7. Gain, if any, from page 2, line 22: \$1,913.

9. Combine amounts on lines 5 through 8. Enter here, and on the appropriate line as follows: \$1,913.

(b) For individual returns:

(2) Redetermine the gain or (loss) on line 9, excluding the loss (if any) entered on line 9(b)(1). Enter here and on Form 1040, line 31: \$1,913.

Part III: Gain from Disposition of Property Under Sections 1245, 1250, 1251, 1252, 1254—Assets Held More than Six Months (See Separate Instructions):

(A) Apartment—Casa Del Mar: Date acquired: 9/20/72; Date sold: 12/15/76.

(B) Furnishings—Casa Del Mar: Date acquired: 1973; Date sold: 12/15/76.

Relate lines 10(A) through 10(D) to these columns: Property (A) and Property (B):

11. Gross sales price: \$43,500 and \$4,000.

12. Costs or other basis and expense of sale: \$34,305 and \$3,024.

13. Depreciation (or depletion) allowed (or allowable): \$3,287 and \$1,913.

14. Adjusted basis, line 12 less line 13: \$31,018 and \$1,111.

15. Total gain, line 11 less line 14: \$12,482 and \$2,889.

16. If section 1245 property:

(a) Depreciation allowed (or allowable) after applicable date (see instructions): \$1,913.

(b) Enter smaller of line 15 or 16(a): \$1,913.

Summary of Part III Gains (Complete Property columns (A) through (D) through line 20(b) before going to line 21):

21. Total gains for all properties (add columns (A) through (D), line 15): \$15,371.

22. Add columns (A) through (D), lines 16(b), 17(1), 18(d), 19(f), and 20(b). Enter here and on line 7: \$1,913.

23. Subtract line 22 from line 21. Enter here and on line 7: \$1,913.

23. Subtract line 22 from line 21. Enter here and in appropriate Section in Part I (See instructions E and G.2): \$13,458.

#### CAPITAL LOSS CARRYOVER

Part I: Post-1969 Capital Loss Carryovers to 1976 (Complete this part if the amount on your 1975 Schedule D (Form 1040), line 16 (a), is larger than the loss deducted on your 1975 Form 1040, line 29a.):

Section A.—Short-term Capital Loss Carryover:

1. Enter loss shown on your 1975 Schedule D (Form 1040), line 5; if none, enter zero and ignore lines 2 through 6—then go to line 7: \$31,000.

2. Enter gain shown on your 1975 Schedule D (Form 1040), line 13. If that line is blank or shows a loss, enter a zero: None.

3. Reduce any loss on line 1 to the extent of any gain on line 2: \$31,000.

4. Enter amount shown on your 1975 Form 1040, line 29a: \$1,000.

5. Enter smaller of line 3 or 4: \$1,000.

6. Excess of amount on line 3 over amount on line 5: \$30,000.

Section B.—Long-term Capital Loss Carryover:

7. Line 4 less line 5 (Note: If you ignored lines 2 through 6, enter amount from your 1975 Form 1040, line 29a): None.

8. Enter loss from your 1975 Schedule D (Form 1040), line 13; if none, enter zero and ignore lines 9 through 12: \$34,722.

9. Enter gain shown on your 1975 Schedule D (Form 1040), line 5. If that line is blank or shows a loss, enter a zero: None.

10. Reduce any loss on line 8 to the extent of any gain on line 9: \$34,722.

11. Multiply amount on line 7 by 2: None.

12. Excess of amount on line 10 over amount on line 11: \$34,722.

Part II: Post-1969 Capital Loss Carryover from 1976 to 1977 (Complete this part if the amount on your 1976 Schedule D (Form 1040), line 16a, is larger than the loss deducted on your 1976 Form 1040, line 30a.):

Section A.—Short-term Capital Loss Carryover:

1. Enter loss shown on your 1976 Schedule D (Form 1040), line 5; if none, enter zero and ignore lines 2 through 6—then go to line 7: \$30,000.

2. Enter gain shown on your 1976 Schedule D (Form 1040), line 13. If that line is blank or shows a loss, enter a zero: \$15,263.

3. Reduce any loss on line 1 to the extent of any gain on line 2: \$14,737.

4. Enter amount shown on your 1976 Form 1040, line 30a: \$1,000.

5. Enter smaller of line 3 or 4: \$1,000.

6. Excess of amount on line 3 over amount on line 5: \$13,737.

Section B.—Long-term Capital Loss Carryover:

8. Enter loss from your 1976 Schedule D (Form 1040), line 13; if none, enter zero and ignore lines 9 through 12: None.

#### RENTAL INCOME

1. Kind and Location of Property: Property A: Lake Hollingsworth, Florida: Residential.

Property B: Casa Del Mar, Lake Worth, Florida: Residential.

Income:

2. Rents received: Property A: \$5,400; Property B: \$2,525.

3. Total (add amounts on line 2): \$7,925.

6. Cleaning: Property B: \$98.

7. Commissions: Property A: \$540; Property B: \$253.

8. Gardening: Property A: \$211.

9. Insurance: Property A: \$151; Property B: \$51.

10. Interest: Property A: \$2,200; Property B: \$1,303.

15. Repairs (list): Roofing: Property A: \$92.

Plumbing: Property A: \$122.

Maintenance: Property B: \$467.

Deductions:

18. Taxes and licenses: Property A: \$822; Property B: \$1,199.

19. Telephone: Property B: \$117.

20. Utilities: Property B: \$488.

21. Other (list): Land Rent: Property B: \$14.

Miscellaneous: Property A: \$373.

22. Add lines 4 through 21: Property A: \$4,511; Property B: \$3,990.

23. Total (add amounts on line 22): \$8,501.

24. Depreciation expense (from page 2, line 28, column (g)): \$3,209.

25. Total deductions (add lines 23 and 24): \$11,710.

26. Net income (or loss) from rents (line 3 less line 25). Enter here and in Schedule E (Form 1040), Part II, line 8: \$(3,785).

Schedule for Depreciation Claimed on Page 1, Line 24:

27. Total additional first-year depreciation (do not include in items below):

Property A—House: \$1,600.

Property A—F and F: \$382.

Total: \$1,982.

Property B—Building: \$776\*.

Property B—F and F: \$451\*.

Total: \$1,227.

28. Totals: \$84,149: \$3,209.

#### APPLICATION FOR AUTOMATIC EXTENSION OF TIME TO FILE U.S. INDIVIDUAL INCOME TAX RETURN

1. Total tax you expect to owe for 1976 (see instruction C): \$55,000.

2. Federal income tax withheld: \$11,451.

3. 1976 Estimated tax payments (include 1975 overpayment allowed as a credit): \$30,100.

5. Total (add lines 2, 3, and 4): \$41,551.

6. Balance due (subtract line 5 from line 1). Pay in full with this application: \$13,449.

Signature and Verification:

If Prepared by Taxpayer.—Under penalties of perjury, I declare that to the best of my knowledge and belief, the statements made herein are true and correct:

Lawton Chiles, 4/14/77.

Rhea Chiles, 4/14/77.

Receipt for certified mail:

Sent to: IRS Center, Southeast Region, Chamblee, Georgia 30006.

Lawton M. Jr. and Rhea G. Chiles: 1976; 265-36-4818.

Schedule of congressional reimbursements and expenses:

Reimbursements:

Travel ..... \$2,446

Official expense ..... 26,200\*

Total reimbursements ..... 28,646

Expenses:

Travel ..... 4,736

Official expense ..... 26,200\*

Cost of living, Washington,

D.C.\*\* ..... 3,000

Total expenses ..... 33,936

Excess expenses over reimbursements ..... 5,290

\*Includes \$2,117 excess campaign contributions used to pay office expenses in 1976.

\*\*See attached affidavit.

Vacation home (Casa Del Mar):

The vacation home was rented by taxpayer for sixty-one days and used personally for fourteen days. Expenses have been reduced by the ratio of personal use days to total use days.

I hereby certify that I was in a travel status in the Washington area, away from

\*Depreciation for 11 months. (See attached statement.)

home, in the performance of my official duties as a Member of Congress, for 178 days during the taxable year, and my deductible living expenses while in such travel status amounted to \$3,000.

#### NONDEGRADATION FACTSHEET

Mr. MUSKIE. Mr. President, when the Senate considered the Clean Air Amendments of 1976 last year, the most controversial issue was the nondegradation provision. This is an important policy first contained in the 1967 Air Quality Act. It is a policy I helped develop and one I continue to support.

Last year the Senate voted 31 to 63 to embrace the committee's nondegradation proposal. New opposition on this issue is likely to occur when the Senate considers the Clean Air Amendments of 1977 later this week. In order to provide further information on this subject, I have developed comments on the newest proposals to weaken the nondegradation provision which have been circulating. In addition I have had last year's nondegradation factsheet updated for inclusion with this statement because it provides the basic information which is relevant to consideration of nondegradation policy.

#### A. EXEMPTION FOR 18 DAYS (5 PERCENT) OF THE YEAR

##### ALLEGATION

An exception should be made to the class I and class II increments which would allow them to be exceeded 18 days of the year. This would allow siting of large plants that are needed for energy production but would not have significant impact on air quality.

##### FACT

An exemption for 18 days of the year—approximately 5 percent of the year—virtually eliminates any of the air quality protection provided by the nondegradation increments scheme. The opponents of the nondegradation provision last year attempted to eliminate or suspend the entire provision. That failed by an overwhelming vote 31 to 63. It appears that this year the opponents of this provision will propose amendments that appear less damaging but in actuality cut the heart out of the nondegradation provision and leave no protection for air quality.

Where air quality values would not be adversely affected by emissions greater than the class I increments allow, the Senate bill already provides a flexible mechanism to allow approval of such projects. The owner of the proposed source may apply for approval to construct in such a case, and if the Governor and the Federal Land Manager agree that air quality would not be adversely affected, then the plant can receive approval. This is a flexible system based on the analysis of the specific land area and project. To put in place a more rigid, destructive, and difficult to implement exemption system is unnecessary and unwise.

Exempting 18 days—5 percent of the year—would allow an increase in total emissions of up to 400 percent in flat areas and 1,000 percent in rugged terrain. If average daily visibility were 70

miles, then on the exempted 18 days, visibility could decline to 19 miles. It would also decline substantially for the entire year. The allowable plant size would be increased by 4 to 10 times by this seemingly small exemption.

How could what appears to be a small exemption have such a large effect on air quality, total emissions, and expanded plant size? An 18 day—5 percent—exemption has the effect of allowing a huge increase in pollution. This occurs because all air quality control programs rest on the approach of catching the peak periods of emissions and thereby controlling total emissions to a more moderate level. If the ability to capture these peak periods is eliminated by such an exemption, then the principal technique for controlling total emissions is lost.

This would also be true for the national ambient air quality standards which protect public health. For example, if the 18 worst days of pollution in Washington, D.C., were eliminated from consideration each year, Washington, D.C., would be declared a virtually "pollution-free" city. That would be absurd, as anyone who has lived in the Washington, D.C., metropolitan area for any length of time knows.

A further complication arises under such a proposal. Though technical, it is extremely important and is the kind of factor that can destroy protection provided under the nondegradation scheme. Air pollution modeling of the dispersion of a plume from a stack can estimate the highest concentrations that will occur. This is single, worst case, analysis and is commonly calculated by EPA, State agencies, and consulting firms.

But calculation of the percentage of violation is a very different proposition. It is extremely complicated, and probably impossible in areas of rugged terrain. Such calculations are beyond the present capability of most State agencies and consulting firms. An exemption that is extremely expensive to attempt, and impossible to calculate in many cases, is not an appropriate system to place in the bill as a legislative requirement.

President Carter and Secretary designate Schlesinger have both indicated that fulfillment of the President's energy plan does not rest on providing an exemption from the requirements of the Senate bill. The energy plan does not require the destruction of visibility in pristine areas such as parks and wilderness areas; it does not require reducing air quality substantially where air is already clean. There are ample sites available for locating new powerplants without such exemptions.

Companies that continue to cling to the siting of huge powerplants within 5 to 10 miles of national parks are blindly ignoring the clearly stated opinion of the American public. In a public opinion poll conducted for the Federal Energy Administration in 1975, 94 percent of the public said they wanted clean air areas protected from further pollution.

The President, the energy officials of the administration, and the Senate committee agree with that assessment and have found that a system of exemptions is entirely unnecessary.

#### B. ELIMINATION OF SHORT-TERM INCREMENTS

##### ALLEGATION

The 24-hour or 3-hour increments are unnecessary and should be dropped. The annual average increment levels are sufficient.

##### FACT

Eliminating the short-term 3-hour and 24-hour increments from the bill would completely undermine the protection provided by the nondegradation policy.

An annual average is the sum of a year's daily pollution readings. Since they are only averages, they can mask high air pollution concentrations. The annual average has never been found to be the protective factor in any of the studies on nondegradation. Projected emissions always exceed the 3-hour and 24-hour increments before they exceed the annual increment. The Environmental Protection Agency studied 33 existing plants to provide the data used in Russell Train's March 10, 1975, letter on this subject. Mr. Train concluded that in two-thirds of the plants studied, if nondegradation requirements had been applicable for those plants, the amount of pollution allowed would have more than doubled compared to nondegradation requirements with the short term increments kept in place. In response to a letter I wrote on this subject, Russell Train, Administrator of the Environmental Protection Agency at that time, has said:

"The short-term increments are generally controlling for sources with elevated emission points (e.g., power plants . . . For example, it is entirely possible that a new power plant could meet the annual Class II increments for both sulfur dioxide (SO<sub>2</sub>) and particulate matter (TSP) yet cause short-term concentrations that would approach the short-term national ambient air quality standards (NAAQS)."

Thirty-three existing plants were analyzed. . . . Clearly, sole application of the annual increment would not, in many cases, provide a significant margin of nondeterioration protection beyond the primary and secondary NAAQS if a source could create short-term concentrations up to the 24-hour or 3-hour national standards.

In addition, . . . allowing degradation up to the three-hour secondary NAAQS, could possibly result in damage to certain commercial crops.

. . . the 24-hour concentration of particulates has a considerable impact on visibility. For example, degradation up to the 24-hour NAAQS would reduce visibility from more than 70 miles to about 5 miles. Sole use of the annual increment for nondeterioration would, in many cases, allow such a reduction in visibility to occur."

If the proposal were to remove only the three-hour and 24-hour class I increments, it would still allow substantial damage to occur in visibility over parks and wilderness areas. Mr. Train stated the following: "In fact, even under the Senate 24-hour Class II increment, visibility would be reduced under the same circumstances (i.e. existing air quality of 10 micrograms per cubic meter) from 70 miles to about 19 miles."

#### C. ADDITIONAL QUESTIONS AND ANSWERS

##### Contents:

1. Urban and Southern Growth.
2. Intermountain Power Project.
3. Hearings.
4. State Involvement.
5. Studies Conducted.

6. CHESS Study.
7. Construction Delays.
8. Buffer Zones.
9. No Growth Areas.
10. New Housing, Farming, Manufacturing.
11. Natural Emissions.
12. Federal Class I Areas.
13. New Parks and Wilderness Areas.
14. Land Use.
15. Inequity Among States.
16. Western States and Energy.
17. Job Losses.
18. Lack of Information.
19. Modeling and Monitoring Technology.
20. Clean Air is a Luxury.
21. Poor People and Fixed Incomes.
22. Control of Permits.

## 1. ALLEGATION

An exemption from nondegradation requirements is necessary to allow growth in urban areas and in the southern areas of the United States.

## FACT

This allegation shows a great confusion between the problems of urban and rural areas. The problem in urban areas is that many have already exceeded national health standards, and therefore are not affected by the nondegradation provision. This problem in no way relates to the provision under discussion. Instead it raises a question related to the "nonattainment" section of the bill. This is addressed in a totally separate section of the bill, where the committee has modified EPA policy to allow greater flexibility for growth in such areas, under carefully controlled conditions.

With regard to southern rural areas, the exemptions mentioned here are principally for western States with large parks and wilderness areas. The effect of the exemptions proposed would be to allow huge facilities to locate close to national parks such as the Grand Canyon, Bryce Canyon, Yellowstone, and other scenic areas. The exemptions would have no negative impact on the ability of western states to supply coal to midwestern and southern States.

## 2. ALLEGATION

An exemption from the nondegradation increments—such as an 18-day exemption—is necessary in order to allow the siting of the intermountain power project which would supply electricity to the State of California for 3 million people.

## FACT

The intermountain power project could be redesigned, relocated, and be able to supply power to the State of California. The companies promising the project have indicated that it would be possible to relocate the plant further from the Capital Reef National Park, but have indicated that they have no desire to do so, and have rejected suggestions to separate the plant into two large facilities which could be sited apart from each other and thereby reduce air quality impact. Instead, the owners insist on one mammoth powerplant larger than any now in existence.

The intermountain power project—IPP—is a 3,000 megawatt powerplant proposed for location approximately 7½ miles outside Capital Reef National Park in Utah. The emissions from the proposed plant would have a substantial

negative impact on the scenic area of the park and the surrounding parks, monuments, and wilderness areas in the Southwest. Scientific projections have been calculated regarding the impact of the IPP project on visibility in the area if an 18-day exemption were allowed. These studies show that visibility from some of the most beautiful viewpoints in the park would decline from an existing visibility range of 100 miles down to 15 miles. The esthetic impact would be severe; the particulate matter and nitrogen dioxide from the emission of such a plant creates a brownish-orange plume which is highly identifiable. The refusal of the owners to relocate this facility away from the park, where sites are available and coal supplies plentiful, is an example of arrogant flaunting of the public interest. Such a facility should not be allowed to dictate Federal policy regarding the protection of highly valued recreation and scenic areas.

## 3. ALLEGATION

Legislative hearings have not been held on this provision.

## FACT

Since enactment of the 1970 Clean Air Amendments, the Subcommittee on Environmental Pollution has held 56 days of hearings to review implications of that act. Specific hearings on nondegradation were held in 1973, 1974, 1975, and 1977. In 1975, 14 days of hearings were held and 48 markup sessions were conducted. One entire day of hearings was focused completely on nondegradation in 1975, and the subject was discussed in numerous other hearings that year. In 1976 4 days of hearings on specific legislation were held. Nondegradation was specifically discussed. Legislative proposals submitted to and considered by the committee included President Ford's proposal, the Environmental Protection Agency's existing regulations, and legislative proposals from the following organizations: The American Paper Institute, the American Mining Congress, Dupont, the National Association of Manufacturers, Shell Oil, Utah Power & Light, Cast Metals Federation, chamber of commerce, National Association of Counties, the Electric Utility Industry, Continental Oil Co., the Sierra Club, and the State of New Mexico and many other groups. The hearings were a combination of oversight and legislative hearings.

## 4. ALLEGATION

States have not been involved adequately in developing these amendments.

## FACT

Twenty States joined the Sierra Club or submitted independent suits requesting the courts to require a nondegradation policy. These States joined the initial Sierra Club suit: Alabama, Connecticut, Florida, Kansas, Louisiana, Maine, Massachusetts, New Mexico, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Dakota, Vermont, Texas. These States filed independent suits requesting the courts to require a nondegradation policy: Illinois, New York, Texas, California, Michigan, and Minnesota—Minnesota adopted the Michigan brief. Only three States opposed the

suits requesting the courts to require a nondegradation policy: Utah, Arizona, and Virginia.

In addition to joining suits, the following States have expressed support over the past several years for a policy of prevention of significant deterioration: Alaska, Colorado, Georgia, Hawaii, Idaho, Indiana, Kentucky, Maryland, Montana, Nevada, New Jersey, North Dakota, West Virginia, Wisconsin, and Wyoming.

Eight States testified in 1975 during the clean air hearings: New Mexico, Nebraska, Texas, Colorado, New York, California, Montana, and West Virginia. All submitted comments on nondegradation. Three meetings were held between the committee staff and State air pollution control officials representing the members of the Governors' conference. In addition, 12 meetings were held between individual State officials and committee staff members. Additional meetings were held in 1976 and 1977.

It was on the basis of the suggestions made in such meetings and statements from these witnesses that caused the committee to make substantial changes in the legislative proposals regarding nondegradation.

On May 12, 1976, the chairman of the national Governors' conference, Gov. Robert D. Ray of Iowa, sent a telegram opposing the delay of congressional action on this issue and said this:

I would like to advise that the policy of the National Governor's Conference (NGC) call for a decision for Congress to allow each State maximum flexibility to incorporate local guidance in its decisionmaking. An amendment to be offered by Senator Moss to S. 3219 would put off Congressional action on this action.

Many States are concerned that the passage of such an amendment would result in continuing litigation over present court-ordered Federal regulations and bring about uncertainties among the States and other interested parties in planning for overall development in clean air areas. Therefore, I urge you and your colleagues to insure that the vital issue of prevention of significant deterioration is settled now by Congress.

## 5. ALLEGATION

No studies have been done. A further 1-year study is necessary to have adequate information upon which to base a decision.

## FACT

This is totally untrue. Ongoing studies of implementation should be conducted, but extensive studies already exist analyzing nondegradation policy and options.

The Environmental Protection Agency has spent approximately \$1 million in studies on nondegradation policies. This is one of the most extensive and expensive series of studies which has been conducted on environmental regulations. Prior to promulgation of the final EPA regulations on December 5, 1975, EPA compiled the following studies:

First, Technical Support Document—EPA Regulations for Preventing the Significant Deterioration of Air Quality, Environmental Protection Agency, January 1975.

Second. "Sierra Club et al. Litigation—Significant Deterioration," B. J. Steigerwald, September 27, 1972.

Third. "Summary of Responses Received Regarding the Prevention of Significant Deterioration."

Fourth. "Summary of Responses Received Regarding the August 27, 1974, Proposal To Prevent Significant Deterioration of Air Quality."

Fifth. "Summary of State Responses on 'Significant Deterioration' Proposal."

Sixth. "The Impact of Proposed Nondegradation Regulations on Economic Growth," volumes 1 and 2, Harbridge House, Inc., November 1973.

Seventh. "Implications of Nondegradation Policies on Clean Air Regions: A Case Study of the Dallas-Ft. Worth AQCR (215)," U.S. Department of Commerce, May 1974.

Eighth. "Analysis of the U.S. EPA's Proposals to Prevent Significant Deterioration Relative to the Development Outlook for New York State," New York State Department of Environmental Conservation, October 1973.

Ninth. "Impact of the Proposed Nondegradation Alternatives on New Power Plants," TRW, Inc., September 28, 1973.

Tenth. "Economic Growth and Development Impacts of Proposals to Prevent Significant Deterioration of Air Quality."

Eleventh. "Scientific Factors Bearing on Regulatory Policies to Assure Nondegradation of Air Quality."

Twelfth. "Availability of Air Quality Data in Areas Generally Below the NAAQS."

Thirteenth. "Technical Data in Support of Significant Deterioration Issue."

Fourteenth. "Nondegradation and Power Plant Size," J. A. Tikvart, August 12, 1974.

Fifteenth. "Significant Deterioration in Zone I Areas and the Relative Location of Powerplants," J. S. Tikvart, October 15, 1974.

Sixteenth. "Discussion Paper on the Magnitude of the Class II Increment in the Significant Deterioration Regulations."

Seventeenth. "Emissions of Sources Subject to Significant Deterioration Issue."

Eighteenth. "Guidelines for Air Quality Maintenance Planning and Analysis, volume 10: Reviewing New Stationary Sources," EPA, September 1974.

Nineteenth. "Guidelines for Air Quality Maintenance Planning and Analysis, volume 12: Applying Atmospheric Simulation Models to Air Quality Maintenance Areas," EPA, September 1974.

Twentieth. "Findings of Task Force on Significant Deterioration," R. G. Rhoads, December 20, 1973.

Twenty-first. "The Largest Annual Average, Maximum 24-Hour and Minimum 3-Hour Concentrations of Sulfur Dioxide Produced Per Year by a Modern 1,000-MW Electric Power Plant Meeting the New Source Performance Standards for Sulfur Dioxide Emissions," Enviroplan, Inc., 1974.

In addition, the Environmental Protection Agency received over 3,000 pages of testimony at the hearings held on its proposed regulations. Ninety-one comments were received from industry.

The following studies have been conducted on various Senate committee proposals:

First. "An Analysis of the Impact on the Electric Utility Industry of the Alternative Approaches to Significant Deterioration," EPA/FEA, October 1975;

Second. Chamber of Commerce Analysis and Discussion Papers;

Third. Analysis of the Impact of the Senate Proposals on the State of Alaska;

Fourth. "A Preliminary Analysis of the Economic Impact on the Electric Utility Industry of Alternative Approaches to Significant Deterioration," EPA, February 5, 1976;

Fifth. "Impact of Significant Deterioration Proposals on the Siting of Power Plants" by Environmental Research and Technology, Inc., February 18, 1976;

Sixth. "Impact Analysis of the Effective Proposed Clean Air Act Amendments and Existing EPA Significant Deterioration Regulations on Electric Utilities in Minnesota and Wisconsin" by David Hoffman, James Bechthol, November 14, 1975;

Seventh. "Technical Studies for Assessing the Impact of Significant Deterioration Regulations," EPA, May 1976;

Eighth. "Summary of EPA Analysis of the Regional Consumer Impact of the Clean Air Act on Significant Deterioration," EPA, May 3, 1976;

Ninth. "A Preliminary Critique of FEA's Analysis of the Impact of Significant Deterioration on Oil Consumption," May 3, 1976;

Tenth. "Estimated Cost for the Electric Utility Industry of Nonsignificant Deterioration Amendments Currently Considered by the United States," NERA, April 16, 1976;

Eleventh. American Petroleum Institute Report by John J. Anderson, April 19, 1975;

Twelfth. "Summary of EPA Analysis of the Impact of the Senate Significant Deterioration Proposal," April 28, 1976;

Thirteenth. "Proposed Clean Air Amendments: Implications of Proposed Rules for Nondegradation of Air Quality on the Construction of Kraft, Pulp and Paper Mills," Environmental Research and Technology, Inc., for the American Paper Institute, September 9, 1975;

Fourteenth. "Proposed Clean Air Amendments: Implications of Nondegradation Rules on Maine," Environmental Research and Technology, Inc., for the American Paper Institute, August 28, 1975;

Fifteenth. "The Effect of Proposed Nondegradation Rules on the State of Maine," Environmental Research and Technology, Inc., for the American Paper Institute, October 30, 1975;

Sixteenth. "A Summary of the Background Levels of Air Quality Parameters for the Oil Shale Tracks in Colorado and Utah from September 1974 through February 1975," American Petroleum Institute, July 14, 1975;

Seventeenth. "Power Plant Impacts on National Recreation Resources," Department of the Interior, March 1976;

Eighteenth. "An Air Quality Evaluation for the Intermountain Power Project," Westinghouse Electric Cooperation

Environmental Systems, October 16, 1975;

Nineteenth. "Health Basis for Preventing Significant Deterioration: An Ounce of Prevention," December 3, 1975;

Twentieth. "Benefits From Preventing Significant Deterioration of Air Quality," April 14, 1976;

Twenty-first. "Impact of Proposed Nonsignificant Deterioration Provisions," Draft Interim Report, Inter-City Fund, Inc., April 14, 1976;

Twenty-second. "Impact of Significant Deterioration Proposals Upon Western Surface Coal Mining Operations," Environmental Research and Technology, Inc., for the Federal Energy Administration, May 5, 1976;

Twenty-third. "An Evaluation of Additional Production Costs for Significant Deterioration and Best Available Control Technology Proposals," General Electric Company, April 26, 1976;

Twenty-fourth. "Technical Evaluation of the Nondegradation Portions of Proposed Clean Air Act Amendment," Environmental Research and Technology, Inc., February 1977;

Twenty-fifth. "The Impact of Significant Deterioration Proposals on the Siting of Electric Generating Facilities—Documentation of Analyses Undertaken between July 1975 and September 1976," Environmental Research and Technology, Inc., prepared for the Electric Utility Clean Air Coordinating Committee, February 1977;

Twenty-sixth. "The Northern Cheyenne Air Quality Redesignation Report and Request," Northern Cheyenne Tribe, Inc., March 3, 1977;

Twenty-seventh. "Cost and Economic Impacts of Proposed Nonsignificant Deterioration Amendments to the Clean Air Act," prepared for Clean Air Coordinating Committee, March 8, 1977;

Twenty-eighth. "A Survey of Power Plant Siting Potential Considering Significant Deterioration and Effects Due to Elevated Terrain and Stagnation," prepared for Utah Power and Light Co. by North American Weather Consultants, Santa Barbara, Calif., January 1977;

Twenty-ninth. "The Cost of Clean Air Legislation," National Economic Research Associates, February 1977.

All of these studies have highlighted the fact that the conclusions reached depend very heavily on the assumption used in conducting the study. Many studies by industry contained untrue allegations that large portions of the country would be blocked from further development. These studies were inaccurate because their initial assumptions were flawed.

Proposals to delay any nondegradation policy while further studies are conducted are merely a smokescreen for the desire to have no such policy at all.

#### 6. ALLEGATION

EPA's basis for requiring pollution cleanup has been challenged and EPA staff has been charged with deliberately distorting data regarding the effects of pollution.

#### FACT

These charges have effectively been laid to rest. Hearings held Friday, April 9, 1976, by the House Interstate and Foreign Commerce and the House Science

and Technology Committees established the following:

First. Current national ambient air quality standards were established prior to the initiation of the study in controversy—the Community Health and Environment Surveillance System Study—CHESS. Even if the CHESS studies were discarded, this would not affect any of the national standards or EPA's implementation policies, all of which are based on a number of studies, of which CHESS is only one.

Second. The CHESS studies, however, should not be discarded; though no study is perfect—and epidemiological studies are particularly difficult to conduct—the CHESS studies have been characterized as the best of their kind in the world and the most reliable epidemiological studies ever carried out.

#### 7. ALLEGATION

Costs of construction delays as a result of the Senate nondegradation policy may be extensive; therefore, no such policy should be adopted.

#### FACT

Greater uncertainty will occur by eliminating the Senate provision than by accepting it and establishing congressional policy in this area. If Congress remains silent on this subject now, that will only aggravate uncertainty, not erase it.

The policy contained in the Senate committee bill will clarify policy and reduce uncertainty. Sources may then apply for the right to construct new facilities knowing the ground rules. At present no such certainty can occur.

Moreover, present EPA regulations are subject to court challenge. If the Sierra Club wins, then EPA will be required to tighten its requirements. Even if EPA is sustained, it still could revise its regulations to make them more stringent. On the other hand, by prescribing the requirements in the bill, EPA's authority to promulgate more restrictive rules is curtailed.

#### 8. ALLEGATION

A no-growth buffer zone of 60-100 miles will be required to prevent pollution of the Federal parks.

#### FACT

This is totally false. Under the Senate bill—but not the EPA regulations—the class I increment which protects such areas is used as an initial, not a final, test. An appeal is allowed which would permit construction of a major facility regardless of the test for a class I area if the applicant can demonstrate no adverse impact on the air quality values of the class I area.

In addition, according to joint EPA-EPA calculations, a well-controlled 1,000 megawatt coal-fired powerplant could locate as close as 6 miles from a class I area without causing that area's increment to be exceeded.

#### 9. ALLEGATION

At least 80 percent of many States would be off-limits to new development.

#### FACT

One percent of the Nation's land would be directly placed in a class I

category, which is designed to protect these important national resources: all international parks, and each national park, memorial park, and wilderness area over 5,000 acres.

#### 10. ALLEGATION

Amendments not only ban new manufacturing plants, but even new housing, farming operations, and recreation.

#### FACT

This is false. The provisions only apply to "major emitting facilities" which emit over 100 tons of the pollutant per year and which are listed as a major emitting source category in the bill.

#### 11. ALLEGATION

The increments (of allowable degradation of air) are often found to be violated by natural emissions which occur in rural and scenic areas. Therefore, further development already is taken up by nature in many areas.

#### FACT

The increments are in addition to any existing baseline air quality. Such a baseline includes natural emissions and existing manmade sources. The increment is an allowable quota which is added to the existing air quality. Nature cannot use it up. The secondary standards, including natural pollution, establish the limits on growth. No one supports violating secondary standards.

#### 12. ALLEGATION

Most Federal lands would be class I, effectively ruling out most land in some States.

#### FACT

This is false. Under the Senate bill, only existing national parks over 6,000 acres and national wilderness areas over 5,000 acres would be class I. All other Federal lands, including national forests, Indian lands and monuments could only be redesignated as class I with State concurrence.

#### 13. ALLEGATION

The number of mandatory class I areas will increase as new national parks and national wilderness areas are created.

#### FACT

This is not true. The mandatory class I designation only applies to national parks and national wilderness areas over 5,000 acres which are in existence on date of enactment.

#### 14. ALLEGATION

The prevention of significant deterioration provisions is a Federal land use policy based solely on one criterion: air quality.

#### FACT

The Senate bill does not require any land classification scheme to be undertaken by the State. The bill in question only regulates air quality and emissions, not land use. The States are free to use the land as they see fit.

Of course, air quality is not the only, let alone the decisive, factor in influencing a State's growth decision. It is merely one factor to be considered.

#### 15. ALLEGATION

The nondegradation policy would have a much more severe impact in some States than in others.

#### FACT

This allegation comes from a misunderstanding of the use of air quality increments proposed in the committee bill.

Even without a nondegradation policy, an air quality increment already exists in clean air areas. The increment is the amount of pollution which could be added to the area until the ambient air quality standards are reached. In areas of flat terrain, that increment is large. In areas of severe terrain, that increment—up to the national ambient air quality standards—is smaller because pollution concentrations build up rapidly against mountainsides. Therefore, States with flat terrain have a greater competitive advantage if no nondegradation policy exists.

Under nondegradation policy, this uneven competitive disadvantage would be diminished. The amount of additional pollution allowed in all areas will be the same. Areas of uneven terrain are frequently constrained by the national primary and secondary ambient air quality standards. The terrain effects would provide constraints with or without a nondegradation policy. In such cases, the nondegradation requirement for the use of best available control technology will enable such areas to control pollution and allow further growth.

#### 16. ALLEGATION

Western States will be held at their present levels of development and not be allowed to develop their energy resources. The Nation will be asked to curtail its industrial output.

#### FACT

These allegations are false. They echo the erroneous position of the chamber of commerce since the summer of 1975—a line which has not been altered even though it has been fully discredited. In responding to the Chamber's allegation, Roger Strelow, Assistant Administrator of the Environmental Protection Agency, said:

I have just read your article in September's Washington Report. . . . The article claims that the Environmental Protection Agency's regulations for the Prevention of Significant Deterioration of Air Quality would endanger States' development and "ban development in areas 60 to 100 miles adjacent to select Federally owned lands such as national parks and forests." This is simply not true.

First, the regulations do not apply to all development, but only a select number of the major stationary industrial sources. Thus, contrary to what the article concludes, activities such as construction, farming, light manufacturing, and residential development are not affected by the regulations.

I would like to comment on the article's contention that Congress in amending the Clean Air Act, is considering a "no growth federal land use policy" based solely on air quality. That is nonsense. In response to the Administration's request to consider all alternatives and to give explicit guidance on a prevention of significant deterioration policy that allows a balancing of environmental, economic and energy objectives, the Congressional Subcommittees have provided proposals that give the States the authority to make their own determinations of what constitutes significant deterioration within a framework of allowable air quality levels. Like EPA's regulations, these proposals require the

States to consider and balance their various objectives, with full public participation. The proposals apply only to major industrial sources.

The public wants to preserve clean air. According to an August 1975 poll commissioned by the Federal Energy Administration 94 percent of the American people favor preserving our clean air regions.

The EPA analysis of energy facilities indicates that coal gasification, oil shale, coal-fired powerplants and other such energy facilities can meet the nondegradation requirements.

In the CONGRESSIONAL RECORD on April 29, 1976, on page 11761, a new EPA study is printed showing that all major industries could build under the Senate committee's nondegradation proposal. These include powerplants, papermills, smelters, refineries, and so forth.

In sum, Western States will not be precluded from development, and the Nation will not be asked to curtail its output. It will be asked to insure that its growth is clean and that analysis of future development occurs in a rational policy rather than on the basis of piecemeal, private decisionmaking.

#### 17. ALLEGATION

There will be a loss of employment due to the nondegradation provisions.

#### FACT

This is incorrect. In addition to the fact that this provision only applies to new facilities—to employment not yet developed—the pollution control requirements imposed in the committee bill will increase employment, not reduce it. In an immediate sense, more jobs will be needed in order to construct the pollution control facilities associated with compliance—facilities which might not have been installed without these amendments. In an economy with high unemployment, this is a plus.

Studies of the Council on Environmental Quality and Chase Econometrics show the economic effects of pollution control. These requirements have led us to the creation of 1 million new jobs, according to the CEQ.

#### 18. ALLEGATION

We do not know which areas of the Nation are clean enough to qualify for coverage under the nondegradation provision and, therefore, must wait for further information before determining that such areas should be protected from significant deterioration.

#### FACT

This criticism misses an important difference between nondegradation areas and dirty areas; it implies that expansion in nondegradation areas will somehow be more restricted than expansion in areas which have exceeded national ambient air standards.

This is untrue. In fact, expansion in dirty areas is more difficult. The health and welfare standards have already been exceeded in such areas, and a substantial burden rests on any applicant for a new source to demonstrate that he will not worsen that situation or interfere with cleaning up to the national stand-

ards; such a source must make the case that any pollution should be allowed.

Absolute knowledge does not exist. There are many gaps in data on monitoring of existing air quality. But this does not provide a reason for delaying a policy to protecting existing air quality. Most States will be able to make intelligent judgments of air quality in areas where little monitoring data exists. As new applications are submitted, information will be gathered as part of the permit approval process.

#### 19. ALLEGATION

Technology does not exist to model the projected emissions from new sources or for monitoring the emissions from these sources. Therefore, Congress should not act until precise tools exist.

#### FACT

This criticism has a "Catch-22" approach. It says that sources should be allowed to pollute because science has not developed precise techniques for telling exactly how much pollution is created; by the time such techniques are developed, they could very well be useless in protecting air quality, since deterioration would have made the question moot.

For years State air pollution control agencies and Federal agencies have used modeling projections to analyze applications for new sources that would continue under the nondegradation proposal. There is no other way of determining the impact of a source that has yet to be constructed.

In most cases, the errors identified show that most pollution is occurring, not less. This indicates a need to control such pollution now.

#### 20. ALLEGATION

High quality air in clean areas is a luxury—a luxury that must be sacrificed in order to allow industry to grow.

#### FACT

Clean air is not a luxury and growth need not be sacrificed to keep it. If we attempt to sacrifice air quality now for short-term gains, we will find our water becoming more acid, our crop production deteriorating, our esthetic experience in wilderness areas declining, and our health being damaged by long-term low-level exposure.

In addition, we will find that we have lost one of the most useful, growth-preserving options available—the option of determining how air resources will be used prior to their use. Without a nondegradation policy, new sources may well adopt lesser control technologies and thereby use up the available air quality without providing room for the growth of industries that follow in subsequent years.

#### 21. ALLEGATION

A nondegradation policy will harm the poor and those on fixed income.

#### FACT

This is erroneous. Those who use this argument cite competing and mutually exclusive arguments. On the one hand, nondegradation allegedly hurts the city dweller because growth in the clean por-

tion of the metropolitan areas will not be allowed and plants will therefore be forced to flee to outlying areas. On the other hand, cities argue that growth will be restricted in rural clean air areas because of the nondegradation provision and sources will be required to remain in urban areas.

Neither allegation is correct. Dirty air areas usually have some portions that continue to be clean and new sources, if carefully controlled and properly sited, can be located in such urban areas. Growth will continue and the metropolitan area will attract jobs and industry. In addition, the amendments contain new provisions to allow expansion in such areas. In rural areas, development of new facilities is clearly allowed and nondegradation requirements only insure that the growth be as clean as possible.

#### 22. ALLEGATION

EPA will have the final control over which sources may get permits to construct.

#### FACT

This is true under present EPA regulations but not true under the Senate bill. The States are responsible for deciding whether to issue permits to new sources under the Senate bill. No State permit may be disapproved if the procedures are followed and if the ceilings and increments set in the bill are observed.

### AUTO EMISSION STANDARDS— S. 252

Mr. STAFFORD. Mr. President, during the last week several spokesmen for the automobile industry have criticized the emission standards in S. 252 on the basis of information contained in EPA's annual emission technology review entitled "Automobile Emission Control—The Development Status, Trends, and Outlook as of December 1976." Specifically that report asserts that final standards proposed for 1980 in S. 252 cannot be met until 1981.

While the technical data in the EPA report is a valuable contribution to our understanding of auto emission technology, I think it is essential that we understand the nature and source of that information. On page 1-1 of the report EPA indicates that most of the information in the document is compiled from submissions from industry.

Thus it is fair I think to conclude that the data reflects a conservative and cautious analysis of the technological capabilities of the industry.

However, the value of the information as an indication of the real capabilities of industry is further called into question by the authors of the report. On page 3-18 the report states:

In order to prepare this status report, EPA solicits from the United States and foreign manufacturers information on their development programs for emission-related technology. The responses requested from the manufacturers are expected to be full and complete descriptions of their emission-related development programs. However, EPA technical staff have reason to believe that not all of

the development effort on emissions-related work may be completely reported to EPA in a timely fashion.

I ask unanimous consent that the balance of the chapter from the technology assessment indicating specific examples of inadequate or incomplete reporting by industry be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

**AUTOMOBILE EMISSION CONTROL—THE DEVELOPMENT STATUS, TRENDS, AND OUTLOOK AS OF DECEMBER 1976**

Section 3.9. The Efficiency at Which Development Information on Emissions Related Subjects Is Reported to EPA May Be Decreasing.

As an indication of the nature of the information which has apparently not been completely reported to EPA, the following examples are given.

**NEW ENGINE DEVELOPMENT PROGRAMS**

The development and introduction of a basically new engine is a substantial undertaking. A new engine is defined here as one that requires a new or different engine block or is a different method of combustion, for example Diesel versus homogeneous spark ignition. It is generally accepted that such a program takes a significant period of time.

New engines are expected to be technologically improved over older engines, and it is not unreasonable for EPA to expect that improved emission performance would be considered in the design and development of new engines. Therefore, the reporting of the development of new engines is considered important by EPA. Recent examples of new engine developments not previously reported to EPA are projects of Volvo, GM, and VW.

Volvo started a development program on a Diesel engine with Ricardo & Company in 1974. To date, 6 vehicles have been equipped with this Ricardo/Volvo engine. The first time that Volvo reported the information concerning this engine development project was in their 1976 Status Report to EPA.

GM has reported development work on V-6 configuration engines, as it pertains to the Buick 231 cubic inch engine and its derivatives. The existence of GM's plans to produce an all-new V-6 engine completely different from the Buick V-6 has been recently reported in a trade publication.<sup>1</sup> A Chevrolet V-6 (200 CID) engine was found in the 1978 GM Application for Certification, but GM did not report the development of this engine in their status report.

The basic information that VW presented on their Diesel engine concerned their 4-cylinder engine. However, under their contract with the U.S. Department of Transportation (DOT/TSC 1193), VW is to provide information (including emissions data) on 4, 5, and 6 cylinder Diesel engines. The work on the 5 and 6 cylinder Diesel engines was not reported to EPA.

VW's progress in the development of a vehicular, ceramic, gas turbine engine has been reported in the press.<sup>2</sup> Tests have apparently been run, yielding claims for better fuel economy than vehicles equipped with gasoline engines. The engine is also reported to have been designed for low emissions. VW did not report any information about this engine to EPA.

**ELECTRONIC CONTROLS**

In this rapidly expanding area some work is now being reported to EPA. Apparently, some of the work had been ongoing for some time before the results were reported to EPA.

CXXIII—1106—Part 14

Because electronic controls offer flexibility to the emission control engineer that mechanical systems may lack, electronic controls are important. They may alter relationships between emission control and fuel economy that may have existed in the past. As long as EPA is unaware of the actual status of development of such new technology, EPA will tend to undervalue the emission control and fuel economy benefits and overstate the time it would take to implement such new technology.

GM first reported work on what was eventually to become the MISAR electronic spark control system in 1975 in their Application for Suspension.<sup>3</sup> However, according to the Application for Suspension and a publication<sup>4</sup> the development started in 1970 and took six years before it was introduced for model year 1977 in limited production.

GM did not report test results on a spark knock sensor in their status report. The GM status report did report that they are working on a combination of a knock-actuated spark control system and increased compression ratio. EPA has recently learned, however, from the 1978 GM Application for Certification that GM plans to introduce a knock-actuated spark control system in model year 1978 on a vehicle using a turbocharger, not on a vehicle using increased compression ratio.

**TURBOCHARGING**

GM and Saab indicated in their 1976 status reports that they plan to introduce turbocharged vehicles for model year 1978. Neither Saab nor GM reported development of turbocharged engines in their 1976 status reports. Either it takes less than one year to design, develop, test and commit to production for a turbocharger, or work was underway earlier and not reported to EPA.

GM<sup>5</sup> and Ford<sup>6</sup> have also been reported as having development work underway on turbocharged engines that were not reported to EPA. GM did report "many programs in GM to develop turbocharged engines", though only a V-6 engine was discussed and a Vega engine was mentioned in passing.

**MECHANICAL OCTANE IMPROVEMENTS**

The spark timing calibrations and compression ratio of an engine influence its emission and fuel economy characteristics. Any changes in the octane requirements of an engine may allow alterations in spark timing calibrations and/or compression ratio. It has been reported<sup>7</sup> that Saab has developed a method to allow for increased compression ratio. This work was not reported by Saab in their status report to EPA.

**TRANSMISSION**

The automobile industry is studying the impact of improved transmissions. Much of the interest has been on multispeed torque converters with lockup clutches for improved fuel economy. For example a recent technical paper<sup>8</sup> projected substantial gains in fuel economy (in excess of 15%) with the use of such a transmission.

The emissions produced by the engine may be altered with use of a lockup transmission because the torque/speed relationships during the test are changed. The transmission is an important part of an automobile's emission control system. Very little in the way of the emissions from advanced transmissions/advanced emission control systems has been reported to EPA. It does not seem reasonable that experimental and/or analytical work has not been done. Rather it appears more likely that the work has not been reported.

**CATALYSTS**

GM reported running a fleet of possibly improved catalysts in their status report.

When asked by EPA for the data on the then incomplete program, GM indicated that they would not provide the data until they were done with the program and had time to analyze the information themselves.

The above examples show that EPA may not be kept abreast of technological developments as much as is necessary. For the preparation of a report of this type, there is not enough time to go back to all the manufacturers and get continual updates of their programs, as areas not reported fully become known. EPA has to rely to a large extent on the manufacturers to supply full and complete reports so that EPA can make its own timely judgments as to what the data mean. Not getting important data on a timely basis can only hamper EPA's estimates of future emission control capability.

EPA technical staff realize that the preparation of responses to the EPA requests for information on progress is a difficult undertaking, and that some degree of judgment is required in deciding what to include in the response. However, the foregoing items of data that were not completely reported appear on their face to be so significant as to raise questions as to why they were not reported; it seems unlikely that they were screened out as being too unimportant to mention. Thus some thought on how reports of this type are to be prepared in the future is in order, to assure that these annual reports can continue to serve the important purposes for which they are prepared.

**OUR STAKE IN THE FREE ENTERPRISE SYSTEM**

Mr. HELMS. Mr. President, the Oak Hill Academy at Mouth of Wilson, Va., each year holds an essay contest for its graduating class. This year the subject of the contest was the free enterprise system. After the winning paper was selected, the judges found that it had been written by a young man from Indonesia who, until this year, had never lived in a free enterprise economic system. The student, Kusno Yunus, came to live in the United States during his senior year in high school, but his essay makes some very telling points about life in a free society.

Mr. Yunus has been accepted as a student at Wingate College in North Carolina and is planning to concentrate his study in either computer science or nuclear engineering. I do not know whether Kusno Yunus plans to remain in the United States or return to Indonesia after his college studies are completed, but

I am sure that either country would keenly welcome the contributions of this young man.

At times the suggestion is made that because only a fraction of the world's population enjoys the freedom which we as Americans possess, these other people do not really appreciate freedom. Of course, this view is false. Time and again those who value freedom the most are the very ones who have yet to attain it, as Mr. Yunus' essay clearly shows.

Mr. President, during the next few weeks as we consider the matter of Federal assistance to education, I think it is fitting to remember that even with larger school budgets, new educational technology, and teaching aids, education remains the product of a very delicate relationship between teacher and student. All the money in the world and all the innovative programs cannot replace that special interaction between teacher and student.

Mr. Yunus' paper is, I believe, a reflection of the fact that this relationship exists at Oak Hill Academy and, to the extent that it exists there and at the other schools throughout the Nation, America's future will be considerably brighter.

Mr. President, I ask unanimous consent that this essay by Kusno Yunus entitled "My Stake in the Free Enterprise System" be printed in the RECORD.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

**MY STAKE IN THE FREE ENTERPRISE SYSTEM**  
(By Kusno Yunus)

For me, free enterprise is just like a big chess board with pawns, rooks, bishops, knights, queen, and king on it. I am but one among the players. My aim is to win the game by obeying the rules of the game. However, I have the freedom to decide which piece I am going to move.

In a free enterprise system, I have the freedom to choose what kind of job I want to perform, which college I attend, and what kind of clothes I prefer to buy. On the other side, I have the privilege to produce things of various styles as I wish and to set the price as high as I wish, as long as I am not contradicting the commercial laws, the health regulations, and the law of supply and demand in my country.

As an ordinary person, I feel the temptations coming from everywhere. Under this free enterprise system, many kinds of products are manufactured. Each company boastfully informs the public of the quality of its product. The decision—to buy or not to buy—is clearly mine.

Sometimes I become confused. I do not know how to choose. I get lost in this wide range of choices. As a consumer, I have the right to select and whatever I select will directly affect the producers. For example, if no one wants to buy a big car during the oil crisis, the producers of the big car will run out of business; they are forced to produce small sized cars.

Today, thousands of colleges and universities are spread over the United States and hundreds of fields of study are offered in these institutions. Before I choose one for me I have to consider my ability, my finances, and my time. If I apply arbitrarily to the wrong college or university, with which I am not able to cope, probably I will flunk. In

a free enterprise system, I am forced to plan for my own future or I will eventually have nothing. The system gives me the opportunity; the rest depends on my own personal achievement.

What happens when everyone has the same opportunity, the same privilege, the same freedom, and equal rights? The answer is that competitive markets are created. Likewise, I, myself, at school have to compete with my peers at Oak Hill Academy in this composition contest in order to win the reward. To get into a good college or university I have to compete with nationwide applicants. This exactly is the free enterprise system.

This free market place urges me to become more and more active. I must search to know my stand in the affairs of the nation. I keep reading the current issues, the national affairs, and the public opinions. It is very important to know what is needed and what is wanted, the life styles of the majority of the people so that I can create something that will be pertinent or will be beneficial to the nation.

The significance of free competition is that the prices in the market become reasonable. When prices are reasonable, people buy more goods which in turn means the companies produce more goods. The higher the production rate the more workers are employed and this will directly affect the unemployment rate and the inflation rate at the same time. This is very meaningful for me since I plan to graduate in about six years from a college. I will then join this competitive society with my bare hands and my empty pockets but knowledge in my head. What I can do is to sell my knowledge and my energy, trying to get the job I prefer.

In a free enterprise system, I am given the freedom to make choices, to invest, to work, and to do other things. The major thing I should learn is how to make important decisions in my life. Suppose I should earn a great deal of money efficiently, the problem then is, if I do not use the money, the inflation will engulf the value of dollars. If it is put into a bank account, I only get 5.5% rate of interest that will not recompense my losses in the 6% inflation rate. If I use my money to buy shares of stock in companies, I have to take the risk. This is a risk I shall gladly take.

Just suppose that I lived in a communist country. I would have to put the state first and myself second. The government decides what I can and cannot do. For example, if I should want to work in the textile industry the state could direct and force me to another field. I would have no freedom to choose what I want myself to be. I am merely a pawn on the chess board the politicians play. Perhaps even worse than the lack of personal freedom is that the government controls the press, the mass media, and the books of the society. I am isolated intellectually from the outside world. There would not be allowed talk of political affairs nor can I protest against the inhumanity of the laws. I cannot build my own business since the state possesses everything. I am quite like a bird in a golden cage, no control over my future, my destination, and no freedom at all. I think I would get some kind of mental illness under this situation where punishments are the propellers to get people to work rather than the use of rewards. I would be existing, but not living. The free enterprise system allows me to live, not merely exist.

Although some may think I play a very simple role as a single citizen in a free enterprise system, on the chess board of play I am the master of myself, a not so simple role to me. What could possibly sound better than this?

**ALTON LOCKS AND DAM NO. 26**

Mr. EAGLETON. Mr. President, on May 23, 1977, the minority leader, Senator BAKER, placed into the CONGRESSIONAL RECORD a letter addressed to him from the Secretary of Transportation, the Honorable Brock Adams, that addressed S. 790, a bill proposing, basically, two things: The establishment of both a system and variety of waterway user charges on all of the Nation's inland waterways; and, the reconstruction of an existing lock and dam situated at Alton, Ill. In his letter, Secretary Adams first expressed his own and President Carter's concerns over a number of issues that they believe are raised by S. 790 and, second, stated the administration's intentions with respect to S. 790 if several of these issues were not resolved by the Congress in a manner satisfactory to the administration. At the time of the insertion of the Transportation Secretary's letter into the RECORD, it was explained that it was being done, because the letter dealt with important issues of interest to all Members of the Senate.

More than half of the Transportation Secretary's letter, as he notes, is, in fact, a summary of his testimony of May 2, 1977, on S. 790 before the Water Resources Subcommittee of the Senate Committee on the Environment and Public Works. The remainder of the Secretary's letter discusses the changes made to S. 790 by the Senate Commerce Committee after it received the proposal, because of its concurrent jurisdiction and declared the President's intention to veto S. 790 if it authorized the construction of a new lock and dam 26 prior to completion of an 18-month field test on the existing lock and dam and if the measure did not contain a provision for the establishment of waterway user charges.

The insertion of the Transportation Secretary's letter was intended both to provide the Senate with notice of the administration's position on S. 790 and to inform the Senate of the elements and reasoning of this position. It has been brought to my attention that an understanding of the administration's position as expressed in the Transportation Secretary's letter in which he incorporated his own prior Senate testimony is not realistically possible without also considering the testimony of the Transportation Secretary that he incorporated into his letter. In addition, it appears that a number of misunderstandings have been generated by not considering the Transportation Secretary's letter in the context of his prior and related testimony. For example, it is only by reading both the letter and the testimony that it is clear that the administration has grounded its position on waterway user charges that take the form of a fuel tax. The Secretary further stated:

The complete details of the proposal have not yet been worked out, and we will work with the Congress on this matter once we have a detailed proposal to present.

The prepared Senate testimony of the Transportation Secretary is brief and to

the point. In order fully to achieve the earlier objectives intended by inserting the Transportation Secretary's letter into the RECORD as well as to correct any misunderstandings that may have been created by the insertion of this letter without the clarifying testimony, I ask unanimous consent that the letter to the distinguished minority leader, Senator BAKER, and the Transportation Secretary's prepared testimony on S. 790 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF TRANSPORTATION,  
Washington, D.C., May 20, 1977.

HON. HOWARD BAKER,  
Minority Leader, U.S. Senate,  
Washington, D.C.

DEAR SENATOR BAKER: As you are aware, I testified on May 2, 1977, before the Water Resources Subcommittee of the Senate Committee on the Environment and Public Works concerning the position of this Administration on the issues of Lock and Dam 26 and Waterway User Fees. I indicated that the Administration strongly favored the imposition of a user fee system, to be imposed gradually over five years, which would recoup 100 percent of waterway operating and maintenance costs and all or a substantial portion of new construction costs. Federal expenditures on waterways through the Corps of Engineers and the Coast Guard are now approaching \$1 billion a year. Commercial waterway users are thus receiving a major benefit from these Federal expenditures, while the full burden of those expenditures falls on the shoulders of the taxpayer. It is simply not equitable, not just, that large, profit-making businesses should have their costs met by the Federal government to this extent.

I further indicated that it was the position of the Administration that before any new lock and dam facilities are authorized at site 26 in Alton, Illinois, an 18-month engineering field testing effort should be undertaken concerning the possibility of rehabilitating the existing lock and dam facility and expanding the lock capacity to 1200 feet. We believe, through new engineering techniques, that rehabilitation is a viable possibility that deserves very serious consideration since it could cost considerably less taxpayer money than construction of a new lock and dam. In view of the fact that Department of Transportation studies indicate that a 1200 foot lock capacity will not be necessary until at least 1990 and the fact that construction will require 8 to 11 years, there is ample time for the rehabilitation possibility to be properly explored. Repairs on the existing lock and dam are now being undertaken that will assure that the facility can function safely until any rehabilitation or construction is completed.

As you know, however, the Senate Environment and Public Works and Commerce Committees has reported a bill (S. 790) at some variance with this position. While the Public Works version contains a user fee provision, it would also authorize a new lock and dam. The Commerce Committee voted in favor of authorizing a new lock and dam and to have DOT study user fees over 18 months.

Because of the importance of this legislation to overall transportation planning and because of its impact on the President's efforts to balance the budget, I feel I should inform you and the Senate of the President's very firm intention to veto any bill authorizing construction of a new Lock and Dam 26 prior to completion of the 18-month field test which does not also contain a provision for the establishment of waterway user charges.

I am hopeful that, working within this constraint, we will be able to enact legislation satisfactory to the various interests involved, and I look forward to working with you in this regard. I would be happy to meet with you at any time to review the basis for the Administration's views on this matter.

Sincerely,

BROCK ADAMS.

#### STATEMENT OF BROCK ADAMS

Mr. Chairman and Members of the Subcommittee: I am pleased to be here today to testify on S. 712, S. 790 and S. 923, bills which have been introduced to deal with the closely related issues of capacity expansion at Locks and Dam 26 at Alton, Illinois, and waterway user charges.

First, let me tell you where we stand now on Alton Locks and Dam. As you know, at the request of this Subcommittee, the Department recently completed a 120-day study on some of the economic aspects of a single 1200-foot lock at Alton. Our economic analysis led us to the conclusion that based on traffic projections an increase in the capacity of the facility at Alton will certainly be required before the end of the century. However, the uncertainty involved in projecting future traffic makes it difficult to pinpoint an exact date by which this additional capacity will be needed. The Department's review of the projections and analyses done by others suggests that increased capacity may not be needed until the last decade of the century. As a practical matter, however, a single 1200-foot lock should be constructed with either major rehabilitation or construction of Locks and Dam 26.

The study also found that a single 1200-foot lock at Alton would not cause significant diversion of existing rail traffic to the waterways. Expansion of lock capacity at Alton would cost the railroads future traffic which they would, in any event, carry only if a decision were made to hold the capacity at Alton at its present level indefinitely. Thus, as far as a single 1200-foot lock is concerned, the only questions are of timing and costs.

Any further capacity increase at Alton beyond that provided by a new 1200-foot lock and any other major capacity increases on the upper Mississippi and Illinois River system should await the completion of a detailed and extensive analysis of the economic and environmental aspects of such capacity increases. A study of this sort could well require a couple of years. During this period, we will work with other agencies to study commodity projections, the impact of user charges on these projections, intermodal impacts and environmental questions, as well as engineering questions. What we are really talking about, then, is whether a decision should be made on a single 1200-foot lock for Alton before or after such a study is completed. The answer to this question and the question of whether the existing facility should be replaced or rehabilitated turns on the engineering aspects of the issue.

The engineering questions are not simple. The Corps of Engineers, following a traditionally conservative approach to the engineering problem of the existing structure, concluded that the expense of rehabilitation would be approximately equal to the cost of replacement with a modern structure. If this proves to be correct, then it is crystal clear that the facility should be replaced and that the new facility should have a single 1200-foot lock in it. It would be foolish not to take advantage of new construction to gain a moderate increase in capacity at a relatively slight increase in cost over what it would cost just to replace the existing capacity.

However, the Corps' engineering approach to rehabilitation has been challenged and the view advanced that the cost of rehabilitation is, in fact, much lower than the cost of replacement. I have had a team of my

own engineers working with the staff of the Corps to review these differences. The conclusion reached by our engineers is that there are lower-cost approaches for rehabilitation of the existing dam which ought to be tested before a final decision is reached. Our engineering task force is of the opinion that there is no useful purpose to be served by any further studies on this question. Their recommendation is that, as early as possible, engineering investigations be undertaken in a way which will let us experiment with the techniques and measures that are in question. Secretary Alexander and I have discussed this recommendation and have concluded, especially in view of the possibility of significant savings if rehabilitation proves feasible, that it should be tried.

In his testimony, General Graves of the Corps will provide you with more details on specifically what is involved. In taking this course, we believe it will be possible to determine for \$10 to \$15 million—a low cost relative to the costs of rehabilitation or replacement—whether the lower cost alternative rehabilitation methods are, in fact, feasible. If these measures do turn out to be feasible, we can go ahead with the rehabilitation of the existing structure. This rehabilitation could well include provision of a 1200-foot lock. A final decision on the level of capacity to be provided in a rehabilitated dam cannot be made, however, until further engineering work has been completed.

On the other hand, if the results of this experiment show that the less expensive ways of rehabilitating the dam do not work, then we can turn to the construction of a new facility with the certain confidence that we have not overlooked an opportunity to effect significant savings.

As far as legislation on Alton Locks and Dam is concerned then, I have the following specific recommendations:

The Congress should postpone a decision on rehabilitation or replacement until the engineering questions have been resolved.

Any future authorizing legislation should contain a prohibition against a 12-foot channel project on the upper Mississippi River and provide for additional economic and environmental study of future transportation needs of the upper Mississippi and Illinois regions.

There should be action by the Congress to enact a fair and effective system of waterway user charges.

Let me now turn to the question of cost sharing and user charges. DOT has extensively studied the possible impacts of user charges, and the results of these studies are presented in the report, "Modal Traffic Impacts of Waterway User Charges." As President Carter said in his message on water policy: "The beneficiaries of Federal water projects do not bear a fair share of the enormous capital and operating costs."

The really major point here is that commercial users receive major benefits from Federal expenditures, while the full burden of those expenditures falls on the shoulders of the taxpayer. It is simply not equitable, not just, that profit-making businesses should have this much of their costs met by the American taxpayer.

Practically all of the Federal expenditures in support of the waterways are made by the Army Corps of Engineers and the Coast Guard. These expenditures have been rising and now are approaching the \$1 billion a year level. As a result of these Federal programs, inland, coastal and Great Lakes vessel operators do not maintain or pay taxes on the rights-of-way which they use. A notable exception is our St. Lawrence Seaway where tolls on vessels and cargoes not only cover the operation and maintenance costs of the Corporation, but annually return to the Treasury part of the original U.S. investment in the St. Lawrence facilities.

Establishing a fair and efficient system of

cost sharing is, obviously, a question of great sensitivity, and the amount and manner in which such a charge is collected could have a significant bearing on whether or not Congress would pass the necessary legislation. In addition to the purchaser of the transportation services and ultimately the consumers, there are the concerns of at least three groups that have to be reconciled in establishing waterway user charges—the users of the waterways, who resist the added costs; the railroad operators who maintain their own right-of-way and feel their competition receives unfair subsidy; and the taxpayers who pay for Federal agencies to furnish the facilities and services. The Department believes the selection of a policy for cost recovery through waterway user charges should take into consideration the principles of administrative simplicity, political feasibility, and public understanding and acceptance. For these reasons, we believe a fuel tax would be preferable to the segment toll.

The complete details of the proposal have not yet been worked out, and we will work with the Congress on this matter once we have a detailed proposal to present. I can tell you, however, what some of the basic points will be. We are going to ask for a fuel tax which would go up in increments over the next five years so that at the end of that period there would be full recovery of inland waterway operating, maintenance and rehabilitation costs. In addition, all or some portion of the cost with interest of new construction would be recovered over the life of a project. All user charge revenues will accrue to the general fund rather than to any trust fund. While these charges are being phased in, the impact of the user charge on shippers will be closely monitored.

While we believe, in principle, that recreation users of developed facilities should be assessed user fees and that users of developed deep draft systems should also contribute to the cost of those systems, we have not yet developed such proposals in detail. The unique cost recovery situation which already exists on the St. Lawrence Seaway would, of course, also be taken into consideration so that inequities would not result. In a short time the Administration will be presenting a complete proposal, but these are the basic elements.

In conclusion, the Administration believes that it is no longer in the national interest to continue direct taxpayer support of commercial water transportation without some form of cost sharing. Water transportation should join the air and highway modes in paying user charges for Federally provided rights-of-way.

Mr. Chairman, that completes my prepared remarks.

#### CLEAN AIR AMENDMENTS OF 1977

Mr. GARN. Mr. President, later this week, that Clean Air Act Amendments of 1977—S. 252—will be on the floor. I have introduced a number of amendments, and I would like to take a few minutes to explain them, and then to discuss some of the philosophical issues raised by this legislation.

Amendment No. 303 strikes from the bill the requirement that sources of emissions which make use of supplemental emission reduction strategies which are otherwise approved by the act continue to pay employees whose services are reduced by the reduction. In other words, if a smelter reduces its rate of operation during adverse atmospheric conditions, as a way of achieving ambient air quality standards, as things stand under the bill, employees would have to continue to be

paid for work they are not performing. Under my amendment, however, employers would pay only for work actually performed. I ask unanimous consent that amendment No. 303 be printed at this point in the Record.

There being no objection, amendment No. 303 was ordered to be printed in the Record, as follows:

#### AMENDMENT No. 303

On page 11, line 15, strike out all through line 23.

Mr. GARN. Mr. President, amendment No. 301 is really in the nature of a technical clarification. What it does is maintain clearly a legal distinction between Indian tribes and States. The amendment would not in any way change the powers of either the tribes or the States under the bill. It simply changes the language in the bill from "States" to "States and Indian tribes." It is, in my opinion, a bad precedent to set to say that "the term 'State' shall include Indian tribes." I ask unanimous consent that the text of amendment No. 301 be printed at this point in the Record.

There being no objection, amendment No. 301 was ordered to be printed in the Record, as follows:

#### AMENDMENT No. 301

On page 21, line 11, after the word "subsection" insert the following: "or Indian tribes within such State".

On page 21, line 15, insert after "State": "or ruling body of the affected Indian tribe".

On page 21, line 18, insert after "Governor": "or ruling body".

On page 21, line 20, strike the word "States" and insert in lieu thereof the word "parties".

On page 21, line 21, insert after "State": "or Indian tribe involved".

On page 21, line 23, insert after "State": "or tribe", and strike "States" and insert "parties".

On page 22, strike lines 4, 5, and 6.

Mr. GARN. Mr. President, amendments No. 315 and No. 317 are introduced as equity amendments. Under the committee bill, international parks, national wilderness areas, and national memorial parks which exceed 5,000 acres in size, together with national parks which exceed 6,000 acres in size, are automatically class I areas. Smaller parks and wilderness areas would initially be classified as class II areas, and the Governor would have the option to upgrade the classification to class I. There are a number of States with several very large parks and wilderness areas which would be discriminated against by this automatic classification. The discrimination would be in favor of State flexibility for States with smaller parks and wilderness areas.

For instance, where a State has only small parks, there would be no automatic class I areas under the committee bill. The State could redesignate the park or area as class I, but would not have to. Under my amendment, States with large parks and wilderness areas would be given the same rights: up to 5,000 acres of wilderness areas and 6,000 acres of national parks could be kept by the Governor in class II status.

In the event that amendment No. 315 is not accepted, I would expect to call up No. 317, which would simply classify all international parks, national parks, wilderness areas, and national memorial parks class I, regardless of size. I ask

unanimous consent that amendments No. 315 and No. 317 be printed at this point in the Record.

There being no objection, amendments Nos. 315 and 317 were ordered to be printed in the Record, as follows:

#### AMENDMENT No. 315

On page 12, line 13, change the semicolon to a comma and add the words "except that the Governor of a State may designate as class II the first five thousand acres of any national wilderness area or national memorial park which lies entirely within the boundaries of his State, and the first six thousand acres of any national park which lies within the boundaries of his State: *Provided*, That the exempted area is compact and contiguous and located at the boundary of the park or wilderness area;"

#### AMENDMENT No. 317

On page 12, line 9, delete the words "which exceeds five thousand acres in size,".

On page 12, line 11, delete the words "which exceeds six thousand acres in size,".

Mr. GARN. Mr. President, amendment No. 316, which I have introduced with Senator HATCH, addresses what is in my view the most critical aspect of clean air legislation: Nondeterioration. As the Senate knows, there has been some doubt about the intent of the Congress in this area, since the 1970 Clean Air Act was passed. The Environmental Protection Agency initially held that no national policy of nondeterioration was intended by the Congress in 1970. Several Federal courts held otherwise, and in 1972, the Supreme Court, by an equally divided vote, upheld the decision of the Court of Appeals. The practical effect of this decision was to order EPA to write regulations providing for the maintenance of air cleaner than the primary and secondary standards.

In my opinion, the fact that there was so much uncertainty is clear evidence that Congress was not, in fact, adopting a policy of nondeterioration. Congress has never been bashful about usurping State responsibilities, and can do so in a clear and unequivocal manner, when it wants to. What is happening here is a classic case of judicial interference in the legislative process. The Federal courts have decided that we should have a national policy of nondeterioration, and that therefore, Congress must have wanted to enact one, and that therefore, Congress did enact one. And now, we appear to be intent on meekly following the lead of the courts.

Last year, when the Clean Air Act was before the Senate, Senator SCOTT, of Virginia, introduced an amendment, which I was happy to cosponsor, which clarified congressional intent. What the Scott amendment did was to establish a limit to Federal responsibility. The limit established was that of health and welfare. In effect, Senator SCOTT said, it is the responsibility of the Federal Government to establish air quality standards sufficient to protect health and welfare. That is what the primary and secondary ambient air quality standards do. Beyond that, the Federal Government has no responsibility. It is not the job of the Federal Government to protect clean air from people. The beauty of the land may be desirable, and the majestic vistas of our country may deserve protection. But,

and this is the critical point, it is not the job of the Federal Government to protect them. If they are to be protected, they must be protected by local government, which alone stands close enough to the problem to find solutions, which alone can carry out the delicate balancing task needed to preserve our environmental values, and at the same time provide the jobs Americans need. Senator SCOTT apparently felt, and I agree with him, that local government will protect the environmental values that are so important to us, but that local government knows enough to reject extreme views, unrealistic views, about how much damage our economy can sustain.

With the passage of another year, we now appear to be ready once again to do the will of the Federal courts, and enact a national policy of nondeterioration. If we are to do so, Mr. President, it is critical that we retain for our local officials the maximum flexibility to balance environmental and economic demands. In other words, we must draw a line limiting Federal responsibility. If we are not to restrict the Federal Government to health and welfare, we must at the very least limit it to nondeterioration, and not allow it to get involved in land use and growth pattern control. In order to do that, we need to understand the meaning of the term "nondeterioration."

As I conceive it, air quality deteriorates over an extended time period. If there is a pollution alert here in Washington, we cannot say that air quality has "deteriorated." It may have, and probably has, here in the District of Columbia, but we can only make that judgment by comparing air quality with some point in the past. What the committee bill does is say that the comparison may be made with yesterday, or perhaps with a period 3 hours ago. In my mind, that approach is unrealistic and unnecessary. It is only meaningful to discuss "deterioration" over some longer period, such as a year.

For example, during a dust storm, a forest fire, or during the construction of the facility itself, the air quality is very poor. But the fire is extinguished, the storm subsides, or the construction ends leaving the air quality very much as it was before. It is not deteriorated in any way. By the same token, meteorological events occasionally conspire to produce temperature inversions, or adverse wind currents, which may temporarily affect the air quality over a given area. As it happens, the conditions are not permanent, and as the weather changes, the air quality reverts to its prior condition. It is not deteriorated in any way.

The basic thrust of my amendment is to take into account these natural phenomena. The committee bill says that if there is an inversion, or if the wind blows the wrong way, even over so small a space as 3 hours, air quality is deteriorated. What is even worse, is that the bill would prevent the construction of a facility on the strength of computer projections of amounts of pollution so small that they cannot even be measured. In my mind, that is simply unacceptable.

There is no showing of health hazard, or any damage to the well-being and welfare of people. In point of fact, since we are dealing here primarily with sulfur oxides, we are not even talking about impairment of the view. To prevent the development of needed resources, the creation of needed jobs, just to satisfy the theoretical demands of computer models is to deny common-sense and to allow our lives to be ruled by mechanistic models.

What my amendment would do is hew closely to the real meaning of the term "nondeterioration." My amendment says that air quality in Class I and Class II areas cannot deteriorate from year to year. Nor can the primary and secondary health and welfare standards, which do have 3-hour and 24-hour maximums, ever be violated. But the 3-hour and 24-hour maximums supposedly relating to nondeterioration would be struck from the bill. I ask unanimous consent that my amendment No. 316 be printed at this point in the RECORD.

There being no objection, the amendment No. 316 was ordered to be printed in the RECORD, as follows:

#### AMENDMENT NO. 316

On page 13, after line 20, amend the table to read as follows:

| (In micrograms per cubic meter)           |     |
|---|-----|
| "Pollutant:                               |     |
| Particulate matter: Annual geometric mean | 10  |
| Sulfur dioxide: Annual arithmetic mean    | 15" |

On page 17, following line 6, amend the table to read as follows:

| (In micrograms per cubic meter)           |    |
|---|----|
| "Pollutant:                               |    |
| Particulate matter: Annual geometric mean | 5  |
| Sulfur dioxide: Annual arithmetic mean    | 2" |

Mr. GARN. Mr. President, the Nation faces the twin critical issues of unemployment and energy, with their solutions increasingly unclear. What is clear is that excessive attention to environmental concerns, without a balancing sense of a need for orderly development and growth has contributed immeasurably to the problems. Current Federal efforts go far beyond what is needed to restore man's environment. They now go to the critical choices which have always been left to individuals: Where we will live; how we will live; how we will use our resources. This administration has not been bashful about injecting itself into these most private of decisions, with ominous implications.

As far as the employment issues goes, let me quote Robert Georgine, president of the AFL-CIO Building and Construction Trades Department, to the effect that—

The small, vocal and extreme environmental groups [are] the chief culprits in the current fuel emergency and energy crisis.

As long as our population continues to grow, we will need jobs for our children. It will not do to say "we shouldn't be having so many children, so let's stop providing jobs for them." But in essence, Mr. President, that is what some of the environmentalists are saying. They do not often say it openly, but sometimes

they even do that. For instance, Congressman WAXMAN of California admitted, during the House debate on this very bill, that what was at issue was not clean air, but the control of growth. I have heard the same thing from other politicians, and from the so-called public interest groups.

Jobs are needed, and we will be foolish to prevent the growth that will provide them. At the same time, we need the energy to fuel our Nation, and if we are to avoid unpleasant international situations, it is imperative that our energy sources be domestic ones. There is a close relationship between environmental protection, and our environmental protection laws must be adjusted to reflect our understanding of that relationship. My amendment would remove the strict and burdensome requirements relating to nondeterioration, while at the same time preserving the most meaningful measure of clean air. I hope it will be supported when the Senate takes the bill up later this week.

#### BOB GIAIMO

Mr. RIBICOFF. Mr. President, the congressional budget process is almost 2 years old and still experiencing growing pains. In the House this year, the process could have seriously suffered, were it not for the able and competent leadership of my good friend from Connecticut BOB GIAIMO, as chairman of the House Budget Committee. Congressman GIAIMO took over the reins of the Budget Committee after its first chairman, Brock Adams, was named Secretary of Transportation. Last month, the first concurrent budget resolution seemed headed for a major defeat. BOB GIAIMO realized that the congressional budget process itself was at stake. He revised the budget resolution and shepherded it through the House, by arguing that the health and viability of the budget process necessitated compromises on specific spending proposals.

In his handling of the budget resolution, BOB GIAIMO again showed himself to be a man of fairness and reason with a clear perspective on major issues.

Recently, the New York Times featured an article on BOB GIAIMO which gives an accurate picture of both the man and the legislation. I commend this article to the attention of my colleagues. Mr. President, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

#### GIAIMO: CAPITOL BUDGET MAKER (By Edward C. Burks)

On the wall behind the clutter of papers and budget reports on his desk there is a splendid symbol of the Renaissance. It's a large sketch of the Duomo, the famous Florentine cathedral, a gift—the sketch, that is—from the Mayor of Florence.

It occupies a special place just behind his chair and provides a touch of serenity in the hurly-burly of an office where billions of dollars are tossed around in conversation. This is the inner sanctum of Robert N. Giaimo, Democrat of Connecticut who is chairman of the House Budget Committee,

which put together—after weeks of hearings and debate—a \$462 billion spending estimate for the Federal Government for the fiscal year 1978.

A 15th-century Medici would feel at home listening to the big-money telephone conversation going on as the Congressman talks to another influential committee chairman:

"Yeah, Al Gross has been talking to Shapiro, and we're going to take out the 10.5 billion. We've been working with you, and I'm even asking you now if you want to make any changes. I don't want to be in the position where we pull out the 10 billion and then find we're putting half of it back later."

In scores of somewhat mysterious telephone conversations and in long hours of budget committee hearings, the amended budget for the current fiscal year ending Sept. 30 and the "target figures" for the 1978 budget have been shaped.

The scene shifts, and it's a few days later. Mr. Giaimo, who ought to be nettled, is holding a news conference. In a session running past midnight, the full House has first tacked on \$5 billion more in spending to his committee's recommendation and then suddenly has sent the whole set of figures back to the Giaimo committee to be re-worked. In short, the budget committee, set up to bring discipline to the budget-making process, has seen its careful estimates rejected.

Without raising his voice, Mr. Giaimo says that the whole thing fell through because President Carter tried to treat Congress "like the Georgia Legislature" and dictate what it should do. "You just don't call from downtown [the White House] and tell the Defense Secretary to call the Armed Services Committee and then expect to write a budget resolution that way," he says. And, "you can't pass a budget out of the House without the support of moderate and Liberal Democrats."

He is commenting on the confrontation between Congressional forces favoring increased defense spending and those who want to cut back on the rapid rise of the defense budget and plow more money into social programs. In committee he had supervised the trimming of \$2.3 billion from Defense Department requests—not a huge sum considering that defense is getting about \$120 billion.

But on the floor, advocates of restoring that money were no longer low-key as they had been in committee. They blasted his budget as unrepresentative of the House and the nation. And the other side demanded more social spending.

A few days later Mr. Giaimo is back on the floor with his budget, still unflappable. His committee has accepted compromise, and he has reluctantly seen the deficit grow by another \$2 billion to \$66.2 billion. But at least the committee has cut \$3 billion of the \$5 billion that the House had tacked on. This time the budget resolution sails through the House to quick approval. More arguments lie ahead with the Senate and when a final version has to be worked out in September.

Forty years ago, Mr. Giaimo, the son of a Sicilian immigrant, worked several summers as a teller in his father's small New Haven bank at \$15 a week. Later, he studied law and went into politics. How does he qualify for the heavy-hitting role in Federal budget-making that he has today?

Maybe there's an easy answer, he feels. He tells of learning about the close ties between purse strings and power politics a quarter of a century ago while serving as one of the three Selectmen in North Haven, his hometown.

An odd situation developed. He was the Democrat, outnumbered by two Republicans, but one of the latter died, and there was an argument about how his successor should be chosen. He thought the Republicans were trying to roll over him in a power play by

refusing to consult him on how the vacancy should be filled. He served notice that he could tie up all activity by refusing to give his required counter-signature on town checks.

The legal hassle boiled into a lawsuit. Mr. Giaimo recalls with pleasure: "We won that damn case." In the meantime, he didn't go so far as to paralyze town activities, but he did force the Republicans to go along with his proposal for governing on a strictly bipartisan basis.

Ironically, he says, it was a long-time Republican head of the board, Joel Beech, "an old-time, Yankee businessman-farmer" who gave him much of his political education. "I learned things about budget-making that we talk about down here," he says. "The only thing you do now is add a few zeroes on the end."

But it was his father, Rosario, a self-made man, one-time lawyer, banker, language teacher, politician, community organizer and leader in Italian-American groups, who pushed him into community and political affairs, telling him: "You've got to be active. There's a big world out there. You can't just sit around."

He describes his father as a strong-willed, "broad-gauged guy." In 1960, after his father's death, the Congressman attended a ceremony at the Giaimo bank when it was formally merged into a larger New Haven bank of which the Congressman is still a director. He remembers: "When the chairman brought the meeting to order by banging his gavel, my father's portrait fell off the wall."

Now 57, Representative Giaimo was first elected to Congress in 1958 and has served several terms on the Appropriations Committee. Tall, dark-haired, bespectacled and verging a bit on the portly side, he has a serious, determined look about him.

But when he's in a good mood he will croak an aria in Italian from Verdi's "La Traviata." And he's a jazz and swing buff, particularly responsive to the big band and combo sounds of the 1930's and 40's. In fact, he not only has a big record collection of such music at home, but he also has a large supply of tapes of the sounds he likes right in his office. When Mr. Giaimo talks about his really favorite troubador—and his father's picture may fall off the wall at this—it's not Verdi's *Trovatore* but Frank Sinatra.

He seems to have inherited a large share of his father's strong will. After the Democratic caucus selected him over Representative Thomas L. Ashley of Ohio by a vote of 139 to 129 last January to head the two-year-old Budget Committee, he told the committee members in submitting his 1978 estimates for their consideration: "While I am flexible, I want to stress that I am determined as well."

The basic job of the committee, as he sees it, is "to compel Congress to discipline itself, to force us to begin to look at existing programs and to evaluate them, to make real estimates, and to learn to say 'no' to spending requests."

He regards himself as a liberal Democrat on social legislation and a moderate when it comes to budget-making. That's why he was upset when he felt that defense spending was getting favored treatment at a time when his committee had been striving for "a reasonable balance among all competing interests." But he had no doubt that a compromise could be worked out and a "first resolution" of the 1978 budget passed as required by May 15.

Before the House set up the 25-member Budget Committee in 1975, seeing to it that key members also sat on the powerful Appropriations and Ways and Means Committees, the budget-making process had become chaotic.

As Mr. Giaimo explains it, the President agreed to stop impounding funds if Con-

gress put its budget-making mechanism in order. But since the committee comprises 17 Democrats and eight Republicans and represents a wide range of loud-spoken opinions, it would be a mutinous vessel indeed without a strong chairman and without a strong sense of discipline among its members.

In the committee discussions this spring, Mr. Giaimo found that he had "to walk a delicate line." There are those on the committee such as Representative Elizabeth Holtzman of Brooklyn and Parren Mitchell of Maryland, both Democrats, who feel that entirely too much is allocated for defense and nowhere near enough for the country's "human and social needs."

Others like Marjorie S. Holt, Maryland Republican, and Omar Burleson, Texas Democrat, fight against proposals to cut Defense Department estimates. Mr. Giaimo insists that the trims finally agreed on will not affect troop levels and will not affect purchases of major weapons systems.

There was a surprising lack of rancor in committee. Miss Holtzman, despite some disagreements with the chairman, says: "I think he's extremely competent and extremely fair, and I have enormous respect for the leadership he has given the committee."

Another member on the other side of the fence, Barber B. Conable, upstate New York Republican stalwart, comments: "He had a tough act to follow. Brock Adams [the first committee chairman] was a successful initiator of the new budget process. Mr. Giaimo addressed himself to the different problems and to a somewhat distracted membership with good humor, industry and attention to the necessary details. He is carrying a large part of the burden of the committee."

In the late 1960's Mr. Giaimo and his wife, the former Marion F. Schuenemann, built a three-story brick townhouse on D Street between First and Second Streets, not far from the Capitol, long before this area made its dramatic comeback as a residential area. "We're a very close family," he says. His grown daughter has moved here and frequently joins her parents for a dinner or an outing.

The Congressman plays golf "every chance I get," and has a quiet night out with his wife once a week or so, maybe at Kennedy Center (an opera or a concert) or at a restaurant, or to a dance. But he also maintains close ties with his native heath in Connecticut and looks forward to going back there permanently when he retires.

There's such a thing as "belonging to a place," he says. On a recent visit home he got a jaunty salute from a woman who had known him during their high school days. Her sally was that old-fashioned, but pleasing one nevertheless: "I used to chase you around but you ran too fast for me."

## S. 790—THE EDITORIAL VIEW

MR. DOMENICI. Mr. President, the issues involved in S. 790 have recently attracted increasing attention from the editorial writers of some of the Nation's leading newspapers.

Just last Friday, for example, the Washington Post ran an editorial entitled "Pass the Barge Bill." This editorial stated that newspaper's support for implementation of a system of waterway user charges, as proposed in the version of S. 790 that was reported to the Senate floor by the Committee on Environment and Public Works.

Mr. President, because of the importance of this issue and the positions taken by some of the Nation's leading newspapers, I ask unanimous consent that a sample of these recent editorials be printed in the Record.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 3, 1977]

#### PASS THE BARGE BILL

For more than 35 years, one administration after another has tried to persuade Congress to impose user charges of some kind on the inland waterways network. This year, at long last, there appears to be a chance that Congress can be persuaded to do so. The opportunity ought to be seized. The subsidy that the federal government supplies to commerce on the rivers and lakes has gone on long enough.

The issue here is not just revenue for the government to make up for the money it spends to benefit particular groups and industries. The more important question has to do with more equitable treatment for competing industries. The barge industry is the only major mode of freight transportation that does not pay at least part of the bill for the maintenance of its right-of-way. The railroads have been paying all along, although they are now being aided by government loans and grants. And the trucking and airline industries both put up a substantial amount of money for highways and airports. The result of this difference, of course, helps to keep the cost of moving freight over water substantially lower than moving it over land or in the air.

The size of the subsidy is substantial. The Corps of Engineers builds and operates more than 250 locks and dams in addition to dredging channels to keep them deep enough for the bigger ships to use. The Coast Guard provides navigation aides and the Maritime Administration guarantees loans. Taken together, the federal subsidies to the waterways network approach a billion dollars a year.

Every effort in the past to reclaim some of this expense in the form of user charges—tolls on the locks or additional fuel taxes, for example—has been rejected because of the influence in Congress of key members whose home states profit enormously from river traffic. Indeed, the Senate Commerce Committee voted last month, 14 to 1, for a study of the whole issue after the Senate Public Works Committee had voted, 14 to 1, in favor of a user fee proposal advanced by Sen. Pete V. Domenici (R-N.M.).

Well, that's the difference between two very different constituencies—commerce and public works. In any case, it is hard to imagine a subject less in need of further "study." The question has been examined by the government at least 17 times since 1939 and congressional hearings have been held on various occasions since 1946. There is sufficient evidence on hand to demonstrate that user charges will not kill the barge industry, nor even cripple it substantially. The latest studies show that the imposition of such charges could cost that industry some 5 to 15 percent of its business because its rates will have to go up. Rather than make a case against user charges, those figures suggest that the railroads have been right all along: the free ride the barge industry has received has helped it skim off freight that, on the basis of non-subsidized costs, would have gone to the railroads—and thereby would have reduced the railroads' need for government help. It is time for Congress to face that and to stop spending general revenues for the purpose of helping an industry that is now strong enough to help itself.

[From the Chicago Sun-Times, May 21, 1977]

#### WARNINGS ON ALTON DAM

Transportation Sec. Brock Adams' warning Thursday on Alton (Ill.) Lock and Dam 26 is welcome news for those concerned about the impact of plans to rebuild the Mississippi River facility.

Adams said he would ask President Carter to veto any legislation authorizing a new Alton lock and dam unless it included imposition of user fees on commercial waterway shippers. That flashes a warning to Sen. Adlai E. Stevenson III (D-Ill.), who has gone along full-steam with Army Corps of Engineers plans for the Alton project. Two months ago, we detailed the reasons why the Stevenson-Corps Alton plans should be shelved, at least until further study.

The arguments are still valid. They include General Accounting Office findings of cheaper ways to repair the locks, Transportation Department studies showing no need for expansion now, Congressional Budget Office warnings about the plan's financial consequences and environmentalists' fears about damage to Mississippi River ecology.

After those dangers were pointed out, Stevenson amended several key environmental-protection measures out of his proposal. And he still wouldn't guarantee the Illinois River the same channel-depth protections that his bill would assure the Mississippi.

Even so, the Senate Public Works and Commerce committees have approved the bill. Sen. Pete V. Domenici (R-N.M.), however, added a user-fee provision despite inane opposition from several other senators. Sen. Ted Stevens (R-Alaska), for example, complained that the measure would make pleasure boaters pay fees—even though the measure specifically excludes pleasure craft.

Things got so tangled that Commerce Committee Chairman Warren G. Magnuson (D-Wash.) sounded as if he just couldn't cope: "We'll let the staff clean all this up."

There should be no rush to "clean it up" now—unless that means ordering fuller hearings on alternate plans so senators can get a clearer idea of the kind of boondoggle they're on the verge of authorizing.

Adams has added his warning to the others. The Senate should listen.

[From the Minneapolis Tribune, May 5, 1977]

#### A SENSIBLE DELAY ON THE ALTON LOCK

At the urging of the Carter administration, a Senate subcommittee has agreed to a sensible 18-month delay on construction of a controversial new lock and dam on the Mississippi River at Alton, Ill. The delay would allow the administration to complete needed engineering studies. We hope the rest of the Senate follows suit.

Backers of the proposed \$420-million lock—mainly the U.S. Army Corps of Engineers and barge and shipping interests—say the new lock is needed to handle the waterway's growing traffic. Opponents—environmentalists and several state and federal agencies—warn of environmental damage if traffic is increased and argue that the old lock can be rehabilitated at much less cost. A recent U.S. Department of Transportation report supports them: "Existing capacity will suffice at least until 1990." The whole question of the desirable level of capacity, the DOT said, "should be the subject of a major and extensive study of the whole (Mississippi waterway) system. There is ample time to conduct such a study." We agree.

The Senate subcommittee also approved a waterway user-fee proposal. Historically, waterway improvement has been paid for out of general-revenue funds. This, in effect, has been a taxpayer subsidy for barge operators and shippers, estimated to be worth \$1 billion a year. Under the proposal, user fees would recover 50 percent of future waterway construction costs and 100 percent of operating and maintenance costs. The Carter administration supports user fees. So do we.

What we do not support, however, are congressional efforts to link the two issues—the lock and the user-fee—as the subcommittee

bill would do. The two issues are related, but only in the sense that the lock is on a waterway used by barges. Otherwise, they should be considered separately. And, furthermore, user-fee proposals should have priority, as the Carter administration has suggested. The case for this was well put in Senate testimony last month by a Columbia University economics professor, William Vickrey: "If appropriate user fees are imposed, traffic patterns may change sufficiently to reveal the fact that extensive expenditures on the (lock and dam) facility would not be justified on a cost-benefit basis."

Delaying lock construction for 18 months would give Congress time to pass a sound user-fee law as part of a needed national transportation policy.

[From the Alton Telegraph, May 3, 1977]

#### DELAY ENCOURAGING

The news about Alton Lock and Dam No. 26 was both encouraging and discouraging Monday.

The Carter administration recommended that Congressional action on the project be delayed 18 months for a detailed \$12 million engineering study of the much-kicked about alternate proposals:

1. To repair the existing facility, or
2. To replace it.

The report on which the recommendation was based held that currently there is no pressing need for a proposed 1,200 foot lock (to replace one of 600 feet).

The existing capacity, said the report, should suffice until 1990.

For many the further delay could be discouraging. Delays always are.

The encouraging news is that the matter is still under serious consideration and stands a chance of being revived.

The longer lock may well disclose alternatives other than those already under consideration.

One important consideration, if events warrant it, is what affect use fees and other methods of making the deep waterways at least partially finance themselves will have on barge traffic—and consequently the need for more capacity.

Congress should act speedily on this fee question so that engineers as well as deep waterways transportation operators can develop a basis for this judgment.

Speedy action on the use fees might have the effect of holding back development of river traffic and thereby reducing the need for enlargement of locks capacity.

Congress should see to it that the river operations begin to pay partially for themselves.

And the sooner we have a chance to judge the effect on the balance between river, rail, and truck transportation, the more accurately planners can gauge what has to be done about the lock.

[From the Chicago Tribune, Apr. 5, 1977]

#### THINK NOW, DIG LATER

Locks and Dam 26 is the subject of a major, complicated, and too little understood controversy coming to a head in the near future. This installation in the Mississippi River near Alton is just above the Missouri River and just below the Illinois River. The present question [and one under discussion for years already] is whether to repair and maintain the present locks, or to replace the installation by a new and bigger one two miles downstream.

In favor of replacement are the Army Corps of Engineers, the barge industry, Sen. Adlai Stevenson [D., Ill.], Representatives Melvin Price [D., Ill.] and Paul Findley [R., Ill.], and assorted construction interests. In favor of rehabilitation are the railroad industry, Representatives Edward R. Madigan [R., Ill.] and

Abner Mikva [D., Ill.], and the environmental lobby.

In a 1974 decision on a suit involving the issue, Judge Charles Richey said, "This court is sensitive to the fact that the public interest lies with both parties. On the one hand, the public is concerned with maintaining the environment as well as the existence of the numerous midwestern railroads, and on the other with the traffic delays and structural integrity of the existing Locks and Dam 26 as well as the free flow of commerce up and down the Upper Mississippi River and Illinois Waterway."

The stakes are huge. Replacing Locks and Dam 26 would cost an estimated \$473 million, at least, in contrast to a price tag of only \$52.7 million on the rehabilitation advocated by the Western Railroad Association. A rehabilitation proposal by the Illinois Department of Transportation would cost about \$70 million.

There is more at stake than what happens at Alton. No. 26 is a pivotal part of two upstream navigation systems, the Illinois River and the Upper Mississippi. The Corps of Engineers is suspected of contemplating a step by step rebuilding of both waterways [as it has already done on the Ohio River], at an ultimate cost of billions of dollars in contracts and incalculable impact on the competing bulk carriers, the railroads.

Sen. Stevenson, as a sponsor of a new and bigger Locks and Dam 26, in his bill disclaims the 12-foot channel in the Upper Mississippi and in his speeches talks about imposing user charges on the barge lines. His opponents are not reassured. The Corps of Engineers long ago was writing memos about deepening the Upper Mississippi; and it is notably persistent. If talk about user charges is sincere, why not impose them now?

As recently as September, 1974, the Corps of Engineers themselves said of No. 26, "The inspection team concluded that the dam appeared to be in satisfactory condition and operationally adequate." Present talk about how the dam is in danger of imminent collapse may be discounted as campaign oratory.

In this controversy, to dig now and think later is clearly undesirable. As the federal Department of Transportation said in a report issued recently, "The whole question of the desirable level of capacity on this waterway system should be the subject of a major and extensive study of the whole system. There is ample time in which to conduct such a study."

Demands for an immediate settlement in favor of the barge industry and the Corps of Engineers should be rejected. The issues are too complex and too little understood, the stakes too great, for the Locks and Dams 26 issue to be decided as just another Corps of Engineers project, rather than in the context of the nation's total transportation system and economy.

[From the Chicago Sun-Times, Mar. 25, 1977]

#### TURN OFF WATER PLANS \* \* \*

Lawmaker's don't like to have the slats kicked out of their pork barrels, but that's just what President Carter did in suspending action on 19 water projects last month and another 14 on Wednesday.

Such projects often show that senators and representatives are "doing something" for the folks at home. But by ordering review of the 33 projects, Carter and Interior Sec. Cecil D. Andrus are asking whether doing something may indeed be doing something bad.

Carter made crucial points: "We must . . . make certain that our investments are cost effective, and that the cost burdens are equitably borne and that the environment is protected."

That's his argument on those 33 plans, but it applies to another—one being pushed by

the Army Corps of Engineers and Sen. Adlai E. Stevenson, III (4-Ill.)—to expand Lock and Dam 26 at Alton, Ill.

Cost effectiveness? The Corps wants to spend at least \$391 million at Alton, by its estimate last year. Yet a Government Accounting Office report last November said repairs costing only \$85 million could keep the locks in full service for 50 years.

Transportation need? A U.S. Department of Transportation report this month said the locks there now could handle all projected traffic through 1990, at least. No great enlargement is needed.

The environment? Conservationists shudder at the prospect of carelessly increased barge traffic, rolling up polluted river bottoms while industry is cleaning up its act.

Cost burdens? A Congressional Budget Office study last summer said the waterway subsidy could bankrupt Midwest railroads. Stevenson advocates barge-traffic fees in speeches, but not in his bill—a point that has apparently escaped Gov. Thompson. After caution during the campaign, he now says he supports Stevenson's measure.

Better to follow the kind of caution Carter is showing on the other projects by assuring that the Corps didn't use outdated data for its studies, as many have argued. Better to study the full economic, transportation and ecological impact. Better to study the need. Better to ask first and dig later.

#### ANATOLY SCHARANSKY

Mr. PELL. Mr. President, on June 1, 1977, it was announced that the Soviet Union has charged Anatoly Scharansky, a leading Soviet Jewish dissident, with treason and espionage. According to press accounts the charge carries a minimum sentence of 10 years imprisonment and a maximum sentence of death.

Mr. Scharansky has been active in trying to help other Jews emigrate and in monitoring Soviet compliance with the 1975 Helsinki human rights accord.

As cochairman of the Commission on Security and Cooperation in Europe—the Helsinki Commission—I deplore the action of the Soviet Government in charging Mr. Scharansky with high treason. The charge that he acted as a CIA agent is patently absurd, and the harsh approach taken by the Soviet Union in this case does not augur well for the upcoming Belgrade conference to review the Helsinki Accords of 1975.

As the author of a recent Senate letter to General Secretary Leonid Brezhnev in behalf of Mr. Scharansky, I am particularly distressed that a heartfelt appeal signed by myself and 27 other Senators has been ignored. Mr. Scharansky's only crime is his courage to speak out for what he believes and to demand Soviet fulfillment of the promises made in the human rights provisions of the Helsinki Accords.

I know that this is a sad and cruel blow to Mr. Scharansky and his family, and I only hope—and urge—that the Soviet authorities will reconsider their action.

Secretary of State Vance testified today before the Commission on Security and Cooperation in Europe and reiterated the administration's concern in this tragic case and categorically denied that Mr. Scharansky was a U.S. agent. Secretary Vance also assured the Commission that individual cases will be addressed during this fall's meeting at Belgrade, Yugoslavia, which will review implementation

of the 1975 Helsinki Accords. In this regard, America's concern for human rights cannot be stated simply in terms of abstract principles. It is important to demonstrate that we are trying compassionately to help individual fellow human beings.

#### NOTICE CONCERNING NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. ROBERT C. BYRD. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

James W. Byrd, of Wyoming, to be U.S. marshal for the district of Wyoming for the term of 4 years vice George O. Houser, resigning.

Andrew W. Danielson, of Minnesota, to be U.S. attorney for the district of Minnesota for the term of 4 years vice Robert G. Renner, resigning.

Thomas P. Sullivan, of Illinois, to be U.S. attorney for the northern district of Illinois for the term of 4 years vice Samuel K. Skinner, resigning.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Monday, June 13, 1977, any representations or objections they may wish to present concerning the above nominations with a further statement whether it is their intention to appear at any hearing which may be scheduled.

(This concludes additional statements submitted today).

#### CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business. If not, morning business is concluded.

#### HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1977

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of S. 1523, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (S. 1523) to amend the Housing and Community Development Act of 1974; to extend housing assistance and mortgage insurance programs; and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIER. I yield myself such time as I may require.

Mr. President, this is a very complicated and complex bill.

The bill covers a considerable amount of territory, and for that reason it will be necessary for the committee to have a number of staff members on the floor for advice on the various parts of the bill. I ask unanimous consent that the following members of the staff of the Committee on Banking, Housing, and Urban Affairs be given access to the floor during the consideration of S. 1523:

Ken McLean, Bob Malakoff, JoAnn Barefoot, Michael Barton, Jim Schuyler, Tommy Brooks, Dan Wall, Pete Van Alstyne, Tony Cluff, Bob Kuttner, Howard Menell, Rob Locklin, Jerry Buckley, Bill Weber, and Carolyn Jordan.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. I make the same request in behalf of Howard Shuman of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, the Committee on Banking, Housing, and Urban Affairs reported the Housing and Community Development Act of 1977 on May 16. The bill is based on 13 days of public hearings in March and April, in addition to extensive oversight hearings last year. The committee marked up the bill in 5 days of executive session in May.

The bill consists of five titles.

Title I deals with Community Development. It would reauthorize the block grant program for 3 years, providing \$4 billion in fiscal year 1978, \$4.1 billion in fiscal year 1979, and \$4.3 billion in fiscal year 1980, as requested by the administration.

The bill contains a major change in the formula used to allocate block grant funds among communities. Under the 1974 act, communities received funds through either entitlements or discretionary grants. Entitlements were based on either a formula which considered population, poverty, and housing overcrowding or, alternatively, on a hold-harmless average of the grants which the community had received under previous categorical programs between 1968 and 1972. The 1974 law provided that hold-harmless entitlements would phase out between 1978 and 1980, and that methods for allocating funds would be reassessed in 1977.

This reassessment has been carried out and has produced a general consensus that the 1974 formula is inadequate, particularly for the large, older, more deteriorated cities. Accordingly, HUD has recommended a new dual formula approach, which would give entitled cities and counties a choice between the formula in the current law and a new formula which tends to favor older communities. The administration has also proposed a new program of urban development action grants for seriously distressed cities. Under the administration's proposal, \$400 million annually during fiscal years 1978-80 would be available for these grants for neighborhood preservation and economic development, particularly distressed cities.

S. 1523 adopts both the administration's dual formula and the urban action program. It also provides an optional third formula, which would aid older cities more than the other options. This third formula would be phased in over 3 years, and would draw the required funds from the amounts authorized for the urban action program.

Title I would, in addition, revise the manner in which funds are allocated to smaller communities. The bill would change the existing system by authorizing HUD to make multiyear commit-

ments for comprehensive programs and would direct more funds to the older small communities of the Nation. These changes would, the committee believes, assure adequate funding for smaller cities which lose hold-harmless entitlements and would increase the effectiveness of the community development program in smaller communities.

Title I would also expand eligible block-grant activities to make more effective the loan provisions of the program, strengthen the targeting of benefits on low- and moderate-income persons, and authorize funding for section 312 rehabilitation loans and the section 701 comprehensive planning program.

Title II deals with assisted housing and related programs. It provides \$1.2 billion in new contract authority for the two major low-income housing assistance programs—section 8 rental assistance and conventional public housing. Some of these funds are earmarked for elderly housing and for projects financed by State housing agencies. A limit would be placed on assistance for multifamily projects which were financed under past Federal programs and can no longer meet rising operating costs, pending a further review of this problem by the committee.

Title II would also limit housing assistance payments for existing housing, to assure that this program is not used in low-vacancy markets where it will create inflationary pressures on rents, and to assure that the program is used as much as possible to contribute to an increased supply of decent housing for lower income people.

This has been a real bone of contention. People argue that if we provide housing payments for people living in existing housing, landlords will simply raise the rents and it will have an inflationary effect on rents generally. This does not increase housing stock. We are providing that those payments be allowed only in places with substantial vacancies and not in areas short of housing. In the areas short of housing, we provide for new construction.

Title III would extend the basic FHA programs and increase the maximum loan amounts for FHA-insured mortgages and for loans made by federally chartered savings and loan associations. The committee believes the increases are required to keep pace with inflation. To expand homeownership opportunities for young and moderate-income families, the bill would lower the downpayment required for FHA loans and expand the graduated payment mortgage program authorized in 1974.

Title III would also strengthen the Government National Mortgage Association emergency tandem plan. This is a standby program to provide funds to the mortgage market during credit shortages.

It can build houses at such times at virtually no cost to the Federal Government. However, use of the program is at HUD's discretion, and we do not have any proposal in this legislation that would require the use of the Tandem Plan now. The feeling on the part of the administration, on the part of the committee, and I expect on the part of the

Congress, is that in view of the recovery, in view of the drop in unemployment, this plan should not be used at the present time. I disagree with that, but I am in a minority and I will not press it.

Title IV of the bill would authorize a new Community Reinvestment Act. Under this act, Federal financial regulatory agencies would be required to assess a financial institution's performance in meeting the credit needs of its primary savings service area to an extent consistent with sound business operations.

This is a very vital part of this bill. I understand there will be an amendment which will eliminate or greatly reduce the effectiveness of this provision. I think the provision is essential because if we are going to rebuild our cities, it will have to be done with the private institutions. The banks and savings and loans have the funds. They have well over a trillion dollars in assets. They get those funds from the local communities.

What we provide is that the regulatory bodies, in passing on whether a bank or a savings and loan would be allowed to branch or grow or extend by having other units, would take into consideration whether or not that institution had reinvested in the community. Unfortunately, we find many banks and many savings and loan which take money from the community and reinvest it elsewhere, in some cases abroad, in some cases in other parts of the country. That is fine, provided it is not overdone. We have found many cases where these institutions have invested virtually nothing in the local community. We think this ought to be taken into consideration as one element in deciding whether or not the institution would be allowed to grow. I am sure we will hear a lot more about this in the next day or two because I expect an amendment will be called up to try to delete that provision from the bill. I hope very much the Senate will decide to keep it in the legislation.

Title V deals with rural housing. It would extend and authorize funds for the housing programs of the Farmers Home Administration. It would also make several changes to strengthen these programs.

In addition to the community reinvestment title, title IV, which I expect will be subject to an amendment which will be discussed at some length, there will also be, I understand, an amendment called up to knock out of the bill a provision that would change the present accounting method for housing.

At the present time, thanks to action taken under the Nixon administration by Mr. Lynn, we have a situation in which the obligational authority for housing has been run out for 20, 30, or 40 years. For that reason we get a distorted, grossly exaggerated impression of the cost of housing, because then it is put into comparison with other programs which also carry a multiyear burden but which are calculated on a 1-year basis in the budget. In the Defense Department that is overwhelmingly clear, but it is also clear in many other programs.

I believe this is a correction, which the committee decided to adopt, which is very wise. It has the support of the AFL-CIO, the homebuilders, and others who are concerned and interested in housing. I am hopeful we can maintain that particular provision in the bill. Without this provision, it will be very difficult to comply with the commitment Congress made way back in 1949, that it shall be a goal of this country to provide an opportunity for every American family to have decent housing. Obviously, this will not happen if we do not provide the kind of allocation of resources on a priority basis which the budget would permit.

This new provision, only in existence since about 1974 or 1975, requires that we run out the cost of housing—not the cost of the B-1 bomber, not the cost of many other programs, but the cost of housing.

Finally, Mr. President, I will again mention the Federal flood insurance program. That is extended in this bill. The committee voted by a margin of 8 to 4 to reject an amendment to reduce the effectiveness of that program. This is a program which is working. It is not easy, because it is not popular in a lot of areas. I am sure every Member of the Senate has had constituents complain about the requirement to get flood insurance. We found, Mr. President, that if we permit people to move into flood-prone areas, it is not just their own risk they are taking. If they were, we could forget it.

It is a free country, let them do it. What happens, however, is that they live in these areas; then, as they get flooded out, the general taxpayers from all over the country have to step in and bail them out. We have done that again and again. This program, therefore, requires that they take out flood insurance—which, incidentally, is subsidized for a considerable period of time. Then, gradually, the homeowners would pay the cost themselves. Also, we discourage people from building in flood-prone areas by requiring flood insurance, and by requiring them to build the kind of structures which could endure in the normal kind of flood they may experience.

As I said, this program is controversial. We expect an amendment to be offered and debated at some length.

Mr. President, before concluding, I would like to take a moment to discuss three amendments which I anticipate will be offered during the floor debate on this legislation. The committee opposes these amendments, and I would like to explain why. I have briefly referred to the amendments earlier in my remarks.

The first amendment, to be offered by my colleague, Senator MORGAN, the junior Senator from North Carolina, would delete title IV, the Community Reinvestment Act. As I have outlined before, this title would specifically authorize the agencies which regulate federally chartered financial institutions to evaluate how well these institutions are meeting the credit needs of the areas which they are primarily chartered to serve. The provision is intended to eliminate the

practice of redlining by lending institutions.

The opposition to title IV is based, primarily, on three arguments. It is argued, first, that title IV is unnecessary because the regulatory agencies already have this power and are already using it. But the fact is that while some of the agencies do consider an institution's investment in its community, others do not. The absence of specific statutory language has, we have been told, undercut efforts to get a uniform policy of community reinvestment.

The second argument is that the bill would increase the paperwork of lending institutions. But the fact is that some regulatory agencies already carry out the review called for in the bill—and there is no indication that the paperwork involved has created unusual burdens.

The final argument raised is that representatives of financial institutions testified against the original bill, and continue to oppose title IV. But the bill I originally proposed has been drastically revised during the committee's markup, and I believe the substantive objections have been satisfied in title IV. The committee believes that the Community Reinvestment Act responds to nationwide demands that Congress do something about redlining. Something can be done—and without burdening lenders. The Federal Home Loan Bank Board and agencies of several States have already shown that a regulatory program can produce greater reinvestment in our communities.

Let me turn to another provision of the bill that is a matter of deep concern to the members of the Committee on Banking, Housing, and Urban Affairs and to others who are directly involved in efforts to meet our national housing goals and provide decent housing for all Americans. I am referring to section 208, which would amend the Housing and Urban Development Act to establish a method of calculating budget authority for housing assistance programs. It is the committee's view that the present method for calculating budget authority established by the Office of Management and Budget under the previous administration is inadequate and should be changed.

In testimony before the Appropriations Committee earlier this year, HUD Secretary Harris put her finger on the critical weakness of the present method. The current budget accounting practice, she said, "tends to exaggerate the costs of the Department's programs relative to other Federal programs, and it tends to distort the real financial impact of HUD programs on the Federal Treasury."

The Committee on Banking, Housing, and Urban Affairs has been troubled by the new budget accounting practice since it was introduced 2 years ago. In April 1975 I wrote to Congressional Budget Director Rivlin that the new method for calculating budget authority was "unrealistic, inaccurate and unfair, and I recommended that a study be undertaken to determine: First, how future expected outlays for housing assistance programs should be calculated, and

second, how budget authority for all other Federal programs should be calculated in order to provide a satisfactory and equitable comparison of program expenditures."

In the months since then, I have continued to hear from groups like the National Association of Home Builders, the AFL-CIO, the National Housing Conference, the Mortgage Bankers Association, the National Association of Housing and Redevelopment Officials, the Coalition for Low-Income Housing, the U.S. League of Cities and Conference of Mayors that the budget accounting guidelines under which HUD is operating are misleading and unfair.

Mr. President, I want to make it very clear that section 208 of the committee bill aims to provide, for housing programs, cost figures which are comparable to those used for other programs. The committee bill does not seek to duck the issue of housing costs. It seeks equal treatment for housing—not preferred treatment. The committee bill, in brief, directs HUD to prepare its budget to reflect in its request for new authority: First, all payments required to liquidate past contributions for contracts and second, all projected payments required to liquidate contracts entered into during the year ahead.

The committee intends that HUD would provide, in addition to its requests for authority to make payments, estimates of future payments that would be required under various assumptions regarding types of housing assistance provided, family income, and rent charges over appropriate time periods.

The committee believes that this method of accounting will enable the committees of the Congress most immediately involved in assessing the costs and benefits of housing programs—the Committees on Banking, Housing, and Urban Affairs, Appropriations, and the Budget—to compare the short-term as well as the long-term costs of providing housing assistance with the costs of providing new weapons systems, the costs of increasing benefits for veterans, the costs of building more highways and roads, the costs of providing more aid for U.S. shipping, and the costs of carrying the national debt.

Mr. President, we all know that the Federal Government will authorize this year millions and even billions of dollars for programs that will require additional appropriations next year and for years thereafter. Most Federal programs involve commitments for funding for more than 1 year, and many have operating costs in addition to the amounts authorized. Yet, with the exception of housing assistance, these commitments and required future obligations are ignored in the Federal budget. In contrast, under the Nixon-Ford guidelines still being used by OMB, the HUD budget shows that the administration is requesting almost \$33 billion in fiscal year 1978 for housing. But the \$33 billion requested by HUD this year includes estimates of what will be required to run the program 10 years, 20 years, 30 years, and even 40 years from today. Only housing for low-

and moderate-income persons, among Federal assistance programs, is budgeted in 1978 for costs that may be incurred in the year 2017.

A proposal for \$1 million in new contract authority for public housing or new State-financed section 8 housing for lower-income families is now required to be expressed in the budget as \$40 million in budget authority. This figure takes into account payments that may be made over the next 40 years, including estimated increases in rents resulting from inflation.

Contrast this with our budget treatment of the B-1 bomber. The fiscal year 1978 budget shows \$1.6 billion new budget authority, but who of us thinks this is the real long-term budget commitment involved? Cost overruns in defense programs are so common, we have come to assume they are inevitable, even though not counted in the budget. And what about future commitments to maintain this sophisticated weaponry? Surely this is no inexpensive matter. Yet, there is no long-run operating cost figure in the budget for us to assess. We spend \$7 billion each year for construction of new highways and roads, without even mentioning the additional billions that will have to be spent to maintain them. Nor do we run out the future obligations of the U.S. Treasury for the Federal debt. If we did, we should have to authorize, this year alone, over \$1 trillion just to pay the interest charges on the current debt, assuming no future increase in interest rates.

Mr. President, I have asked why housing programs have been singled out for special treatment in the budget. There are those who say it is a historical carryover from the Nixon-Ford era, and there is strong evidence that this is the case. As you will remember, President Nixon shut down all of our Federal housing programs in 1973, despite congressional protest. His HUD Secretary at that time, James Lynn, supported the moratorium on housing and ignored his pledge to the Congress that he would carry out the programs that were authorized to achieve our national housing goals. Mr. Lynn was then appointed Director of the Office of Management and Budget. He carried his fight against housing with him. It was he who, in 1975, ordered HUD to report budget authority as it now does. It is his directive that continues today to be followed by the OMB and by the congressional budget committees. The antihousing bias of the Nixon-Ford administration should not be continued. To eliminate this bias, the committee has adopted section 208.

It is also argued that housing's "special treatment" in the budget merely reflects two facts: First, that housing programs do involve multiyear commitments, and second, that housing commitments are legal contracts.

Mr. President, these two facts are correct. Housing programs do require multiyear commitments and legal contracts. This is because they operate through the voluntary actions of private lenders, homebuilders, construction workers, property owners, and local

governments and agencies, and require a significant amount of money over a long period of time.

But these two facts do not really explain housing's unique treatment for budget purposes in the Federal or congressional budget.

There are—as I have indicated before—other major Federal programs which have long-term commitments. Some of these are legal, others are moral obligations. It certainly is not clear that the Government's moral obligations are any less binding or less expensive than its legal obligations.

There is no practical difference between the Federal Government's continuing moral obligation to provide compensation to the unemployed, benefits to war veterans, social security payments to retired workers, and its legal obligation to continue to make housing assistance payments for lower income families. In reality, there are a number of programs which have no obligations budgeted for the future but for which expenditures in the future are more certain than they are for housing programs.

Mr. President, the question of how budget authority for housing should be calculated can be resolved simply. Require that budget accounts for all programs reflect anticipated expenditures over a common period. Correct the present practice requiring housing to count in this year's budget authority its maximum long-term commitment without requiring other programs with such commitments to do the same. Section 208 of the committee bill would improve both congressional and public decision-making regarding national priorities by presenting housing and other Federal assistance programs in the same way in the Federal budget.

Finally, I would like to say a word about a third amendment which proposed to alter very drastically the Federal flood insurance program. A similar amendment was considered by the committee and rejected by a vote of 8 to 4. The committee adopted, instead, the administration's proposal to extend the program through fiscal year 1978. The 1-year extension would give the new administration time to review the program, and the Senate another opportunity to conduct oversight hearings. I would like to recall for my colleagues the background of the flood program. It is crucial to understanding the committee's firm opposition to the amendment which Senator EAGLETON will offer.

In 1965, Congress directed the administration to study the feasibility of establishing an insurance program to deal with the problem of flood losses. The study showed that the hazards of flood damage in the United States have been rising steadily, and that demand for property in flood-prone areas is increasing. The study found that people are generally uninformed about flood risks. Most are overoptimistic about their chances of avoiding flood loss, or expect the Federal Government to bail them out should a flood disaster occur. The staff concluded that a flood insurance program could be established to save not only lives, but the high costs of property

losses that are borne by the Federal Government and by individual property owners.

But the study emphasized that for an insurance program to succeed, future flood losses must be reduced through local management of flood-prone areas. The continued unregulated development of flood-prone areas would undermine any effort to provide insurance protection for persons living in areas of flood risk. It is important to remember this, because in 1973 Congress amended the flood insurance law to require communities, as a condition for receiving subsidized insurance, to implement flood plain management regulations and to bar participation by federally regulated lending institutions in construction or real estate activities in communities which fail to participate. Experience showed that communities were not moving voluntarily to do so. Flood losses and Federal disaster expenditures were continuing to mount.

The Congress, after lengthy deliberations and considerable compromise, enacted the present program in order to take into account all viewpoints. And the program is working. More than 15,000 communities are participating in the program. More than 12 million flood insurance policies have been sold. Over \$30 billion worth of property is now protected by flood insurance. Local communities are adopting better practices to reduce the likelihood of future flood damage. It is projected that by 1980 the Federal Government will save almost \$2 billion each year as a result of the flood program—and private property owners will save even more.

Those who would amend the present law present two basic arguments to support their views. They argue first that this is an unnecessary infringement on the rights of private property. But experience has shown that this is not the case. Experience has shown that owners of property will build in flood-prone areas, lenders will make loans in areas that are flood prone, and people will buy in areas that are flood prone. And when the flood disaster occurs, the Federal taxpayers will pick up the tab out of compassion. The history of this program has demonstrated that "carrots" are simply not enough—some sanction is needed to stimulate communities to act. Under the current program, over 150,000 communities have responded. Each month brings new communities into the program. Communities recognize that this program protects private property without unnecessarily infringing on private rights.

Those who propose amending the statute argue, second, that the program has been plagued with problems, particularly with problems in mapping flood-prone areas.

There is no doubt that mapping has been a problem. But the problem of surveying and drawing maps for over 20,000 communities, showing block-by-block areas that are flood prone is a monumental task. It requires preparation of a preliminary, and then a detailed, final map. There have been problems in preparing these maps. But, I am pleased to

report, the problem of inaccurate or unclear flood maps is a problem of the past. All of the preliminary, and frequently inaccurate, maps have been redrawn, and thousands of properties have been redesignated.

The problems of mapping and securing understanding and agreement concerning responsibilities do not require a drastic legislative solution. They require continued congressional oversight. The Committee on Banking, Housing, and Urban Affairs plans to hold such hearings during this session, and to take any remedial legislative action needed.

This is not the time to interrupt a program that is beginning to produce savings that will amount to \$2 billion annually in a matter of years.

This certainly is not the time to turn from a program of insurance to a program of haphazard, emergency aid.

Congress has before it now yet another disaster relief appropriations bill.

The present flood insurance program offers a practical alternative to increased disaster relief spending. The flood insurance program accordingly should be retained without drastic amendment.

Mr. President, I hope that the Senate will adopt this bill. I have an amendment I expect to offer at a later time to cut the overall cost of the bill back to the level recommended by the administration. It is slightly over that now and I think it should come into conformance with the administration. I think we can offer that in a way which will be acceptable to most Members of the Senate.

In that event, of course, the bill will not only be in accordance with the congressional budget limitation, but also in accordance with the request of the Office of Management and Budget.

Mr. President, I reserve the remainder of my time.

Mr. BROOKE. Mr. President, I yield to the distinguished Senator from New Jersey such time as he may need.

Mr. CASE. Mr. President, I ask unanimous consent that during consideration of this bill, Alan Boyd of my staff be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROOKE. Mr. President, the distinguished chairman of our committee, the Senator from Wisconsin, has outlined the major provisions of Senate 1523, the Housing and Community Development Act of 1977. This is a significant bill which makes a number of "mid-course corrections" in our major housing and community development programs. I would like to highlight some of the important objectives of this bill.

First, the bill effectively addresses the issue of the formula for allocation of community development funds. Since the enactment of this program in 1974, I have been concerned that the community development formula has short-changed many of the neediest cities and towns, particularly the older cities of the Northeast and Midwest. For the past 3 years, only the "hold-harmless" clause, providing funds to these cities based upon their prior participation in HUD categorical programs, has protected most of these cities from severe reduc-

tions in funding levels. And beginning in fiscal year 1978, funding under "hold-harmless" will phase down by one-third each year until fiscal year 1980, when all communities will receive their basic formula entitlements.

This bill contains two changes in the formula which will help redress the imbalance in HUD's current allocation mechanism. First, the committee approved the administration's dual formula approach which would give communities a choice between the current formula and a new formula which measures age of housing, poverty and growth lag. The new formula gives increased weight to two factors which are far more sensitive to the needs of older communities—housing stock built prior to 1940 and the extent of a community's growth which falls below the national growth rate. Age of housing has been shown to be an extremely effective indicator of community development need. It also correlates well with a number of other factors such as high tax effort and loss of tax base, which are symptomatic of distressed cities. The new formula will make substantial progress toward directing funds at the neediest cities, particularly those which are phasing down from their "hold-harmless" levels.

The second formula change is an adjustment to the dual formula for "impaction." I sponsored this amendment in committee along with the distinguished Senator from New Jersey (Mr. WILLIAMS). The adjustment will consider a city's proportion of old housing stock relative to the proportion of old housing in all metropolitan areas. "Impaction" will better target community development funds at the cities with high concentrations of older housing. These cities, which are located throughout the country, have increased community development needs because of the impact of their older, deteriorated housing and obsolete infrastructure. These two changes go a long way toward redressing the inequities in the community development formula.

For smaller cities and towns under the community development program, this bill provides assured funding for those communities in need. Under this bill, the Secretary of Housing and Urban Development would be allowed to make multi-year commitments of discretionary funds to small cities with comprehensive community development programs. First priority in funding would go to those cities and towns which are currently carrying out a comprehensive program, and are phasing down from their "hold-harmless" entitlements. The criteria for awarding these grants would include the size of the city, its prior and present funding levels, its capacity to perform, age of housing and poverty. Discretionary funds will be allocated by State according to a dual formula which is similar to that adopted for the basic entitlement program for larger cities. I believe that these provisions adequately recognize the needs of smaller cities for assured funding to carry out their community development programs and reflect our awareness that many smaller cities are in distress and need a source of

longer-term funding to help meet their serious problems in housing and community development.

The bill also provides that no city currently receiving entitlement funds would lose those funds until the decennial census in 1980 determines that the population of the city has fallen below 50,000. HUD's use of updated census estimates for population would have resulted in a loss of funding for a number of communities including Arlington, Mass.; White Plains, N.Y.; Covington, Ky.; La Crosse, Wis., and others. The updated figures used by HUD have a margin of error and are not an accurate basis for determining a community's entitlement status. This provision will assure that these cities remain in the program until regular census data indicates that they no longer qualify for entitlement funding.

There are a number of other provisions in the community development title of the bill which should assist our cities in improving their housing conditions, encourage physical and economic development, and expand economic opportunities for low and moderate income families. I am very pleased that the committee bill provides for a housing preservation plan as part of a community's housing assistance plan—HAP. Cities would be required to identify deteriorated housing in their communities and devise a strategy for rehabilitation of the housing stock. This should prove to be a useful tool for communities to focus and target their neighborhood revitalization efforts.

At the same time, this bill provides a new authorization of \$60 million for the section 312 rehabilitation loan program. This program has been extremely successful in many communities and serves as an essential tool to help preserve existing neighborhoods. The program has suffered in the past because of administrative attempts by HUD to curtail the program and cut off its funding. I am hopeful that HUD Secretary Patricia Harris will improve the management and administration of this vital program so that it may serve its purpose as a vital supplement to a community's rehabilitation program using community development funds.

Mr. President, I believe that the changes and improvements in the community development block grant program contained in this bill make this program a much more valuable resource for assisting our cities in meeting their urgent housing and community development needs.

Title II of the bill contains the major housing provisions under the section 8 housing assistance and public housing programs. The bill provides funding for about 400,000 assisted housing units in fiscal year 1978, which will be allocated in accordance with local housing assistance plans. This will give local communities the opportunity to decide the mix of public housing and section 8 units, and to select the number of new, rehabilitated and existing units according to the needs of the particular community.

The bill provides for \$708.1 million for public housing operating subsidies. This

amount will be sufficient to fund operating subsidies at the level required by the performance funding system. There is also provision for at least \$42.5 million for modernization of existing public housing projects. Modernization represents a wise investment which is needed to preserve and upgrade thousands of basically sound public housing units throughout the country.

Mr. President, we have literally billions of dollars invested in public housing in this country. We must adequately maintain this housing. We cannot have our Government become the Nation's largest slum landlord, as has often been charged.

If we do not provide sufficient funds for modernization, there will be further deterioration of these housing units, and low-income families and the elderly will not be able to live in decent housing, and with some sense of dignity.

I am very relieved that the committee saw fit, and I hope the Senate will agree, to earmark \$42.5 million for modernization of existing public housing projects.

The committee report contains a strong recommendation to HUD concerning disposition of HUD-acquired properties under the section 221(d)(3) and section 236 housing programs. I chaired committee hearings in Boston on April 18 to hear testimony on the problems of multifamily subsidized housing in Boston. We heard that there is a serious foreclosure problem in Boston and a number of other cities and that HUD policies and practices have not contributed to solving this problem. In fact, witnesses indicated that when HUD acquires these properties after foreclosure, many projects actually deteriorated, and that poor maintenance and management were common problems in HUD-owned buildings. In addition, when these projects have been sold by HUD to private purchasers, HUD sells these buildings in "as-is" condition and has received an average return of no more than 3 to 7 cents on each dollar of its original investment. At the same time, rental subsidies to low- and moderate-income tenants are terminated so that tenants are faced with rent increases beyond their ability to pay or are forced to move.

The committee report strongly urges HUD to retain these projects until maintenance and management are brought up to an adequate level. If this would require rehabilitation and repairs by HUD, these should be performed while the projects are HUD owned. Then, when the projects are sold by HUD, HUD would receive a reasonable return on its investment and living conditions would be improved for the tenants. After sale, HUD should insure that tenants will be protected from rent increases through the use of section 8 or other rental subsidies.

There are a number of other problems in section 221(d)(3) and section 236 projects, which the committee will analyze at hearings on this issue later in the year. But the recommendations in the committee report will provide substantial benefit to the low- and moderate-income tenants living in these buildings, and will help provide HUD with a reasonable return to the FHA insurance fund.

Mr. President, I have been greatly concerned about the problem of homeownership affordability, particularly for young families of moderate and middle income who are being priced out of the homeownership market. I introduced the Young Families' Housing Act, Senate 664, in February of this year to assist these families in purchasing their first home. The committee bill contains the first part of the Young Families' Housing Act, which provides for FHA insurance of graduated payment mortgage. The graduated payment mortgage would reduce monthly mortgage payments during the early years of a mortgage and increase those payments during the later years. The availability of this mortgage instrument should give young families a greater opportunity for homeownership by reducing the burden of high initial monthly mortgage payments. The second provision of the Young Families' Housing Act, which provides for an individual housing account, will have to be considered by the Senate Finance Committee. The individual housing account would provide that young families could save up to \$2,500 a year in an interest-bearing savings account, up to a lifetime maximum of \$10,000. These savings would be deductible from income for income tax purposes and the interest income would be tax-exempt, if the proceeds were used for the downpayment on a first home.

Therefore, this savings account would help enable young families to make the downpayment on their first home.

Mr. President, I believe that there are two principal problems facing first-time home buyers. We have had almost a decade of young families who have been unable to afford their first home. The first problem, is accumulating the downpayment and that would be addressed by the individual housing account.

The second problem is high initial monthly mortgage payments, and the provision for an FHA-insured graduated payment mortgage in this bill should assist young families in entering the homeownership market.

I am hopeful that the provision for an individual housing account will be considered by the Senate Finance Committee during this session of the Congress.

Mr. President, the bill contains extensions for FHA programs, and extensions and authorizations for rural housing programs which are vital to our national housing efforts. The only provision which I would like to highlight would authorize FHA mortgage insurance where adverse economic conditions temporarily exist due to Indian land claims. Mortgages may be insured, at the discretion of the Secretary of HUD, if homeowners are unemployed as a result of these land claims. This provision would assist the residents of Mashpee, Mass., who are suffering severe economic distress as a result of Indian claims for their properties. This program would assist these hard-pressed families during this extraordinary situation.

Mr. President, I believe that this is an important bill which helps meet the urgent housing and community development needs in our country. I strongly urge my colleagues to support the bill.

Mr. President, there are many other matters that I could cover at this time, but I think they have been ably discussed by our distinguished chairman.

On the whole, I believe this is an important piece of legislation which helps meet the urgent housing and community development needs in our country.

I am hopeful that my colleagues will support this bill substantially as it has been reported by the committee. We have had lengthy hearings and markup sessions on this bill. I think this bill incorporates the best that could be done for housing and community development for 1978.

Therefore, I hope my colleagues will act favorably upon this legislation.

Mr. President, I yield the floor.

Mr. GARN. Mr. President, permit me, as a member of the Banking Committee, to review and discuss some of the complexities of the legislation we have before us. S. 1523, as reported by the Banking Committee, contains some 66 pages and covers a myriad of Federal programs in the areas of community development, housing, rural housing, mortgage credit, and title 4, which is identified as community reinvestment. More about that later.

For the convenience of my colleagues, I will proceed to move through the bill from title to title, highlighting some of the areas of importance to my colleagues. One of the most important points in this legislation is contained in title I, community development, wherein we propose the reauthorization of the block grant program for 3 years, 1978, 1979, and 1980. This will permit the communities, cities and counties to plan ahead at least for a 3-year period. It helps to remove some of the question, doubt, and concern on the part of city officials as they have to prepare for their annual budget process. Heretofore, Congress has been delayed in acting for one reason or another and has placed cities and counties across the country in precarious positions in trying to anticipate whether or not previously existing Federal programs would be continued, interrupted, reduced, increased, or whatever, making it nearly impossible for comprehensive fiscal planning on their part. We all know that local government in this country, for the most part, is the center of fiscal responsibility in government at all levels and Congress must not contribute or make more difficult their efforts to balance their budgets and improve their communities.

We have extended and authorized additional funds for section 312 rehabilitation loans and the section 701 comprehensive planning program. Both of these programs are extremely important and have been utilized with great success in communities throughout this country. I am personally committed to supporting both programs and am very pleased to see that, within the Department of Housing and Urban Development, the support is being rekindled on the highest levels for especially the 312 rehabilitation loan program. More and more people across the country are identifying the existing housing stock as the core upon which our efforts can be based to rehouse and house those who

are in substandard housing conditions or needy.

As far as section 701 comprehensive planning assistance is concerned, the committee has added a number of bureaucratic requirements which localities must identify and respond to as part of their application for CDBG and money such as this 701 planning fund will be helpful to the smaller, less sophisticated cities as they prepare their applications for community development block grants and similar programs. I cannot emphasize enough how strongly I feel and am committed to 312 rehabilitation loans and 701 comprehensive planning assistance.

In title II, housing assistance and related programs, a number of broad ranging programs have been dealt with in one way or another, ranging from the public housing program to research, flood insurance, and urban homesteading. A major change was made by amending the Housing and Urban Development Act to change the present method of calculating budget authority for housing assistance programs in order to provide for a "more satisfactory comparison in the Federal and congressional budgets of proposed expenditures resulting from various programs."

The goal is a laudable one, but more study and work needs to be done in this area before the budget consideration can be considered as acceptable. This is a very complicated and difficult subject to quickly review. I am sure that the Banking Committee will be giving this a good deal more attention in the months ahead. Criticism is made of the previous method of calculation, that of multiplying the total amount of new contract authority approved by the maximum term of the contract authorized. This may indeed be subject to question but, on the other hand, it is not correct to say that simply utilizing an annual authorization of a contract which could run anywhere from 1 to 15 years is correct either. As I said, this is a very troublesome procedure and more attention needs to be given it.

In title III, mortgage credit, a number of adjustments have been made in some of the programs for mortgage limits which were sorely needed to permit prospective borrowers to purchase homes in today's market and still be able to avail themselves of FHA mortgage insurance and other related insurance programs.

Another related adjustment came in the area of Federal savings and loan association mortgage limits which too were adjusted to provide for the increased cost of housing in this country.

Title IV, community reinvestment, is a section of the bill that has come in for severe criticism, and it should be pointed out that an attempt to remove that title from the bill was made in the Banking Committee and lost on a tie vote of 7 to 7. That should indicate to the Members of the Senate the degree of concern that the members of the Banking Committee have; however, suffice it to say that more will be said in this regard, as an amendment is before us to remove that title.

Title V, rural housing, extends a number of rural housing programs and pro-

vides for additional authorizations for their continuation. Senator MORGAN, the chairman of the Rural Housing Subcommittee, and I, as the ranking minority member of the subcommittee, held a 1-day hearing on rural housing during the past recess and I am pleased to be able to say that in my home State of Utah, the rural housing program is met with a great deal of acceptance and is amassing an excellent record as a program which is being utilized for the purpose intended by Congress. We expect to be bringing to this body a bill dealing more specifically with rural housing sometime before the end of this session. In the meantime, the provisions of title V are most desirable and will permit the rural housing program, as administered by the Farmers Home Administration, to continue.

All in all, the chairman of the Banking, Housing, and Urban Affairs Committee, and the ranking minority members of the committee, Senators PROXMIER and BROOKE respectively, together with Senator SPARKMAN, the chairman of the Housing Subcommittee—with Senator BROOKE also serving as the ranking minority member of that subcommittee, have brought to this Chamber a bill which, with some modification, could warrant the support of every Member. It is important that each Member give full consideration and support to a number of the amendments which have already been laid on the table. As I have said before, these will be discussed in more detail as they are brought up for consideration.

Finally, as one of my colleagues said during consideration of another matter some months ago, this is a bill I want to support but there are some changes that must be made. I urge my colleagues careful consideration of the many issues contained in the bill and of the many amendments before us.

#### PUTTING OUR COMMUNITY DEVELOPMENT FUNDS WHERE THE PROBLEMS ARE GREATEST

Mr. HUMPHREY. Mr. President, the Housing and Community Development Act of 1977, which the Senate will be considering over the next few days, provides the Members of this body with a unique opportunity to respond to the findings of a study which Congress mandated in 1974. At that point, we were not certain that the Community Development Block Grant—CDBG—formula would serve its intended purpose—namely to assist those cities most in need. The HUD studies, one conducted in-house, and one by the Brookings Institution, revealed that the hold-harmless distribution showed a weak statistical relationship to community development need. The hold-harmless funds, it appeared, were going to those cities who had previously exhibited keen grantmanship skill but were not necessarily those cities most in need. More specifically, the study documented the decreases in the share of funds going both to central cities and to the Northeast.

HUD, therefore, proposed a dual formula as an alternative to the existing distribution mechanism. Under this formula, no community would get less than they would have under the existing for-

mula. However, many communities would be eligible for increased funding.

This proposal which considers a community's age of housing stock, growth lag and poverty, would target increased funds to older cities which have been losing population. It is precisely these cities most in need of community development funds, which were receiving an inequitably small proportion of funds under the existing formula. The beauty of the dual formula is that no community will be worse off than it otherwise would have been—but some communities will be better off—and these are, in fact, the communities most in need.

I also fully support the Williams-Brooke impactation amendment which further assists the most needy cities, again while not reducing funds to other entitlement cities. Under this amendment, the proportion of pre-1939 housing stock would be considered as a basis for increased funding. Those communities which would benefit under this approach, the older communities, will be eligible for increased funds, but not at the expense of other areas, as the increased authorization necessary to finance the provision is derived from a reduction in the urban development block grant program. This will still permit the introduction of the UDAG program while increasing the equity of the block grants.

The Committee on Banking, Housing, and Urban Affairs spent a great deal of time deliberating the merits of this bill. It involved addressing difficult and sensitive issues and certainly was no easy task for any of the Members. I believe Chairman PROXMIER and his colleagues are to be commended for the equitable and reasonable bill which the committee reported.

I fully support this bill and urge my colleagues to do likewise.

Mr. RIBICOFF. Mr. President, the Housing and Community Development Act (S. 1523) offers new hope for America's cities. This measure provides a needed and long overdue boost for the Nation's beleaguered and deteriorating urban areas.

The condition of urban America, with its aging housing stock and rapidly dwindling populations, has worsened with the economic dislocations of recent years. Unemployment in some economic sectors, such as the construction industry, has reached depression proportions in many areas of the country, particularly the Northeast. While there has been some general improvement in the amount of new housing, housing starts in my part of the country last year showed the slowest and weakest improvement of any region. A number of cities—most spectacularly New York City—have been forced to the brink of total financial collapse.

The goals of the 1968 Housing Act are far from realized. That important measure envisioned a production target of over 22 million units of housing in the period 1968 to 1977. It is estimated that, by the end of this year, only 18.7 million units will have been built. Because of the lack of adequate, decent housing many families live in crowded, unsanitary structures.

Older cities have deteriorated, in large measure because of the neglect of earlier administrations. There are some sections of northeastern cities which appear as if they have been devastated by aerial bombardment—vacant lots, gutted buildings and little, if any, municipal services. These conditions have precipitated a sizable outmigration, particularly by the more affluent.

Our older citizens are also experiencing considerable difficulty in finding proper housing. It is estimated that more than 3 million elderly persons are in need of assisted housing. Living on fixed incomes, older persons simply do not have the mobility to seek better housing. Thus, many of our elderly are forced to live where conditions are hazardous to their health, safety, and general well-being.

S. 1523 is not the final solution. It is no panacea. It is, however, an important measure. It has become increasingly apparent that the old formula for the distribution of community development block grants—depending on population, poverty, and overcrowding—has not sufficiently met the needs of the Nation's most depressed urban areas which have been losing population. The new formula system proposed in this legislation enables a municipality to select the one which most closely satisfies its particular requirements.

The additional housing and urban development programs which are supported by the legislation's community development and housing assistance provisions are urgently needed. The \$12.45 billion, 3-year authorization for community development block grants is critical for those cities which are struggling to meet the basic needs of their citizens.

The urban development action grants program is particularly useful for aiding aging urban areas in alleviating physical and economic deterioration. It will aid cities and urban counties to attract private investment to stimulate the needed restoration of housing or to develop the resources to cope with population losses and declining tax bases.

Under the urban development action grants program funding will be made available to stimulate investment which will strengthen the economic infrastructure of financially distressed areas. Severely depressed cities will have the necessary capital to begin the restoration of seriously deteriorated neighborhoods, to develop needed employment opportunities and to recycle nonutilized or underutilized facilities for industrial activities.

Mr. President, the legislation before us today signifies the Congress intention to begin the revitalization of our country's urban areas. Attempts to weaken this measure should be resisted. We must insure that assistance is provided to those most in need, especially to older cities struggling to fight urban blight.

UP AMENDMENT NO. 346

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposed an unprinted amendment numbered 346:

On page 36, line 8, strike out "\$1,239,620,000" and insert in lieu thereof "\$1,116,620,000".

Mr. PROXMIRE. Mr. President, this amendment would bring the bill into conformity with the overall funding request of the Office of Management and Budget. At the present time, the bill is \$56 million over the congressional budget ceiling and it is \$123 million over the request of the Office of Management and Budget.

I think the President has indicated a great interest in this legislation, and his speeches have been very strong in this regard. He said in Milwaukee, for example, last fall that the No. 1 domestic problem in our country is our cities. I think he has shown his concern by a generous request in this budget. I think that, obviously, we, in the Banking, Housing, and Urban Affairs Committee, are deeply concerned with it. We have a number of members who are really champions of the cities and housing.

But I think we have to put this in proportion. The President has indicated that he is concerned about excessive spending by Congress, and I think he is right. I am concerned, too, and I think many other Members of Congress are. For that reason I think it is wise for us to reduce our spending levels.

I might point out this bill is not a budget-buster even in its present form. The bill is only about 1 percent over the request of the President, but that is 1 percent too much. I do not think we should have legislation that comes before Congress where the President understands the program thoroughly, supports the program, has indicated that by his personnel appointments, has indicated that by his budget levels, and then argue that the program out to be increased.

There were a number of areas, specific areas, in which the committee increased the level requested by the President. I am very sympathetic to all of those areas, and I am sure other Members are, too.

I am not going to reduce most of those. For instance, on the 312 rehabilitation program, we went \$60 million over the level requested by the administration.

HUD has, I think, very able, sensitive, and experienced people now who have appraised this, and who tell us they cannot use that money. But the committee decided to give it to them, and, in view of the popularity of rehabilitation, I think that program's funding might very well survive on the floor even if we try to cut it.

A second area is 701, planning. This is an area where I felt for years we funded too much money, but it is an area where again the committee went \$12.5 million over the President's level. I tried to hold it down but was unsuccessful, and because of the nature of that planning and because of the great lobbying ability, articulateness and persuasiveness of the people who benefited from this planning, it was very, very hard to cut it. I

am not going to try to cut that below the level the committee recommends.

A third is public housing operating subsidies, of which the Senator from Massachusetts is a great champion and has done a fine job in supporting.

He argued that the budget was too low by \$43 million, and the committee went along with it. Again I am not going to try to cut this level back. What I will do instead, is to take those amounts and reduce the overall housing assistance program, which is at a level of \$1.232 billion and which can afford to take a reduction. My amendment would cut that back so that the total amount authorized will be at the same level as the President requested. This would be \$123 million below the committee bill, which would be somewhat below the level recommended by the Senate budget resolution, but would be in accordance with the President's budget. I think that is the responsible thing to do. Although I am sure there may be those who feel the committee is right and we should not make any cut at all, I am hopeful that this amendment I am offering now will be accepted.

Mr. BROOKE. Mr. President, this amendment comes as a surprise to me. Now that my distinguished chairman has outlined where he intends to make the budget cuts, I understand the purpose of his amendment.

I know that at our markup sessions the distinguished chairman wanted to keep the total budget figure as low as possible. But it appears to me that he now intends to cut \$123 million from this bill, which represents the difference between the authorization in the bill and the President's budget. But I think that if the chairman wants to effect these savings—and I wholeheartedly agree with him that we should reduce the budget wherever it is prudent to do so—that he should look at the congressional budget resolution figures rather than the President's budget. We are \$53 million over the budget resolution, and I think that the budget resolution should represent our budget target. As the chairman will remember, this bill is very close to the budget resolution. I think we ought to take the budget resolution as our guide rather than the President's budget.

Mr. PROXMIRE. May I say to my good friend we were very close to both of them. We were not very much in excess.

Mr. BROOKE. Not far off at all.

Mr. PROXMIRE. One percent over the President's budget and one-half of 1 percent over the congressional budget.

I really think, as I say, President Carter has been generous. I think HUD made a very fine impression. They do ask for a substantial increase in authorizations over what we have had in the past, and I think they are determined to have a vigorous housing program and community development program. I would hope we would be able to agree to go back to the level that the President requested in view of the fact that there is only a moderate difference.

I think we can, if we find that somehow throughout the year, because of the economic situation and because of prog-

ress that HUD has made they can proceed on this, the Senator from Massachusetts and I are both on the Appropriations Committee—he is the ranking member of the Banking Committee—and we may be able to at that time consider a supplemental. We may be able to consider authorizing additional funds and then appropriating additional funds.

Mr. BROOKE. I wish I could agree with my distinguished colleague. Actually it would seem to me that the process ought to operate in reverse. We can act in Appropriations Committee with greater flexibility if we have the full authorization. If you do not have the authorization, you cannot make the appropriation. I would rather have sufficient authorization and then leave it to the Appropriations Committee to decide whether to make further cuts in our housing program.

I would hope that the Senator would consider amending his amendment to decrease the overall housing figure by \$53 million in the areas he mentioned, rather than \$123 million. That would be using the budget resolution rather than the President's budget. I think that is a fair and equitable starting point.

I would hate to see us cut back considerably in public housing modernization. I have just spoken about the urgent need for upgrading our public housing projects.

Under your amendment, would there be any reduction in modernization funding? Would the Senator tell us exactly where he intends those cuts to be made?

Mr. PROXMIRE. Yes. I do not cut rehabilitation at all; I do not cut it at all.

Mr. BROOKE. I know.

Mr. PROXMIRE. I do not cut planning, I do not cut operating subsidies. I cut in only one area, and that is housing assistance. It is by far the largest area. It is an area where there is considerable question as to whether or not HUD, which this year had 41,000 starts, would be able to provide for 400,000 units. Admittedly it will not be quite as difficult as that may seem because many of those would be used houses. But, nevertheless—

Mr. BROOKE. You are also cutting new housing construction under the section 8 program, are you not?

Mr. PROXMIRE. Well, it would have that effect, yes; to be frank, it would.

Mr. BROOKE. And we certainly need that new construction. Everyone has testified about the great need for new housing construction.

Mr. PROXMIRE. Of course, it could be existing or it could be new depending on the emphasis that HUD decides to place on it. It could be either one, but it probably would be some of both.

Mr. BROOKE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. BROOKE. On my time.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DeCONCINI). Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays on the pending amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. HEINZ. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. PROXMIRE. I yield on my time to the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I ask unanimous consent that Constance Maffin, a member of my staff, be accorded the privilege of the floor during the debate and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. I thank the Senator for yielding.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. I understand that the Senator from Massachusetts is willing to yield back the remainder of his time on the pending amendment.

Mr. BROOKE. I yield back the remainder of my time.

Mr. PROXMIRE. I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Wisconsin. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. ABOWEZEK), the Senator from Delaware (Mr. BIDEN), the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from Idaho (Mr. CHURCH), the Senator from California (Mr. CRANSTON), the Senator from New Hampshire (Mr. DURKIN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Kentucky (Mr. FORD), the Senator from Louisiana (Mr. LONG), the Senator from Arkansas (Mr. McCLELLAN), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Montana (Mr. METCALF), the Senator from Rhode Island (Mr. PELL), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I also announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from Florida (Mr. STONE), and the Senator from Georgia (Mr. NUNN) are absent on official business.

I further announce that, if present and

voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "nay."

I further announce that, if present and voting, the Senator from Georgia (Mr. NUNN) would vote "yea."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BELLMON), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Oregon (Mr. HATFIELD), the Senator from Nevada (Mr. LAXALT), the Senator from Maryland (Mr. MATHIAS), the Senator from Kansas (Mr. PEARSON), the Senator from Delaware (Mr. ROTH), and the Senator from South Carolina (Mr. THURMOND) are necessarily absent.

I further announce that, if present and voting, the Senator from South Carolina (Mr. THURMOND) would vote "yea."

The result was announced—yeas 39, nays 33, as follows:

[Rollcall Vote No. 171 Leg.]

#### YEAS—39

| Cranston | Metcalfe  |          |

So Mr. PROXMIRE's amendment was agreed to.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHILES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. Mr. President, I ask unanimous consent that Ethan Seigel and Tim Bartik, of my staff, be granted the privileges of the floor during the consideration of the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that John Backer, of my staff, be granted the privileges of the floor during the consideration of the pending measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent that Martin Franks and Judy Heffner, of my staff, be granted the privileges of the floor during the debate and votes on the pending legislation today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I ask unanimous consent that Barbara Klein, of my staff, be granted the privileges of the floor during the debates and votes on the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I ask unanimous consent that Robert Kabel, of my staff, be granted the privileges of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Indiana.

UP AMENDMENT NO. 347

Mr. BAYH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Indiana (Mr. BAYH), for himself, Mr. NUNN, Mr. CRANSTON, Mr. MORGAN, Mr. STONE, Mr. THURMOND, Mr. GRAVEL, Mr. HOLLINGS, Mr. LUGAR, and Mr. BENTSEN, proposes an unprinted amendment No. 347.

The legislative clerk proceeded to read the amendment.

Mr. BAYH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 54, between lines 7 and 8, insert the following:

SEC. 312. (a) Section 2(b)(1) of the National Housing Act is amended by striking out "\$12,500 (\$20,000)" and inserting in lieu thereof "\$15,000 (\$23,000)".

(b) Section 2(b)(2) of such Act is amended by inserting before the semicolon at the end of the proviso in clause (2) the following: "(twenty-three years and thirty-two days in the case of a mobile home composed of two or more modules)".

(c) Subparagraph (B) of the second paragraph of section 2(b) of such Act and subparagraph (B) of the third paragraph of such section 2(b) are each amended by striking out "twenty years" and inserting in lieu thereof in each case "twenty-three years".

Mr. BAYH. Mr. President, I offer this amendment to the Housing and Community Development Act on behalf of myself, Mr. NUNN, Mr. CRANSTON, Mr. MORGAN, Mr. STONE, Mr. THURMOND, Mr. GRAVEL, and Mr. LUGAR. I would like to express my appreciation in particular to the Senator from Florida, Mr. STONE, who put a great deal of work into this amendment.

Essentially, my amendment will raise the FHA guarantee ceilings and terms for mobile homes. I believe it is only reasonable and logical that if this body is willing to increase the guarantees for conventional housing, that it should also do the same for mobile homes. After all, inflation affects young and old families

buying mobile homes just as it does those families that purchase conventional housing.

For example, the price range for a single unit mobile home is from \$9,700 to \$18,000 with the average price being \$16,000. This represents a 30-percent increase since 1974. Presently the FHA guarantee for such homes is \$12,500. Clearly these figures on single unit mobile homes indicate that the price of a mobile home has surpassed the present day FHA guarantee. It is clear that inflation also impacts on the mobile home industry.

Mr. President, the amendment I propose today attempts to remedy this discrepancy. Specifically, my amendment would raise the dollar amounts for single-wide mobile homes from \$12,500 to \$15,000—still a thousand dollars under the average price for a single unit mobile home, and for double-wide units from \$20,000 to \$23,000. In addition, the terms for double-wide units would be extended from 20 to 23 years.

Mr. President, I do not think it is necessary to remind my colleagues of the rapidly rising cost of conventional housing.

We are all painfully aware of it, as are our constituents. In fact, the most recent statistics indicate that an average price of a single-family dwelling in this country has risen to an astonishing \$51,600. That figure tells us that a large number of American families have been priced right out of the single-family housing market. I am not speaking here of underprivileged or low-income families alone, but also of middle-class families. We cannot ignore the fact that last year the growing mobile home market accounted for one out of every five single-family homes sold in this country. Furthermore, for those single-family homes sold for under \$30,000, mobile homes accounted for 76 percent; and for those sold for less than \$20,000, mobile homes comprised 94 percent.

Mr. President, who are the buyers of these housing units? They are the young families getting started and the older couple living on a fixed income—those very families who need the provision of this act the most, but who, without this amendment, would be overlooked.

It is because of the growing need for additional mobile homes for those families that can no longer afford to pay the exorbitant prices for conventional housing that I offer this amendment to Housing and Community Development Act. Furthermore, this amendment is simple in its provisions, easy in administration, helps those who need it most, and I urge its swift adoption. Therefore, I urge my colleagues to join in seeing that this measure is passed.

Mr. SPARKMAN. Mr. President, I offer an amendment to the Bayh amendment as follows: I move to delete section V of the amendment offered by Senator BAYH.

The PRESIDING OFFICER (Mr. HASKELL). If the Senator will suspend, the Chair is informed that the Senator's amendment is not in order at this time until the time on the amendment of the Senator from Indiana has expired.

Mr. BAYH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. BAYH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. Mr. President, I ask unanimous consent that my amendment be changed. I request permission to modify my amendment so that where the amendment provides \$15,000, the sum of \$16,000 be inserted therein.

The PRESIDING OFFICER. The Senator has the right to modify his amendment and it is so modified.

Mr. BAYH. Mr. President, I yield back the remainder of my time.

Mr. PROXMIRE. Before the Senator does that, let us have a discussion, so we understand.

As I understand it, the Senator from Indiana has modified his amendment to provide that the 20-year time which we now have in the law will continue in effect.

Mr. BAYH. That is correct.

Mr. PROXMIRE. He has provided, however, for an increase in the limits on insurance on mobile homes; by how much?

Mr. BAYH. To \$16,000. We would add \$1,000 to the \$15,000.

Mr. PROXMIRE. So the total limitation would be how high?

Mr. BAYH. It would be \$16,000.

Mr. PROXMIRE. Mr. President, I think that is an excellent amendment. It accomplishes something we have to accommodate to. Unfortunately, we have very serious inflation. Prices rise. A tremendous number of people, as the Senator from Indiana said so well, depend now on mobile homes—not only people of very limited circumstances, but a number of people of middle-income stature. I think this is an amendment which will be most helpful.

I think the Senator was very accommodating and very wise to limit the term to 20 years. As I understand it, there has been no study, really, of the economic life of a mobile home. In the absence of that study, I think we should stay where we are, rather than create a situation where we have a loan outstanding at the end of a 20-year period and the property is not adequate to redeem it.

Mr. BAYH. That is correct.

Mr. President, I yield to the Senator from Massachusetts.

Mr. BROOKE. Mr. President, as I understand it, the Senator's original amendment raised the mortgage limits to \$15,000.

Mr. BAYH. Mr. President, to be consistent, I wish to modify my amendment so that that \$15,000 would go to double-wide. Double-wide is now \$20,000. We are raising it to \$23,000. I ask unanimous consent to modify my amendment to change that to \$24,000.

The PRESIDING OFFICER. The Senator has the right. His amendment is so modified.

Mr. BAYH. Let me say, I am going to yield back my time and discuss this, when the Senator from Alabama is going to propose his amendment.

The PRESIDING OFFICER. The Chair interjects here that the Senator's modifications are adopted. Would the Senator send his modifications to the desk so the clerk can see them?

The amendment, as modified, is as follows:

On page 54, between lines 7 and 8, insert the following:

SEC. 312. (a) Section 2(b)(1) of the National Housing Act is amended by striking out "\$12,500 (\$20,000)" and inserting in lieu thereof "\$16,000 (\$24,000)".

Mr. SPARKMAN. I want to say that I am perfectly willing, so far as I am concerned, to accept the modified amendment.

Mr. BAYH. Then the Senator from Indiana—

Mr. BROOKE. Does the Senator's amendment relate to both single-wide and double-wide mobile homes? That would be \$16,000 on the single-wide and \$24,000 on the double-wide. Is that correct?

Mr. BAYH. I thought the Senator from Alabama was going to offer an amendment. I would rather not object to his effort than initiate it on my own.

Mr. President, in an effort to expedite what we are doing here, I ask unanimous consent, further, in the spirit of camaraderie and conciliation, that the amendment be further modified so that the extended period from 20 to 23 years be deleted and that the term be kept at 20 years.

I must say I would prefer to get the 23 years, but our two distinguished colleagues, the Senator from Wisconsin and the Senator from Alabama, are prepared to oppose that. I do not know where the Senator from Massachusetts is on this.

If we can get the additional dollars, as far as the amount that can be borrowed to get into these homes, then I think the extra 3 years are matters which could be studied. I hope that the Senator from Wisconsin will give us a pledge here that in the next go-round on this, they could see whether there needs to be an extension of this matter from 20 to 23 years.

Mr. PROXMIRE. I can assure the Senator from Indiana that we shall have hearings on that and give it every consideration.

Mr. JAVITS. Will the Senator yield for a unanimous-consent request?

Mr. BAYH. I yield.

Mr. JAVITS. I ask unanimous consent that Barbara Washburn be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. BAYH. I yield.

Mr. SPARKMAN. I think we all ought to understand that HUD is studying this proposition right now. Undoubtedly, as I believe the chairman has said, when they have completed their study, they will make recommendations to us and the committee will consider them.

Mr. BAYH. I appreciate the fact that my three colleagues are willing to accept

the amendment. I think a word of explanation is important in as much as I have been willing to accept a shorter term.

I see my distinguished junior colleague from Indiana here. We are both very familiar with the type of mobile homes being produced today. The quality is significantly greater than it has been in the past.

It seems to me if, indeed, in the past a 20-year duration made sense, that now with increased quality and the numbers of people relying on these homes, it would be only wise to extend it to 23 years.

Our colleagues took issue on that. I yield to their judgment with the understanding they have already volunteered to look into this so that the next time we discuss this matter, we can explore the possibilities of extending the terms of the loan from 20 to 23 years.

Mr. BROOKE. Will the Senator yield?

Mr. BAYH. I am glad to yield to the Senator.

Mr. BROOKE. One of the concerns expressed by HUD is that these monthly payments should not be increased to the point where they would be beyond the ability to pay of the likely mobile home-buying population. This could be a very serious problem.

I believe there is another amendment which may be offered which would increase mortgage limits by up to 50 percent, in the \$30,000 range. This could lead to a substantial increase in defaults because the monthly payments would be beyond the reach of the population that buys mobile homes.

Mr. BAYH. We are targeting, as the Senator knows, on a specific market—lower middle income market, older people, young people who cannot even come close. We are talking about less than half the price of a regular home.

It is not a matter of competing with the normal housing market.

One of the reasons the Senator from Indiana felt compelled to extend the length of term from 20 to 23 years was, as we were increasing the size of the market, we would be prorating that over an additional 3 years and avoid the kind of concern expressed by the Senator from Massachusetts.

Mr. BROOKE. Then the monthly payments would be less; is that correct?

Mr. BAYH. Yes. The monthly payments.

We have just discussed people who go as if they were paying rent on the down-payment on that mobile home every time they get a paycheck.

I believe we have pretty well resolved that now, so I will not pursue the 23 years. But I hope we can at a later date approach that because that gets the per month payment down and makes these homes available to people who otherwise will not have them. It is the only thing they can afford. They are high quality merchandise right now and in a price range that most people can afford that could not if they had to go out and get into a conventional home market.

Mr. LUGAR. Will the Senator yield?

Mr. BAYH. Yes.

Mr. LUGAR. To what extent does the amendment now, as amended, correspond

to the House of Representatives provision in this same area? Are we still consistent with the language of the House, with the \$16,000 to \$24,000, and the other \$12,000—

Mr. BAYH. The only change would be in the dollar amount. That is the only inconsistency with the House.

Mr. LUGAR. And with regard to the terms, where does that lie?

Mr. BAYH. They are consistent now with the 20 years.

Mr. LUGAR. I just wish to comment. I strongly support the Senator from Indiana's amendment. I think it is apparent for the reasons he has suggested and that have been commented on by other distinguished Senators that we are talking about housing needs of a very large number of Americans, trying to offer some commonsense consistency to financing with regard to those.

I commend the Senator from Indiana's initiative and I support it strongly.

Mr. BAYH. I thank my colleague.

In order to be absolutely certain there is no misunderstanding, I should say that I think perhaps what the Senator from Indiana was describing in his question, which I did misinterpret, is that the law now provides for 20 years. The amendment we are preparing to vote on would provide 20 years, whereas in the House bill it is 23 years. I assume this difference will be resolved in conference.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. BAYH. I yield back all my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Indiana, as modified.

The amendment, as modified, was agreed to.

#### AMENDMENT NO. 346

Mr. PROXMIRE. Mr. President, I have previously submitted amendment No. 346 to S. 1523 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes an amendment numbered 346.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following:

#### TITLE VI—FEDERAL RESERVE BOARD

Sec. 601. The second paragraph of section 10 of the Federal Reserve Act (12 U.S.C. 242) is amended by striking out the third sentence and inserting in lieu thereof the following: "Of the persons thus appointed, the President shall appoint one, by and with the advice and consent of the Senate, to serve as Chairman of the Board for a term of four years and one shall be designated by the President as Vice Chairman of the Board for a term of four years."

Mr. PROXMIRE. Mr. President, I will explain the amendment. The purpose of this amendment is to subject the appointment of the Chairman of the Board of Governors of the Federal Reserve System to Senate confirmation upon nomination by the President.

To my surprise, and to the surprise of many Senators, we do not confirm the Chairman of the Federal Reserve Board now.

It should surprise us because, ironically, we do confirm members of the Board, but not the Chairman.

There was a recent poll of Members of Congress and of people in the academic community and the business community as to who were the most influential people in the United States. No. 1, of course, was the President of the United States, which goes with the job.

But No. 2 was the Chairman of the Federal Reserve Board. It was a wise determination. William McChesney Martin was Chairman and was regarded as one of the most powerful men in Washington.

The Federal Reserve Board has a power peculiarly congressional. The Constitution gives the money power to the Congress. It is a congressional power to coin and regulate money.

We created the board and gave these money powers to the Federal Reserve Board. The Chairman of the Board is a man who wields enormous influence, but he is not confirmed when appointed Chairman, as long as he is a member of the Board at the time the President appoints him.

This is an oversight we should have recognized years ago, and I am offering that amendment now. It has been before our committee, and there has not been any objection to it.

The Federal Reserve is the instrument by which the monetary policy of the Nation is carried out on behalf of the Congress. The single most important individual involved in the conduct of monetary policy, which determines our interest rates and has an enormous effect on inflation, is the Chairman of the Federal Reserve. Monetary policy, of course, exerts an important influence on the economy and on employment inflation and growth.

All seven members of the Federal Reserve Board are appointed by the President by and with the advice and consent of the Senate for 14-year staggered terms. The Chairman is appointed by the President from among the seven members for a term of 4 years. The member selected is not required to be confirmed by the Senate in that capacity.

Because the post of the Chairman of the Federal Reserve is of such enormous influence, the Committee on Banking, Housing, and Urban Affairs last year reported to the Senate a provision which would have required Senate confirmation of the position. However, the provision was contained in a bill that included controversial matters and the entire bill failed to pass.

I introduced this legislation again in this Congress and recently held hearings on the measure. The Federal Reserve Board has no objection to the enactment of this provision into law.

In my judgment it is imperative that the Senate have the opportunity to hold hearings and to debate whomever President Carter appoints to chair the Fed-

eral Reserve and to conduct the monetary policy of the Nation.

Mr. President, some Members may feel this may be an "ad hominem" situation affecting the Chairman. There is no way of knowing whether President Carter intends to reappoint Chairman Burns or not. He may or may not do so. In any case, that appointment will not take effect until next January.

I have a letter from the Chairman of the Federal Reserve Board, Arthur Burns, indicating that he has no objections to my amendment.

This amendment is a long overdue procedural reform and is not intended to influence in any way the President's nomination of a Federal Reserve Chairman next January. Needless to say, if the President does renominate the present incumbent, the Banking Committee will hold expeditious hearings on the nomination and bring the matter to a prompt vote.

But I cannot imagine the Senate saying that it should not consider the man who has the kind of power the Chairman of the Federal Reserve Board has, particularly since it is a peculiarly congressional power. He is independent of the executive branch, but subject, of course, to congressional scrutiny and oversight. Therefore, if there is any nomination over which we have authority where we should demand that authority, it is in this case.

We approve the nomination of every second lieutenant, of all kinds of assistant secretaries, of people in all sorts of jobs by rote in this Chamber, with no debate, no consideration.

I think it is obvious, if we have any notion of simply passing the buck and being irresponsible, that we should act in this case to affirm our responsibility for the Chairman of the Federal Reserve Board.

So I hope this amendment will be accepted.

Mr. President, I ask unanimous consent that the letter from Chairman Burns be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CHAIRMAN OF THE BOARD OF GOVERNORS, FEDERAL RESERVE SYSTEM,

Washington, D.C. June 3, 1977.

HON. WILLIAM PROXMIRE,  
Chairman, Committee on Banking, Housing,  
and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: It has come to my attention that when the Senate considers S. 1523, the Housing and Community Development Act of 1977, early next week, you are planning to offer a floor amendment which would require the appointment of the Chairman of the Board of Governors to be subject to Senate confirmation upon nomination by the President.

I have no objection to the amendment you are planning to offer.

Sincerely yours,

ARTHUR F. BURNS.

Mr. BROOKE. Mr. President, I do not rise to oppose this amendment. I do not know why there has been no requirement that the Chairman of the Federal

Reserve Board be confirmed by the Senate except that, of course, all members of the Board of Governors are confirmed by the Senate and then the Chairman is appointed by the President.

I think the same procedure holds forth for the Federal Home Loan Bank Board. I do not know that there is any other chairman of such a board who is actually confirmed as such by the Senate.

I think it is true in any of these instances that there is confirmation by the Senate on membership on the board itself and not on the chairmanship. Therefore, I do not see any particular reason why this Chairman should be confirmed.

I have the highest esteem and respect for Arthur Burns, who has served so ably as the Chairman of the Board of Governors of the Federal Reserve System. I, for one—and I am sure there are others who agree—hope the President of the United States will renominate him to be the Chairman of the Board of Governors of the Federal Reserve System, because he has done such an outstanding job.

Arthur Burns is such an authority, and is so respected by the financial community and, I think, by the country generally. He is truly one of the most highly respected public servants we have.

But we are not talking about Arthur Burns. Presumably, if he is renominated by the President, he would be confirmed by the Senate. But I take it that my distinguished chairman of the Banking, Housing, and Urban Affairs Committee feels there is some necessity for confirmation of the Chairman of the Federal Reserve Board, and I wonder why this does not equally apply to other boards and commissions as well.

Mr. PROXMIRE. May I say to my good friend from Massachusetts, my amendment is not aimed at this time or this particular chairman. As the Senator recalls, this proposal was considered by the committee last year, offered as a bill by this Senator last year, approved by the committee last year, reported to the floor last year, and I do not think anybody at that time had a notion of whether Carter, if he were elected President, would reappoint Arthur Burns or whether somebody else would be appointed.

I share the admiration the Senator has expressed for Arthur Burns. He is a brilliant economist. I disagree with him very strongly on some measures, and I think his position has been one that is highly controversial, as it often is likely to be in this particular area, which is, by nature, highly controversial. I would have an open mind on any confirmation. But I think it would be most unfortunate if we did not have an opportunity to pass on the President's appointment of the Chairman of the Federal Reserve Board.

The reason why the Federal Reserve is different from the Home Loan Bank Board is that the latter has a 4-year appointment to the Board. Members of the Federal Reserve have a 14-year appointment, and it is possible for a President to avoid simply letting the Senate act on confirming the Chairman in this pecu-

liarily congressional function. The President can name his own Chairman from the Board, as long as he names one of the seven members.

It seems to me that whether it is Arthur Burns or whoever it is, the Senate ought to insist that the Banking, Housing, and Urban Affairs Committee ought to hold hearings and report to the Senate on its judgment as to his or her qualifications to be the Chairman.

I think the Senator would agree there is some difference in the qualifications necessary for the Board itself and for the chairmanship. We have approved some members of the Board who had very little economic background as qualifications for membership, very little in the area of monetary or fiscal policy, and we have had people accepted by the Senate who are adequate to serve on the Board but who, I think, in many cases would not be considered to be qualified as the Chairman.

The Chairman has great influence in leading that Board. As I say, we have seen it not only with Arthur Burns, we have seen it with William McChesney Martin; we have seen it with Eccles, and with a lot of distinguished Chairmen in the past. So I hope the Senator would accept this amendment and recognize that it is not directed at anybody in particular. I share the Senator's admiration for Arthur Burns.

Mr. BROOKE. I am sure the Senator does share the great esteem I have for Dr. Burns. I think his monetary policies have proven correct and are, I believe, greatly responsible for the improvement in the economy in this country.

But I cannot agree with the Senator when he says that we should confirm a member of the Board of Governors who could not serve as Chairman of that Board.

Mr. PROXMIRE. Maybe we should not, but we have done it.

Mr. BROOKE. I do not know that I have ever voted on a confirmation of a member of the Board of Governors of the Federal Reserve Board in the 11 years I have served on this committee when I did not feel that, if the President should designate him as Chairman, he could not serve well as Chairman.

Mr. PROXMIRE. I would say about two-thirds of the people we passed on, in my view, would not be qualified to be Chairman. But in any event, whether I am right or wrong, the fact is—

Mr. BROOKE. Then why have him serve as a member of the Federal Reserve Board?

Mr. PROXMIRE. Being a member is less demanding than being Chairman. Also, once a person has served on the Federal Reserve Board there is a record. Let us leave the present distinguished Chairman aside for the moment, and say the President should pick one of the other members of the Board. It seems to me it would be very desirable and proper for the Senate to examine his record as a member of the Board, what he had done, whether or not his judgment had been sound, whether he had demonstrated the kind of quality we would expect a chairman to have.

As I say, you can make an argument against our confirming anybody. We could, for instance, rule out confirming second lieutenants and majors and some of the many very minor positions we confirm.

But this is such a powerful position, right at the heart of our economic policy in our country, undoubtedly the most important economic position we have, except possibly that of the President. For the Senate to pass the buck and say, "We are not going to confirm him," seems to me would be most ironic.

Mr. BROOKE. The President could have a vacancy on the Federal Reserve Board and nominate a person to fill that vacancy and, at the same time, name that person as Chairman of the Federal Reserve Board.

Mr. PROXMIRE. Presidents have usually done exactly that.

Mr. BROOKE. Without any service on the Federal Reserve Board at all.

Mr. PROXMIRE. That is right. The Senate would have to act to confirm him.

Mr. BROOKE. It is not a matter of serving on the Federal Reserve Board and then being chosen on the basis of his service.

Mr. PROXMIRE. That was not the argument. My argument applied to a case where the President does as President Nixon did in appointing Arthur Burns as Chairman of the Federal Reserve Board. If he is an outsider, then we should act on his confirmation, we should have a hearing, have debate and act to confirm him or not.

The same thing has been true of William McChesney Martin, the same thing has been true of most of the chairmen of the Federal Reserve Board. However, in the event he is already on the Board, we do not have that opportunity to pass on whether or not he should be chairman, and I say we then have a chance to look at a real record to determine whether that record warrants his being elevated to the chairmanship or not. I think we should participate in that because it is a congressional responsibility, a constitutional congressional function independent of the executive.

Mr. BROOKE. I mentioned the Federal Home Loan Bank Board. What would the distinguished Chairman say concerning the Chairman of the Federal Deposit Insurance Corporation? Should we confirm the Chairman of the FDIC?

Mr. PROXMIRE. Well, I think we probably should, but I think that is of far lesser importance with respect to economic policy than that of the Chairman of the Federal Reserve Board. The Chairman of the Federal Reserve Board determines, more than anybody else in our country, monetary policy.

The head of the FDIC is an administrator who runs the insurance program. I think it is important to have a man or woman of ability and quality there, and I think it would be very good for us to confirm him or her. I would vote for it. I would be in favor of it.

But I do not think that is an imperative, as urgent, as it is for us to have an opportunity to have a voice in determining who is the Chairman of the Federal Reserve Board.

Mr. BROOKE. What about the chairmanship of the Securities and Exchange Commission?

(At this point Mr. MOYNIHAN assumed the Chair.)

Mr. PROXMIRE. Well, in the case of the SEC, during the years the Senator from Massachusetts and I have served on the Banking, Housing, and Urban Affairs Committee, it would seem to me we have acted on virtually every appointee. They have appointed people who have been, to the best of my knowledge, outsiders who have come in and been appointed as chairman. There may have been an exception or two. But in any event, I think it would have been wise for us to have passed on that. I would not object to those improvements the Senator is suggesting. Let us consider a few less second lieutenants and consider more chairmen of boards who have the policymaking responsibilities in our Government.

Mr. BROOKE. What is the administration's position on this? Does the administration want to have the Chairman of the Federal Reserve Board confirmed by the Senate?

Mr. PROXMIRE. I do not know of any administration position one way or the other. I presume that the present administration might wish a situation in which they can appoint any member of the Board they like as chairman without the Senate interfering. I do not think we should permit it. They have not said one way or the other, as far as I know.

As I say, the Chairman of the Federal Reserve Board himself said he has no objection to the amendment.

Mr. BROOKE. I read that letter addressed to our distinguished chairman which has been printed in the RECORD. It said:

DEAR MR. CHAIRMAN: It has come to my attention that when the Senate considers S. 1523, the Housing and Community Development Act of 1977, early next week, you are planning to offer a floor amendment which would require the appointment of the Chairman of the Board of Governors to be subject to Senate confirmation upon nomination by the President.

I have no objection—

In principle—

to the amendment you are planning to offer.

I do not think that is a ringing endorsement of the Senator's amendment at all. I do not know what Chairman Burns could have said under the circumstances. If he had any objection to it, it would look as though he had something to fear by confirmation of the Senate. On the other hand, he has already been confirmed by the Senate. He was confirmed by the Senate when he was appointed to the Federal Reserve Board, as are all the other members of the Federal Reserve Board and all members of the SEC, FDIC, the Home Loan Bank Board, and every other agency.

I am just trying to ascertain—and I will not belabor this point—why the distinguished Chairman feels it is so important at this time that we confirm the Chairman of the Federal Reserve Board. I still cannot quite clearly understand that.

Mr. PROXMIRE. May I say to the Senator from Massachusetts, he is about as eloquent and persuasive a lawyer, contender, arguer, and debater, as I know.

Mr. BROOKE. I thank the Senator.

Mr. PROXMIRE. I have not, however, heard one single reason why we should not confirm the Chairman of the Federal Reserve Board to occupy that extremely powerful position. This is congressional authority. The money power is congressional in the Constitution, and it is our responsibility. I think before the President decides who is going to be chairman, the Senate should find out his views in detail, and we should examine his record in detail. We should discuss whether or not the position he takes is the right position for the economic policy of this country. We have to assume that responsibility, and this gives us an opportunity to do so.

Mr. BROOKE. The distinguished chairman is not a member of the bar, but no one would ever doubt that he has articulate and persuasive powers on the floor of the Senate and in the committee. We are all aware of that.

But I might remind the distinguished chairman that the burden of proof is not on me to show why he should not be confirmed; the burden is upon the Senator to prove why he should be confirmed.

Mr. PROXMIRE. I welcome that burden and am delighted to have it. It is easy.

Mr. BROOKE. The Senator has the burden of persuading us that there is some good reason.

Mr. PROXMIRE. This is about the easiest case I ever had. I cannot imagine an easier case.

Mr. BROOKE. Apparently it is not an easy case when it has never been done before in the history of the United States. This is 1977. If it is such an easy case, why has it not been done before?

Mr. PROXMIRE. It should have been done in 1913. It should have been done in 1914. It should have been done in 1915. It should have been done a long time ago.

Mr. BROOKE. Has the Senator ever considered why it was not?

Mr. PROXMIRE. It was not.

Mr. BROOKE. Why?

Mr. PROXMIRE. It was not done because in most cases, in almost every case I can recall—I am sure there are exceptions—the President appointed an outsider, not a member of the Board; therefore, it was necessary to hold hearings and it was necessary to confirm him. The case for the Senate assuming the responsibility for the appointment for the Chairman of the Federal Reserve Board, the most important and powerful economic policy position in our Government, is, it seems to me, just overwhelming. Either we do that or abolish Senate confirmation of appointments.

Mr. BROOKE. Can the Senator know when we will again be faced with the situation where the President appoints an outsider?

Mr. PROXMIRE. Fine.

Mr. BROOKE. Then we will have confirmation hearings on that person.

Mr. PROXMIRE. Maybe we will be covered in that event.

Mr. BROOKE. Then this amendment is predicated on the reappointment of Arthur Burns.

Mr. PROXMIRE. No. The President could appoint any one of six other members of the Board.

Mr. BROOKE. Another member of the Board?

Mr. PROXMIRE. That is right.

Mr. BROOKE. It is predicated on the appointment of some other member of the existing Board; is that correct?

Mr. PROXMIRE. That is correct.

Mr. BROOKE. Is that the Senator's fear?

Mr. PROXMIRE. It is not a fear. It is saying we should assume responsibility here, particularly in this area. I wish the Senator would meet that problem. The Constitution provides that the power to coin money and regulate the value thereof is a congressional power. It is a congressional authority. The Federal Reserve Board, as everyone hears about it, is independent from the executive branch. It is not independent from Congress. That Board is our creature. Are we going to assert that responsibility?

Mr. BROOKE. We do in confirming each appointment to the Board.

Mr. PROXMIRE. We do not do so very well when we let the appointment to the most powerful position be made by the President, from whom the Federal Reserve Board is supposed to be independent, without any opportunity for the Senate to act on that appointment if the President appoints a member of the Board.

Mr. BROOKE. No one can be appointed chairman of that Board who has not been previously confirmed by the Senate.

Mr. PROXMIRE. Yes, and we confirm members of that Board flying blind.

Mr. BROOKE. That cannot be.

Mr. PROXMIRE. There is no way we know who might be chairman when he comes in as a member of that Board.

Mr. BROOKE. Here is the distinguished Senator from Texas (Mr. Tower). I am sure he has never voted on anything flying blind since he has been on the Banking Committee. That is for sure.

Mr. PROXMIRE. I can say something, but I will not.

Mr. TOWER. Mr. President, I wish to ask one question.

Can the Senator think of anything more redundant than inviting Arthur Burns before the committee for a confirmation hearing? I do not know anyone who has appeared before that committee more often than Arthur Burns or whose views on virtually every topic one can think of are better known than the views of Arthur Burns. Why could we not grandfather him in? What is the point of including him in this?

Mr. PROXMIRE. I certainly would not want to grandfather anyone in. I would think if Arthur Burns came before us there are many points that could be raised, debated, and discussed. The Senator from Texas and the Senator from Massachusetts both feel that he has been almost perfect, God-like, in his decisions, and I think that is subject to some debate and discussion. I think he has made some serious mistakes; he has done some fine

things, also. I think we should discuss it. I do not think it would be at all redundant. He should be before us for discussion on monetary policy, fiscal policy, and labor policy and just about every other policy. For instance, we have not found out why, in the years that Arthur Burns has been Chairman of the Federal Reserve Board, we have had worse inflation than we have had under the aegis of any member of the Board.

Mr. TOWER. That is the question, if that is the question.

Mr. PROXMIRE. With one exception. And that exception is a gentleman who was Chairman of the Federal Reserve Board for a few years during World War II. Except for that, Chairman Burns breaks all records on inflation. Perhaps he could answer that question.

I have a feeling he would be confirmed, probably resoundingly, with the majority of the Senators on this side and an overwhelming majority of the Senators on that side of the aisle. But I think it would be a good thing for the country to discuss it and for the Senate to assume its responsibility for it.

Mr. TOWER. The Senator has made an intriguing statement. He asked why we had the inflation with Arthur Burns as Chairman of the Fed.

Is the Senator implying that the Chairman of the Fed is responsible for the inflationary cycles we have had?

Mr. PROXMIRE. I think that there are many responsibilities. I would say that Congress shares a full burden, and I think our Presidents have, as well.

Mr. TOWER. Does the Senator think that deficit spending has nothing to do with it?

Mr. PROXMIRE. Of course, it has a great deal to do with it.

Mr. TOWER. Does the Senator say that organized labor with demands and getting raises in wages and benefits that have no relationship to demand and productivity and the laws of supply and demand had nothing to do with it?

Mr. PROXMIRE. I do not say that, of course.

Mr. TOWER. The fact that OPEC artificially jacks up the prices of oil, they have nothing to do with it? My stars, the Chairman of the Fed is indeed a powerful man if he is the one wholly responsible for that.

Mr. PROXMIRE. There is a perception in this country that the only man fighting inflation is Arthur Burns, and that his policies of fighting inflation are the best policies. That may be correct. I think we should debate it, discuss it, and recognize that he has a great deal of influence over a very important aspect of controlling inflation; that is, monetary policy—how big the money supply is and how rapidly it grows. During the years he has been Chairman, we have had this remarkable phenomenon of worse inflation than we had when other gentlemen were Chairman.

The Senator is absolutely right. The fact we had big deficits contributed to it greatly. The fact we had enormous increases in the price of oil by OPEC also is a big element. The fact we had drought and bad farm crops in 1 or 2 years was also an important element.

I think we should take all this in consideration, debate, and discuss it.

Mr. TOWER. I think it can be stated the other way. Maybe we would have had a worse inflation if it had not been for the restraint of people like Arthur Burns.

Mr. PROXMIRE. The Senator may well be right. If he is right, then Arthur Burns can undoubtedly survive debate and discussion in the Senate. I think it will be a happy day for us to discuss that. I think we should discuss a nominee of great importance for a change instead of people up here whose positions are of less importance.

Mr. TOWER. I ask the Senator why this is germane to a housing bill?

Mr. PROXMIRE. The Senator has offered many amendments that were germane and many that were not germane in the past, I am sure.

Mr. TOWER. And many were defeated as well.

Mr. PROXMIRE. I am sure some of them may have been. But this amendment is in order under the rules and, as I say, we have had hearings on it, we acted on it, we approved it, and we sent it to the floor before. I see no reason why it should not be on this legislation. It has a great deal to do with housing.

The policies of Arthur Burns have had more to do with affecting housing in this country—their effect on interest rates, their effect on the availability of credit—than perhaps those of any other official.

Mr. TOWER. Then I have another germane amendment. That is the repeal of the Davis-Bacon Act. That has had a very direct influence on housing. Perhaps we could discuss that subject.

Mr. PROXMIRE. I will be delighted to have that come up, and I will vote against it.

Mr. TOWER. I thought the Senator would.

Mr. BROOKE. Mr. President, I think the Senator's slip is showing a little bit. I think this is really the Burns amendment. It is evident to me from his colloquy with the Senator from Texas that it could very well be called the Burns amendment.

I think the Senator fears that the President, in his wisdom—and it may very well be his wisdom—may renominate Arthur Burns as Chairman of the Federal Reserve Board.

Mr. PROXMIRE. If the Senator will yield—

Mr. BROOKE. Just a minute. He is automatically on the Board, and if he becomes Chairman he does not have to come before our committee for any further confirmation; is that not correct?

Mr. PROXMIRE. No, that is not correct. Let me tell the Senator that this is in no sense the Burns amendment. I do not think it does a service to Arthur Burns to put it in that way. This amendment may pass, or it may be defeated. My guess is that if Arthur Burns were before this body for confirmation, he would do a whole lot better if the question was tied to this amendment. I think that Senators, whether they are enthusiastic or unenthusiastic about Dr. Burns, recognize the desirability of hav-

ing a voice in determining who is to be Chairman of the Federal Reserve Board.

I also think it significant that there are many people who are great admirers of Arthur Burns. I am one of them; although I think he has been wrong often, I admire his mind, his character, and his tremendous ability to exert leadership on that Board and elsewhere.

Mr. BROOKE. Is this a forerunner of things to come? I mean can we now expect amendments that would require the Chairman of the FDIC, the Chairman of the SEC, the Chairman of the Federal Home Loan Bank Board, and others to be recommended by our committee and confirmed by the Senate?

I would just like to know the direction in which we are moving.

Mr. PROXMIRE. I give the Senator two answers. First, I have no intention of offering amendments in these other areas. By and large, they are people who serve 4 or 5 years, not 14 years.

Mr. BROOKE. Is that the distinction?

Mr. PROXMIRE. That is No. 1. Second, while I have no intention of—

Mr. BROOKE. Chairman Burns does not serve as Chairman for 14 years. He is Chairman for 4 years.

Mr. PROXMIRE. No, but he is a member of the Board for 14 years. He serves 14 years on the Board, and can become Chairman at any time.

Mr. President, I reserve the remainder of my time.

Mr. BROOKE. Mr. President, if no one else wishes to be heard on this matter, I certainly do not intend to raise any question of germaneness. It is just a matter that I think needs to be discussed rather thoroughly. I think I clearly understand the purposes of the amendment, and I shall not be guided, by a ringing endorsement of the amendment by Chairman Burns. As I have said, I do hope the President will renominate him, not only for the good of the President and his administration, but for the good of the country.

I yield back the remainder of my time.

Mr. PROXMIRE. Mr. President, does the Senator from Alabama wish to speak on this matter?

Mr. ALLEN. No. As soon as the time has been yielded back, I wish to raise a point that the amendment is not germane, and appeal to the Chair on that.

Mr. BROOKE. Mr. President, I yield back the remainder of my time, so the Senator can make his point.

The PRESIDING OFFICER. Has time been yielded back?

Mr. PROXMIRE. I have not yielded back my time. The Senator from Massachusetts has.

The PRESIDING OFFICER. All time has been yielded back—

Mr. PROXMIRE. No, Mr. President, I have not yielded back my time as yet. Do I understand I have 7 minutes remaining?

The PRESIDING OFFICER. The Senator is correct.

Mr. PROXMIRE. Mr. President, I understand the argument may be made by the Senator from Alabama that this is

not germane, because this is a bill to amend the Housing and Community Development Act, and that could be an amendment to the Federal Reserve Act. I would just like to state my intention.

As I said in the course of the debate, I can think of no officer that has a more profound, direct, and explicit effect on housing than the Chairman of the Federal Reserve Board. If the Chairman, or the Federal Reserve Board itself, decides upon a policy of limiting increasing the money supply, and thus limiting the availability of credit, then, as we experienced in 1966 and 1970, we would likely have a credit crunch, and interest rates go up. In 1966, interest rates went up sharply, and there was a very devastating effect on housing.

The course followed, therefore, by the Chairman of the Federal Reserve Board, and the policies he decides to promote, are probably more important in determining the scope and the effectiveness of housing and community development than the legislation we have before us here.

I think for that reason it is extremely important that we have an opportunity, in considering our housing programs and in deciding on the kind of community development programs that are necessary, also to consider the policies of the Federal Reserve Board, and have an opportunity to pass on the record and the position that has been taken and very likely will be taken by the present Federal Reserve Chairman.

For that reason, Mr. President, I hope that the Chair will find that this amendment is germane.

I might also point out that the Chairman of the Federal Reserve Board, himself, considered this amendment, and he said:

It has come to my attention that when the Senate considers S. 1523, the Housing and Community Development Act of 1977, early next week, you are planning to offer a floor amendment which would require the appointment of the Chairman of the Board of Governors to be subject to Senate confirmation upon nomination by the President.

I have no objection to the amendment you are planning to offer.

Under those circumstances, again I would hope that the Chair would find that this amendment is germane. I yield back the remainder of my time.

Mr. ALLEN. Mr. President, I raise the point of order that the pending amendment is not germane. Had there been no time limitation agreement, of course, germaneness would not have been required. But under the time limit, the statement is specifically made in the agreement that no amendment that is not germane to the provisions of said bill shall be received.

No matter how closely related the Federal Reserve Board is to the housing issue, it still finds no place in this bill, because there would have to be some specific reference to the membership of the Federal Reserve Board for this amendment to be in order, and there is no such reference in the bill itself.

I raise the point that the amendment

is not germane as required by the unanimous-consent agreement.

The PRESIDING OFFICER (Mr. MOYNIHAN). The Chair rules that amendment No. 346 introduces new subject matter not in the bill and is therefore not germane, and the amendment falls.

The bill is open to further amendment.

Mr. PROXMIRE. Mr. President, I yield myself time on the bill. I understand that under the rules of the Senate I would be permitted to appeal that ruling to the Senate.

The PRESIDING OFFICER. The Senator is correct.

Mr. PROXMIRE. And I also understand that a majority vote would overturn the Chair's ruling.

The PRESIDING OFFICER. The Senator is correct.

Mr. PROXMIRE. I do not intend to do that. I intend to let the amendment go because the amendment is pending in the Banking Committee on another bill. I am sure there will be no question of point of order language in that particular case.

Rather than jeopardize the amendment by putting it into a position where it might very well be defeated, not on substantive grounds but on procedural grounds, I will withdraw the amendment and not press it at this time. I assure the Senate it will come up shortly.

The PRESIDING OFFICER. The bill is open to further amendment.

UP AMENDMENT NO. 348

Mr. HARRY F. BYRD, JR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Virginia (Mr. HARRY F. BYRD, JR.) proposes an unprinted amendment No. 348.

On page 2, between lines 10 and 11, insert the following new subsection:

"(3) By inserting in paragraph (6) 'either' before '(B)' and by inserting before the period at the end thereof the following: 'or (C) has a population in excess of one hundred thousand, a population density of five thousand persons per square mile, and contains within its boundaries no incorporated places as defined by the United States Bureau of Census:'"

On page 2, line 11, strike "(3)" and insert "(4)", and on line 14, strike "(4)" and insert "(5)".

Mr. HARRY F. BYRD, JR. Mr. President, the purpose of my amendment is to modify the current definition of an urban county to include any county which has a population of at least 100,000 persons and no incorporated areas as defined by the U.S. Bureau of Census, plus a density of at least 5,000 persons per square mile.

Under the current definition of an urban county, eligibility for direct funding is based on having 200,000 persons exclusive of incorporated areas, except where an agreement has been entered into to undertake essential community development and housing assistance activities.

In the Washington metropolitan area, the District of Columbia, the city of Alexandria, and the counties of Fairfax,

Montgomery, and Prince Georges are receiving funding from this act. Only Arlington County is excluded benefits, whereas all contiguous jurisdictions are eligible.

In every way other than the 200,000-population requirement, Arlington County can be considered an "urban" county. It is more like a city—and has only 23 square miles. In addition, it has all the legal authorities of a city.

Arlington is unique in that technically it is a county, but in actuality it is a city.

Yet Arlington, with a population of 156,000 and a density in excess of 5,000 inhabitants per square mile, is excluded under present law.

The proposed amendment will bring only Arlington County into the entitlement program and will have minimal effect on the overall entitlement allocation. It will conform to the intent of the law to provide assistance to urbanized areas, as Arlington obviously is an urbanized area.

Every Member of the Senate, I believe, has been to Arlington County. One could scarcely set foot in that area without recognizing that it is indeed an urbanized area.

Arlington has a larger population than Alexandria—and is more urban than Fairfax County, yet technically is excluded under the current law.

I believe Senators will agree that equity requires approval of the proposed amendment, which was approved by the House committee and is now in the House-passed bill.

I ask the distinguished manager of the bill if he is willing to accept the amendment.

Mr. PROXMIRE. The Senator from Virginia has talked to me about this amendment. I have had a chance to discuss it with the staff. There is some resistance on the part of HUD on the grounds that once they make an exception it sets a precedent. As the Senator from Virginia has said so well, Arlington County is unique. This would not mean that there would be a very large amount of money that would be available elsewhere.

Furthermore, it has the problems of an urban county. I believe we all know that. That is No. 1.

No. 2, it has administrative capacity and legal powers to carry out housing and community activities so it can do the job and do it competently.

No. 3, it has an urban character. It is integral to the District of Columbia.

For all of those reasons it seems to me this amendment is proper and in order. As far as I am concerned, I am willing to accept the amendment.

Mr. BROOKE. I would just have to point out, as my colleague from Virginia knows, that there are other counties that may have unique problems which we may have to deal with. I understand the problem that Arlington County has, and I have no objection to the amendment.

Mr. HARRY F. BYRD, JR. I thank the able Senator from Wisconsin and the able Senator from Massachusetts for favorable consideration of this amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. PROXMIRE. I yield back the remainder of my time.

Mr. BROOKE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

UP AMENDMENT NO. 349

Mr. CURTIS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) proposes an unprinted amendment No. 349.

At the appropriate place in the bill, insert the following:

"SECTION — Section 242(c) of the National Housing Act is amended by adding the following sentence:

"No mortgage insurance premium shall be charged with respect to the amount of principal and interest guaranteed by the Department of Health, Education, and Welfare under title VII of the Public Health Service Act."

Mr. CURTIS. Mr. President, this amendment deals with a situation where the Creighton Hospital, in Omaha, Nebr., is financed by a loan from HUD and a loan from HEW.

The adoption of this amendment would lower hospital costs to the public. It would do so by lowering the cost of financing nonprofit teaching facilities hospitals whose mortgages are both insured by HUD/FHA and guaranteed by HEW under title VII of the Public Health Service Act.

HUD has found a way administratively of making a like reduction in FHA mortgage insurance premiums where the HEW guarantee is under the title VI Hill-Burton program. Unfortunately, that administrative solution will not work in the case of the title VII teaching facilities hospital program, where the guarantee is 90 percent rather than 100 percent. This technical amendment would give equal relief to title VII hospitals. The FHA premium would apply only to the part of the mortgage not guaranteed by HEW.

Mr. President, as I understand this, it amounts to paying a double premium where they are dealing with two agencies and in this particular case it has overcharged the hospital I mentioned by about \$100,000 a year.

Mr. President, as I mentioned, the proposed amendment would lower the costs to the public of hospitalization. It would do so by lowering the FHA mortgage insurance premium paid by nonprofit teaching facilities hospitals whose mortgage has both: One, FHA insurance under section 242 of the National Housing Act, and two, an HEW guarantee under title VII of the Public Health Service Act.

HUD should not charge an FHA premium on the portion of a hospital mortgage which is guaranteed by HEW.

The HEW guarantee runs to HUD and removes from HUD any risk on that portion of the mortgage.

HUD has recognized this, and per a HUD legal opinion of April 30, 1976, has found a way not to charge the mortgage insurance premium on the portion of financing guaranteed by HEW under title VI—Hill-Burton program—of the Public Health Service Act. The solution found there was to use two mortgages, a first mortgage insured by HUD and a second mortgage guaranteed by HEW.

This solution, unfortunately, will not work in the case of a title VII hospital where the second mortgage is only 90 percent guaranteed by HEW—unlike the 100-percent guarantee under title VI. Therefore, the proposed amendment is needed.

It should also be noted that Public Law 94-484 enacted last October will enable HEW to provide 100-percent guarantees under title VII, but only on projects guaranteed after September 30, 1977.

In the case of a teaching facilities hospital in Omaha having a mortgage of \$50 million of which \$22 million is covered by an HEW 90-percent guarantee under title VII, the savings would be about \$100,000 per year. The title VII program covers only nonprofit hospitals, so that the savings will benefit the public.

This amendment would have been brought up earlier when S. 1523 was before the subcommittee and committee, but for the fact that the Creighton Omaha Hospital, referred to above, was only advised of the need for corrective legislation on May 27.

The proposed amendment is in the public interest and is in the nature of a technical and corrective amendment to relieve an inequity. It is of limited scope, as described above, but does solve a nationwide problem.

Mr. President, it is my hope that the distinguished chairman and the minority leader of this bill would see fit to accept this amendment.

Mr. PROXMIRE. Mr. President, I congratulate the Senator from Nebraska on this amendment. It is a good amendment. As I understand it, it is just for hospitals in being or under construction. It would not result in new construction. It would help them meet their mortgage payments and somewhat lower those payments. It would reduce the cost to the public and to the hospitals. I think it is an ingenious amendment, a good amendment. I am happy to support it.

Mr. President, I yield back the remainder of my time.

Mr. CURTIS. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

The Senator from Pennsylvania.

UP AMENDMENT 350

Mr. HEINZ. Mr. President, I call up my amendment at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk proceeded to read as follows:

The Senator from Pennsylvania (Mr. HEINZ), for himself, Mr. STONE, and Mr. CRANSTON, proposes unprinted amendment numbered 350.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 12, between lines 3 and 4, insert the following:

"(g) Section 104 of such Act is amended by adding the following new subsection at the end thereof:

"(1) (1) The Secretary shall, in making funds available to the recipients of grants under this title, permit any such recipient to receive funds, in one payment, in an amount not to exceed the total amount designated in the recipient's application, and approved by the Secretary pursuant to this section, for use by the recipient for establishing a rehabilitation loan fund which is to be established in a private financial institution, and which is to be used to finance rehabilitation activities that are part of the recipient's community development program. The Secretary may, as a condition of making such payment, require that the rehabilitation loan fund be utilized for the making of loans to finance rehabilitation activities in a manner consistent with this Act. Rehabilitation activities authorized under this section shall begin within forty-five days after the Secretary has made such payment.

"(2) The Secretary shall establish standards for such cash disbursements which will insure that the deposits result in appropriate benefits in support of the recipient's rehabilitation program. These standards shall be designed to assure that the benefits to be derived from the local program include at a minimum one or more of the following elements, or such other criteria as determined by the Secretary:

"(A) Leverage of community development block grant funds so that participating financial institutions commit private funds for loans in the rehabilitation program in amounts substantially in excess of deposit of community development funds;

"(B) Commitment of private funds for rehabilitation loans at below-market interest rates or with repayment periods lengthened or at higher risk than would normally be taken;

"(C) Provision of administrative services in support of the rehabilitation program by the participating lending institutions; and

"(D) Interest earned on such cash deposits shall be used in a manner which supports the community rehabilitation program. At the time of application, the Secretary shall review and approve all agreements with lending institutions which receive funds for community rehabilitation programs. Such approval shall be made on a case-by-case basis, and upon a determination by the Secretary that the agreement with the lending institution meets minimum benefit standards as listed in this paragraph."

Mr. HEINZ. Mr. President, I rise to offer an amendment on behalf of Senator STONE, Senator CRANSTON, and myself. I believe both the majority and minority on the committee have received a copy of this amendment.

The purpose of the amendment is to permit clearly the use of community development funds for the establishment of locally designed rehabilitation loan programs in conjunction with local lending institutions. This amendment would

allow a community to deposit a portion of its community development entitlement in a lending institution in order to leverage private funds for home repair or mortgage financing in designated neighborhood revitalization areas.

Until recently, there was no need for this amendment. The Department of Housing and Urban Development allowed communities to use community development funds for this purpose. Earlier this year, however, HUD published regulations which would have substantially curtailed this practice. Many successful ongoing local programs would have been stopped. Presently, HUD has indicated that it will revise its regulations to allow for lump sum deposits in lending institutions under certain circumstances.

The amendment that I offer would simply clarify the law so that the use of community development funds in this manner, within certain guidelines and in order to achieve specific benefits, is an eligible use of program funds. Our amendment would eliminate local uncertainty over whether the activity will be eliminated in future years or will be allowed to continue.

The chief benefit to the use of lump sum deposits is that local governments are able to obtain a commitment from a lending institution or institutions for a specific amount of mortgage money to be utilized for loans for home repair and mortgage financing in designated neighborhood revitalization areas. As a result, not only is a substantial amount of private capital made available for housing rehabilitation in deteriorated neighborhoods, but the program is undertaken as part of a comprehensive plan to revitalize very deteriorated older residential and commercial areas.

The lump sum deposit is utilized in several different ways. Some communities have used the deposit as security for high-risk loans to very low income neighborhood residents. Other communities employ the lump sum deposit as a means of subsidizing the interest rates charged low- and moderate-income families. This has been achieved by allowing the interest which accrues on the deposit to be used to reduce the interest which accrues on the deposit to be used to reduce the interest charged on the mortgage or home repair loan. In all cases, the financial institutions administer the loan program and thus eliminate the need for communities to establish parallel administrative structures and serve, therefore, as direct loan agents for the program.

The major opposition to the use of lump sum deposits has come from the Department of the Treasury, which objects to letter-of-credit borrowings in advance of imminent cash needs, since this requires additional borrowings on the part of Treasury on which interest must be paid.

In my view, these objections and the minor additional costs to the Treasury which are involved must be weighed in terms of the benefits. These benefits have been substantial in terms of leveraging private dollars for neighborhood conservation in communities across the country and in terms of expanding the participation of private lending institutions

in older, deteriorated residential, and commercial areas.

The lump sum deposit seems to be an important vehicle for developing comprehensive neighborhood revitalization strategies which involve local elected officials, private institutions, and neighborhood groups.

Finally, this amendment, while permitting the Secretary of Housing and Urban Development to allow this practice, also has safeguards against possible misuse of the lump sum deposit. It also specifies minimum elements of a local program which must be evident before such a lump sum deposit can be made in a financial institution.

Mr. PROXMIRE. Mr. President, will the Senator from Pennsylvania yield on the point he just made?

Mr. HEINZ. Yes, I yield.

Mr. PROXMIRE. He made a very good point. I want to commend him on it.

I call his attention to the fact that we had hearings this morning, at which the Treasury Department appeared and asked that they be allowed to get interest on the money that they deposit in the banks themselves.

What the Senator from Pennsylvania is saying is, with regard to community development money, which the Federal Government makes available to the localities, that they be allowed to get a return. Is that correct?

Mr. HEINZ. That is absolutely correct.

Mr. PROXMIRE. I do not see how inconsistent the Treasury can get. This morning, this very day, they appeared and testified very strongly in favor of this bill, which is designed to do one thing only; that is to let them earn return on the money that they deposit in commercial banks and savings and loans.

Mr. HEINZ. It does not surprise me, Mr. President, that the Secretary of the Treasury is looking for any way he possibly can to increase his revenues.

What I am asking for here, and I think the chairman of the Committee on Banking is sensitive to this, is to give our local elected officials and our private lending institutions a chance to fashion, to customize, their strategies for neighborhood revitalization. If the Treasury gets any more into these communities, these programs, than it already is, we are going to wipe out the ability of local people—citizens, local governments, local financial institutions—to have the tools to get together and really attack the problem of neighborhood revitalization at the local level.

I know the chairman of the committee, the distinguished Senator from Wisconsin, really believes in getting local financial institutions involved. Indeed, title IV of this act is aimed directly at that.

Since I always believe that it is important not just to have a stick but a carrot as well, I believe that this amendment, Mr. President, is vital.

Mr. BROOKE. Will the Senator yield on one point on the subject raised by the chairman?

Mr. HEINZ. Yes, I yield.

Mr. BROOKE. I have not prejudged the Senator's amendment, but I see a distinction between what the chairman said the Treasury testified to this morn-

ing and what the Senator from Pennsylvania is attempting to do.

The Treasury Department deposits this money and receives interest on that money. What the Senator from Pennsylvania is saying is that when communities draw down the money, they draw it out of the Treasury. The community wants to deposit that money and receive interest, so that they would be getting the interest rather than the Treasury.

Mr. HEINZ. That is correct. I am not sure there is a direct confrontation here between Treasury and what they testified to today. Unfortunately, I was not at the hearings. Let me explain so we are all clear on how the procedure now works.

A commitment, a reservation, is made for community development money. Under the present system, at least up until HUD wrote some preliminary regulations earlier this year, a letter of credit was issued to the communities and they could draw down on that letter of credit whenever they saw fit. If they wanted to draw down at the beginning of the fiscal year, they could. They then would be authorized, under this amendment, to take part of that money and deposit it in financial institutions in order to leverage funds for neighborhood conservation. There would have to be, under the amendment, certain quid pro quos. They would have to get an appropriate response from the financial institutions in order to deposit in those financial institutions.

Of course, if my colleague has had a chance to read the amendment and I did make a copy of it available earlier, I think both to the chairman and the ranking minority member—he will see that we have very carefully set out the conditions under which the Secretary of HUD may, by regulation, determine in what cases the funds may be drawn down. On page 2 of the amendment, the terms and conditions he may prescribe are set out. Then he is authorized to approve the use of such moneys on a case-by-case basis, so that the Federal Government is very carefully protected here.

Does the Senator from Massachusetts understand that?

Mr. BROOKE. I understand that was a condition under current practice, I think that currently committees can only draw down money that will be used within the next 3 days. They would not draw down all of the funds at one time. And Treasury was able to hold the money until it was needed by the community.

If a community could draw down a year's funds at once, even before it needs the funds, and deposit of money, and draw interest on the money—

Mr. PROXMIRE. If the Senator will yield, the practical fact is—we found this to be true in Milwaukee, Wis.—that if the city has to follow the procedure in the law and cannot handle the money itself, the fact is that it is hogtied. It is very, very hard to operate efficiently, for it to make the payments the way it should make the payments—promptly, on time, efficiently—and coordinate the interest that they can get from their financial institution and what they have to pay their contractors. It works out far better if we give them a little freedom and enable them to earn as much as they can.

Mr. BROOKE. That is true, but is the Senator not just saying that, rather than let the Federal Government draw the interest on the money, the city should be allowed to receive the interest?

Mr. PROXMIRE. So the city can draw a little extra interest.

Mr. BROOKE. What does the Senator mean by a little extra interest? They can draw out all the funds, deposit them in a bank, and draw interest on that money.

I do not understand how, on the one hand, the Senator from Wisconsin wants to cut back on the housing budget, and, on the other, give communities a larger community development entitlement than the Congress authorized.

Mr. PROXMIRE. I do.

Mr. BROOKE. This certainly is going to take money out of the Federal Treasury, because the interest that Treasury could be deriving from their money will go to the cities. Why not just give the money to the cities, as the committee did with the \$123 million in housing funds which the Senator just took out of the bill with his earlier amendment?

Mr. PROXMIRE. Because, as I say, we have had a practical problem in Milwaukee, where we simply have not been able to get our money in time to the job we want to do. The amendment of the Senator from Pennsylvania would help cure that.

Mr. HEINZ. If I may respond to the Senator from Wisconsin.

Mr. PROXMIRE. Yes.

Mr. HEINZ. The Senator is correct. The amendment would help accomplish two things. First, it would insure the money was always available because it would already be there in the local financial institution.

Mr. BROOKE. The money is available when it is with the Treasury.

Mr. HEINZ. I do not know if in Massachusetts they have had any trouble getting reimbursement from the Federal Government under Medicaid or other programs, whether any of the hospitals have had difficulty getting their reimbursement for depreciation as part of the payment under both Medicare and Medicaid.

In Pennsylvania, we have had enormous problems. The Federal Government is already borrowing from obligations, 30, 60, 90, 180 days, for no reason at all, just slow pay.

Mr. BROOKE. What would be the cost to the Federal Treasury under the Senator's amendment?

Mr. HEINZ. We asked the Treasury to come up with some numbers. We have been asking them ever since we held hearings in the committee over a month ago on this and they have been unable or unwilling, as the case may be, to supply us with any numbers.

It seems to me, if they have a great objection to this, they would substantiate numerically how much money it will cost them. They have not come up with any.

Mr. BROOKE. I can understand what the Senator from Wisconsin said. Maybe Wisconsin, Pennsylvania, and probably my own State and others have had some problems in having the money readily available to pay for housing rehabilitation work. That I understand.

That may be one purpose of the amendment.

But the major purpose of this amendment, as I see it, is to give cities an opportunity to draw interest on this money on deposit. They would get their community development plus interest.

Where is it coming from? It has to come from the Federal Treasury.

Mr. HEINZ. If that were true—

Mr. BROOKE. The cost is borne by the taxpayers.

Mr. HEINZ. But that is not the way it works.

Mr. BROOKE. All right.

Mr. HEINZ. The way it works is that, on a case-by-case basis, the Secretary of HUD would be authorized to allow a city to draw down on its letter of credit money which would be deposited in a financial institution, a bank or something. The interest on that deposit would not go to the municipality to finance its general expenditures, or the local government. What would happen is that the general purpose unit or local government receiving the money would negotiate, prior to any money going to the financial institution, an agreement that could include such things as leveraging, community block grant fund. The participating financial institution would make private funds for loans for rehabilitation available, in an amount substantially in excess of the money deposited out of its entitlement.

It would allow the commitment, for example, of private funds at below market interest rates or with lengthened repayment periods by those same financial institutions.

What it is is a way of extending rehabilitation efforts on a case-by-case basis, using interest admittedly that the Treasury will forgo, but that the interest payments do not go—I think this is the thrust of the Senator's question—to the municipality in the form of some generous unrestricted bonus payment. That is not what happens.

Mr. BROOKE. Let us take an example. A city gets a grant of \$3 million, deposits it in a savings and loan, at, say, 5 percent interest.

To me, that means that city X is getting a community development grant of \$3 million plus 5 percent on that \$3 million. So it is getting a much larger grant from HUD, from the Federal Government, than we have authorized and appropriated.

Is that not correct?

Mr. HEINZ. I say to the Senator that it is true that city X will have the benefit of additional expenditures.

Mr. BROOKE. Does the Senator mean additional income?

Mr. HEINZ. Additional income.

Additional income which will eventually come out of the pocket of the Treasury if we make the assumption the Treasury is now able to invest or borrow less, as the case may be.

Mr. BROOKE. Certainly.

Mr. HEINZ. There is no attempt to say that to the Senator. In fact, I said at the outset that the reason the Treasury is concerned is that they may have to borrow more or invest less, as the case may be.

But it seems to me, if we want to look at this in the most accurate light, what we are giving is an incentive to the cities that have the initiative and the creativity to fashion a more forward-looking program. Involving the private financial institutions in the area, in a neighborhood revitalization strategy.

I think it is quite appropriate that we should give an incentive and reward to those governments that are able to do so.

We are not giving anything away. We are not giving, as I say, a bonus payment without any quid pro quo whatever to some lucky municipality.

We are leveraging and, as a result, I think doing a service to the people who live in those neighborhoods that will benefit from rehabilitation programs.

Let me give an example. First of all, not all the money that the community may be entitled to would be drawn down.

In York, Pa., they have an annual entitlement of some \$3 million under the community development program. Under the CD program, as I understand it, they deposited \$25,000. Not \$3 million, \$25,000. This \$25,000 then became seed money for high risk loans in deteriorated residential areas of the city.

What they got as a result of that seed money was \$500,000 in additional commitments from five financial institutions.

Now, that is a tremendous amount of leverage. That is what we are trying to encourage here.

Mr. BROOKE. I understand the concept of leveraging. What I cannot understand, if I may have the attention of the Senator from Wisconsin, is if we take the example of city X, they got a \$3 million community development grant, and can invest that money. They draw down their full entitlement from HUD. They deposit the money in a savings and loan at, say, 5 percent interest, whatever interest rate they can get, and they use this money. That is a revenue loss to the Treasury.

Mr. HEINZ. If the Senator will yield, there is always a revenue loss to pay bills on time.

Mr. BROOKE. Yes. In this bill, we have \$3.5 billion in community development funds.

Now, if that money—let us say \$4 billion in grant money—is taken by every city and deposited in a bank what you have done would cost the Federal Government about \$200 million. The Senate has just agreed to take out \$123 million from the housing authorization, and you will give the cities back \$200 million. It just seems to me that what we ought to do is go through the authorization and appropriation process and decide on the allocation of community development funds to cities.

Mr. PROXMIER. Mr. President, if the Senator will yield, it is a matter of all kinds of assumptions the Senator jumps to, one whole year's interest you are automatically going to get. As I understood it, the Senator's amendment also provided discretion to HUD, did it not?

Mr. HEINZ. Absolute discretion with HUD. It is on a case-by-case basis.

Mr. PROXMIER. It will be the exception.

Mr. BROOKE. What do you mean by

discretion? How would you allow city X to do this and not allow city Y to do it?

Mr. HEINZ. It is going to be based on the benefits of the program.

Mr. BROOKE. What criteria?

Mr. HEINZ. On paying the costs to the Federal Government so that we do not have to increase that community development authorization of \$4 billion, \$5 billion, or \$10 billion so that we can attack the problem of rehabilitation now, not 5 years from now after our buildings have fallen down. I think the program will save money.

Mr. BROOKE. What criteria will the Secretary of HUD use in determining whether city X or city Y shall be allowed to draw down their funds and get interest?

Mr. HEINZ. Well, the overall criteria will be whether the Secretary judges this to be a wise investment of Federal money. There is set forth in the amendment a nonexclusive list but, nonetheless, an exemplar list of criteria.

Mr. BROOKE. What do you mean by a wise investment of Federal money, depositing it in a bank?

Mr. HEINZ. Let me give the Senator an example: Community development grant funds are deposited in participating lending institutions. These institutions in turn commit private funds for loans in designated rehabilitation areas in amounts substantially in excess of the deposit of community development funds. In other words, if \$1 is deposited in a bank we are expecting that bank, under the terms of the agreement that we arrived at, to put in \$2 or \$3 or \$5 or \$10 of private funds. In fact, in York, Pa., they put out \$20 of commitments for every dollar of seed money that is deposited in that institution. That is pretty good. It is called leverage, I say to the Senator.

I understand his concern about the Treasury, and this may cost us a few dollars, but it is not going to be a wholesale raid on the Treasury because we are not talking about drawing down the entire \$3.5 billion in community development. We are talking about drawing down a very small portion of it for a relatively modest space in time.

Mr. BROOKE. But under the Senator's amendment, \$3.5 billion would be eligible to be drawn down, is not that correct?

Mr. HEINZ. I will say to the Senator I do not see how that would be possible. I have to answer the Senator no, it will not be possible to draw down \$3.5 billion.

Mr. BROOKE. If the communities wanted to draw down this money and could get approval from the Secretary of HUD, could they not?

Mr. HEINZ. In my judgment I do not think the Secretary would be meeting his responsibilities to Congress if he were to draw down \$3.5 billion and put it out all of a sudden. I do not think that would be right.

Mr. BROOKE. The Senator from Pennsylvania said the Treasury could not give him a cost estimate. Does the Senator have any estimate of costs to the Federal Treasury of this amendment?

Mr. HEINZ. No, I do not. But I will

say to the Senator from Massachusetts this has been a practice at HUD for at least 3 years. The only reason for getting into this amendment is that HUD first had decided they might revise regulations this January or February. This was under pressure, and I do not know why. Perhaps it was from the Treasury Department. Then HUD changed its mind and decided it wanted to continue this program because there were numerous benefits to the communities. There was a lot of flexibility in getting the local financial institutions involved.

Mr. BROOKE. Have we had any hearings? I do not know of any hearings where we have discussed HUD's experience with this practice.

Mr. HEINZ. The reason we have not had hearings on it is because it has been taking place. It was permitted, it is permitted, under existing law, and if my amendment fails the result will be the following: HUD will not be prevented or prohibited or proscribed from what it has been doing these 3 years. We will have, if we reject this amendment, no amendment for intelligent guidelines so that we have an effective, functioning, intelligent program.

Mr. BROOKE. Do we need this amendment only to give HUD guidelines?

Mr. HEINZ. If the Senator would care to look at the amendment, I think he will see we set forth in the amendment very, very thoughtful and careful standards. We tell HUD they can only operate on a case-by-case basis. They cannot, as they may be empowered to do under the existing community development legislation, whether we pass the act before us or not, simply let all this money out.

Mr. BROOKE. These guidelines the Senator sets forth in his amendment would appear to me to be the logical guidelines that HUD must have used anyway during its 3-year experience with this program. Is that not true?

Mr. HEINZ. I would say to the Senator you cannot ever tell what is logical or not with a Federal bureaucracy. If the Senator has found that Federal bureaucracies are always logical I would appreciate his help on some things where I found them to be illogical.

Mr. BROOKE. What my colleague from Pennsylvania is saying is that we do not need this amendment because HUD already has the authority to do what this amendment would give them authority to do, with the exception that the amendment contains certain guidelines which the Senator feels should be written into law.

Mr. HEINZ. I think so.

Mr. BROOKE. Is that a fair statement?

Mr. HEINZ. I think HUD has kind of also created a climate of uncertainty by proposing some regulations and then withdrawing them, and I think it is also important not only that we have good guidelines but have some constancy about them, and I would hope the Senator could accept the amendment.

Mr. BROOKE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I ask on line 1 of my amendment, that the amendment be modified so that the word "shall" after the word "Secretary" be stricken and the word "may" be inserted in lieu thereof.

The PRESIDING OFFICER. The amendment is so modified.

Mr. HEINZ. Mr. President, I understand that with that modification the Senator from Massachusetts does not object to the amendment.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. BROOKE. Mr. President, although I still have some reservations, as I have expressed to the Senator from Pennsylvania, I commend him for trying to work out a solution to his problem. I hope that we are not going down a path which would in any way infringe upon the authorization and appropriation process of Congress.

I think by changing the language so that it is no longer mandatory but is permissive certainly makes it a much better amendment, and I am willing to accept the amendment.

Mr. PROXMIER. Mr. President, I am happy to accept the amendment. It is a good amendment. I commend both Senator HEINZ and Senator BROOKE on the debate.

I think Senator BROOKE is absolutely right to state the case that others have about our concern that this may go around the appropriations process. But I think the Senator from Pennsylvania has modified his amendment now to make it discretionary and permissive, and I think that is the way it should be. Also, the House of Representatives has accepted the amendment, and I think it is a sound amendment in its present form.

Mr. HEINZ. Mr. President, I ask unanimous consent to have printed in the Record a statement by the junior Senator from Florida, and the attachments referred to therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### STATEMENT BY MR. STONE

I join today in support of this amendment which directs the Secretary of the Department of Housing and Urban Development to continue to allow on a case-by-case basis lump-sum drawdowns of Community Development Block Grant (CDBG) funds by cities with rehabilitation programs. These funds could then be deposited in local financial institutions and would attract private funds for community rehabilitation purposes in amounts substantially in excess of CDBG money.

Lump-sum drawdowns have promoted involvement of private investment in rehabilitation programs in neighborhoods where such risks would otherwise not be taken. Cities in Florida and in many other states have indicated that it would be very difficult to undertake rehabilitation programs if lump-sum drawdowns of community development funds were discontinued. I attach to my statement, letters I received from the Director of the Department of Housing and Urban Development in Jacksonville, Florida, advising me of Jacksonville's experience with regard to lump-sum drawdowns of block grant funds, and for the serious consequences if the practices were discontinued.

This amendment is supported by the National League of Cities, the U.S. Conference of Mayors and the National Association of Housing and Redevelopment Officials (NAHRO).

I am concerned by reports of abuse of the lump-sum drawdown privilege. To prevent such problems in the future, the amendment requires the authorized rehabilitation project to begin within 45 days after the lump sum payment has been made. It also directs the Secretary of HUD to establish standards to ensure that the deposits result in benefits in support of the community's rehabilitation program. In view of these safeguards, I believe Congress would be well-advised in this case to allow a departure from the Treasury Department policy which discourages the deposit of federal grant money in banks to draw interest.

Mr. President, adoption of this amendment will result in additional private investment and participation in rehabilitation and will reduce the opportunity for abuse. I strongly urge its adoption by the Senate.

##### DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, May 25, 1977.

Re: Drawdown of Community Development Funds.

Senator RICHARD STONE,  
The Capitol,  
Washington, D.C.

DEAR SENATOR STONE: We are delighted to know of your interest in the practical and workable administration of the Community Development program. The ability of the City of Jacksonville to drawdown a portion of the City's Community Development Block Grant to establish a rehabilitation program has been the only way that we could have had such an effort. I am enclosing a copy of a letter dated December 28, 1976, concerning this same subject. That letter was addressed to the Rules Docket Clerk concerning administrative rules proposed by the previous administration.

The City of Jacksonville approached each of our major lending institutions to generate interest in the administration of a rehabilitation loan program using private funds with a separate guarantee from the Community Development program. We met with unanimous rejection for any program dealing with individual loans and/or guarantees. The only interest was in response to a proposal to deposit a reasonably large sum of funds to back a reasonably ambitious loan program.

Please remember that we were asking private banking institutions to support a program which had been seriously maligned by the past federal administration when the only federal program was the Section 312 loan. We have received excellent support locally for the concept and for the goals of our rehabilitation program. I am confident that with a reasonable degree of experience, we will be able to obtain a degree of "leverage" for private funds. However, to avoid the horrendous administrative costs of processing each loan with a requisition of Block Grant funds, I would anticipate that we would still desire to use a deposit of funds to participate in the guarantee of our rehab loans.

I would agree that there should be limits placed on the amount of funds to be drawn in advance of need and that there should be some relationship to the activity of the program for the retention of those funds. Furthermore, I think it only appropriate that the use of these funds and any interest

gained therefrom be specifically directed toward the rehabilitation loan activity.

On behalf of the City of Jacksonville, I would encourage your efforts to protect our right to make reasonable use of the Community Development funds consistent with local and national objectives.

Respectfully,

JOHN VAN NESS,  
Director.

Enclosure.

DECEMBER 28, 1976.

Subject: Docket No. R-76-292 Community Development Block Grants  
RULES DOCKET CLERK,

Office of the Secretary, Room 10141 Department of Housing and Urban Development, Washington, D.C.

DEAR SIR: We object to the change in financing rehabilitation loans to be brought about by the addition of Section 570-503(c).

Jacksonville's housing rehabilitation program in nine target neighborhoods is directly effected by this section. The City of Jacksonville deposits Community Development rehabilitation funds with a local savings and loan institution. The deposits serve as insurance against the institution's loans. The interest received on the deposits is a factor in the net difference between the 3 percent rate charged the homeowner and the market rate on the loan charged by the institution.

This approach is the only way we could obtain any interest or commitment from the local financial community. It is the only approach we are aware of that has the potential of obtaining leverage for additional institutional loans beyond the actual Community Development funds. The incentives proposed as an alternative by Section 570-503(c) will not be adequate from our experience to attract the participation by the Jacksonville lending community.

With the abandonment, for all practical purposes, of a national rehabilitation program by the discontinuance of the Section 115 grant program and the "on-again off-again" funding of the Section 312 loans program, cities across the land were confronted with the prospect of developing their own rehabilitation guidelines. We chose the approach cited above and obtained concurrence in its implementation with Community Development funds from the HUD Jacksonville Area Office. Copies of the initial correspondence are attached.

It was our objective from the beginning to involve the private banking sector with the City's rehabilitation program. It was our objective from the beginning to avoid having the City serve as the direct loan agent for the process. As it was, in a twelve-month period we were able to solicit proposals on two separate offerings only from one savings and loan institution. If we must rely on the alternatives proposed by Section 570.503(c), the City may be confronted with three alternatives:

1. abandon the program
2. adopt a direct loan program administered by the City with excessive administrative costs.
3. limit program to the cumbersome Section 312 process.

We can appreciate the Treasury's desire to reduce its borrowing cost. We would hope that the architects of federal regulations would have some appreciation of our urban problems. Jacksonville has an estimated twenty percent of its housing stock in the substandard category. We had hoped to make some inroads on this problem through Community Development rehabilitation loans. Section 570.503(c) is going to make it more difficult to accomplish that objective.

Sincerely,

JOHN VAN NESS,  
Director.

The PRESIDING OFFICER (Mr. SARBANES). Is all time yielded back?

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment. The amendment was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### UP AMENDMENT NO. 351

Mr. HUMPHREY. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. HUMPHREY) proposes unprinted amendment No. 351.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the text of the amendment be printed in the RECORD and that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill insert the following language:

The Secretary of the Department of Housing and Urban Development, in consultation with the Secretary of the Department of the Treasury, shall prepare a report which analyzes the fiscal crisis confronting many urban areas. It shall include but not be limited to the following:

- a. the number and characteristics of cities presently suffering from or nearing fiscal stress;
- b. causes of fiscal stress;
- c. specific recommendations and options which are or should be available to the Federal, State, and local governments for preventing and/or reversing fiscal stress.

This report shall be transmitted to Congress no later than March 1, 1978.

Mr. HUMPHREY. Mr. President, the fiscal crisis which hit many of this Nation's cities came as a surprise to many of us. Not only did we in Congress have no prior warning of what was to occur, but nobody in the executive branch was aware of, or immediately prepared to rescue these cities. That was nearly 2 years ago, and from what I have observed, little has changed. We still have no overall, coherent urban strategy to provide a framework for Federal approaches to city problems. We are still spinning our wheels and putting out fires rather than plotting a steady course of preventive and corrective actions. We are still dealing with individual cities and localized problems rather than developing a comprehensive plan which would benefit all cities in all parts of the country.

In 1984, we created the Department of Housing and Urban Development to help revitalize our Nation's deteriorated central cities. And, to the extent that physical deterioration is symptomatic of the problems of the cities, HUD has made a noble effort, despite the obstacles imposed by past administrations. The phys-

ical deterioration is, however, just that—symptomatic of other deeply rooted problems. These problems of deteriorating tax base, inability to get credit, out-migration of industry and middle class, and increasing costs of public services are forcing many cities to take drastic actions, and thus to exacerbate their existing problems. These economic and fiscal problems largely ignored in recent years by HUD, share both a cause and effect relation with the social and physical problems with which HUD demonstrated great concern. One, however, cannot be resolved without the other. It is for this reason that I am offering an amendment mandating that HUD work with the Treasury Department to analyze the present and potential fiscal problems affecting our Nation's cities and recommend solutions.

It is about time that the Department of Housing and Urban Development took a long-range and comprehensive look at our Nation's cities and evolve a plan of action to deal with the many facets of a city's problems. My amendment will set them on the road to do just that.

Mr. President, this amendment has been discussed with both the manager of the bill and the ranking minority member. It relates to the Department of Housing and Urban Development making a very comprehensive study of fiscal problems that affect our municipalities.

In 1964, we created the Department of Housing and Urban Development to help revitalize our Nation's cities and particularly to help those that were the central cities. Since that time, as we know, many of our cities have faced very severe monetary and revenue crises. I have asked in this amendment that the Department of Housing and Urban Development, in cooperation with the Department of the Treasury, analyze the present and potential fiscal problems affecting our Nation's cities and present to Congress proposed remedies and solutions.

I seek the response now of the distinguished Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, as I understand it, this amendment would call for a study by HUD to get some information we urgently need, do not have, but should have if we are going to have a sensible, coherent, and logical policy.

In the first place, it would require the number and characteristics of cities presently suffering from or nearing fiscal stress.

Mr. HUMPHREY. Yes.

Mr. PROXMIRE. There are lots of rumors about and talk about it, but we do not know what the facts are.

No. 2, the causes of fiscal stress. Again we do not know the facts.

And finally, specific recommendations and options which are or should be available to the Federal, State, and local governments for preventing this situation.

As I understand it, the position by HUD is one of not opposing the amendment.

Mr. HUMPHREY. That is correct.

Mr. PROXMIRE. They do not see anything wrong with it. The House of Representatives has put it in their bill.

Mr. HUMPHREY. That is correct.

Mr. PROXMIRE. They have accepted it.

This will not be an amendment that costs money. It does give us information we urgently need to have for a sensible kind of policy. I think it is a good amendment, and I support it.

Mr. HUMPHREY. May I say I extended the date to March 1 instead of January 1, 1978, because I am not at all sure how long it will take for the authorizing legislation here that we have to go through both Houses.

Mr. BROOKE. Mr. President, I have read and studied Senator HUMPHREY's fiscal stress, fiscal crises amendment. I am sure that it will prevent fiscal crises. I think it is a study that is very sorely needed, and I am very pleased to accept the amendment.

Mr. HUMPHREY. Mr. President, I yield back the remainder of my time.

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HUMPHREY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### UP AMENDMENT NO. 352

Mr. HATHAWAY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Maine (Mr. HATHAWAY) for himself, Mr. WILLIAMS, and Mr. MUSKIE proposes an unprinted amendment No. 352.

Mr. HATHAWAY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 66, after line 4, insert the following new section:

Sec. 513(a) Title V of the Housing Act of 1949 is amended by adding at the end thereof a new Section 528 to read as follows:

"Sec. 528. All property subject to a lien held by the United States or the title to which is acquired or held by the Secretary under this title other than property used for administrative purposes shall be subject to taxation by a State, Commonwealth, territory, possession, district, and local political subdivisions in the same manner and to the same extent as other property is taxed: *Provided, however,* That no tax shall be imposed or collected on or with respect to any instrument if the tax is based on—

"(1) the value of any notes or mortgages or other lien instruments held by or transferred to the Secretary;

"(2) any notes or lien instruments administered under this title which are made, assigned, or held by a person otherwise liable for such tax; or

"(3) the value of any property conveyed or transferred to the Secretary, whether as a tax on the instrument, the privilege of conveying or transferring, or the recordation thereof; nor shall the failure to pay or collect any such tax be a ground for refusal to record or file such instruments, or for failure to impart notice, or prevent the enforcement of its provisions in any State or Federal Court."

(b) Notwithstanding any other provision of law, no State, Commonwealth, territory, possession, district, or local political subdivision which has received, prior to the date of enactment of this Act, tax payments from the Department of Agriculture based on property held by the Farmers Home Administration shall be liable for, or be obligated to refund, the amount of any such payment, which, if it had been made after the date of enactment of this Act, would have been authorized by the provisions of section 528 of the Housing Act of 1949, and no officer or employee of the United States shall incur or be under any liability by reason of having made or authorized any such payments.

(c) The provisions of new section 528 set forth in subsection (a) above shall be effective as of January 1, 1977.

Mr. HATHAWAY. Mr. President, this amendment allows the Secretary of Agriculture to pay the property tax imposed by State and local jurisdictions on Farmers Home property that has been subject to foreclosure. The Secretary was doing this by custom until he was advised a few years ago that it was in violation of the supremacy clause of the Constitution. In order to remedy this situation we have to have specific authorizing legislation to allow these State and local taxes to be paid.

The cost of the amendment is \$2 million, and it is endorsed by the Secretary of Agriculture. Acceptance of this amendment would complement a number of other improvements contained in the bill with respect to rural housing.

In this regard, Mr. President, I was particularly pleased to review the provisions of title V of this bill dealing with rural housing. It includes a number of the provisions of S. 1150, the Rural Housing Act of 1977, which I was pleased to join Senator HUMPHREY and a number of my distinguished colleagues in introducing on March 28 of this year.

These provisions should improve the administration of the Farmers Home rural housing programs which are so important to my own State and to all States which have substantial proportions of their populations living in rural areas.

With regard to the particular needs of citizens in rural areas for better housing, I shall cite a couple of statistics.

In 1973, the Joint Center for Urban Studies of Harvard-MIT estimated that there were 13.1 million households suffering from "housing deprivation" and of these more than 5 million, or 38 percent, were nonmetropolitan.

In 1974, the ratio of substandard housing to public housing was 5 to 1 for urban counties, and 17 to 1 for rural counties.

The incidence of substandard housing in nonmetropolitan areas was 3½ times that in metropolitan areas in 1974.

Among the provisions included in the pending bill which are derived from S. 1150, is a section authorizing Farmers Home to make payments for latent construction defects which are undiscovered during final inspection. Also included is a section specifically authorizing the funding of elderly and handicapped housing under Farmers Home programs, and allowing the construction of congregate housing for the elderly.

In addition, there is a section mandating the implementation of Farmers

Home rural rental assistance programs. This had been delayed due to opposition and resistance from prior administrations, which had necessitated court battles. Recently, Secretary Bergland indicated to the courts involved that the Department of Agriculture would faithfully carry out the prior legislation in this area, which is gratifying to those of us who have advocated these programs for a number of years. But at the same time, it is useful through legislation to mandate implementation lest future administrations be tempted to reverse the decision of the present one.

Another provision adopted from S. 1150 would direct the Secretary of Agriculture to establish a research capability. Further, it includes a provision which would facilitate the payment of local taxes and insurance by Farmers Home borrowers. It permits the Secretary of Agriculture to advance funds for these purposes when borrowers' prepayments are insufficient to meet these obligations.

Together, these provisions indicate a marked improvement in Farmers Home programs. I am hopeful that the remaining proposals contained in S. 1150 will soon see their way into law, and commend the Senator from North Carolina (Mr. MORGAN) for his determination to hold hearings on these proposals in the near future.

#### PAYMENT OF STATE AND LOCAL TAXES ON FORECLOSED PROPERTY

There remains one further proposal, not contained in S. 1150, but part of a separate bill, S. 605, which I introduced on February 3 of this year, along with Senator MUSKIE. This proposal is to specifically authorize the Secretary of Agriculture to pay State and local taxes on the value of foreclosed property.

From the inception of the Farmers Home rural housing program, the Secretary would pay these taxes. But within recent years, the Secretary has refused to pay such taxes. This refusal is apparently based upon the supremacy clause of the U.S. Constitution which has been interpreted in numerous court decisions to preclude the Federal Government's payment of taxes to State and local jurisdictions absent specific congressional authority.

The absence of such authority in the present statutory structure and the Secretary's concomitant refusal to pay State and local taxes has worked a severe hardship on a number of local jurisdictions throughout the country. For example, I have heard from town managers and local officials in all parts of my own State who have described the dilemma posed by the Secretary's refusal to pay local taxes on property upon which he has foreclosed. The towns which were earlier denied their greatly needed tax revenues due to the financial instability of the loan program participants who later defaulted, subsequently found that the Secretary also refused to pay past due taxes because of the constitutional difficulty. These towns must nonetheless provide water and sewer services, police and fire protection, and road repair and plowing in the winter to the property in question.

My amendment would remedy this unfortunate situation and would provide the specific congressional authority which the Farmers Home Administration says it needs in order to meet State and local tax obligations. This amendment is cosponsored by my colleague from Maine (Mr. MUSKIE) and by the Senator from New Jersey (Mr. WILLIAMS).

I am pleased to report that the FmHA supports this amendment. It estimates that the annual revenue loss would go to State and local jurisdictions as payments to which they are entitled for services they are already providing. I have also learned from Farmers Home officials that under the present structure local officials in some parts of the country have grudgingly provided police protection and other services to areas dominated by foreclosed property. This is a situation with which neither the Farmers Home officials nor the local officials are comfortable, and the time has come to remedy it.

The language of my amendment provides that foreclosed property held by the Secretary of Agriculture shall be subject to legitimate State and local property taxes. The amendment is effective retroactively to the beginning of the current tax year, and also provides that taxes paid by Farmers Home to State and local authorities during prior years need not be returned, but rather shall be deemed to be authorized pursuant to this amendment.

It is my understanding that this amendment is acceptable to the floor manager of the bill and to the ranking minority member of the committee and I urge its approval.

Mr. BROOKE. Mr. President, will the Senator yield for a question?

Mr. HATHAWAY. I am happy to yield.

Mr. BROOKE. Is the Senator saying that under the present law, if foreclosure occurs, then a State cannot then recover property taxes from the Farmers Home Administration?

Mr. HATHAWAY. The Senator is correct. The title to the property reverts to the United States and the State cannot collect taxes against the United States. The Secretary had been paying these taxes gratuitously until it was pointed out to him that the supremacy clause of the Constitution prevented him from doing that and that he needed congressional authorization in order to resume the practice. Also, there is a provision in the amendment which states that all prior payments made by the Secretary are endorsed by this piece of legislation. With this provision, he will not have to take back from States and localities money that he has already paid.

Mr. BROOKE. How long has this practice existed, if the Senator knows?

Mr. HATHAWAY. The practice has been in existence for the past 2 or 3 years.

Mr. BROOKE. When did the Secretary of Agriculture terminate the practice?

Mr. HATHAWAY. I am mistaken. The act took effect in 1949, and the practice was up until 2 or 3 years ago to pay

these taxes. Then it was brought to his attention at that time that this was in violation of the supremacy clause of the Constitution and so the Secretary stopped making the payment.

Mr. BROOKE. Has this caused a hardship in the Senator's home State?

Mr. HATHAWAY. Yes, it has. I have received numerous letters and calls from city managers and town managers asking for the support of this amendment. It has caused a considerable hardship. The amendment, by the way, has been adopted by the House of Representatives. I presume that the State of Massachusetts and every other State in the Union would have similar problems.

Mr. BROOKE. Does the Senator have any cost estimate on this amendment?

Mr. HATHAWAY. Two million dollars.

Mr. BROOKE. What was the cost during the last year that this practice was in operation?

Mr. HATHAWAY. I am sorry. I do not know what it was 3 years ago, but the estimate provided by the Secretary of Agriculture is that it would now cost \$2 million. I presume that is based upon what he was paying out 3 years ago plus the increase in the amount of loans.

Mr. BROOKE. This is a national estimate?

Mr. HATHAWAY. That would be the national figure.

Mr. PROXMIRE. As I understand it, that \$2 million would not be additional funds that we would have to appropriate. That would come from the program, is that not correct?

Mr. HATHAWAY. The Senator is correct.

Mr. PROXMIRE. As I understand it, furthermore, there is no opposition by the Farmer's Home Administration to this?

Mr. HATHAWAY. No, the Farmer's Home Administration supports this, and the amendment was drafted by them.

Mr. PROXMIRE. Also, the House of Representatives has acted favorably on a similar provision.

Mr. HATHAWAY. The House of Representatives has identical language.

Mr. PROXMIRE. The House of Representatives has identical language, and it would permit a policy to be followed that has been followed from 1949, does the Senator say, until 1975?

Mr. HATHAWAY. That is correct.

Mr. BROOKE. Mr. President, if the Senator will yield, is the Senator asking for an authorization of \$2 million?

Mr. PROXMIRE. They do not need an additional authorization, do they? As I understand, they would use funds already authorized and appropriated.

Mr. HATHAWAY. It is to allow specifically what the Department of Agriculture had been doing in prior years, under existing law. It is not for the additional authorization of funds.

Mr. BROOKE. They have the money already in the existing budget, but they need this authority to do it?

Mr. HATHAWAY. The Senator is correct.

Mr. BROOKE. But they would have to reduce the amount they spend on other items?

Mr. HATHAWAY. I presume they would, yes.

Mr. BROOKE. That would mean a cut-back on rural housing, for example; is that correct?

Mr. HATHAWAY. The Senator is correct. They would have to take it out of something.

Mr. BROOKE. How much money is authorized for rural housing, if the Senator knows?

Mr. PROXMIRE. An extraordinarily large sum, as I understand. I cannot tell the Senator the exact amount, but this would be a very tiny fraction of the amount; far less than 1 percent; is that correct?

Mr. HATHAWAY. Yes; and I understand in most recent years they have been well under the amount which they have been authorized to spend.

Mr. BROOKE. I ask that question because I know the Senator from Maine has been a leader in championing rural housing programs. I am sure he would not want to be robbing Peter to pay Paul.

Mr. HATHAWAY. The Senator is correct.

Mr. BROOKE. The Senator says there is sufficient money, and so there would be no adverse effect on rural housing?

Mr. HATHAWAY. The Senator is correct.

Mr. WILLIAMS. Mr. President, I am delighted to join with my distinguished colleagues the Senators from Maine (Mr. MUSKIE and Mr. HATHAWAY) in offering an amendment to S. 1523, the Housing and Community Development Act of 1977, in order to correct an inequity that has caused added financial burdens for States and small communities. This amendment would permit States and localities to levy taxes on housing units that have been acquired by the Farmers Home Administration—FmHA—as a result of defaults on FmHA housing loans.

FmHA presently provides rural residents with business and farm loans under the Consolidated Farm and Rural Development Act, and housing loans under the National Housing Act. Under each of these acts, if a borrower defaults on a loan, FmHA takes title to the property for which the loan was made. The Consolidated Farm and Rural Development Act specifically provides that real property acquired by FmHA under that act is subject to State and local taxation in the same manner as privately owned property. However, no equivalent provision exists in the National Housing Act with respect to rural housing loans, and thus States and localities are barred from levying taxes on FmHA-held housing units. It should be noted that State and local governments may already tax housing units acquired by HUD because of defaults on HUD loans. This inconsistency in the law imposes an unfair burden on a number of small communities, many of which are already experiencing budgetary problems as a result of the unstable economic conditions of the last several years.

At the end of February 1977, FmHA's inventory of housing units acquired as a result of defaults on loans totaled a little over 8,000 units. Some of the prop-

erties in the FmHA inventory are resold after only 2 or 3 months, while others remain unsold for as long as 2 years. Throughout the period that FmHA holds title to a housing unit, the jurisdiction in which it is located must continue to provide it with services. Yet the local government cannot recoup its expenses for providing those services because it cannot tax FmHA held housing units.

The amendment now before the Senate would end this inequity by making the National Housing Act consistent with the Consolidated Farm and Rural Development Act, which already permits States and localities to tax FmHA-acquired real property. An identical amendment, sponsored by Representative WILLIAM HUGHES, was recently approved when the House considered its version of the Housing and Community Development Act of 1977. Also, the administration has expressed no opposition to this amendment, which FmHA estimates would cost about \$2 million per year.

Mr. President, I believe that this amendment is particularly important for small communities throughout the country, and I urge its adoption.

Mr. PROXMIRE. I yield back the remainder of my time.

Mr. HATHAWAY. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. PROXMIRE. I move to reconsider the vote by which the amendment was agreed to.

Mr. HATHAWAY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### AMENDMENT NO. 314

Mr. MORGAN. Mr. President, I call up my amendment No. 314.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. MORGAN), for himself, Mr. SPARKMAN, Mr. TOWER, Mr. GARN, Mr. LUGAR, and Mr. SCHMITT, proposes an amendment numbered 314.

Mr. MORGAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 54, line 8, delete all of title IV, the Community Reinvestment Act of 1977.

The PRESIDING OFFICER. The Chair would inquire of the Senator from North Carolina as to whether this is the amendment upon which a time limitation has been agreed to.

Mr. MORGAN. There is a time limitation, as I recall, of 2 hours to the side.

The PRESIDING OFFICER. A 4-hour time limit.

Mr. MORGAN. Mr. President, I also ask unanimous consent that the name of the Senator from Nebraska (Mr. ZORINSKY) and the Senator from North Carolina (Mr. HELMS) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MORGAN. The purpose of the amendment, Mr. President, is to delete the entire title IV of the act. There perhaps may be some question as to the wording of the amendment itself, as to whether or not it would delete the entire title. So I ask unanimous consent that the amendment as printed be amended as follows: by striking out, on the first page, "On page 54, line 8," and then adding, at the end of line 2, after "1977", a comma and adding thereafter "beginning on page 54, line 8, through page 58, line 2."

The purpose of that modification, Mr. President, is to make sure that the amendment is clear, and that it shows my intention that the entire title IV be stricken, rather than just the title line, as might have been indicated by the original amendment.

The PRESIDING OFFICER. Will the Senator send his proposed modification to the desk?

Mr. MORGAN. I have it right here, Mr. President.

The PRESIDING OFFICER. Is there objection to the modification? The Chair hearing none, the modification is agreed to, and the amendment is so modified.

The amendment, as modified, is as follows:

Delete all of title IV, the Community Reinvestment Act of 1977, beginning on page 54, line 8, through page 58, line 2.

Mr. MORGAN. Mr. President, the issues that are being considered today in S. 1523 are very important, and they concern me greatly, because I personally believe that one of the greatest needs in America today is for housing, and that anything we can do in Congress to expedite the construction and provision of housing for Americans should be done.

But the particular issue before us, and the one that I have called to the attention of the Senate, is also one that concerns me very greatly. I believe, Mr. President, first of all, that it has no business in the middle of a housing bill; for, in effect, if not the first step toward allocation of credit, or the requirement of the allocation of credit by lending institutions in America, it certainly is a foot in the door.

Because of that I think, it is something that should be considered and debated independently of the very important housing legislation which is before this body at this time.

As a matter of fact, Mr. President, the essence of title IV, which I have moved to strike, was introduced by the distinguished chairman of the Banking, Housing, and Urban Affairs Committee as an independent bill, designated as S. 406. Hearings were held on S. 406 as an independent bill. The title of that bill was "The Community Reinvestment Act of 1977." But during the markup of the housing bill (S. 1523) which we are now considering, the Banking Committee voted to attach an amended version of S. 406, the Community Reinvestment Act, to the housing bill.

I might add by way of emphasis that I did not have the privilege of being

present at the time the housing bill was marked up, inasmuch as I was hospitalized at the time. However, I would add that later on, after I was able to return to the committee, we did consider this matter very briefly one day; I moved to reconsider the vote by which this section was added to the housing bill and by my recollection the vote was 7 to 7. Therefore, it being a tie, the motion failed and the section remained in the bill.

Title IV, the provision I am talking about, the Community Reinvestment Act of 1977, requires the Federal supervisory regulatory agencies to make an ongoing assessment of whether or not a financial institution is meeting the credit needs of its primary savings deposit area. This primary savings deposit area is defined—I quote verbatim from the bill—as "a compact area contiguous to a deposit facility from which such facility obtains or expects to obtain more than one-half of its deposit customers."

Mr. President, I feel that during the last election a resounding message was sent to Congress. That message was that the American people are tired of additional Federal bureaucracy and paperwork. Our new President has pledged himself to see that as much paperwork as is possible will be eliminated. All too often we in Congress pass legislation which is noble in intent, but which in actuality is counterproductive to our goals. I believe that the Community Reinvestment Act is such a piece of legislation.

During our hearings in March, witness after witness testified on the adverse effects of such a law, including additional paperwork and additional cost to be borne by the consumer, and even the drying up of all credits in some innercity areas.

During the markup of the bill an amendment was offered and adopted which seemed to eliminate all reporting requirements, but upon closer examination it is evident that the financial regulatory agencies would be required to promulgate yet another set of regulations affecting financial institutions, regulations which Chairman Burns and others indicate would be almost impossible to draw up under the provisions of this bill. I can assure my colleagues that with these regulations will come a mountain of paperwork.

Mr. President, I wish that the printed transcript of those hearings was available so that my colleagues would have the opportunity of reading the testimony of all of these various agencies before the occasion arose that we had to vote on this bill. I want to make it clear at this point that I support wholeheartedly the ultimate intent of this bill, which is to assure that the credit needs of the inner city are adequately met. I am very much concerned about the problems of the inner city and during the last Congress, I was cosponsor of a bill which had to do with redevelopment or rebuilding some of the buildings in downtown inner cities in an effort to try to revitalize these areas.

As a past attorney general of my State, I was among the attorneys general of

the country as a consumer advocate. I am thoroughly convinced that this bill as written would have an adverse effect on consumer lending in our financially distressed inner cities.

That is not only my opinion but the opinion of others adequately expressed in the correspondence which has been placed on the desks of the various Senators.

I might say again, Mr. President, as I have said many times on the floor of this Senate, one of the most frustrating things I have found in the Senate is how in the name of commonsense we get a message across to the Members of this Senate. Here we are debating a very important bill with three Members in the Chamber. This is a bill which, in my opinion, will add mountains of paperwork to every savings and loan and every banking institution in America. How do we get the message across? We send out a "Dear Colleague" letter. Members receive at least 2,000 pieces of mail every week. How do they read it? They cannot read it. If we place letters on their desks, they do not have time to read the letters before they come in and vote.

I do not know how we make up our minds to vote. I do believe if I could get just two-thirds of the Members of the Senate to sit in this Chamber for 15 minutes I could convince them that this provision does not belong in a major housing bill.

If we ever adopt a consumer advocacy agency—and I voted for it 2 years ago, but I doubt that I will this time—I hope to the Lord we will apply it to the Congress so it can take a look at the legislation we pass to see if the injection of items such as this into major pieces of legislation constitutes an unfair practice.

I am satisfied that Members of this body come in and think they are voting primarily or solely for a bill that will really develop housing in America.

I do not have the answer to this question. There is no one to blame. It is just the parameters of the work of a Member of the U.S. Senate being so large as to be humanly impossible for anyone to know just what to do.

It is my honest opinion that this bill is based on a misconception of how our financial system operates. Proponents of the bill would argue that deposits in the inner city are being funneled out to make loans in the suburbs and in the more affluent sections of town. I would argue that this is a rare, rare instance, and that the majority of the inner-city areas cannot support savings institutions without the additional resources of the more affluent sections of the cities and their suburbs.

What this legislation would do is actually discourage the financial institutions in the more affluent sections of town from becoming involved in inner-city lending because this would not be meeting the community credit needs of their primary saving deposit areas, defined as a compact area contiguous to a deposit facility from which they get 50 percent of their savings.

What is a savings and loan institution in the suburban area of the city of Wash-

ington going to do when more than 50 percent of its savings comes from that contiguous area? Are they going to branch out and bring their money to downtown inner-city Washington which we are trying to develop? I say it is going to have the exact reverse effect. It will be the rare exception when it does.

During the hearings on this legislation, we heard testimony of how a group of financial institutions in the city of Philadelphia banded together to form the Philadelphia mortgage plan to insure that the credit needs of the inner city were being met. I say to my colleagues that if they will check back in their home States, they will find that this is the same type of concerted effort that is being made by concerned financial institutions throughout the country. It is through efforts such as these that we are going to be able to deal with the financial plight of our inner cities, and not additional paperwork and bureaucracy as this bill would require.

We are paperworking the businesses of this country to death.

For example, within the last 5 months, and I ask Senators to please note this, three acts of Congress have gone into effect aimed at redlining and the problems of credit in the inner city. Why not stop and see whether our previous legislative efforts are successful in dealing with this problem before we add yet another layer of legislation, paperwork, and bureaucracy? Let us find out if those three acts which have already passed will have their desired effects.

The Home Mortgage Disclosure Act is aimed at determining whether or not a financial institution is redlining in its home lending policies. If I recall correctly, the reports require that the loans be shown according to census tracts.

Under that law, the first reports were required to be filed in March, just 2 months ago. What do they show? Will these reports indicate that redlining has been practiced? If they do, does not each of the regulatory agencies of the various financial institutions have the authority to step in, to move in, and to see that the financial needs of the deposit facilities are being served?

The preamble to this title says:

The Congress finds that regulated financial institutions are required by law to demonstrate that their deposit facilities serve convenience and needs of the communities in which they are chartered to do business;

If these reports, which were just filed 2 months ago, indicate that a savings institution is not serving the area or the needs of the community where the deposit facilities are located, the law already requires them to do something about it.

This very act, in which we seek to add another layer of bureaucracy upon the institutions of this country, finds that the convenience and needs of communities include the need for credit services as well as deposit services. It makes it perfectly clear that the law already requires that financial institutions meet these credit needs. Here we have not given the act that we passed just last year but 2 months to come into effect—

only 2 months—before we are attempting to lay upon these financial institutions and these regulatory agencies additional burdens which I do not believe they can properly carry out.

The compilations of these reports were at a huge cost to our home lending institutions. Yet there has been little or no interest shown in these reports since their filing in March.

Earlier, during this last 2 or 3 weeks, I had printed in the RECORD, some findings of the savings and loan institutions, of reports that they made. I believe it indicated that their responses had been that, out of 2,775 inquiries, 1,543 had responded and almost no interest was shown. Rather than read the whole thing on my time, I refer my colleagues to the RECORD of Wednesday, May 18.

Let me add, as I have on the floor of the Senate many times, I am a director of a savings and loan in my State. It is a mutual savings and loan, designed primarily to serve the needs of the housing people of my area. There is no one in the Senate who knows better what can happen when you do not have credit because, when I started practicing law, in the area in which I lived, there was no credit available for a person to build a home unless he had about 60 to 70 percent of the downpayment and he could prevail upon one or two insurance companies to come in and make the loan. That is the reason I got busy in 1958 and 1959 and formed a savings and loan and brought it into my town. I know what it can do to a community. I know how it can hamper the development of a community when there are no funds available to build homes.

At the same time, I know what it can do to the financial institutions that are trying to serve these needs when we continue to add and add more and more paperwork, which ultimately must be passed on to the consumer.

In addition to the Home Mortgage Disclosure Act which was passed, there is the Equal Opportunity Credit Act and regulation B, which just went into effect in April, just a month ago. This is designed to prevent any kind of discrimination in the granting of credit by any federally insured or regulated deposit institution.

Compliance with these regulations should assure that credit is granted wherever it is needed and wherever borrowers have the capability to support the debt. The complaint and reporting provisions of these regulations should supply, in time, a fairly sound and realistic appraisal of situations in which credit is being denied.

Third, the argument can also be made that the very recently approved National Neighborhood Policy Act, which authorizes a National Neighborhood Commission, will also provide a source and forum for the consideration of the extent to which credit deficiencies might exist and how they might best be dealt with.

What I am saying, Mr. President, is that, by passage of this act, we are resorting to overkill. To begin with, there have not been conclusive studies to show whether the credit needs of the inner cities are being met, except for sound

financial reasoning, of course. If we do have a serious problem with redlining, then, certainly, we ought to give these other, recently enacted legislative initiatives time to see whether or not they can adequately deal with the problem.

Again, Mr. President, in that connection, let me say there is another effort being made. We felt so strongly about this matter that we asked the Comptroller of the Currency to comment on title IV of this bill. We asked the Federal Reserve Board to comment on it. We asked the Federal Home Loan Bank Board to comment on it. We have responses from these groups, the Department of Housing and Urban Development having already commented during the hearings, according to my understanding.

Today, we received a letter from the Acting Comptroller of the Currency, which we had understood was in the making for a substantial period of time.

In any event, we did get the letter today.

In the immediately preceding paragraph, it alludes to the problems and alludes to a letter that has been sent to Senator PROXMIER and others; this entire letter is available to anyone who wants it. This is the conclusion.

To consider appropriate strategies for solving these problems, the President has created, by letter of March 21, 1977—

Just 2½ months ago—  
and pursuant to Executive Order 11297, the Urban and Regional Policy Task Force, chaired by HUD Secretary Harris with the Secretary of the Treasury playing a prominent role. The initial recommendations of the task force, expected by early fall, promise to be comprehensive in their approach. Undoubtedly, Congress will recognize the wisdom of dealing on a broad basis with the multifaceted social and economic issues which must be addressed in any effective program of community revitalization rather than attacking the problems in a disconnected and piecemeal fashion. Therefore, we urge that legislation of the type embodied in Title V—

It should be title IV, but in the original bill, it was title V—

of the omnibus housing bill be tabled until receipt of the Task Force recommendations.

So, Mr. President, let me go back and recapitulate momentarily.

We first have the Home Mortgage Disclosure Act, passed during the last Congress, which required, just within the last 2 months, that lending institutions file reports showing where their money had been lent. So we have that first safeguard, which no one has had time to act on.

Second, we have the Equal Credit Opportunity Act and Regulation B, which only went into effect in April.

Third, we have the National Neighborhood Policy Act, which created the Neighborhood Commission, to provide a source and forum for consideration of this very problem.

Now we have come along and this administration, this President, on March 21, by Executive order, created another task force to deal with this very same problem.

Mr. President, it just makes sense to me that, before we pile onto all of the

rest of the regulatory requirements, we just take the time to see if any of those four practices are going to take effect.

Somebody has said this is a relatively innocuous act and it really will not have much effect. Let me read what section 406 of title IV has to say:

SEC. 406. Regulations to carry out the purposes of this title shall be published by each appropriate Federal financial supervisory agency, and shall take effect no later than one hundred and eighty days after the date of enactment of this title.

Regulations to carry out the provisions of this act. What kind of regulations? Are we talking about credit needs, Mr. President, for homebuilding? Are we talking about credit needs for financing household appliances? Are we talking about credit needs for financing automobiles?

And who is going to determine them? Is the Comptroller of the Currency? Is the Federal examiner going to have to have an ongoing program in every deposit area of America to determine what the credit needs of that area are with regard to housing or appliances or automobiles or whatever?

And how is he going to determine whether they are going to be met?

Is every financial institution in America going to have to keep a record of every verbal as well as written loan application that comes into their banking or financial institution? And then when the examiners come along, are they going to have to determine whether the loan was made or whether it was denied on the basis of sound credit practices? Or whether it was made in the area in which the loan was located?

These are not just questions I have dreamed up in my mind. These are questions that have been raised to me by people of the regulatory agencies as we have tried to get into this matter.

I will read from a letter signed by Dr. Arthur Burns, Chairman of the Board of Governors, in which he had responded to my letter of May 12 asking for comments on the amended language of section 406:

The amended version would still require the financial regulatory agencies to promulgate yet another set of regulations affecting financial institutions.

The legislation would require the supervisory agencies to assess the effectiveness of institutions in meeting the needs of their communities. Before such assessment could be made, the "needs of the community" would have to be identified. In effect, the legislation would require the financial regulatory agencies to measure continuously the credit needs of every community in the United States.

It is unclear how the supervisory agencies are expected to carry out this responsibility. We would hope that the Congress does not envisage extensive on-going surveys of the credit demands of individual communities. Obviously, such studies would be outside the normal supervisory role of the agencies and would involve substantial additional costs.

There is a further two-fold difficulty in determining whether a depository institution is meeting the credit needs of its service area. First, a regulator would have to determine the degree to which the area's credit needs were unmet by all other creditors serving the area. This would involve the difficult task of assessing the activities of banks, thrift institutions, mortgage bankers, finance companies, and insurance companies. Sec-

ond, after deciding what the unmet credit needs were, if any, a regulator would then have to determine what share of those needs a particular institution should attempt to satisfy.

Moreover, other approaches for implementing this legislation that have been considered by the Board's staff have also been found to be costly and of dubious value in determining community needs. For example, staff has considered whether loan approval and rejections could be analyzed. Loan information would have to be classified as to whether the borrower resided within or outside the bank's primary service area. Applications would have to be placed into specific categories, such as automobile loans, home improvement loans, personal loans and business loans. Examiners would have to compare applications from within the bank's savings service area that had been rejected to those loans outside the bank's savings service area that had been approved.

The examiners would be required not only to assess the soundness of the bank's loan's as at present, but they would also be required to assess the creditworthiness of applicants whose loan requests had been rejected in order to determine if the bank was rejecting loan applications meeting commonly accepted credit standards from within its primary savings service area while making loans outside of its primary service area. Such a process would significantly increase the work load and staffing requirements of the supervisory agencies. Moreover, such procedures would not reach those cases where loan requests were not reduced to a written record, nor would it uncover instances where longstanding policies had created a climate in which few credit requests are made. Thus, we do not believe this approach would accurately address the issue of determining community needs.

Alternatively, if the supervisory agencies took a different approach and required financial institutions to maintain records showing the amount of deposits generated from the primary savings service area and the amount of loans made in the area, we foresee equally serious objections. Aside from the cost of additional record keeping for financial institutions, the principal problem with respect to such an approach is that, given the wide differences in the demographics of service areas and the consequent differences in loan demand, it would probably be impossible to arrive at a reasonable judgment as to what a proper reinvestment ratio should be. Moreover, such an approach would be likely to interfere with the economically desirable flow of credit from areas of supply to areas of demand.

Finally, and most importantly, to the extent that this or any other sanction should prove effective in causing credit to flow substantially into an area on the basis of non-market forces, entry by depository institutions into other similar areas would likely be discouraged. Such areas would then be deprived of additional deposit services and some degree of loan services as well. Thus, the legislation seems likely to prove counterproductive in its effects.

As described in my most recent letter to Chairman Proxmire on this subject (copy enclosed), there are a number of ways in which the Federal Reserve is already encouraging banks to establish lending policies and business practices that are designed to better meet the credit needs of their communities.

For the above reasons, I am opposed to enactment of Title IV of S. 1523.

Mr. President, that letter was dated May 23, long after I voiced my objections to this portion of the bill, but it reaffirms what I had to say.

Mr. President, I ask unanimous consent that the letter of Dr. Burns, the let-

ter of Mr. Marston, Chairman of the Federal Home Loan Bank Board, and the letter of Acting Comptroller of the Currency, Robert Bloom, be printed in the RECORD at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.  
(See exhibit 1.)

Mr. MORGAN. Mr. President, I ask that that be done so there may not be any misunderstanding about what I have had to say.

In concluding, Mr. President, I would like to raise my most serious objection, and that is that I feel legislation of this nature is a significant step in the direction of credit allocation by the Congress of the United States.

If bills of this nature are pushed to their ultimate conclusion, then the day will come when a financial institution may be forced to make an unsound loan in a specific location in order to meet its quota of loans in a given locality.

Mr. President, I view this as an extremely dangerous and unwise direction for this Congress to take, and I hope my colleagues will join me, along with my distinguished colleagues, Senators SPARKMAN, ZORINSKY, TOWER, GARN, LUGAR, and SCHMITT, in voting to delete this burdensome and counterproductive piece of legislation.

The time, I think, has come for Congress to finally say "no" to further bureaucratic paperwork and regulation.

Let us see if these four remedies which I have already discussed are workable. The Home Mortgage Disclosure Act, the Equal Credit Opportunity Act, the National Neighborhood Policy Act, and the new task force which was appointed by the President on March 21, are four new legislative or executive initiatives designed to look into this problem and, in the meantime, we in the Banking Committee are taking another look at it.

I commend my distinguished chairman for his work in the Banking Committee. I serve on several committees, and I know of no chairman in the Senate who devotes more of his time and efforts to the functions and duties of his committee than does Chairman PROXMIER. As a matter of fact, I say sometimes facetiously that he is the nearest thing to perpetual motion in the Banking Committee I have ever seen. I say it good-naturedly, but he does do it.

The chairman is forever having someone into our committee with oversight hearings, and if more Members of Congress, more committees of Congress, did this and had been doing it in the years past I doubt very seriously if the Watergate Committee would have ever existed or the Church Committee would have ever existed, and there probably would have been no need for the Intelligence Committee on which I serve.

So I say in all earnestness we do have a working chairman, and I plead with the Senate to delete this section. Let us wait and see what these four remedies I have described do, and if they have any effect. In the meantime, the chairman can be carrying on ongoing hearings to determine what other remedies would

be available, rather than inserting this into one of the Senate's major pieces of housing legislation.

I reserve the remainder of my time, Mr. President.

#### EXHIBIT 1

FEDERAL RESERVE SYSTEM,  
Washington, D.C., May 23, 1977.

HON. ROBERT MORGAN,  
U.S. Senate,  
Washington, D.C.

DEAR SENATOR MORGAN: Thank you for your letter of May 12 asking for my comments on the amended language of S. 406, the "Community Reinvestment Act," which has been incorporated as Title IV of the Omnibus Housing Authorization bill (S. 1523).

As you indicate, the amended version would still require the financial regulatory agencies to promulgate yet another set of regulations affecting financial institutions.

The legislation would require the supervisory agencies to assess the effectiveness of institutions in meeting the needs of their communities. Before such assessment could be made, the "needs of the community" would have to be identified. In effect, the legislation would require the financial regulatory agencies to measure continuously the credit needs of every community in the United States.

It is unclear how the supervisory agencies are expected to carry out this responsibility. We would hope that the Congress does not envisage extensive on-going surveys of the credit demands of individual communities. Obviously, such studies would be outside the normal supervisory role of the agencies and would involve substantial additional costs.

There is a further two-fold difficulty in determining whether a depository institution is meeting the credit needs of its service area. First, a regulator would have to determine the degree to which the area's credit needs were unmet by all other creditors serving the area. This would involve the difficult task of assessing the activities of banks, thrift institutions, mortgage bankers, finance companies, and insurance companies. Second, after deciding what the unmet credit needs were, if any, a regulator would then have to determine what share of those needs a particular institution should attempt to satisfy.

Moreover, other approaches for implementing this legislation that have been considered by the Board's staff have also been found to be costly and of dubious value in determining community needs. For example, staff has considered whether loan approval and rejections could be analyzed. Loan information would have to be classified as to whether the borrower resided within or outside the bank's primary service area. Applications would have to be placed into specific categories, such as automobile loans, home improvement loans, personal loans and business loans. Examiners would have to compare applications from within the bank's savings service area that had been rejected to those loans outside the bank's savings service area that had been approved.

The examiners would be required not only to assess the soundness of the bank's loans as at present, but they would also be required to assess the creditworthiness of applicants whose loan requests had been rejected in order to determine if the bank was rejecting loan applications meeting commonly accepted credit standards from within its primary savings service area while making loans outside of its primary service area. Such a process would significantly increase the work load and staffing requirements of the supervisory agencies. Moreover, such procedures would not reach those cases where loan requests were not reduced to a written record, nor would it uncover instances where long-standing policies had created a climate in which few credit re-

quests are made. Thus, we do not believe this approach would accurately address the issue of determining community needs.

Alternatively, if the supervisory agencies took a different approach and required financial institutions to maintain records showing the amount of deposits generated from the primary savings service area and the amount of loans made in the area, we foresee equally serious objections. Aside from the cost of additional record keeping for financial institutions, the principal problem with respect to such an approach is that, given the wide differences in the demographics of service areas and the consequent differences in loan demand, it would probably be impossible to arrive at a reasonable judgment as to what a proper reinvestment ratio should be. Moreover, such an approach would be likely to interfere with the economically desirable flow of credit from areas of supply to areas of demand.

Since we have not been able to formulate what regulations could be adopted to accomplish effectively the objectives of the legislation, we cannot estimate supervisory costs or costs to financial institutions. Based on the System's experience in enforcing consumer credit regulations, however, it is possible that the costs would be substantial.

I might further point out that the "sanction" provided in the amendment to the proposed Bill that was approved by the Committee on May 9, 1977, i.e., to consider such information in the evaluation of applications for new deposit facilities, would probably not be very effective. First, although it is ambiguous as to holding company banks, it clearly would not impose sanctions on independent banks that are located in non-branching states. In addition, a depository institution that wishes to circumvent the Congressional objective would suffer only the penalty of being limited in the expansion of its deposit-receiving facilities.

Finally, and most importantly, to the extent that this or any other sanction should prove effective in causing credit to flow substantially into an area on the basis of non-market forces, entry by depository institutions into other similar areas would likely be discouraged. Such areas would then be deprived of additional deposit services and some degree of loan services as well. Thus, the legislation seems likely to prove counterproductive in its effects.

As described in my most recent letter to Chairman Proxmire on this subject (copy enclosed), there are a number of ways in which the Federal Reserve is already encouraging banks to establish lending policies and business practices that are designed better to meet the credit needs of their communities.

For the above reasons, I am opposed to enactment of Title IV of S. 1523.

I hope that the above comments will be helpful to you in your deliberations.

Sincerely yours,

ARTHUR F. BURNS.

FEDERAL HOME LOAN BANK BOARD,  
Washington, D.C., May 18, 1977.

HON. ROBERT MORGAN,  
U.S. Senate,  
Washington, D.C.

DEAR SENATOR: This is in response to your request of May 12, 1977 for the Board's views on the wisdom of enactment of the Community Reinvestment Act. You have also asked for our comment on the nature of regulations which we might propose as a result of enactment, an estimation of the cost of promulgating and enforcing such regulations and the potential cost to the financial institutions subject to the Board's regulation.

As the Board testified on S. 406 as originally proposed, the Board strongly favors the objective of having depository institutions meet

the credit needs of communities. In fact, the Board does review an institution's proposed plans for meeting community credit and savings needs in connection with all deposit facility, permission to organize and insurance of account applications. Nevertheless, the Board had a number of difficulties with the proposed legislative approach of S. 406 and continues to have difficulties with the revised S. 406 as adopted by the Senate Banking Committee. This is because although the language of the bill has been considerably altered, it is the Board's view that it is substantively very similar to the original bill.

Let me comment on this point briefly. The Board testified in opposition to the specifics of S. 406 in part because the Board did not believe that the objectives of the bill were well defined. We were unclear as to exactly what the Committee meant by the term "communities needs". For example, were these the needs of inner city blighted or deteriorating neighborhoods or were these the needs of certain members of society experiencing discrimination in obtaining housing credit? In the case of an affluent suburban community, does meeting community needs indicate that channelling funds into the inner city of the central city would be looked upon adversely? The present version of S. 406 does not cure any of these difficulties, and we continue to be unclear as to how to direct examiners to assess an institution's record of service to community credit "needs".

Secondly, and related to the question of which "needs" of the community are to be served, is the problem of defining the community or market area that an institution is supposed to be serving. As we testified on S. 406, the Board finds the definition of the primary savings service area in the bill wholly unworkable. This is because the area as defined is likely to be so small that it would not encompass a reasonable lending area, particularly for downtown branches of associations. As indicated in our testimony, this limited definition of a primary savings service area exacerbates the problem of the mis-match of savings areas and lending areas. In addition, there is a great deal of subjectivity in delineating the primary savings service area, and a large number of alternative areas could be used. Since the amended version of S. 406 contains the original definition of primary savings service area and keys the operative section of the bill to meeting the needs of that area, the Board must reiterate its objection to this feature of S. 406.

Thirdly, a major objection the Board expressed to the original S. 406, which has not been cured in the amended version, is its primary application only to Federally chartered savings and loan associations. Since State chartered savings and loan associations are not required to come to the Board for branch approvals, the impact of the bill would not be felt by such associations. We recognize that State chartered banks are required to receive branch approval from the FDIC and the Fed. However, it is the Board's understanding that a significant purpose of the bill is to serve housing credit needs—as opposed to other "credit needs", such as consumer loans. Therefore, the failure to reach over half of the savings and loan industry, the major housing credit suppliers, is in the Board's view a serious shortcoming. In addition, if enacted, the Board is concerned that Federal institutions may convert to State charter to avoid coverage under the bill. The Board must oppose such a potential erosion to the dual system.

For these reasons, the Board is seriously concerned about implementation of the bill, if enacted. The Board's staff has made an initial analysis of the bill, as amended, from an implementation point of view. As a technical

matter, it reflects its rapid drafting. Key terms, for example, are left undefined. The bill as drafted makes application of the provisions to chartering and granting of insurance of accounts to new institutions difficult, if not impossible. As alluded to above, the Board would be given no standard as to how to interpret the "community needs" requirement. The Board would be hard put to provide guidelines to examiners with respect to judging S&Ls on the basis of this criterion. Any guidelines would require that examiners become familiar with housing needs in a community or primary savings area. This requires the skills of a local housing market analyst. Our preliminary analysis of the bill indicates that if the Board were to fashion a definition of the "community" or primary savings service area for each institution, and its various offices it would have to require additional recordkeeping by institutions, probably a register of loan applications. Beyond that, the Board would have to establish a "norm" for each institution, possibly by region, market area, or "community", in order to provide examiners with guidelines as to how to assess each institution in terms of meeting credit needs. This is quite a substantial additional workload for examiners and one for which they are ill-prepared by training. Examiners would have to assess to what extent lending outside of the primary savings areas represents a legitimate lack of "need" for funds in the primary savings area.

In conclusion I would like to remind you of the proposal the Board made in its S. 406 testimony. The Board proposed that each institution's compliance with the fair lending and equal opportunity credit laws be reviewed in connection with each deposit facility application. (As with the whole bill, this proposal has the limitation of having its greatest impact on Federal associations). In the Board's view this proposal is a reasonable alternative to S. 406, as originally proposed and as amended. The alternative has the virtue of being administratively feasible and would certainly insure that a community's needs are being served to the extent protected by the fair lending and equal credit opportunity laws.

Without question S. 406 treats of a very important subject—making mortgage and other credit available to communities. However, the bill's possible goals are many and ill-defined and it constructs an enforcement mechanism which is unfair, as respects only Federal association to the exclusion of State chartered associations, may well be unworkable as an administrative matter, and reflects a basic misunderstanding as respects the sources of savings and the areas in need of mortgage credit.

Sincerely,

GARTH MARSTON.

COMPTROLLER OF THE CURRENCY,  
Washington, D.C., June 2, 1977.

HON. ROBERT MORGAN,  
U.S. Senate,  
Washington, D.C.

DEAR SENATOR MORGAN: I was glad to receive your letter of May 12, 1977, concerning the Community Reinvestment Act (S. 406) and to have a further opportunity to explain our reasons for opposing enactment of this legislation, now incorporated into an omnibus housing authorization package as Title V.

The opposition of the Comptroller's office to such a legislative proposal is longstanding and substantially predates the introduction of S. 406. To put the matter in historical perspective, it appears that Chairman Proxmire first focused upon the issues addressed by the Act in connection with a branch application filed by Pacific National Bank of Washington in Seattle. I enclose a copy of our

letter of August 27, 1976, which explains the circumstances surrounding that application and the deliberate efforts on the part of this Office to grant a full and fair hearing to all views, especially those of interested groups representing the local community.

Senator Proxmire followed his initial inquiry with three related pieces of correspondence in June and July, reflecting his growing concern that the Comptroller does not adequately consider the convenience and needs of a local community in determining whether to approve or deny an application for a national bank charter or branch facility. By letter of October 12, 1976, a copy of which also is enclosed, we responded to the Chairman in detail, setting forth our policies and procedures for insuring that the national banking system is responsive to the needs of the individual communities across the nation which it has been created to serve. As we attempted to make clear, it is unrealistic to expect those needs to involve only simple local demand for credit, however important a factor that may be.

Senator Proxmire seemed especially interested in the role of banks in alleviating the specific problems of urban decay by meeting inner city demand for home mortgages. In this particular regard we assured the Chairman that disinvestment in urban neighborhoods was an issue to which our Office has assigned high priority. The previous Comptroller emphasized repeatedly that national banks, and all financial institutions, have a duty to provide their communities with leadership and expertise in planning programs to combat such deterioration. However, we also pointed out that these problems cannot be solved by banks alone. A cooperative community-wide effort aimed at eliminating the root causes of housing blight, employment shortages, and educational weaknesses is essential.

To consider appropriate strategies for solving these problems the President has created, by letter of March 21, 1977, and pursuant to Executive Order 11297, the Urban and Regional Policy Task Force, chaired by HUD Secretary Harris with the Secretary of the Treasury playing a prominent role. The initial recommendations of the Task Force, expected by early fall, promise to be comprehensive in their approach. Undoubtedly, Congress will recognize the wisdom of dealing on a broad basis with the multi-faceted social and economic issues which must be addressed in any effective program of community revitalization rather than attacking the problems in a disconnected and piecemeal fashion. Therefore, we urge that legislation of the type embodied in Title V of the omnibus housing bill be tabled until receipt of the Task Force recommendations.

We trust this will be helpful in preparing for debate on the Senate floor. If I or my staff can be of any further assistance, please do not hesitate to call on us.

Sincerely,

ROBERT BLOOM,  
Acting Comptroller of the Currency.

MR. PROXMIRE. Mr. President, I want to thank my good friend from North Carolina for those concluding remarks. He almost persuaded me to support his amendment with the logic and beauty of what he said at the very end.

I must say that regretfully I oppose it. Senator MORGAN is a very, very hard-working member of the committee. He has been particularly interested in housing, especially in the last year or so. He is chairman of our Rural Housing Subcommittee, and I must say there is a great deal of force and logic in his argu-

ments. But I rise in opposition to the amendment, and I urge my colleagues to retain title IV, as reported.

Mr. President, for more than 2 years the Banking Committee has been studying the problem of redlining and the disinvestment by banks and savings institutions in older urban communities.

By redlining let me make it clear what I am talking about. I am talking about the fact that banks and savings and loans will take their deposits from a community and instead of reinvesting them in that community, they will invest them elsewhere, and they will actually or figuratively draw a red line on a map around the areas of their city, sometimes in the inner city, sometimes in the older neighborhoods, sometimes ethnic and sometimes black, but often encompassing a great area of their neighborhood.

We also know that smalltown banks sometimes ship their funds to the major money markets in search of higher interest rates, to the detriment of local housing, to the detriment of small business, and farm credit needs.

In 1975 Congress took the first small step against redlining. We passed a mild version of the Home Mortgage Disclosure Act, requiring financial institutions just to disclose where home mortgage loans are made.

The data provided by that act remove any doubt that redlining indeed exists, that many credit-worthy areas are denied loans. This denial of credit, while it is certainly not the sole cause of our urban problems, undoubtedly aggravates urban decline.

I might point out, Mr. President, that the redlining information has not been available just for 2 months, not just for 3 months, not just for 4 months, but ever since last September 30 in most cases.

Furthermore, the use of that data has been quite extensive. The New York papers have had a very elaborate series of stories on the amount of disinvestment in New York, pointing out that about 11 percent of the money deposited in Brooklyn remains, and 89 percent is invested elsewhere.

In the District of Columbia we find about 90 percent of the money is invested outside of the community where the money is deposited. Chicago has an enormous amount of disinvestment; in California, the data and details flowing from our legislation show that Los Angeles has suffered a great deal of disinvestment; St. Louis has massive disinvestment; Indianapolis is the same way; and in Cleveland, the Cleveland Plain Dealer had a series of stories pointing out this very serious problem, and highlighting the fact that this is something that is undoubtedly contributing or has contributed for a long time to the decay of the city.

Therefore, the committee included title IV to reaffirm that banks and thrift institutions are indeed chartered to serve the convenience and needs of their communities, and as the bill makes clear, convenience and needs does not just mean drive-in teller windows and Christmas Club accounts. It means loans.

Mr. President, the solution to housing and economic development needs is not

simply a Federal program, a Federal charge. There is no way that the Federal Government alone can solve this. If HUBERT HUMPHREY had been elected President of the United States, if PAUL SARBANES had been elected President of the United States, if ED BROOKE had been elected President of the United States, and with their deep commitment in the case of each of those three great Senators, to the building up of our cities, there is no way that the Federal Government can solve that problem with its resources.

What it takes is the kind of resources that the local financial institutions have, and they have plenty. They have over \$1 trillion, \$1,000 billion.

Now, it is possible that the Federal Government may put in a few billion dollars this year or over the next few years to help rebuild our cities. But it will be peanuts compared to what the financial institutions can put in, if they have the will to do it.

The private sector has the capital, the know-how, and the efficiency to do the job. And the banking industry must be encouraged to reinvest in local needs rather than continuing to favor speculative loans to shaky foreign regimes, to REITs, to unnecessary supertanker fleets, to bank insiders, and all of the other questionable ventures that have managed to get credit while our local communities starve.

Mr. President, I have great admiration for our banking system. I started off, when I finished school, in a bank and worked in a bank in New York for my first employment. I think that bankers sit right at the heart of our economic system, and I think they do have much better judgment because they understand their community, and have much better judgment than we have here. But the record shows we have to do something to nudge them, influence them, persuade them to invest in their community.

Just this week, a letter came across my desk from the vice chairman of First National City Bank, defending excessive Third World lending by U.S. banks.

The letter is as follows:

Bankers who have stepped up their cross border lending in response to urgent financing needs in the developing countries and a decidedly soft loan market at home are being roundly lambasted . . .

You bet they are. What does he mean by a soft loan market at home? Has he talked to young families in Brooklyn and small businessmen in Milwaukee who cannot get loans? What does he mean by urgent financing needs in the developing countries? What about urgent economic development needs in Detroit, Philadelphia, Baltimore, and Boston?

We need to encourage bankers to get out of the office and walk around the block and find loan opportunities here at home. The law already provides that banks are chartered to meet the convenience and needs of their communities.

Let me repeat that. The law now chartered banks to do what? To meet the convenience and needs of their communities.

But unfortunately many bankers and many bank regulators have forgotten the meaning of those words.

Title IV provides that:

Regulated financial institutions have a continuing and affirmative obligation to help meet the credit needs of the local communities in which they are chartered.

That is what the bill that we are now considering and the part of the bill that the amendment would delete provides.

And we provide that the regulatory agencies shall encourage lenders to give priority to local credit needs, consistent with sound lending practices.

The act provides that bank examinations shall assess how well the lender is serving the local community, and that this assessment will be taken into consideration if the institution makes application for a new branch. Those who are serving their communities should be rewarded. Those who are utterly neglecting their communities should not.

Mr. President, we might say that we simply bewail the situation, leave it to the marketplace, leave it to the bankers. We have done that now for years and years and years. We suffer this problem in the cities, in Detroit, in Milwaukee, in Chicago, in New York. The banks are taking the money out of these communities and investing it elsewhere.

We know, furthermore, as I am going to point out in a minute, that this is not necessary, that in the case of Philadelphia where they have gotten 15 of the most outstanding financial institutions together they have stopped redlining and they have done a great job there. They have made over 1,500 loans and made those loans in the last 18 months.

They have had a default rate of only six-tenths of 1 percent which is about the same default rate in the conventional area. It has been a smashing success. It has worked. They only turned down about one out of five of the applicants that have made application under this system from the inner city. But that can be done elsewhere, but it takes leadership from the Federal Government and takes leadership from the regulatory agencies.

The intent and effect of this measure has been widely misunderstood, and it has been the subject of a scare campaign by some trade associations. And boy how they lobbied. I talked to a number of Senators today who told me how they were called and received many letters from bankers in their State and called, also, by their own personal banker who makes loans to them—that is about as influential as you get from a lobbyist—to urge them to support the Morgan amendment to oppose the section of the bill. An early draft of the bill would have required additional reporting by lenders. The committee considered this provision in markup, and we unanimously agreed that bank examiners already have access to ample data to carry out the purposes of this title. We deleted the reporting requirement.

The Senator from North Carolina has made a very strong point and a very emphatic argument, indicating that this would require a lot more paperwork, a lot more redtape. That was true of the bill originally perhaps, but it certainly is not true of the bill now.

I think the redtape argument is a red

herring. I would say to those who fear increased bureaucracy—if the private sector fails to do the job of reinvesting capital in older communities and the Government has to pick up the pieces, then you will really see redtape. This is a private enterprise proposal.

The proponents of this bill also say it is impractical. Is it? Is it impractical? Let us consider.

We had a test of what this bill would do in two States. Two State banking commissioners have already adopted precisely this approach.

Did the chamber of horrors described by the Senator from North Carolina if this provision goes into effect materialize in those States?

Have we had credit allocation? Have we had redtape? Have we had additional paperwork?

Commissioners Connell of Connecticut and Greenwald of Massachusetts testified in support of the Community Reinvestment Act.

They told the committee that whenever they received branch applications, and this is just what this bill would require to be done on a national basis, they take the opportunity to assess how well the bank is serving its existing areas.

Banks that want to branch into lucrative suburban locations must demonstrate their commitment to areas served by existing city branches.

Let me read briefly from the testimony at the hearings from the Commissioner of Massachusetts, Commissioner Greenwald. She said this:

In Massachusetts, we have administratively instituted many of the provisions of this bill; we have done so in keeping with our legislative mandate to regulate in the public interest.

And she gives a series of examples of how this has worked out, and I shall quote just a few:

In one case we got a commitment that the bank would now make mortgage loan applications available at all its branch locations. Another was asked to make a commitment to work with community representatives in the older neighborhoods that it traditionally served, and to seek local area members for its Board of Trustees.

Most interestingly, another bank was granted permission to establish a suburban branch only after it renewed its commitment to a branch in an underbanked neighborhood by relocating it to better quarters, extending banking hours there, and offering the bank's full range of services at the branch. This branch the bank had earlier sought to close; a request which had been denied.

These are the kinds of actions that can be taken at the review process, at a branch hearing by the regulatory agency.

This is exactly the kind of action, as I say, that has been put into effect in Massachusetts, and in Connecticut. There is no evidence that there has been any domination by the regulator and redtape, any credit allocation. But it has worked to improve the opportunities for people in the cities to get loans. This carrot and stick approach delivers better banking services to both city and suburb.

Even at the Federal level, where the bank supervisory agencies are less

sensitive to the disinvestment problem, the Federal Home Loan Bank Board, has gently jawboned certain savings and loan associations who were obviously failing to serve their communities. In one case, a savings and loan based in Washington, D.C., was exporting 99 percent of local deposits out of State, despite local credit needs. The Bank Board called in management for a little talk. That was all it took: no redtape, no reports. Just a signal that the regulators felt the institution was neglecting its community. And the next year, the percentage of lending in the city went up from 1 percent to 20 percent.

Similarly, this bill would encourage the agencies to be somewhat more vigorous in reminding lenders of their local responsibilities.

The Senator from North Carolina has circulated a letter from Chairman Arthur Burns opposing this bill. Dr. Burns' letter says that first of all it would be impractical to encourage banks to meet local credit needs. Then he goes on to say that the Fed is already encouraging banks to meet local credit needs.

Now, Dr. Burns is a masterful economist, but he cannot very well have it both ways. If it is impractical, the Fed cannot be doing it already. It is like the fellow accused of assault who says, "I didn't do it, and besides I was provoked."

Interestingly, Dr. Burns is very inconsistent about whether banks should be required to give priority to local credit needs. Let me quote from another letter of Dr. Burns. Back in 1974, at the height of the credit crunch, Chairman Burns wrote a letter to Robert Mayo, President of the Federal Reserve Bank of Chicago. Dr. Burns wrote that feedlot operators were having a very bad year, and that many country banks were cutting back local loans in order to obtain higher yields elsewhere. Then Dr. Burns said:

While funds should normally flow to the uses offering the greater return, I believe that it is important that each banker realize that the continued availability of credit to local activities may well, in the long run, yield the greater total return to the economy of his community, and thus to his bank as well. Taking due account of relative credit risks, the first obligation of bankers is to the credit requirements of their service area.

Dr. Burns concludes by asking President Mayo to "remind bankers of this obligation whenever the opportunity presents itself."

So Dr. Burns agrees with title IV that the first obligation of banks is to their local service areas, but he would prefer to apply this principle selectively, as suits his fancy, rather than have Congress legislate a consistent public policy.

I would add that Dr. Burns also opposed the Home Mortgage Disclosure Act, which Congress passed and President Ford signed into law. The Federal Reserve Board and the other Federal bank supervisory agencies, unfortunately, have never shown much interest in these issues. It took two oversight hearings by the Banking Committee followed by highly critical committee reports and a lawsuit by major civil rights groups, before the banking agencies even began to

enforce the laws against discrimination in lending. So their opposition to the Community Reinvestment Act is in character.

On the other hand, the president of the Nation's largest savings bank, Mr. Todd Cooke, testified in support of this legislation.

Think of that, Mr. President: The president of the largest savings bank in this country supports this legislation. He has had the greatest success of any bank in the country, and he supports it.

Mr. Cooke summed up the need for the bill better than I can. He said:

One: A financial institution, in my judgment, clearly has a primary and continuing responsibility to the community in which it is authorized to operate. This is an underlying premise of the bill in which I heartily concur.

Two: This responsibility cannot be limited to simply helping meet the community's deposit needs, but must, as a matter of economic logic, extend also to its credit needs.

Three: Accordingly, I take no exception to the bill's directive that the supervisory agencies use their chartering, examining, supervising and regulating authority to encourage financial institutions which may have been lax in this regard, to meet with these twin responsibilities.

Now, this is not Ralph Nader talking. It is the president of the Nation's largest savings bank. Mr. Cooke made certain recommendations for making the bill easier for bankers to live with, and the committee followed them. Mr. Cooke, through his own bank, took the lead in devising the Philadelphia mortgage plan, which voluntarily commits Philadelphia banks to reinvesting in older Philadelphia neighborhoods. It is a model approach.

As I say, it has been a smashing success. People did not think it could be done; but they took the inner city area, and instead of drawing a red line around it, they took every single block, block by block, and if it had less than 10 percent abandoned housing, they would make loans for any sound structure to any applicant who had a reasonable credit record. As I say, they have turned down only something like one out of five loans, and they have had a default record every bit as good as the record in conventional suburban areas and other areas.

That Philadelphia approach is an approach that would be commended to bankers under this bill. And obviously, if all bankers had the foresight and community commitment of Mr. Cooke, we would not need this bill. But the problem is that many bankers neglect their local communities. Arthur Burns has admitted as much in his letter to Robert Mayo.

Mr. President, I do hope that the Senate will not accept this amendment. As I say, I have the greatest respect for the Senator from North Carolina, and particularly for his great sincerity in this matter, but I think that this is the best opportunity we have to provide effective reinvestment, investment buildup in our cities on a sound basis, at no cost to the Federal Government and no cost to the taxpayer in the private sector.

I think in many ways this is the most important part of the entire bill, and I hope the amendment is not accepted.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. RIEGLE). Who yields time?

Mr. MORGAN. Mr. President, I yield myself as much time as I may use.

Mr. President, I have just a word or two in response to my distinguished chairman. I think he makes a good case for deleting the section that I have pointed to, in that he points out that Dr. Arthur Burns, even as early as 1974, was using the regulatory powers of his office to try to make sure that the credit needs of a given group were met. I do not find the inconsistencies in his letter to me, because he says they are already trying to do it, but the difficulty that he points out is, how are you going to carry on a continuing assessment of these credit needs, and what are the ones you are talking to?

My distinguished chairman also alludes to the president of the largest savings bank in the United States. I have not had access to that testimony, and I do not know exactly what he said, but I do know this: The cost of this proposal is going to be passed on, maybe not to the taxpayers directly, but it is going to be passed on to the consumer.

What my chairman said reminded me of a hearing we held in Salt Lake City last Thursday with regard to rural housing. The executive vice president of the largest bank in the State of Utah came in and testified in a very glowing manner with regard to all of the 30-some programs of the Farmers Home Administration, and said that the regulations provided no difficulties at all for his bank.

I asked him if it was not true that most Government regulations provided no real difficulties for the largest institutions, because they can always put on all the help that they need. He acknowledged that that was somewhat true.

The next witness who testified said:

I beg to differ with the distinguished gentleman, because a branch banker, of a branch of his bank in my hometown, came to see me and wanted to handle some of my building financing, and when I told him I was dealing with section 515, he said, "That is just too complicated," and walked out.

Maybe the big bankers can understand it and cope with these regulations, but most of my bankers in North Carolina are not that big, and most of our savings institutions are not that big.

So I still say most of the cost is going to be passed on to the consumer.

Mr. PROXMIRE. Mr. President, will the Senator yield on that point?

Mr. MORGAN. Momentarily.

Mr. PROXMIRE. I might ask the Senator to explain, why is it that if there is such a substantial cost, the evidence in both Connecticut and Massachusetts, where they have tried this and operated on this basis for some time now, is that there is no cost?

Furthermore, as the Senator knows, we deleted from the bill all the reporting requirements. We said it would be necessary for regulatory bodies to rely on the information they already have, but that

should be enough to do the job, and, indeed, in Connecticut and Massachusetts it has been a sufficient amount.

Mr. MORGAN. I would say to the distinguished chairman that, first of all, I have not had access to their testimony. Even though we have tried, the testimony has not been printed.

But even with regard to deleting the reporting costs, it was just the difference between tweedledee and tweedledum, because the committee came back with the requirement that the information required shall be published by each appropriate agency and shall take effect. What you are saying is that rather than we in the Senate taking the time to write the regulations so we will know what reporting will be required, we are going to delegate that authority to some faceless bureaucrat who is not answerable to the electorate. I would rather have had the bill as originally written.

Mr. PROXMIRE. We would all be happier to have minimal regulations; but on the basis of experience in those two States, the regulations would be very minimal, and would not require additional reporting.

We have also had testimony from a small bank, the South Shore National Bank in Chicago, a bank which has total assets of something like \$60 million; not tiny, but rather small.

They were enthusiastically in favor of this bill. The president of that bank said this legislation was something he could operate with very well. He did not see any particular additional cost on his part, and he felt it was desirable to encourage banks and to provide incentives for banks to be concerned about loans in their particular communities.

Mr. MORGAN. Since the Senator has made it very clear that there would be no more reporting, would the Senator have any objection to deleting section 406, which says additional regulations shall be provided, and let the agencies act on the basis of information already provided under the law?

Mr. PROXMIRE. Will the Senator withdraw his amendment if we provide that?

Mr. MORGAN. I think he would be more inclined to, but I still think it would be looking toward the allocation of credit. I believe it would be reassuring to the financial institution that whatever was done would have to be done on the basis of all of these reports which we have already required.

Mr. PROXMIRE. If the Senator will permit, let me read that sentence.

SEC. 406. Regulations to carry out the purposes of this title shall be published by each appropriate Federal financial supervisory agency, and shall take effect no later than one hundred and eighty days after the date of enactment of this title.

That is the whole thing.

Mr. MORGAN. I think it would make it far more acceptable. I still think it would be a first step toward the allocation of credit, but at least it would eliminate a new rash of regulations. Of course, by the same token, I believe the regulatory authorities probably already have it. This would be a clear indication that we did not expect more.

Mr. PROXMIRE. Let me consider that. We do have a problem when we implement a law of this kind without any regulations.

Mr. MORGAN. We already have, under the Home Mortgage Act that was enacted last year, the redlining reporting. All they would have to do would be to look at it and see where the home mortgages were being made. I assume that is basically what we are talking about.

Mr. PROXMIRE. I would be happy to take that under consideration. Perhaps we can arrive at some accommodation. I am sure there will be additional discussion of this amendment. Let me consider that. I believe it is an interesting suggestion.

Mr. MORGAN. Mr. President, I yield to the distinguished Senator from Indiana so much time as he desires.

Mr. LUGAR. Mr. President, I appreciate the distinguished Senator from North Carolina yielding to me. I simply want to draw the attention of this body to title IV and why we are in a debate on this general issue. It is entitled "Community Reinvestment." It suggests, under section 402:

The Congress finds that—

(1) regulated financial institutions are required by law to demonstrate that their deposit facilities serve the convenience and needs of the communities to which they are chartered to do business;

(2) the convenience and needs of communities include the need for credit services as well as deposit services; and

(3) regulated financial institutions have continuing and affirmative obligation to help meet the credit needs of the local communities in which they are chartered.

The suggestion of title IV is a reasonable one, that so far as there is a Federal responsibility for supervision of some portions of the banking system, and that some portions of the banking system gain sustenance and strength from the Federal Government, there is an obligation with regard to these institutions to perform services to the public.

The problem, however, very quickly becomes one of the definition of "public" and the definition of "community."

Clearly, "community" is a keyword, both of title IV, as well as of the language, a service of the community in which the deposit facilities are involved.

The definition of "community" is clearly not a part of this act. It has been suggested in testimony before the Banking Committee, and before many other bodies, as to how "community" might be defined. The intent of those who spoke in favor of title IV in committee sessions was to take a look at neglected inner-city areas or other depressed areas, for that matter, of suburbia or rural America, areas in which there are many houses and many persons reportedly wanting to have loans, with the inability to mesh together the institutions which are close by these properties.

Clearly, that has been the intent of much Federal debate and finally Federal legislation in recent years.

Title IV draws this to the fore by suggesting that as a part of extending services, part of the chartering process, the community records be taken into consideration. I would submit that title IV begs

the question, as have most other pieces of legislation, in this respect. It is not clear what community we are talking about. It is not clear how we define community; how criteria are set up as far as these services are concerned.

Finally, of course, we require in other aspects of legislation, not only with regard to banking but in commonsense, that loans be made with a degree of prudence; that there be proper collateral; that there be some hope of repayment; that the normal terms that pertain to banking are not suspended in this process.

There is always the lurking suggestion that bankers who are regulated in this matter have not been doing their duty and that somehow by legislation they can be coerced.

I would suggest that even if that be the case, this legislation is unlikely to make very much difference in that regard. The sanctions that are finally offered, even if some institution is found guilty in the process, are apparently that the institution would have some difficulty extending its facilities, no more and no less than that. That, of course, was a product of some of the debate before the committee in which this section was modified several times around. It was in section 406 of the original bill.

So for several defects, first of all being, the lack of a definition of "community," any idea as to the criteria which would satisfy the community service situation, and finally if a party is found guilty there being very little sanction, these are serious objections to the inclusion of title IV, the community reinvestment portion of this act.

I was surprised to hear the sponsor, the distinguished Senator from Wisconsin, point to this as one of the most important aspects of the legislation. In the judgment of many of us it is not a very important part, and it simply is defective on almost all counts.

What is the constructive alternative of this situation? This is a problem which has faced inner-city America for a long time. It seems to me that the situation calls for a revitalization of local government generally; a revitalization of business generally; a climate in which a people anticipate that there will be adequate law enforcement, for one thing; city services of sewage, sanitary pickup, the cleaning of the streets, the general respect for property, and a sense of community not lined by square blocks, but a sense of community in which there is a general caring about property and about how the city or the community involved is going to be run.

These are of the essence.

This perennial attempt to provide credit allocation, to provide by law some reason why loans must be made at the penalty of losing the business, is simply a gesture in futility. It is brought out annually to try to show a good heart and some faithfulness with regard to this sort of thing, but it seems to me this has very little to do with what is occurring in urban America today.

Until there is at least some sense that loans are made on the basis of the ability to repay, on the basis of reasonable

collateral, and on the basis of the general strength of affairs, the fact is that loans will be made in a community and the community will be perceived fairly broadly. The community, in my judgment, ought to be perceived very broadly.

When we begin segmenting by lines and carving by socioeconomic groups, we make a grievous error, not only in government but in financial policy. I have very considerable sympathy for the heart of what is involved in this attempt, but I simply say that title IV is defective in its attempt to remedy and is a part of a long generation of attempts of this sort that I believe should not be a part of this general legislation. Therefore, I have cosponsored the amendment by the distinguished Senator from North Carolina and am hopeful that the Senate will adopt this amendment and thus strengthen the overall legislation by deleting title IV.

I yield the floor.

Mr. TOWER. Will the Senator yield me 3 minutes?

Mr. MORGAN. Mr. President, I yield to the distinguished Senator from Texas as much time as he desires.

Mr. TOWER. Mr. President, I associate myself with the remarks that have been made by my distinguished colleague from North Carolina and my distinguished colleague from Indiana. I am concerned about this business of credit allocation. I know that this is not credit allocation in a general way, but I think if we start getting into credit allocation in a specific way, that is going to be the harbinger of more legislation of this type to come.

Nothing could militate more strongly against the vitality of a market-regulated economy than a growing system of credit allocation. In my view, there are alternatives to the scheme that is proposed in the Community Reinvestment Act. One alternative that I think should be given serious consideration—I do not think it has been—is that one termed shared risk. There may be various types of shared risk proposals, but I have one in mind.

The problem with most neighborhoods which have been redlined is that not only has adequate mortgage credit not been available, but a number of other necessary services are also lacking. Adequate schools, street improvement, garbage pickup, transportation, and other services often are not available, or at least are inadequate.

(At this point Senator STEVENSON assumed the Chair.)

Mr. TOWER. Should we expect mortgage lenders to go into these neighborhoods alone? I think not. If there is not involvement by the whole community, how can we encourage lenders to make mortgage credit available? One proposal would be to establish a scheme of co-insurance, or shared risk.

For example, a premium that would be charged would finance a fund which would be used to help cover any risks incurred by the lenders. In such a scheme, should losses occur, the lender would not bear the full loss, but only a certain percentage of the loss on a particular mortgage.

I think there are probably other workable alternatives which are designed to provide mortgage credit to redlined areas. I do not think that we should indulge in the authorization or, indeed, the mandate of a system of credit allocation, at once not providing adequate guidelines or criteria to be used in making an assessment as to the record of lending institutions or meeting the credit needs of their so-called primary savings service area.

I think that the argument has been made against this measure. I think that before we should consider this, we should look at other alternatives, the idea of credit allocation to be considered only as a last resort, when all else proves to be unfeasible or impractical.

Therefore, I urge the Senate to adopt the amendment proposed by the Senator from North Carolina. I, for one, would be prepared to urge the chairman and other members of the committee to take a look at some alternative solutions to this problem.

I thank my distinguished friend from North Carolina for yielding me this time.

Mr. PROXMIER. Mr. President, I yield such time as he may require to the Senator from Maryland.

Mr. SARBANES. Mr. President, I rise in opposition to this amendment and in support of title IV in the bill as reported by the committee. I wish to underscore the statement made by the chairman of the committee in support of this proposal.

Really, we should turn the question around the other way: Why should not a banking institution have a responsibility to meet the credit needs of the local communities in which they are located, in the very communities from which they are drawing their sustenance? Why should they not have a responsibility to respond to that community?

The bill is very, very careful in making it clear that, in meeting this responsibility, the safe and sound operation of the institution has paramount consideration. There is nothing in this legislation that is going to require any lending institution to take any risks that are inconsistent with or contrary to the safe and sound operation of the institution. That appears more than once in the course of the title and, in particular, it appears in section 404, where it is stated:

In connection with its examination of a financial institution, the appropriate Federal financial supervisory agency shall assess the institution's record of meeting the credit needs of its primary savings service area consistent with the safe and sound operation of such institution.

So there is nothing in this legislation that will require them to depart from safe and sound practices and, therefore, that argument is not appropriate. This legislation is extremely sensitive to that concern.

The distinguished Senator from North Carolina made a very strong argument and, in the course of it, he quoted the Chairman of the Federal Reserve System in a letter of May 23, which I understand has been printed in the RECORD. It was talking about the administrative

difficulties of carrying forward the provisions of this legislation—how, if they tried to do it one way, it would pose problems; they tried to do it another way, it would pose problems.

I can appreciate that we are getting the same refrain, of course, from the other supervisory agencies. But I think the important letter is the one Mr. Burns wrote to the president of the Federal Reserve Bank of Chicago, which was quoted by the chairman of the committee, in which he talked, at the time of the credit crunch, about the difficult problem faced by operators of cattle feedlots in the Midwestern States. In the course of that, he noted that it is also possible—this is Chairman Burns—

That some country banks may be reluctant to make adequate funds available locally because of the very high returns that can be obtained by them on money market instruments, including loans to city banks, in the Federal funds market.

He then went on to say, in his letter to was taking place. He reflected his sensitivity to it.

He put his finger on a practice that the president of the Federal Reserve Bank of Chicago:

While funds should normally flow to the uses offering the greater return, I believe that it is important that each banker realize that continued availability of credit to local activities may well, in the longer run, yield the greater total return to the economy of his community and thus to his bank as well. Taking due account of relative credit risks, the first obligation of bankers is to the credit requirements of their service area.

I repeat that sentence: "Taking due account of relative credit risks"—which this legislation seeks to do by the protective language that I referred to earlier of operating in a safe and sound manner. Chairman Burns states:

Taking that into account, the first obligation of bankers is to the credit requirements of their service area.

That is what this legislation seeks to accomplish, that they should pay their first obligation to the credit requirements of their service area.

I think that is a reasonable standard to be applied. I hope Members of the Senate will support the committee in title IV of the bill and reject the amendment.

Mr. MORGAN. Mr. President, I think about all has been said that can be said on behalf of this amendment and in opposition to it, and certainly, about all that is going to be listened to.

But I do thank my distinguished colleague from Maryland and my distinguished colleague from Wisconsin for pointing out from the letter of Dr. Burns, who is Chairman of the Federal Reserve Board, that the Federal Reserve Board is sensitive to the problems and needs of credit, and why burden them with more and more and more regulations if the Board has already demonstrated, as that letter clearly points out, that they are sensitive to such needs.

Mr. President, the law does say that in keeping with safe and sound operation of such institution. Well, a few bad credit risks in order to meet the 50-percent allocation of credit in the area may not

endanger the soundness of that institution, but it might very well endanger the profits or the soundness of that particular loan.

Mr. President, the distinguished Senator from Utah (Mr. GARN) is a sponsor of this amendment and is unavoidably absent. He had a statement prepared to deliver in support of the amendment.

Mr. President, I ask unanimous consent that his statement be printed in the RECORD immediately following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### STATEMENT BY SENATOR GARN

We believe that inclusion of the Community Reinvestment Act of 1977 as Title V of this legislation is both inappropriate and unwarranted. Only recently were hearings held on S. 406, which has been made Title V of this legislation. The hearing transcript and report are not yet available and the hearing itself produced a great deal of disagreement on the need for the legislation.

Title IV is a modified version of S. 406, the Community Reinvestment Act of 1977, and would require an ongoing assessment of a financial institution's community credit effectiveness. Although we support the intent of the bill to insure greater credit availability for the inner cities, we feel that the bill as reported out would not only add a tremendous amount of paperwork for our already overburdened financial institutions, but would also have the adverse effect of causing a reduction in credit availability in these areas which we are trying so desperately to revitalize.

The many criticisms of the need for the legislation in this form and at this time may be placed in four categories in relation to already existing law and regulation.

(1) The "convenience and need criteria" which is applied by the regulatory agencies at the time of approval of new institutions or branches already requires the same type of review and analysis provided in this legislation.

The Acting Chairman of the Home Loan Bank Board, Mr. Garth Marston, testified before the Senate Banking Committee on March 24, 1977, that pursuant to the statutory requirements in Section (5) (a) of the Homeowners Loan Act, the board issues charters for Federal associations "giving primary consideration to the best practices of local mutual thrift and home financing institutions. In connection with such charter applications the board considers three criteria: (1) the necessity for the proposed association in the community to be served; (2) the reasonable probability of usefulness and success of the proposed association and (3) the question of whether the charter may be granted without undue injury to the properly conducted existing local thrift and home financing institutions."

In regard to bank charters, Title 12 of the United States Code Annotated, Section 1816 enumerates the factors to be considered in issuing certificates to do business for federally chartered banks. It states: "the factors to be enumerated in the certificate required under Section 1814 of this Title and to be considered by the Board of Directors under Section 1815 of this Title shall be the following: the financial history and condition of the bank, the adequacy of its capital structure, its future earnings prospects, the general character of its management, the convenience and needs of the community to be served by the bank and whether or not its corporate powers are consistent with the purposes of this chapter."

What this means is that the supervisory agencies are already considering the credit needs of a community in granting or denying

charter applications, and thus the Community Reinvestment Act adds nothing other than additional paperwork to existing law.

(2) The Home Mortgage Disclosure Act, just recently effective, requires that S&L's and other regulated institutions disclose in a very detailed fashion the type and amount of mortgage lending that they do in all geographic areas. The Home Mortgage Disclosure Act has not yet been given sufficient time to provide a body of information on lending activity which might be helpful in formulating policy and regulations which might address special problems of local credit deficiencies wherever they might be found to exist.

(3) The Equal Credit Opportunity Act and Federal Reserve Regulation B promulgated thereunder have only recently become effective and the regulations under the Act provide very stringent and detailed procedures to prevent any kind of discrimination in the granting of credit by any federally insured or regulated deposit institution. Compliance with these regulations should assure that credit is granted wherever it is needed and borrowers have capability to support the debt. The complaint and reporting provisions of these regulations should supply, in time, a fairly sound and realistic appraisal of situations in which credit is being denied.

(4) The argument should be made that the very recently approved National Neighborhood Policy Act, which authorizes the Neighborhood Commission, will also provide a source and forum for the consideration of the extent to which credit deficiencies might exist and how they might best be dealt with.

In summary, it may be said that Congress has recently taken several actions, all of which relate to the issue at hand, and it only seems reasonable that time should be allowed in order to ascertain the effectiveness of these legislative and regulatory actions before imposing upon the industry and supervisory authorities another complex and unwieldy burden.

A number of arguments of a substantive nature need also to be made. The enactment of this Section would have adverse effects upon the free flow of capital within our economy, and "a rose by any other name" is still "credit allocation." This nation is a patchwork of capital short and capital surplus localities and the pattern is changing constantly. The main thrust of government and industry efforts over the last ten or fifteen years has been to solve these problems. Improvement of secondary markets, standardization of mortgage instruments, relaxation of geographic lending limitations are all part of this effort. Enactment of this Section into law would be a step backward, encouraging the creation of barriers to the free flow of funds to places they are needed.

Our lending institutions generally do the bulk of their lending in the communities where they maintain facilities. There may well be exceptions to this pattern, to be found mostly in non-branching states where individual associations are entrapped in loan markets that do not provide adequate outlets for accumulated savings capital. The enactment of this Section and the consequent imposition on the whole nation of costly and complicated procedures embodied in it as a means to cure isolated difficulties would, in fact, be adverse to the public interest.

This Section disregards the need to allow the free flow of funds between different regions of the country. If the marketplace is allowed to operate as it should, funds will tend to flow into areas where they yield the highest rate of return, risk factors being taken into account. Overemphasizing the need to meet local credit needs will discourage the free flow of funds and disrupt the flow of credit from capital surplus areas to capital short areas. This free flow of funds is important because it tends to spread out the

supply of mortgage funds and even out its fluctuations. It reduces the cost of mortgage credit by bringing competition into areas where mortgage demand exceeds supply.

Testimony presented to the Committee by a national citizens' organization stated that the bill could actually have a detrimental impact on the inner city lending. This was supported by the following three contentions:

(1) that it would retard early entrance by lending institutions into neighborhoods which are beginning to undergo significant revitalization as a result of the restriction to meet local credit needs,

(2) that pooling of resources through allocations from other banks may be impaired if the focus is entirely on meeting local credit needs. There is a mismatch in areas having a small deposit base relative to its credit needs, and

(3) it would provide justification for suburban banks and branches to restrict their credit to their local communities, eliminating the obligation to provide credit worthy central city applicants with loans and mortgages.

This section clearly confuses cause and effect in the process of urban decline. The underlying premise of this section is that inner cities may be revitalized by requiring depository institutions to focus on local credit needs. Undoubtedly, lending plays an important role, but deterioration of inner city neighborhoods is due to a number of complex, interrelated factors. Lenders react to a series of events that ultimately lead to neighborhood deterioration.

A recent HUD publication stated that the decision of individuals and groups of people determines most of what happens. Households in the neighborhood decide to move out, households presently looking for a house decide not to buy in that neighborhood, bank officers decide not to loan money for the area, owners of apartment houses decide to cut down on maintenance to keep what they consider to be a reasonable profit. In other words, it is the decisions that people make individually or collectively that have the critical impact on what happens to the buildings, streets, schools and parks.

A task force of a financial industry organization recently completed its study of factors leading to neighborhood deterioration and concluded that their finds reject the allegation that neighborhood deterioration is caused by lenders. This is a simplistic and erroneous conclusion. Lenders are not the prime cause, nor are they blameless in the deterioration of the nation's cities. They are an important part of a very complex process of growth, decline, deterioration and rebirth of major portions of our cities. In this process, home mortgage credit is not the sole nor even the principal reason for neighborhood deterioration.

The bill reported out by the Banking Committee would require the bank examiners to assess the institution's record of meeting the credit needs of its primary service area; yet, the bill sets out no criteria or guidelines upon which this assessment is to be based. We suggest that this assessment can only be based on additional paperwork and bureaucracy which would very well discourage financial institutions from opening branches in our declining inner cities. Undoubtedly the FHLBB and the banking agencies will have to develop a whole set of complicated regulations to "test" whether financial institutions are adequately meeting community credit needs.

One of the bank regulatory agencies recently wrote: "The bill would impose an unnecessary reporting burden on financial institutions which would be largely duplicative of requirements already in effect under the Home Mortgage Disclosure Act." A recent witness who was generally in favor of the

legislation stated that, "if passed, it might provoke the federal supervisory agencies to a frenzy of rule-making and regulations which could prove burdensome to the financial institutions involved without providing any real benefit to the public." He further reported that his institution's report, as required by the Home Mortgage Disclosure Act of 1975, was 32 pages in length and had been estimated by their controller to cost \$83,000 to produce. Other witnesses generally supported the contention that the recordkeeping provided for herein, whether on a local basis or by the regulatory agency, appeared to duplicate the Home Mortgage Disclosure Act for institutions with home or branch offices in SMSA's.

The U.S. League of Savings Associations recently conducted a survey on the public's use of Home Mortgage Disclosure Act data. Of the 2,775 institutions picked to be questioned about HMDA, 1,543 responded within a week. Those reports are summarized in an attachment. You will note from the enclosed tabulation that almost two-thirds reported receiving no requests whatsoever for the data required to be compiled by the HMDA by census tract (and at the price of considerable personnel and management time and effort)! In addition to the raw data, I am also submitting for the record a sampling of notations made on the survey form by the respondents.

According to the survey with 1,533 responses for lending institutions, an overwhelming 1,039 institutions have received absolutely no requests for home mortgage disclosure reports.

Costing upwards of \$16.5 million annually to comply with the Home Mortgage Disclosure Act, the Act is a total waste of time, effort and money.

#### Tabulation of responses re public requests for home mortgage disclosure reports

|   |       |
|---|-------|
| Total No. of Questionnaires Sent Out.                 | 2,775 |
| No. Responses received as of 5/13/77.                 | 1,543 |
| No. Associations Receiving No Requests                | 1,039 |

#### COMMENTS ON QUESTIONNAIRES

People's Homestead, Monroe, La.—This association has spent considerable time and money on this project for no benefit to anyone!

Spring Garden S&L Co., Cincinnati, Ohio—This report costs us \$300.00 a quarter for what?

Westerleigh S&L Assn., Staten Island, N.Y.—Cost of having disclosure produced by Data Center was approximately \$3,000.00!

Franklin Federal, St. Petersburg, Fla.—Report has been displayed in lobby area and casually observed by no more than a dozen people.

Port Clinton S&L Co., Port Clinton, Ohio—A useless computation!

Standard Federal, Troy, Mich.—We have not received single telephone or in-person request to examine our Mortgage Disclosure Data in spite of the enormous cost which we expended in terms of time and money to prepare these figures. We are located in an urban area—namely Detroit. We have over \$1,900,000,000 in assets; we have 36 branches and the truth is that no one wants this information, no one uses this information. It is totally a waste of time and money for all concerned.

Black Mountain S&L Assn., Black Mountain, N.C.—None of our clients have ever uttered anything other than total disgust with the information shown on these required disclosure forms. The typical reaction, in every case that I can recall is "just some more Government red tape." This is a sincere reply.

Carolina Federal, Asheville, N.C.—We have received absolutely no injury from any source for this information. The preparing of this information is made by members of our staff appraisal and inspections department and is compiled by one of our very competent staff members at considerable time, effort and expense to our institutions. The information may have some internal value; but as interest to the public, we have none shown.

Tarrytown and No. Tarrytown S&L Assn., Tarrytown, N.Y.—The whole program is a waste of time and money which the associations are subjected to. The whole program is unreal as who would want to purchase a home in an area where the authorities do not protect life and private property.

Enterprise Federal, Lockland (Cincinnati, Ohio)—Hope this moves someone to act favorably and responsibly.

Greater Delaware Valley S&L Assn., Upper Darby, Pa.—We were requested to send a copy to the State Dept. of Banking.

First Federal, Orlando, Fla.—Local newspaper reporter asked about list but did not want a copy.

Home Federal, Collinsville, Ill.—One copy of 1975 figures to Southwestern Illinois Planning Commission.

Orange Belt Federal, Colton, Calif.—We have three offices located in three different cities. No one has ever even mentioned mortgage disclosure data.

Twin City S&L Assn., Neenah, Wis.—The Act is a complete waste of time.

Kenwood S&L Assn., Cincinnati, Ohio—We were not required to make disclosure. However, State Superintendent required us to disclose to his office.

Astoria Federal, Long Island City, N.Y.—We are a billion dollar association and it is a crime we are required to expend so much time, effort and money in preparing these disclosure reports as we have yet to have one

inquiry from any source to inspect same. I hope your efforts will be successful in having this ridiculous requirement eliminated.

Cherokee Federal, Canton, Ga.—No one asked to see this information. We have the information posted in our lobby so a few people may have seen it but none to our knowledge. We feel the disclosure data is a complete waste of our time.

Cambria S&L Assn., Johnstown, Pa.—We have even discussed this disclosure data with two different housing and community groups, one public official and a number of private individuals. They knew nothing about it and were not the least bit interested in examining the information. It is time that groups of people responsible for regulations come visit the "firing line" and see what the real world is like on the outside.

First Federal, Jasper, Ala.—Not one inquiry but a lot of time spent on preparation.

Merchants Co-operative Bank, Boston, Mass.—Our bank was exempt from making a mortgage disclosure as a similar one was needed in the State of Massachusetts. It is interesting to note that we have only had two inquiries during the past two years and both of these were from private citizens doing research work.

Peoples S&L Co., Flushing, Ohio—I feel it's useless.

Chippewa S&L Assn., Chippewa Falls, Wis.—A total waste of time, effort and money.

Home Federal, Fayetteville, N.C.—Another consumerist congressional colossal calamity.

First Federal, Howell, Mich.—Private citizens occasionally will glance at it but doubt if they know what it is all about.

Thrift Federal, Cleveland, Ohio—Local paper asked for copy of first report and published breakdowns by associations and banks. No requests for second report. Seems they are beating a dead horse in Cleveland area.

Argo S&L Assn., Argo, Ill.—Our association plus Summit First Federal and Argo State Bank combined together and ran one newspaper ad with no response.

Bridgeport S&L Assn., Bridgeport, Ohio—We have had no requests for this information—it is a waste of time, money and effort—typical government red tape.

Home Federal, Xenia, Ohio—None, we have not had a single request re. this data. I fully agree, a tremendous expense for nothing.

Lincoln Park Federal S&L, Chicago, Ill.—We mailed copies of the data to the 20 more active community groups in our area on March 30th (without their having asked us for the data). It is interesting to note that we didn't even have any calls before 3/31/77 from any groups or individuals asking when or whether the data would be available, and ours is a very active area for community groups!

Union Federal, Wheeling, W. Va.—Not a damn one!

During the markup, an amendment was offered and was presented as a curative measure to reduce the paperwork burden required by the legislation initially introduced. However, we contend that we must stop and ask the question, "What are the examiners going to base their assessment of the credit needs of a community on if not additional records and reports to be maintained by the financial institutions?" Section 6 of the Act as reported would require the appropriate federal financial supervisory agencies to promulgate regulations to carry out the purposes of this act. We would submit that by regulation we are allowing the federal supervisory agencies to accomplish the very paperwork nightmare which the overwhelming majority of the witnesses at our hearings warned.

During the hearings before the Banking Committee, we heard testimony relating to how a group of financial institutions in

Philadelphia joined together to form the Philadelphia Mortgage Plan to help meet the credit needs of the inner city. We suggest that this same type of concerted effort is being made by concerned financial institutions throughout the country and we believe that initiatives like the one in Philadelphia are the way in which we must deal with the financial problems of the inner city—not additional legislation and paperwork as this bill would require.

A number of basic administrative problems can be anticipated by a simple review of the definitions provided or omitted in the section. For example, what is meant by the term "affirmative marketing program"? It is not defined. What is meant by the term "lower income persons"? Or, what is meant by the term "older communities"? What guidelines are there for the agencies to evaluate the affirmative marketing programs of depository institutions? What is an adequate affirmative action? What is meant by the term "special outreach effort"? What is meant by the term "credit needs"?

The administration of the proposed law is entirely dependent upon the concept of a primary savings service area or PSSA, which is defined in the Section as "a compact area contiguous to a deposit facility from which such facility obtains or expects to obtain more than one-half of its deposit customers, depending upon whether it is an existing facility or a proposed new facility. Delineation of such an area for a proposed new facility would be an exercise in pure speculation and conjectural argument. In the case of an established facility where some factual data on customer location might be available, it is still virtually impossible to delineate a PSSA on an objective and conclusive basis.

One member of the Banking Committee indicated his serious question about whether or not this new section would call into play a great many more forms which will have to be filled out, further burdening those institutions for the sake of determining whether or not they are doing their business in a proper way. He questioned whether or not the bureaucrats will take up this section and recognize it as being what its supporters intended, or whether they would take the Committee's language and then go wild. He was very troubled with the possibility that this new Section might be creating a new mammoth amount of paperwork.

In conclusion, it should be pointed out that the Administration's witness testified that "we would instead urge the Committee to work with us to develop an overall strategy on urban reinvestment," and further, that "we believe there should be a comprehensive approach to revitalization which includes specific attention to reinvestment problems.

Although the intent of our legislation is a worthy one, we once again state that we must look to see what the ultimate effect of this legislation will be. That ultimate effect could well be a reduction in credit availability in these blighted areas due to the increased paperwork load required of the financial institutions in those areas. In conclusion, we would add that we are of the opinion that we acted in haste in adopting this measure in the Banking Committee and in so doing have created the possibility of another paperwork nightmare which may, in fact, work to counteract the very noble intent of the legislation.

Mr. SCHMITT. Mr. President, I have grave reservations concerning title IV of the legislation now before us. Originally introduced as the Community Reinvestment Act, the title is a step in the direction of credit allocation by Government agencies. I would like to detail some of the problems which are evident in analyzing this title.

First, this legislation would require a great deal of additional paperwork and thus, additional cost for the depository institutions involved. In order for a regulator to determine whether "the needs of a community" are being met, these needs would first have to be identified. This would mean, among other things, that the supervisory agency would have to evaluate what the credit needs of a community were on a continuing basis. As Chairman Burns of the Federal Reserve Board has pointed out, such evaluations are outside of the normal supervisory functions of these regulatory agencies. The legislation would also require examiners to assess the soundness of loans made by the financial institutions. Included in this assessment would have to be an evaluation of rejected loan applications. The examiners are not trained to provide this type of evaluation, and requiring them to make the evaluation would be time consuming and expensive.

Additional tasks assigned the examiners would have to include a categorization of loans by use of the funds and by whether the money would be lent to an applicant within or outside of the institution's service area; a comparison of loan applications from outside the institution's designated service area with those from within; and finally the writing of voluminous regulations and guidelines that would eventually overburden both the institutions and the regulatory agencies.

While there would clearly be an increase in regulatory burden should this title become law, there is no clear indication that the problem which it addresses would be solved. The decay in our urban areas can only be halted when Government adopts a policy which encourages the development of an environment conducive to private investment. Such an environment would include good streets, sewers, street lights, and police and fire protection. Only then will real investment become contagious in these areas.

The requirement that financial regulatory agencies allocate credit under this or any other scheme can have adverse effects. By forcing financial institutions to make loans of dubious quality, the Congress would easily convince financial institutions to close branches in decaying neighborhoods and thus, lead to further economic and social decline in these areas. Chairman Burns has noted this possible result in a recent letter to Senator MORGAN. While I am not convinced that such an incentive for more branches to move out of depressed areas would deprive these areas of loanable funds entirely, their removal from these areas would at least deprive these areas of depository services.

The Banking Committee has heard testimony from many groups on the desirability of this legislation. A great deal of this testimony addressed the question of the effectiveness of and need for this type of credit allocation. The Acting Chairman of the Federal Home Loan Bank Board, Gartha Marston, testified that supervisory agencies do take into consideration the performance of financial institutions in providing several

types of services when applications for branches are submitted to the agencies. Mr. Marston stated that his examiners, as a part of periodic supervisory examinations of institutions under their jurisdiction, review the nondiscrimination efforts of these institutions. In addition, Mr. Marston noted, the Federal Home Loan Bank Board's examiners make special investigations of complaints of alleged discrimination made by individuals and groups. In sum, Mr. Marston felt that his agency and the savings and loans institutions which it supervises are making progress when possible to halt discrimination in lending.

Let me say, in summary, that while the best intentions are attached to the Community Reinvestment Act as embodied in title IV of S. 1523, this legislation would prove burdensome and costly and would not achieve its intended goals.

Mr. MORGAN. Mr. President, I am prepared to yield back my time.

Mr. PROXMIRE. Mr. President, I yield back my time and ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. HUDDLESTON (when his name was called). Present.

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Delaware (Mr. BIDEN), the Senator from Arkansas (Mr. BUMPERS), the Senator from Idaho (Mr. CHURCH), the Senator from California (Mr. CRANSTON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Kentucky (Mr. FORD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Arkansas (Mr. McCLELLAN), the Senator from Montana (Mr. METCALF), and the Senator from West Virginia (Mr. RANDOLPH) are necessarily absent.

I further announce that the Senator from Florida (Mr. STONE) and the Senator from Minnesota (Mr. ANDERSON) are absent on official business.

On this vote, the Senator from Minnesota (Mr. ANDERSON) is paired with the Senator from West Virginia (Mr. RANDOLPH).

If present and voting, the Senator from Minnesota would vote "nay" and the Senator from West Virginia would vote "yea."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BELLMON), the Senator from Nebraska (Mr. CURTIS), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Utah (Mr. HATCH), the Senator from Oregon (Mr. HATFIELD), the Senator from Nevada (Mr. LAXALT), the Senator from Maryland (Mr. MATHIAS), the Senator from Kansas

(Mr. PEARSON), the Senator from Delaware (Mr. ROTH), the Senator from Vermont (Mr. STAFFORD), and the Senator from South Carolina (Mr. THURMOND) are necessarily absent.

I further announce that, if present and voting, the Senator from Utah (Mr. GARN), the Senator from Utah (Mr. HATCH), the Senator from South Carolina (Mr. THURMOND), the Senator from Tennessee (Mr. BAKER), and the Senator from Oregon (Mr. HATFIELD) would each vote "yea."

The result was announced—yeas 31, nays 40, as follows:

[Rollcall Vote No. 172 Leg.]

YEAS—31

So Mr. MORGAN's amendment, as modified, was rejected.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BROOKE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PROXMIRE. Mr. President, I yield to the Senator from Oklahoma for a unanimous-consent request.

Mr. BARTLETT. Mr. President, I ask unanimous consent that Mr. Ed King of my office be granted the privilege of the floor during votes and consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MCINTYRE. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. PROXMIRE. I yield to the Senator from New Hampshire.

Mr. MCINTYRE. Mr. President, I ask unanimous consent that the privilege of the floor be granted to T. J. Oden, my staff member on banking, during consideration of S. 1523.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill is open to further amendment. Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAVEL. Mr. President, will the Senator yield?

Mr. NUNN. Mr. President, I yield.

Mr. GRAVEL. Mr. President, I ask unanimous consent that Richard Ake of my staff be accorded the privilege of the floor during consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 353

Mr. NUNN. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Georgia (Mr. NUNN) proposes unprinted amendment No. 363.

On page 25, line 24, strike out "and poverty," and insert in lieu thereof "poverty, and impact on the unit's growth of national policy or direct federal program decisions."

On page 21, line 20, strike out "and poverty," and insert in lieu thereof "poverty, and impact on the unit's growth of national policy or direct federal program decisions."

Mr. NUNN. Mr. President, this legislation, among many other provisions, provides funds for community development which can be allocated in the discretion of the Secretary of Housing and Urban Development. Among the criteria examined by the Secretary in fiscal year 1976 for allocation of these funds, pursuant to administrative regulation, was consideration to applicants experiencing "an extraordinary high rate of growth or a severe and rapid decline in population and economic activity—resulting primarily from the impact of national policy decisions or direct Federal program decisions." For some reason, this consideration was not accorded to applicants experiencing these circumstances in fiscal 1977. My amendment is intended to express congressional intent that consideration for the impact on an area of national policy decisions or direct Federal program decisions be included in the criteria which the Secretary reviews prior to allocating these discretionary funds.

It is important to recognize that, if adopted, my amendment would not single out communities which are impacted by these decisions. Rather, it merely adds this fact as one of the many criteria which can be considered in determining an area's needs for the purpose of grant assistance. A community must still meet all eligibility requirements and evidence the requisite commitment to the objec-

tives of the block grant program. In practical terms, we are talking about the need for low-income housing and economic development and, to the extent that a Federal decision affects these needs, it is a rational factor to be weighed.

Mr. President, an example of the type of situation to which I am referring is located in Hinesville, Ga. Fort Stewart, which is located just outside of Hinesville, is the home of the newly created 24th Army Infantry Division. Consequently, the military and civilian employment at Fort Stewart will increase from under 5,400 people to over 15,500 by September of this year. Liberty County will triple in size by 1980.

The Army estimates that over 2,700 families will require off-post housing and no estimates are available, as of yet, reflecting the housing requirements of the single enlisted men. Over 61 percent of the military personnel who will be at Fort Stewart by September 1977 will have incomes below the criteria used by HUD for eligibility in the bloc grant program. As you can see, the demands placed upon the communities' resources as a result of the Federal policy decisions regarding Fort Stewart will be substantial and consideration of this impact in allocating bloc grant funds is eminently reasonable.

Mr. President, Congressman Bo GINN, of Georgia, offered an identical amendment to the housing and community development bill which was accepted when the bill was considered on the House floor. It is my understanding that this amendment is acceptable to the managers of this bill. I believe this amendment is a constructive addition to this bill and I hope that my colleagues will support it.

Mr. President, I understand that the committee staff and the committee chairman have looked over this amendment, and I understand it will be acceptable.

Mr. PROXMIRE. I would like to ask the Senator, the author of the amendment, Senator NUNN, a question: Does this amendment limit in any significant way HUD's administration of allocation of discretionary bloc grant funds, as I understand it?

Mr. NUNN. It does not in any way limit the discretion of the Secretary. It simply adds one other criteria.

Mr. PROXMIRE. There is no earmarking?

Mr. NUNN. There is no earmarking.

Mr. PROXMIRE. And the identical amendment or a very similar amendment is already in the House bill?

Mr. NUNN. That is correct. It was accepted on the House floor. It is simply another criteria for the Secretary to look at when she is considering the allocation of these discretionary funds.

Mr. PROXMIRE. In the event a Federal installation or some other Federal policy has an adverse effect on the communities, that will be taken into consideration; if it has a favorable effect, that will be taken into consideration the other way.

Mr. NUNN. That is right, if the Federal decision causes extraordinary growth particularly in the need for low-

income housing, then this would be a fact that the Secretary will take into consideration in arriving at her decision.

Mr. PROXMIRE. Mr. President, I support the amendment.

Mr. BROOKE. Mr. President, I have read the amendment, and as I understand it, it just adds another factor to be considered by the HUD Secretary.

Mr. NUNN. It is the same factor that was added by regulation back 2 years ago, so it is not something brand new. It is something they used 2 years ago but did not use last year.

Mr. BROOKE. I support the amendment.

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time.

Mr. NUNN. I thank the Senator from Wisconsin and the Senator from Massachusetts.

The PRESIDING OFFICER. Is all time yielded back on the amendment?

All time is yielded back.

The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. PROXMIRE. Mr. President, the majority leader has asked me to inquire if any Senator on the floor has an amendment he wishes to call up at this time.

Mr. BROOKE. Yes, we have one.

Mr. PROXMIRE. We would be happy to consider it.

Mr. President, I understand that the distinguished Senator from North Dakota has an amendment which he will be offering shortly.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BURDICK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### AMENDMENT NO. 342

Mr. BURDICK. Mr. President, I call up my amendment No. 342, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Dakota (Mr. BURDICK) proposes an amendment numbered 342:

At the appropriate place in the bill insert the following:

SEC. —. The twenty-second undesignated paragraph of section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) is amended by inserting "or farm" immediately after "residential".

Mr. BURDICK. Mr. President, I have before the Senate an amendment to S. 1523. This amendment is very simple and attempts to address a problem that has arisen in small, sparsely populated States with large rural areas. The amendment would allow savings and loan institutions to make loans for farm buildings and property out of the 5 percent-of-assets "spillover" basket that was created by the Consumer Home

Mortgage Assistance Act of 1974. The Federal Home Loan Bank Board adjusts the "spillover" category to conform with each association's net worth and most associations presently realize only a 2-percent category rather than the statutory 5 percent. Therefore, there is little likelihood of an undue amount of "commercial farm enterprise activity" taking place.

My particular concern is that in principally agricultural States such as North and South Dakota, savings and loan associations which have maintained reasonably steady net savings inflows find that they have not been in a position to make the types of farm loans which are commonly made in those States. Federal associations, particularly in these farming jurisdictions, have been forced to export capital to other areas in search of mortgage loans which technically qualify under Board regulations. This minor clarifying amendment would allow associations in these and a few other jurisdictions to keep the money at home.

This amendment has already been incorporated in the companion bill to S. 1523 in the House. Members in that body have seen the need to address this problem which presently faces rural based savings and loans and their depositors. I am asking the Senate today to address itself to this problem also and grant rural people the opportunity to utilize the assets of their local savings and loan institutions instead of seeing their hard earned savings shipped off to other parts of the country due to a constraint in the savings and loans lending authority. As I have already pointed out, the assets category from which these farm loans would come is so small that it will not in any way misdirect the functions or intent of the Federal savings and loan system. Rural America needs this amendment.

Mr. President, the amendment simply would allow rural areas to use a part of this spillover category which is now going outside the State for farm loans.

Mr. BROOKE. Mr. President, will the Senator yield for a question?

Mr. BURDICK. Certainly.

Mr. BROOKE. As I understand it, this is for commercial farm enterprise loans, is that correct?

Mr. BURDICK. I beg the Senator's pardon.

Mr. BROOKE. Commercial farm enterprise loans?

Mr. BURDICK. Well, if you want to call it commercial. It is farming.

Mr. BROOKE. Farming?

Mr. BURDICK. Yes.

Mr. BROOKE. Can savings and loan associations make these loans at the present time?

Mr. BURDICK. In certain specific non-farm categories only.

Mr. BROOKE. What categories?

Mr. BURDICK. Is that right, Mr. Chairman? What is the percentage of farm loans, if any?

Mr. PROXMIRE. On federally chartered savings and loan associations?

Mr. BURDICK. Yes.

Mr. PROXMIRE. They can make them for residential housing purposes, but not for farming purposes, for instance, to buy

a herd, or buy dairy equipment, or whatever.

Mr. BROOKE. They cannot make such a loan at all at the present time?

Mr. PROXMIRE. That is right.

Mr. BROOKE. So the purpose of the Senator's amendment is to enable savings and loan associations to make the loans?

Mr. BURDICK. To use only the 5-percent spillover category for that.

Mr. BROOKE. At the present time they cannot make the loans?

Mr. BURDICK. That is right.

Mr. BROOKE. They have no authority for it?

Mr. BURDICK. That is right; and as a result, the money is going into other parts of the country. It is our depositors' money that is going out, and we need the money in the farm areas.

Mr. PROXMIRE. Mr. President, I think there is great merit in this proposal. The Senator's point is that in a State like North Dakota, which is very rural, primarily and overwhelmingly a farm State, the money comes from the deposits of farmers into savings and loans, and the savings and loans make their loans outside the State, though the natural place for them to make them would be in the farm area. He is asking, as I understand it, for only 5 percent.

Mr. BURDICK. That is right.

Mr. PROXMIRE. Not more than that.

Mr. BURDICK. Farm depositors now cannot receive money for farm loans.

Mr. PROXMIRE. The Senator, I think, has offered similar legislation to this in the past.

Mr. BURDICK. Yes, I was advised that it had merit, and I was advised to take it up later, and I am now here later with this amendment.

Mr. PROXMIRE. The House of Representatives has now adopted this provision?

Mr. BURDICK. That is correct.

Mr. PROXMIRE. In their present bill?

Mr. BURDICK. That is right.

Mr. McINTYRE. Mr. President, will the Senator yield?

Mr. PROXMIRE. Yes.

Mr. McINTYRE. Mr. President, I am advised that this very same proposal is before the Financial Institutions Subcommittee now.

Again, it represents an expansion of savings and loan, and gets into this basket question that arose the other day in connection with the proposal of the Senator from California. We are planning hearings on that whole panorama of issues beginning approximately June 21. I would hope that as long as it is in the House bill and thus has an opportunity to be adopted in conference, the chairman would resist this amendment at this time, and give the Subcommittee on Financial Institutions an opportunity to decide whether they are banks with respect to spillovers, or whether they are going to be held to what they were originally designed for, which is residences. Senators are pestering us, calling for piecemealing it bit by bit. With all due respect to the Senator from North Dakota, I think we can solve his problem in good fashion if he will

allow us to have hearings in an orderly manner, and not take the matter out of context.

Mr. PROXMIRE. May I say to the Senator that I greatly sympathize with his position, since he brought it up in 1975 and 1976, and has been told that we will have hearings. I can understand he wants action.

Mr. BURDICK. That is correct.

Mr. PROXMIRE. On the other hand, I support the chairman of the subcommittee with jurisdiction over financial institutions when he promises that he will, within days, or is it in 2 weeks—

Mr. McINTYRE. Two weeks.

Mr. PROXMIRE. In 2 weeks we will have hearings, bring it to the floor in a short time after that, and the Senator is even hopeful we can have hearings before the conference is held on this bill. That will give us an opportunity to go into conference on the basis of having it submitted and understanding the situation more clearly than we can with a short debate and vote on the floor today.

Mr. BURDICK. As the chairman has stated, I have been before the Senate before on this very issue, and I have been assured very much as I have been here today. The House of Representatives has acted on the issue. And we are dealing with a very small category; we are dealing with farm money, and it is a farming State. Can the Senator assure us we will have hearings before the conference?

Mr. PROXMIRE. I will refer that question to the chairman of the subcommittee.

Mr. McINTYRE. We will be going to conference, probably, in another week.

Mr. BURDICK. Then I am delayed another year.

Mr. PROXMIRE. No, no, this will be a long conference. We may start the conference in a week, but with all the titles in this bill, I would anticipate it will take several weeks before the conference completes its work.

Furthermore, even if we did go to conference and even if they turned down this provision in the House bill, we would still have an opportunity to act on the legislation before the Financial Institutions Subcommittee, and we would promise action on it.

We will have legislation on financial institutions before this year is out, and I would assure the Senator he would have an opportunity to offer his amendment on that, if the committee did not act.

I would also tell the Senator I have great sympathy for his amendment. My own inclination is to support it, although I would want to get the record of the hearings. It represents reinvestment in the local community, and I am all for that.

But I would greatly appreciate it if the Senator would withdraw his amendment, with the understanding that we will have hearings in a few days, possibly before the conference, and in any event before the end of this year, if it is too late for this particular bill. We will have an opportunity for the Senator to bring it up on the floor before the year is out.

Mr. BROOKE. I, too, would like to say

to the Senator that I am very sympathetic with his cause. We have just acted on an amendment which is consistent with what the Senator is trying to do in so far as farms are concerned, regarding money in banking institutions within the inner cities which goes, to the suburbs, and is never used within the cities. The concept is the same. I believe the situations should be treated alike. The Senator is saying that money is deposited in the farmers' district and is exported elsewhere.

Mr. BURDICK. The Senator is precisely correct.

Mr. BROOKE. I do not see how the Senate can say one thing on one issue and another on this question.

I do know the problems the chairman of the subcommittee has had with the entire issue. If he gives the Senator his assurance, as he has, to have the hearings within the next 2 weeks, he will have them. We will be in conference on this matter. Hopefully, we can settle it and not have to put it over for another year. I know the frustration of coming back time and again and hearing, "We will have hearings," but I believe the Senator has a firm commitment now. I hope he will take the assurance of the chairman that we will do everything we possibly can.

Mr. BURDICK. May I ask the manager of the bill, will hearings be held in time to include it in the subsequent legislation, and with the possibility of it appearing in time for the conference on the present bill?

Mr. PROXMIRE. There is every likelihood that hearings will be completed before we finish the conference. I believe the odds are strongly in favor of that. If they are not, I can assure the Senator that the proposal will be considered by the committee in connection with legislation which will be forthcoming before the end of the year. We will notify the Senator so that he has every opportunity to offer this amendment. My present disposition, if the Senator will withdraw it—though I cannot commit myself because I cannot listen to the hearings—is to ask to cosponsor it because I think it is a good proposal. If the Senator will defer his proposal at this time, I believe we can give that assurance.

Mr. BURDICK. I want to say I am a very agreeable man and we get along very well. I want some action on this in 1977. I will press for a vote in 1977 if everything else fails. We are entitled to it. We are not talking about anything big. We are talking about a small part of the money. As the Senator from Massachusetts has said, this is farmers' money going into savings and loans that goes out of the State. They need the money at home. I think it is a very meritorious amendment.

With those assurances, I will relent, after 2 years, but not longer than the end of this calendar year.

Mr. PROXMIRE. The Senator is indeed a patient, gallant, and persistent man. I thank him.

Mr. BURDICK. Mr. President, I withdraw the amendment.

Mr. PROXMIRE. Mr. President, I sug-

gest the absence of a quorum on my time.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that a quorum call be held without time being taken from either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Will the Senator withhold that request?

Mr. PROXMIRE. I withhold that request.

Mr. ROBERT C. BYRD. Mr. President, I know of no other amendment on which a vote will occur tonight. Does the distinguished manager know of any?

Mr. PROXMIRE. I do not, no sir.

Mr. ROBERT C. BYRD. Does the distinguished ranking member?

Mr. BROOKE. I do not.

Mr. ROBERT C. BYRD. I understand Mr. EAGLETON will call up an amendment tonight and will debate it to a little extent, at least. A vote will occur fairly early tomorrow on that amendment.

#### ORDER FOR RECESS UNTIL 9:45 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9:45 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### ORDER TO RESUME CONSIDERATION OF S. 1523 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at the hour of 10 a.m. tomorrow the Senate resume consideration on the pending measure, the housing bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. This would mean, Mr. President, that there would be a rollcall vote fairly early on the Eagleton amendment tomorrow.

Tomorrow will be a long day because it is the desire of the leadership to complete action on the housing bill tomorrow so that the Senate can begin action on the Clean Air Act on Wednesday.

There are several amendments yet to be called up. I would anticipate several rollcall votes tomorrow. We will be coming in early. I would anticipate a late session, if necessary, to complete action on the bill.

Mr. President, I suggest the absence of a quorum under the same conditions as enunciated by the distinguished Senator from Wisconsin.

Mr. DOLE. Will the Senator withhold that?

Mr. ROBERT C. BYRD. Mr. President, I withhold that.

Mr. DOLE. I wonder if I might send my resolution to the desk at this time.

Mr. ROBERT C. BYRD. I yield for that purpose.

#### DIPLOMATIC RELATIONS WITH CUBA

Mr. DOLE. Mr. President, I send a resolution to the desk, on behalf of myself, Mr. HELMS, and Mr. HAYAKAWA.

The PRESIDING OFFICER. The resolution—

Mr. ROBERT C. BYRD. May I ask if Senator SPARKMAN is aware of the nature of this resolution?

Mr. DOLE. It is a resolution on Cuba.

Mr. ROBERT C. BYRD. Has the Senator asked for its immediate consideration?

Mr. DOLE. Not yet. I will take 1 second and then I will.

Mr. PROXMIRE. Will the Senator yield for the purpose of asking that the time not be charged to either side on this matter because it is not relevant to the bill, as I understand it?

Mr. DOLE. Yes.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the time on the resolution to be discussed by the Senator from Kansas not be taken from our time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I will explain the resolution. I am introducing a resolution to express opposition to the normalization of U.S. relations with the Cuban Government until certain preconditions are met. Mr. President, I set forth those preconditions, the compensation for property, the release and repatriation of American citizens, withdrawal of Cuban military troops and advisers from Africa, renewal of an antihijacking agreement with the United States, and guarantee for the future security of the U.S. naval base at Guantanamo Bay, and others.

Based on that brief explanation, Mr. President, I ask for immediate consideration of the resolution.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 182) to express the sense of the Senate with regard to conditions under which the United States will establish diplomatic relations with the Government of Cuba.

The resolution is as follows:

Whereas, the Government of Cuba expropriated approximately \$1.8 billion worth of private property owned by United States nationals in 1959, for which no compensation has since been rendered;

Whereas, the Government of Cuba currently imprisons more than 15,000 of its own citizens on the basis of their political beliefs, and incarcerates at least 7 American citizens on political grounds;

Whereas, the Government of Cuba has deployed more than 10,000 Cuban troops and military advisers to the African continent for the purpose of interfering in political issues of a purely domestic nature; and

Whereas, the Government of Cuba has demonstrated little or no willingness to renew assurances with the United States on cooperative anti-hijacking procedures, or on

the security of the United States Naval Base at Guantanamo Bay: Now, therefore, be it

*Resolved*, That it is the sense of the Senate that there should be no United States diplomatic recognition of the Government of Cuba, and no partial or complete lifting of the United States trade embargo against the Government of Cuba, until such time as the Congress of the United States determines that the Cuban government has:

(a) provided reasonable compensation for United States property expropriated in 1959;

(b) released from prison and repatriated those United States citizens held on political charges, and demonstrated significant progress towards observance of the human rights of its own citizens;

(c) withdrawn Cuban military troops and advisers from the African continent; and

(d) provided assurances on cooperation in hijacking situations, and on the future security of the United States Naval Base at Guantanamo Bay.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. SPARKMAN. Mr. President, I must object, if the Senator insists on calling it up at this time.

The PRESIDING OFFICER. Objection is heard.

Mr. DOLE. Mr. President, I then ask unanimous consent that my resolution be placed under General Orders on the Senate Calendar.

Mr. ROBERT C. BYRD. Mr. President, I object to that.

The PRESIDING OFFICER. Objection is heard. The resolution will go over under the rule.

#### STATEMENT ON RESOLUTION ESTABLISHING CONDITIONS FOR RESTORING RELATIONS BETWEEN THE UNITED STATES AND CUBA

Mr. DOLE. Mr. President, I have today submitted a Senate resolution to express opposition to normalization of U.S. relations with the Cuban Government until certain preconditions are met. On Friday, the administration announced that a mutual agreement had been concluded to permit the exchange of mid-level diplomatic personnel between our two governments. Negotiations leading to this agreement were conducted in private, outside the realm of public scrutiny and comment. It now appears likely that the administration will proceed with efforts to fully restore diplomatic relations with the Castro regime, and to lift the 16-year-old trade embargo against Cuba. Because I believe that the Cuban Government must demonstrate preliminary good faith on its part, and because I feel strongly that Congress and the American people should provide input into this major policy development, I have offered a resolution to provide guidance in resuming normal relations with Cuba.

My resolution would express the sense of the U.S. Senate that there should be no formal U.S. recognition of the Government of Cuba, and no partial or complete lifting of the 1962 U.S. trade embargo against Cuba until Fidel Castro's regime has met certain conditions. Those conditions are: First, compensation for U.S. property confiscated by Cuba in 1959; second, release and repatriation of American citizens currently imprisoned in Cuba on political charges, along with progress toward observance of the hu-

man rights of Cuban citizens; third, withdrawal of Cuban military troops and military advisers from Africa; and fourth, renewal of an antihijacking agreement with the United States and guarantees for the future security of the U.S. naval base at Guantanamo Bay.

These four conditions reflect the major conflicts between the United States and Cuba for the past 17 years and, in my opinion, should constitute the minimum concessions we expect from Castro before we restore diplomatic recognition and trade.

#### WE HOLD THE BARGAINING CHIPS

It is important that one fundamental factor be clearly understood at the outset: the Communist Government in Cuba has as much and more to gain from improved relations with United States, as we have to gain from the arrangement. Consequently, it would be a serious mistake for us to forge ahead with unilateral concessions until all outstanding differences between our Governments have been fully explored and at least partially resolved. We, as a nation, have much to offer and much to expect in return. Concessions on our part must be fully matched by substantive, reciprocal concessions on the part of the Cuban Government. And I believe there should be no formal reinstatement of diplomatic relations, nor resumption of normal trade patterns, until agreements have been reached and genuine progress made toward resolving major disagreements as we see them.

It is also important that American policymakers realistically distinguish between Castro's initiatives which are dictated by economic necessity, and those which might reflect genuine moderation in his policies of terror and repression. Our policymakers must recognize that the Communist regime's ideological foundations remain unchanged, and they must insist on certain preconditions before any further consideration of normalized relations takes place.

#### PRESENT CONDITIONS UNACCEPTABLE

American interests and concerns with regard to Cuban policies remain largely unchanged, and a number of present Cuban policies are clearly unacceptable from our national point of view. In the first place, Cuba has made no effort to compensate American citizens for property and assets expropriated by the Cuban Government following Castro's takeover in 1959. The U.S. Foreign Claims Settlement Commission has certified the value of that loss at \$1.8 billion, and has also ruled that American claimants are entitled to interest on their certified claims at the rate of 6 percent per annum from the date of seizure. It was in response to the confiscation of American property that our own Government imposed a partial trade embargo against Cuba in October 1960, which was followed by imposition of the total trade embargo in February 1962.

In the context of current international concern about the appropriate observance of human rights by governing institutions, the Carter administration should insist upon significant progress in this area by the Castro regime. Credible

reports indicate that as many as 15,000 to 20,000 Cuban citizens are imprisoned in Cuba because of their opposition to the Communist government. In addition, I understand that at least 18 American citizens remain imprisoned in Cuban jails, and at least seven of these are incarcerated on charges of espionage or similar allegations of a political nature. Others are held on charges relating to drug use or hijacking activity. In line with a perfectly natural sense of concern by the United States about repressive actions against our own citizens, as well as Cuban citizens, we must insist that tangible steps be taken by the Cuban regime to resolve that concern. It is vital that U.S. policymakers apply the same human rights criteria to Cuba which has been applied to other nations with whom we maintain friendly relations. It is nothing short of ironic that the Carter administration proposes to improve relations with Cuba at the same time that it suggests that we reduce or eliminate interaction with traditional allies in Latin America and other parts of the globe.

It should be made absolutely clear to Castro that there can be no meaningful improvement in American-Cuban relations until he agrees to terminate his active promotion of Communist aggression in Latin America and Africa. It is an insult to the principle of self-determination that Castro still maintains a force of some 10,000 Cuban troops in Angola, 2 years after their strong-arm activities won that country over to the Communists. In addition, Cuban military advisers are being deployed throughout the African Continent—in Ethiopia, Mozambique, and elsewhere—to instigate political turmoil and bloodshed. The Cuban dictator's revolutionary activism has not diminished, despite his earlier promises. It must be halted before we agree to normalize diplomatic relations.

The Cuban Government announced in October 1976 that it would allow its antihijacking agreement with United States to terminate in April of this year. They have indicated no willingness to formally renew the agreement, and I fear that this removes a major psychological force to discourage the hijacking of American planes to Cuba. The administration, and Congress, should insist upon a formal renewal of the hijacking accord, along with Cuban guarantees on the future security of the U.S. naval base at Guantanamo Bay. There have been indications that the Cuban leadership refuses to provide these assurances until the U.S. trade embargo is lifted. If these reports are accurate, and the Cuban Government attempts to "blackmail" the United States into political and economic ties, it should be clearly understood that the United States does not submit to such techniques. Those who insist that the time is at hand for the United States to demonstrate "good faith" by lifting the trade embargo have not, I suspect, fully considered the lack of good faith by the Cuban Government on these and other issues of importance to the American people. I would urge this administration, and my colleagues in Congress, to insist that all these matters be properly addressed before binding agreements with

the Cuban Government are consummated.

#### LITTLE TRADE VALUE

To those in our own country who advocate resumption of diplomatic relations for the purposes of bilateral trade, I would point out that future trade relations are likely to benefit Cuba far more than they will the United States. The precipitous plunge of world sugar prices has been among the major factors which has brought Castro to the point of expressing interest in improved relations with our Government. The return of the U.S. sugar market to Cuba would mean reduced imports of sugar from friendly sugar-producing nations, as well as an additional burden upon our domestic sugar-producing industry.

Castro sees the United States as a prime market for the island's principal export crop as well as other Cuban products like nickel, seafood, rum, and cigars. While trade always has two-way benefits, the Cuban market does not have as much importance for the United States. Cuba will not be a vast market for American businessmen, as a Commerce Department study estimates only about a \$300 million potential from the Cuban market. In relation to our annual trade level of about \$100 billion, the prospects are indeed insignificant. At present, about 60 percent of Cuban trade is with other Communist countries, and it is worth noting that Cuba currently owes the Soviet Union about \$5 billion. By most standards, the Cuba Government clearly has a poor credit rating.

#### NO UNILATERAL CONCESSIONS

The Cuban Communist regime likes to imply that it is up to the United States to demonstrate good faith and to take the first step in improving political and economic relations. At the same time, some of my colleagues in Congress, and those formulating policy in the administration, are likewise suggesting that it is our responsibility alone to heal old wounds and initiate reconciliation with the island. My point is simply this: Improved relations between the United States and Cuba do not depend upon a unilateral decision by the United States. Instead, Castro is going to have to make some tough decisions of his own based on the intensity of his desire to improve relations with the United States. There is absolutely no reason why policymakers in this country should feel obliged to bend over backwards to curry favor with the Communist regime.

I say this: If there must be concessions made, let them be made bilaterally. And if Cuba is unwilling to restrain subversive activity in Africa; if it is unwilling to compensate American citizens for stolen property; if it is unwilling to release American prisoners and become more conscious of the human rights of its own citizens; and if it is unwilling to provide simple assurances on the safety of Americans who are hijacked to Cuba, then I say Cuba does not warrant U.S. recognition or trade considerations.

The announcement on Friday that 10 American prisoners will be released from Cuban prisons was a welcome sign, but only a minor initial step on Castro's

part. We should not overreact to that token gesture, but insist on further substantive progress in resolving American concerns. The release of some U.S. prisoners demonstrates that Castro is capable of making concessions. We must, therefore, maintain our commitment to acquiring full cooperation on all outstanding issues before relations are "normalized."

I urge my colleagues in the Senate to join with me in supporting this resolution, and I sincerely hope that the President will heed our advice on the matter.

Congressman WILLIAM BROOMFIELD, ranking minority member on the House international affairs committee, is introducing a companion resolution this afternoon in the House of Representatives. I trust there will be early attention to this cooperative effort by both Houses of Congress.

#### HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1977

The Senate continued with the consideration of the bill (S. 1523) to amend the Housing and Community Development Act of 1974; to extend housing assistance and mortgage insurance programs; and for other purposes.

Mr. ROBERT C. BYRD, Mr. President, I suggest the absence of a quorum. I ask that the time not be charged against either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BROOKE, Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### UP AMENDMENT NO. 354

Mr. BROOKE, Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Massachusetts (Mr. BROOKE) proposes an unprinted amendment No. 354.

The legislative clerk proceeded to read the amendment.

Mr. BROOKE, Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 47, lines 8 and 9, strike, "by the end of calendar year 1977."

And in line 19 insert the following: "(v) fifty or more individual homeowners were joined as parties defendant or were members of a defendant class prior to December 31, 1976, in litigation involving claims to ownership of land in the community by an American Indian tribe, band, or nation."

Mr. BROOKE, Mr. President, this is a technical amendment.

Mr. President, section 306 of the Housing and Community Development Act contains provisions to assure that homeowners severely injured by the In-

dian land claims suit in Mashpee, Mass., are eligible for FHA mortgage insurance. Such insurance should both encourage financial institutions to write mortgages on Mashpee homes and it should help assure that, if a family is in such severe economic straits resulting from the Indian claims that the mortgage is assigned to HUD, HUD's policies will be sufficiently lenient so as to keep that family in its residence.

Mr. President, only final settlement on the land claims will provide the relief the people of Mashpee truly need—the clearing of title on landholdings. This represents one more attempt by the Congress to provide emergency assistance for those most seriously affected, but it is no overall solution.

I am offering a technical amendment to insure that the legislative intent awarding this aid to Mashpee is even more clear than as originally drafted. And it is my hope this perfecting language will be signed into the law in the very near future.

Mr. President, I ask unanimous consent that an excerpt from the Senate Banking, Housing, and Urban Affairs Committee report on S. 1523 be printed in the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Section 306(b) would amend section 203 of the National Housing Act by adding a new subsection (c) authorizing the Secretary, notwithstanding any other provision of title II of such Act, to insure, and to commit to insure, under section 203(b), as modified by this proposed subsection, a mortgage which meets both the requirements of this proposed subsection, and such criteria as the Secretary by regulation may prescribe to further the purpose of this proposed subsection, in any community where the Secretary determines that—

(A) temporary adverse economic conditions exist throughout the community as a direct and primary result of outstanding claims to ownership of land in the community by an American Indian tribe, band, or Nation;

(B) such ownership claims are reasonably likely to be settled, by court action or otherwise, by the end of calendar year 1977;

(C) as a direct result of the community's temporarily impaired economic condition, owner occupants of homes in the community have been involuntarily unemployed or underemployed and have thus incurred substantial reductions in income which significantly impair their ability to continue timely payment of their mortgages; and

(D) as a result, widespread mortgage foreclosures and distress sales of homes are likely in the community.

A mortgage would be eligible for insurance under section 203(b) as modified by this proposed subsection without regard to limitations in title II relating to a mortgagor's reasonable ability to pay, economic soundness, marketability of title, or any other statutory restriction which the Secretary determines is contrary to the purpose of this proposed subsection, but only if the mortgagor is an owner occupant of a home in a community specified above who, as a direct result of the community's temporarily impaired economic condition, has been involuntarily unemployed or underemployed and has thus incurred a substantial reduction in income which significantly impairs the owner's ability to continue timely payment of the mortgage. The Secretary would be authorized to encourage or afford directly to or on behalf of mortgagors whose mortgages are

insured under section 203(b) as modified by this proposed subsection forbearance, assignment of mortgages to the Secretary or such other relief as the Secretary deems appropriate and consistent with the purpose of this proposed subsection. The Secretary, in connection with any mortgage insured under section 203(b) as modified by this proposed subsection, would have all statutory powers, authority, and responsibilities which the Secretary has with respect to other mortgages insured under section 203(b), except that the Secretary would be authorized to modify such powers, authority, or responsibilities where the Secretary deems such action to be necessary because of the special nature of the mortgage involved. Notwithstanding section 202 of title II, the insurance of a mortgage under section 203(b) as modified by this subsection would be the obligation of the special risk insurance fund created pursuant to section 238 of title II.

Mr. BROOKE, Mr. President, I have discussed this technical amendment with the distinguished chairman of the committee. I believe he will accept it.

Mr. PROXMIRE, Mr. President, I am happy to accept this amendment. We have discussed it and debated it at some length both on the floor and in conference. It is a good amendment. I yield back the remainder of my time.

Mr. BROOKE, Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BROOKE, Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BROOKE, Mr. President, I suggest the absence of a quorum. I ask that the time not be charged against either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The legislative clerk proceeded to call the roll.

Mr. EAGLETON, Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### AMENDMENT NO. 335

Mr. EAGLETON, Mr. President, I call up my amendment No. 335 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read as follows:

The Senator from Missouri (Mr. EAGLETON), for himself and others, proposes an amendment.

Mr. EAGLETON, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 54, between lines 7 and 8, insert the following:

Sec. 312. (a) Section 202(b) of the Flood Disaster Protection Act of 1973 is amended to read as follows:

"(b) In addition to the requirements of section 1364 of the National Flood Insurance Act of 1968, each Federal instrumentality described in such section shall by regulation require the institutions described in such

section to notify (as a condition of making, increasing, extending, or renewing any loan secured by property described in such section) the purchaser or lessee of such property of whether, in the event of a disaster caused by flood to such property, Federal disaster relief assistance will be available to such property."

(b) Section 3(a)(4) of such Act is amended by striking out all after "mortgages or mortgage loans" and inserting in lieu thereof the following: "but shall exclude assistance pursuant to the Disaster Relief Act of 1974 (other than assistance under such Act in connection with a flood);"

Mr. EAGLETON. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EAGLETON. Has 1 hour been reserved on this amendment, to be equally divided?

The PRESIDING OFFICER. The Senator is correct.

Mr. EAGLETON. Mr. President, it is late in the evening and there will be no vote on this until tomorrow morning. I am advised by the distinguished majority leader. I wish to reserve 10 minutes of my hour, to be consumed tomorrow morning at the close of morning business.

Mr. ROBERT C. BYRD. Will the distinguished Senator yield?

Mr. EAGLETON. I yield to the majority leader.

Mr. ROBERT C. BYRD. The Senator may want to have the time begin running at 10 o'clock. Under the order previously entered, the Senate will resume consideration of the bill at 10 a.m. tomorrow.

Mr. EAGLETON. I thank the majority leader.

Mr. President, then I make my request to have my 10 minutes begin at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, this amendment is cosponsored, in addition to myself, by Senators TOWER, DANFORTH, BUMPERS, BENTSEN, EASTLAND, CURTIS, CHILES, JOHNSTON, DOMENICI, and HELMS.

This amendment would make a modest change in the national flood insurance program. Very simply, it would allow a community which has compelling reasons for not adopting the restrictive HUD land use code to continue to have access to conventional forms of financing. The amendment makes it clear, however, that such communities would not be eligible for Federal construction assistance or flood disaster loans. In addition, it would require private lenders to notify borrowers of the flood designation and advise them the property is not eligible for disaster aid in the event of a flood.

Mr. President, all my amendment seeks to do is give local jurisdictions a small degree of choice about how they handle purely local affairs. It proceeds from a consideration that maybe—just maybe—local people might know a little more about their own town and its problems than some Washington HUD of-

ficial who has never even been to the community.

There are many good reasons why a community might resist dictation from Washington. One is that most of these communities have already taken account of their flood problems and adopted appropriate zoning regulations. Understandably, they object to having these local initiatives set aside by some HUD official whose only knowledge of the town is based on a crude map drawn by an outside consultant. Even HUD admits that these maps are full of errors, and the GAO says these maps are virtually useless as a basis for administering a sound flood plain management program.

More often, a community's decision is based simply on economics. The town of Cassville, Mo., is a good example. Cassville is a town of 1,900 population, and over the past decade, the people there have made an all-out effort to attract industry and build up their city. They have succeeded in luring industries with 1,100 new jobs to Cassville, which has become something of a boomtown. Now, Cassville has been told by HUD that 60 percent of its incorporated area is subject to flooding. HUD has made this determination despite the fact that there has been no serious flooding in Cassville in human memory; despite the fact that the citizens of Cassville several years ago designated their own, more reasonable flood plain, based on actual experience as well as professional engineering studies; and despite the fact that not one dime in Federal disaster relief ever has gone to Cassville.

Based on that, the people in Cassville decided they would just as soon forego eligibility for Federal disaster aid and stand on their own. But HUD, the all-wise and all-knowing in Washington, says, "No, you cannot look after your own interests. You have no choice but to stop natural growth in this alleged flood plain, even though it encompasses all of your industrial employers, your business district and your town square."

The case of Wooster, Ohio, is another example of the kind of problem my amendment addresses. That community recently was told by HUD that it is being suspended from the flood insurance program, and as of June 15, all the sanctions provided by law would be applied against it.

Wooster is the home of about a dozen companies which, together, provide the bulk of oil well drilling equipment for the entire Midwest region. These companies are located in a low-lying industrial area which, on occasion, has experienced some backwater, but it never has caused significant damage and always has quickly receded. The HUD land use restrictions would make it impossible for these companies to expand or substantially improve their properties, and the companies informed the city council they would pick up and move rather than operate under those kind of conditions. In addition, the county fairgrounds have been included in the HUD map as flood prone and no improvements could be made on those premises, either.

This is the kind of bread and butter

concern that has prompted hundreds of other communities across the country to stay out of the program or to seek major changes in the way it is administered. As of April 19, 1977, sanctions were being applied against more than 3,000 communities. I ask unanimous consent that a State-by-State breakdown of those communities be printed in the RECORD at this point in my remarks.

There being no objection, the breakdown was ordered to be printed in the RECORD, as follows:

STATE-BY-STATE BREAKDOWN  
State and total number of cities  
under sanctions

|                |     |
|----------------|-----|
| Alabama        | 49  |
| Alaska         | 3   |
| Arizona        | 4   |
| Arkansas       | 65  |
| California     | 14  |
| Colorado       | 44  |
| Connecticut    | 1   |
| Delaware       | 2   |
| Florida        | 11  |
| Georgia        | 100 |
| Idaho          | 20  |
| Illinois       | 143 |
| Indiana        | 39  |
| Iowa           | 266 |
| Kansas         | 161 |
| Kentucky       | 52  |
| Louisiana      | 54  |
| Maine          | 62  |
| Maryland       | 3   |
| Massachusetts  | 32  |
| Michigan       | 88  |
| Minnesota      | 169 |
| Mississippi    | 29  |
| Missouri       | 170 |
| Montana        | 32  |
| Nebraska       | 101 |
| Nevada         | 1   |
| New Hampshire  | 73  |
| New Jersey     | 8   |
| New Mexico     | 22  |
| New York       | 158 |
| North Carolina | 35  |
| North Dakota   | 83  |
| Ohio           | 92  |
| Oklahoma       | 99  |
| Oregon         | 6   |
| Pennsylvania   | 282 |
| South Carolina | 31  |
| South Dakota   | 69  |
| Tennessee      | 290 |
| Texas          | 240 |
| Wyoming        | 20  |
| Utah           | 31  |
| Vermont        | 54  |
| Virginia       | 9   |
| Washington     | 24  |
| West Virginia  | 4   |
| Wisconsin      | 54  |

(At this point Mr. MATSUNAGA assumed the chair.)

Mr. EAGLETON. Mr. President, these communities are tired of dictation from Washington by bureaucrats who know nothing about their local situation and care even less. I have with me a picture of just such a bureaucrat, a representative of the Federal Insurance Administration who was photographed by the Aurora, Mo., Advertiser newspaper while he was dictating his terms to the residents of that community.

I am sorry I do not have a bigger audience, because it is a juicy picture. This is the friendly HUD Director as he invaded Cassville. He is lecturing the people of Cassville on what is in their best interest. To cap off his speech, he referred to Representative TAYLOR and me as un-

mitigated rednecks, or something like that.

Frankly, that designation does not hurt me politically in that part of the State. Anyway, here is this picture. It will speak for itself.

A few years ago, Governor Wallace of Alabama added the term "pointy-headed bureaucrat" to the English language. I urge my colleagues to take a look at this picture and see if this does not epitomize what Governor Wallace may have had in mind.

The people, Mr. President, are fed up with this kind of pointy-headedness, of which the Federal flood insurance program regrettably has become an example. They are tired of listening to bureaucrats like the one in this picture, who told the people in Aurora that anyone who did not like the flood insurance program is a "redneck," and that Congress would do nothing to help them. The people have heard enough of this kind of talk, and they have decided they want some answers, all in all.

Mr. President, the amendment before us, sponsored by 10 or more Senators, would not affect communities which are willing participants in the flood insurance program nor would it jeopardize a single dollar of direct Federal assistance. The only question at issue is whether decisions involving vital planning and development are going to be made by someone in the HUD office here in Washington or whether the local community is to be left even this slightest tinge of local decision, whether a banker cannot make up his own mind whether he wants to loan the bank's money to a businessman in his area.

Opponents of this amendment contend that communities which stay out of the flood insurance program will nevertheless come running to Washington for help if they experience a flood and Congress will be persuaded to give it. Mr. President, that argument ignores the clear words of the Flood Protection Act, which provides that no property owner shall qualify for Federal disaster assistance or construction assistance unless he agrees to purchase flood insurance. The amendment before this body does not change that requirement, and, in fact, restates the condition in the body of the amendment itself. So it is in there twice. Nothing could be plainer than this fact, and if a community consciously decides to stay out of the program, they are not eligible for 1 cent of flood disaster relief.

In conclusion, Mr. President, the amendment would restore the right of local communities to turn down Federal handouts if they choose to go it alone. Therefore, I urge the amendment's adoption. It would do nothing to hinder a community which likes the program from continuing to enjoy its benefits and it leaves intact most of the program's incentives.

Mr. President, I am pleased to yield to my distinguished colleague from Missouri (Mr. DANFORTH).

Mr. DANFORTH. I thank my senior colleague for his excellent statement and for his initiative in offering this amend-

ment. I think he has captured very lucidly the spirit of the people of the State of Missouri who are absolutely up in arms about this particular question.

The saccharin controversy is followed in close order by the flood plain insurance controversy in the minds of the people of our State in their impressions and outrage over the overreach of the Federal bureaucracy in trying to manage their affairs.

As I understand this amendment, and I ask Senator EAGLETON if he will bear me out in this, he is not objecting to the Federal Government conditioning the offering of Federal flood insurance or Federal grants or Federal loans or what amounts to land use planning.

What he is objecting to, as I understand it, is the Federal Government purporting to tell banks with no connection at all other than, for example, FDIC coverage, banks that are located in a community, people who have lived in the community all their lives, that they are not able to make loans in flood plain areas.

Mr. EAGLETON. The Senator is absolutely correct.

Just permitted to fit the loan money to a business deriving in that area if they think it is a good, prudent loan, the bank is permitted to make the loan. That is all the amendment does.

Mr. DANFORTH. Under the law as written now, if a Federal bureaucrat designates an area as being within a flood plain, then a bank which is FDIC-covered, or insured, is prohibited by the present law from making a loan to a business located in that flood plain.

Mr. EAGLETON. The Senator is exactly correct.

Mr. DANFORTH. And this is exactly the kind of overreach by the Federal bureaucracy that we were objecting to in offering this amendment.

Mr. EAGLETON. I thank my colleague. I think he has summed it up very convincingly.

Mr. DANFORTH. Mr. President, in Aurora, Mo., there was a confrontation a few weeks ago between the citizens of Aurora and Federal officials in charge of this program.

Aurora, for those who do not know, happens to be one of the highest points in the State of Missouri. Aurora has never been flooded. Yet the Federal bureaucracy has stated that Aurora is part of a flood plain and has conditions not only of Federal assistance in case of a flood and Federal insurance by bank loans in that community, or Aurora's participation in what amounts to Federal land use planning. During the confrontation between a Mr. McClure and the people of Aurora, Mr. McClure stated, and I am quoting from the Aurora newspaper:

"Don't tell me there have never been any floods here," McClure said at the meeting, "I've heard all the arguments. Just because there has not been a flood here, doesn't mean there won't be. If you gamble that there won't be a flood, and lose, don't call us."

Nobody in Aurora wants to call. The question is whether they are going to call the Federal Government and ask for anything. The question is whether the

Federal Government is going to prohibit the people of Aurora from getting loans from banks in their own communities.

I think that this is representative of exactly the feeling that is so prevalent in our country today. The feeling on the part of people throughout the country that Washington is made up of the bureaucracy that knows the answers, that knows all the situations and concerns in a local community, that we in Washington have a monopoly on truth and wisdom and that we are darn well going to tell people in Aurora and Cassville and in communities throughout this country what they should do and what business practices they should have.

I am pleased to join with my colleague from Missouri (Mr. EAGLETON) in cosponsoring this amendment and urging its support.

Mr. EAGLETON. I thank my colleague.

Mr. President, I ask unanimous consent that the name of the Senator from New Mexico (Mr. SCHMITT) be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I ask unanimous consent that a 2½ page letter from the National League of Cities endorsing this amendment be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL LEAGUE OF CITIES,  
Washington, D.C., May 31, 1977.

DEAR SENATOR: On behalf of the National League of Cities, I am writing this letter to comment on S. 1523, the Housing and Community Development Act of 1977, and to commend the Senate Banking, Housing and Urban Affairs Committee for supporting a three-year authorization of the Community Development Block Grant Program. In our opinion, the President presented to Congress a well-balanced legislative proposal and the Senate committee has adopted several valuable amendments to improve the current law.

NLC has consistently endorsed the major elements of the Carter proposal including the proposed dual formula, the Urban Development Action Grants Program (UDAG), and a plan to fund comprehensive small city programs. The League's Board of Directors voted last week, by mail ballot, to reaffirm our commitment to this important legislation and to establish NLC's policy position on two significant formula amendments to the President's proposal.

The first formula amendment, which was introduced by Senator Harrison Williams and later amended by Senator Edward Brooke to include a funding phase-in provision, deals with cities of over 50,000 population and basically benefits those cities which were helped through the Administration's dual formula. The Williams-Brooke formula modification adds a third formula for calculating funding levels for entitlement communities, and it substantially reduces the available dollars for the proposed UDAG program.

The second formula amendment changes the allocation method for distributing the metropolitan and non-metropolitan discretionary balances. A two formula approach, which is similar but not identical to the dual formula for cities of over 50,000 population, is employed to distribute the discretionary balances into a pool at the state level using the 1974 formula or a second formula. The second formula weighs the age of housing 50

percent, poverty 30 percent, and population 20 percent. Each state will receive an allocation based on the larger amount.

Although the League believes that the bill before the Senate is a good piece of legislation, you should be aware that we are opposed to these formula amendments as contained in S. 1523.

The League opposes the Williams-Brooke "Impaction" formula because it siphons funds from a highly desirable component of the Administration's proposal—the UDAG program. We believe that the \$400 million UDAG program provides HUD with the necessary flexibility to resolve formula inequities or deficiencies of the dual formula, and to promote the economic revitalization of a greater number of cities (both large and small). We urge the Senate to support the \$400 million UDAG program as requested by the President.

NLC objects to the second formula amendment or the two formula approach for distributing the discretionary balances for three reasons: First, it transfers elements of the dual formula, devised after lengthy studies and numerous computer runs for larger communities, to smaller communities with the assumption, not with studies or computer runs, that the same considerations would apply to cities under 50,000 population just as for larger cities. Second, the amendment was considered and adopted by the Committee without complete information showing the funding distribution for the metropolitan discretionary balances. Third, no additional funds are provided by this amendment to fund both formulas fully. Thus, some states will receive less money than they would receive if the allocation system was based exclusively on the 1974 formula.

For these reasons, NLC is opposed to this formula amendment and we strongly urge your support of our position.

We are aware that Senator William Hathaway plans to offer a floor amendment to S. 1523 to reserve 25 percent of the funds appropriated for UDAG for the participation of cities with population below 50,000. Senator Hathaway's amendment would allow cities of similar size to compete more equitably for needed federal assistance. His proposal is consistent with the general principles established under the original act, since it extends the same treatment, as applied under the Regular Block Grant Program, to divide the available funds between large and small communities. As I indicated before, the League is totally supportive of the UDAG program, and we urge your support of Senator Hathaway's amendment to guarantee adequate funding and the participation of smaller cities in this program.

The League is also concerned about an amendment which Senator John Tower plans to offer pertaining to the UDAG program. His amendment, as we understand it, would allow "distressed areas" within cities and urban counties to become eligible for the UDAG program. The amendment is contrary to the Administration's proposal and it opens the program indiscriminately to almost every city and county in the country. We oppose this amendment because it would scatter the program's limited resources.

NLC also supports an amendment to be offered by Senators Richard Stone and John Heinz to continue to allow lump-sum draw-downs of Community Development Grant funds by cities with rehabilitation programs. In the past, cities have been able to leverage their CD dollars and attract private investors into neighborhoods where they would not ordinarily take the risk. We feel that this amendment is a good one and its adoption should benefit many local governments.

NLC supports Senator Thomas Eagleton's amendment to the section dealing with flood insurance, which would lift the sanction imposed on Federally-insured banks, and sav-

ings and loans institutions in a non-participating community. This amendment does not address all the questions that NLC raised prior to the adoption of the Act in 1973, but at a minimum, it would prevent unwarranted economic hardship by some communities while these questions are answered. Additional improvements in the present law, would require assessment of the economic consequences and land use implications for the community, as well as the private citizen. One answer would be a requirement that a cost benefit analysis should be submitted at the time the community would enter into the permanent program; another avenue to explore would be the establishment of a compensation plan for economic losses.

In conclusion, you should also be aware that the League strongly supports the following Committee improvements to the Administration's bill:

Multi-year funding of small city comprehensive programs.—The League is pleased that the Committee recognized the need for such an amendment. Through this provision, small cities will receive the same treatment as the larger cities, and they can more adequately plan and carry out comprehensive CD programs. We feel confident that this change will favorably benefit our smaller communities and enhance their ability to participate in the program.

An improved loan provision.—To our knowledge, not a single CDBG loan has been provided to any city since the start of the program. The committee recognized that localities need a workable loan program in order to leverage funds and carry out larger development activities.

Title IV, the Community Reinvestment Act.—Title IV reinforces the concept, provided in a previous law, that financial institutions are obligated to serve the needs of their immediate area. This does not force the lending institutions to loan a certain percentage of funds to a given area, but merely directs the regulatory agencies to encourage affirmative lending practices. NLC would prefer the language to be stronger and more specific, but a vote to delete Title IV would be a tremendous setback for any improvement against lending discrimination in the cities.

Housing Budget Authority.—NLC supports the Committee language with regard to calculating assisted housing budget authority. The present system grossly misrepresents the annual cost of assisted housing, particularly at the time when priorities and cost are assessed by the Budget Committee and the Congress. The 40-year cost of housing stands side-by-side with one-year programs. This leads to misconceptions of the annual drain on the federal budget and, therefore, the system should be clarified.

The National League of Cities is committed to the reauthorization of this vital program and we hope you will support our efforts to produce the best possible legislation for our nations' cities. Please let us know if we can be of any further assistance to you.

Sincerely,

ALAN BEALS,  
Executive Director.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the name of the distinguished Senator from Alabama (Mr. ALLEN) be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I reserve the remainder of my time.

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I hesitate to object to the distinguished Senator from Missouri and the Senator from Alabama in their position on this.

The senior Senator from Missouri (Mr. EAGLETON) has been extraordinarily diligent. He is very well informed. I cannot recall any measure in which I have been involved which has come before the committee in which a Member of the Senate has been more consistent, better documented, studied the question more thoroughly, gone out to his State and talked with people from all walks of life. He does bring a great deal of thought, experience, and work to this matter.

Nevertheless, I must oppose the Eagleton amendment. I do so because it would drastically, very drastically, alter the Federal flood insurance program. A similar amendment was considered by the committee and rejected by a vote of 8 to 4. The committee adopted, instead, the administration's proposal to extend the program through fiscal year 1978. The 1-year extension would give the new Administration time to review the program, and the Senate another opportunity to conduct oversight hearings. I would like to recall for my colleagues the background of the flood program. It is crucial to understanding the committee's firm opposition to the amendment which Senator EAGLETON offers.

In 1965, Congress directed the administration to study the feasibility of establishing an insurance program to deal with the problem of flood losses. The study showed that the hazards of flood damage in the United States have been rising steadily, and that demand for property in flood-prone areas is increasing.

I think that we should recognize that what typically happens is that people will go back over and over again into those flood-prone areas no matter what kind of warning they have, and they know now, if they are flooded out, the Federal Government is going to come along and take care of them, for we have always done that in the past. It has cost the Government billions of dollars. We are not hard-hearted, we do not turn our backs on American citizens. We have helped them over and over again.

The wise thing to do would be to set up a flood insurance program to do several things: To provide money in case of a flood so they could be taken care of; to provide a disincentive for moving into flood-prone areas; and also to encourage those who are in areas like this to build structures which resist flood. That is what the flood insurance program tries to do.

The study I have talked about here, the 1965 study, found that people are generally uninformed or misinformed about flood risks. Most are overoptimistic about their chances of avoiding flood loss, or expect the Federal Government to bail them out should a flood disaster occur. The staff concluded that a flood insurance program could be established to save not only lives, but the high costs of property losses that are borne by the Federal Government and by individual property owners.

But the study emphasized that for an insurance program to succeed, future flood losses must be reduced through local management of flood-prone areas. I agree that management has not been skillful. HUD has blundered in many cases. It made some sad mistakes, some pitiful mistakes.

I have had the same experience in Wisconsin where people have taken me out and shown me areas where flooding will not likely happen, where they will not have a flood in a hundred years, and will not have a flood in 25 years because there is no way they could be flooded. But the maps they had were out of date. They proceeded from awkward information, and almost in a way, information that was considered very badly informed and very grossly inefficient by local people. Nevertheless, that program is very greatly improved now. It is on a different basis.

The continued unregulated development of flood-prone areas would undermine any effort to provide insurance protection for persons living in areas of flood risk. It is important to remember this, because in 1973 Congress amended the flood insurance law to require communities, as a condition for receiving subsidized insurance, to implement flood plain management regulations and to bar participation by federally regulated lending institutions in construction or real estate activities in communities which fail to participate. Experience showed that communities were not moving voluntarily to do so. Flood losses and Federal disaster expenditures were continuing to mount.

The Congress, after lengthy deliberations and considerable compromise, enacted the present program in order to take into account all viewpoints. And the program is working. More than 15,000 communities are participating in the program. More than 12 million flood insurance policies have been sold. Over \$30 billion worth of property is now protected by flood insurance. Local communities are adopting better practices to reduce the likelihood of future flood damage. It is projected that by 1980 the Federal Government will save almost \$2 billion each year as a result of the flood program—and private property owners will save even more. Think of that. Here is a program that saves money. It does not cost money, it saves money. It saves billions of dollars.

Those who would amend the present law present two basic arguments to support their view. They argue first that this is an unnecessary infringement on the rights of private property. But experience has shown that this is not the case. Experience has shown that owners of property will build in flood-prone areas—we all know it; it happens in every State—lenders will make loans in areas that are flood prone, and people will buy in areas that are flood prone. And when the flood disaster occurs, the Federal taxpayers will pick up the tab out of compassion.

Mr. President, there is an area in our State on the Mississippi River in which there is a flood almost every year, and every year the people go right out and they build and they have their families

there and they get flooded out. They are hopeful it will not happen. If it happens, they will be bailed out and, of course, they have been bailed out at a great cost to the taxpayer. But, of course, the property there is cheap, and the lenders do not care because they are taken care of by the Federal Government moving in. That was true before we accepted this program. Now we have got a rational approach. The history of this program has demonstrated that "carrots" are simply not enough—some sanction is needed to stimulate communities to act. Under the current program, over 15,000 communities have responded. Each month brings new communities into the program. Communities recognize that this program protects private property without unnecessarily infringing on private rights.

Those who propose amending the statute argue, second, that the program has been plagued with problems, particularly with problems in mapping flood-prone areas, as I pointed out.

There is no doubt that mapping has been a problem, and there is no doubt that for part of this period it was incompetent. But the problem of surveying and drawing maps for over 20,000 communities, showing block-by-block areas that are flood prone is a monumental task. It requires preparation of a preliminary, and then a detailed, final map. There have been problems in preparing these maps. But, I am pleased to report, the problem of inaccurate or unclear flood maps is a problem of the past. All of the preliminary, and frequently inaccurate, maps have been redrawn, and thousands of properties have been redesignated.

The problems of mapping and securing understanding and agreement concerning responsibilities do not require a drastic legislative solution. They require continued congressional oversight. The Committee on Banking, Housing, and Urban Affairs plans to hold such hearings during this session, and to take any remedial legislative action needed.

This is no time to interrupt a program that is beginning to produce savings that will amount to \$2 billion annually in a matter of years.

This certainly is not the time to turn from a program of insurance to a program of haphazard, emergency aid.

Congress has before it now yet another disaster relief appropriations bill.

The present flood insurance program offers a practical alternative to increased disaster relief spending. The flood insurance program accordingly should be retained without drastic amendment.

Mr. President, these are just not Government agencies that oppose the Eagleton amendment. Let me indicate some of the groups that do, and there are some important Government agencies that have a stake here: The Federal Deposit Insurance Corporation and the Office of Management and Budget oppose the Eagleton amendment. The League of Women Voters; the Secretary of Housing and Urban Development; the American Federation of Labor and Congress of Industrial Organizations; the Conservation Foundation, and practically all

the conservation groups; the American Red Cross; the Council on Environmental Quality in the Executive Office of the President all oppose the Eagleton amendment and feel that the present flood insurance program is essential.

Now, in conclusion, Mr. President, I would like to do something that I suppose is rarely done in the Senate, and that is to quote from a speech that was made in the House by the distinguished Congressman from Ohio, one of the ablest Members of Congress, Mr. ASHLEY. I think it sums it up very well. This will just take me a minute to read it, and I would like to call it to the attention of the Senators. Mr. ASHLEY made this point, he said:

It is patently unfair, if I may conclude for a moment. What I am saying is that it is very unfair to expect the premium for flood insurance to be paid by the taxpayers of this country while the participants in the flood plain legislation, the beneficiaries, are unwilling to change their construction, their building, their living habits sufficiently to obviate the dangers.

Let me just remind the Members of what we have done since 1973. Since the 1973 Flood Disaster Protection Assistance Act, here is how the Congress has attempted to alleviate some of the problems involved in the very tough Federal sanctions of the flood insurance program. I am simply trying to say, Mr. Chairman, that since the adoption of the 1973 Flood Disaster Protection Assistance Act the Congress has provided exemptions for existing structures in place prior to March 1, 1976. We have provided exemptions for small businesses occupied and in place prior to January 1, 1976. We have provided exemptions for home improvement loans not to exceed \$5,000. We have provided exemptions for nonresidential agricultural related buildings. Finally, the amendment just adopted, the Ertel amendment, provides improvements to property suffering nonflood damages up to 80 percent of the value of the residence.

So that the point I am making is that the flood insurance program is not something that has been static. It has been very responsive to the kind of complaints against the program that we have heard from our constituents, and it has adapted that program, it seems to me, in a sensible way.

Mr. President, I yield to the Senator from Massachusetts such time as he may require on the amendment.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. BROOKE. Mr. President, I rise to oppose this amendment reluctantly because I have the greatest respect for both of the Senators from Missouri, Senators EAGLETON and DANFORTH, and I know how much this amendment means to them and to their State.

But this is an important amendment not only to them, but an important amendment to the Nation because it really would be the death knell for flood insurance in this country.

The effect of the amendment, Mr. President, would be to seriously weaken the Federal flood insurance program, because the major incentive to participate in the program has been the sanction in section 202(b) against lending in flood-prone areas.

If this section is repealed, communi-

ties will withdraw from the program and develop their flood plains without adequate flood plain management. They could then reenter the program after development and cover those risks under the subsidized insurance program. This amendment would also stimulate investment and development in flood hazard areas without construction safeguards or insurance. The provision in the amendment requiring notification of mortgagors on eligibility for disaster relief would create a serious administrative problem for lenders, who would have to review their mortgage portfolios after each flood to assure that disclosure is made.

Mr. President, as has been said, the administration strongly opposes this amendment. In a letter from OMB Director Bert Lance dated May 25, 1977, he argues that the amendments would essentially make the flood insurance program a voluntary program. He believes that the current program is effective because those who take the risk of living in flood plains bear a share of the cost of the risk. No community is given the option of limited participation or is currently allowed subsidized insurance for its new development. Under the Eagleton amendment, a community could allow uncontrolled development in its flood plain and receive subsidized insurance on that new development in the future.

The OMB Director believes that the additional cost of these subsidies would total billions of dollars over the next 20 years.

As the chairman has said, HUD, the President's Council on Environmental Quality, AFL-CIO, Red Cross, and every environmental group opposes this amendment.

It is true that the Senator is supported by the National Association of Homebuilders and the National Association of Realtors, who are concerned about restrictions on development in flood plains. And the Senator maintains that his amendment would only restore a "small degree of local self-determination" to the program.

There is no doubt that there have been problems with the flood insurance program in the past few years. But the program does protect flood plain residents and is widely available under the current law.

As has been said, over 15,000 communities participate in the program—over 75 percent of the eligible communities are participating in this program. Significant progress has been made in the past year in correcting flood maps and improper designations of flood prone communities and improving the management of the program.

Senator PROXMIER in his statement said that after these floods occur, the Federal Government comes in and bails out those unfortunate people who have suffered from a flood disaster.

What the Senator from Wisconsin did not say is that they go right back into the same areas and rebuild their homes and assume the same risk all over again. They rebuild in the same flood-prone areas time and time again.

You can be very sympathetic with someone who wants to go back to his home, but there is some real benefit because of the availability of flood insurance.

I think we have a good flood insurance program which has been debated and debated over the years, and, as I have said, even though there are some problems, it has served over 15,000 communities in this country, and even more are now joining the program.

But if we delete section 202, that would be the end of the program, because it then becomes no more than a voluntary program, and I fear we just will not have a national flood insurance program.

I say to the Senators from Missouri, and there may be others who think that they would benefit by this amendment, that in the long run the country would suffer severely by this amendment. It is for that reason that I cannot support the amendment offered by my distinguished colleagues from Missouri.

Mr. PROXMIER. Mr. President, I understand the Senator from New Jersey is coming to the Chamber to speak on this, and I think it is on a related matter, but not on the Eagleton amendment. I think he has some other amendment he is going to speak on briefly.

I suggest the absence of a quorum and ask unanimous consent that the time not be taken from either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WILLIAMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS. Mr. President, I rise in opposition to the proposed amendment to S. 1523, the Housing and Community Development Act of 1977.

The amendment would remove section 202(b) of the Flood Disaster Protection Act of 1973, which prohibits federally supervised, approved, regulated or insured institutions from making loans in an area of special flood hazards, unless the community in which the flood-prone area is located is participating in the flood insurance program.

As the original author of the national flood insurance program, which began in 1968, with the National Flood Insurance Act, I would like to spell out some of the enormous successes of this program over the years.

Since 1936, the Federal Government has spent billions of dollars on relief and indemnification for property losses, plus billions more on flood prevention and control. Despite these efforts, losses from floods continue to increase on an annual basis. It is estimated that the Federal Government is now spending \$1.25 billion each year for flood disaster relief.

In response to the growing annual loss from flooding, the Congress enacted the National Flood Insurance Act of 1968. This act had two objectives. The first was to make available to residents in flood

risk areas federally subsidized insurance at reasonable premium rates. The second was to require communities with flood-prone areas to enact land use and control measures designed to encourage the rational use of land within these areas as a condition for the availability of federally subsidized flood insurance.

Originally, participation in the program was on a voluntary basis. Experience demonstrated that builders and Communities continued to build in areas susceptible to flooding. By 1973, when the Congress reexamined the flood insurance programs, flood-prone property was being developed all over the country. Few communities were entering the program and few property owners were purchasing policies to protect themselves. Few communities bothered to become involved. Almost no local effort was being made to protect homeowners from even the greatest hazards of floods and hurricanes before they occurred. Federal disaster relief after the storms was increasing.

Finding that "the Nation cannot afford the tragic loss of lives caused annually by flood occurrences, nor the increasing losses of property suffered by flood victims, most of whom are still inadequately compensated despite the provision of costly disaster relief benefits," Congress enacted the Flood Disaster Protection Act of 1973. The most important part of the revision to the flood program was section 202(b). This section makes the local availability of federally related mortgages contingent upon the community's adoption of sound flood plain management practices.

With this incentive to community participation, the original objectives of the program are finally being realized:

Today, approximately 70 percent of the Nation's communities participate in the flood insurance program. In New Jersey, all but 30 of the 567 municipalities are enrolled in the program. According to figures just released by the Department of Housing and Urban Development, New Jersey leads the Nation in terms of participation in the flood insurance program;

Over 15,500 communities are participating in the program, compared to 2,856 before the present law was passed;

At least 97½ percent of the property located in the Nation's flood plains can be insured;

One million policies are in force today, or three times the number realized under the voluntary program; and

Today's \$30 billion coverage of flood risks is some five times that under the 1968 law.

Mr. President, as these statistics demonstrate, the objectives of the original laws, as improved and refined over the years, are finally being realized. The savings to the taxpayer are considerable. By the year 2000, it is estimated that there will be a \$3 billion annual reduction in flood losses.

Beyond these savings to the taxpayers, through community flood plain management and sound construction techniques, residents living in flood plains are protected. And in environmental terms, safer

construction of new flood plain homes reserves the environment by avoiding the necessity of building dams.

Based on the measurable success of the current program, I must vigorously oppose the amendments being offered by the Senators from Missouri and Texas.

The removal of section 202(b) is contrary to the purposes of both the National Flood Insurance Act of 1968 and the Flood Disaster Protection Act of 1973. The economic justification for the program—to reduce dependence on massive flood disaster relief appropriations funded by all taxpayers, over 90 percent of whom live outside flood-prone areas—would be undermined. This is so because communities would be under no obligation to practice prudent flood plain management.

Sound flood plain management is of the utmost importance if we are to reduce disaster relief costs and minimize future property damage. This amendment, however, would encourage irresponsible construction which results from imprudent flood plain management.

It would contribute to the high cost of disaster losses. Not only would it be contrary to the basic concept of flood plain management, but it would also unfairly force taxpayers throughout the United States to subsidize irresponsible construction in nonparticipating areas.

Mr. President, it is not difficult at all to predict the likely effects of deleting the present conditions on federally related financing within flood-prone areas, keeping in mind that conventional mortgage loan closing account for about 80 percent of the Nation's total on one to four family homes:

First, a major incentive to community participation in the national flood insurance program would be undetermined. The 15,500 communities already in the program would be penalized as would taxpayers in nonflood-prone communities. Both would be forced to continue to indemnify losses which would inevitably occur in communities permitted to do nothing to protect residences from flood damage.

Second, removal of the flood insurance purchase requirements in participating communities would most certainly undermine the flood insurance program by creating further incentives for new substandard construction in the flood plain.

In other words, it would spell the end of flood plain management and encourage the very irresponsible construction that contributes to the very losses we all regret. Moreover, taxpayers throughout the country would be forced to subsidize this irresponsibility.

Third, without adequate conditions on federally related financing for new construction in flood-prone areas, communities would remain out of the flood insurance program while completely developing their flood plains. At some future time, such as after a flood disaster, they could appeal to the Federal Government for costly flood protection works. Or they could simply enter the program to obtain the benefits of subsidized flood insurance rates.

And last, flood insurance premiums would soar without widespread participation, putting flood insurance beyond the reach of most homeowners.

Mr. President, there are other features of the amendments which either are unrealistic or unworkable, or both. Repealing the flood insurance purchase requirement for structures located in identified flood-hazard areas for nonrelated disasters would expose disaster victims to future uncompensated flood losses. Moreover, the amendment would preclude any form of disaster relief for flood-related disaster in nonparticipating communities. Thus, in the event of a flood, the law would actually prevent the Federal Government from providing even temporary relief for food, shelter, and related assistance to victims.

The amendment would also require private lending institutions to notify borrowers in writing of the existence of any flood hazard.

This putative consumer protection device is intended to serve as a substitute for community participation in the flood insurance program. However, the concept is unworkable for several reasons.

In the first place, the amendment assumes that disclosure by the lender that property is in a high-flood-hazard area would provide some degree of protection to the prospective mortgagor. It may provide notice, but it does not provide protection.

Second, the proposed notification comes too late to serve any purpose. Under the amendment, disclosure would come after the individual had signed the property purchase agreement. Only then would the individual approach a lending institution for financing. At this point, the purchaser has, without knowledge of the flood hazard, signed on the dotted line. With that knowledge, he may not wish to consummate the agreement but could do so only by forfeiting a downpayment.

This is hardly consumer protection or flood disaster prevention. Under the present law, if the lender denies a loan because of flood hazard, the buyer can get out of his contract—it having been conditioned upon his ability to obtain a mortgage—obtain a refund of his downpayment, and walk away from the flood-prone property.

Third, from a practical standpoint, I do not see how lenders could possibly notify all borrowers about the availability of Federal disaster relief in the event of major flooding.

The Carter administration supports a strong flood plain management program, including section 202(b) of the present law. Recently, there have been several affirmative demonstrations of this.

On May 24, the President signed an Executive order directing executive agencies to improve flood plain management and to avoid direct or indirect financial support of unwise flood plain development.

In addition, the President's Council on Environmental Quality, the Office of Management and Budget, and Secretary Harris have reaffirmed this support for

the present law and their opposition to the pending amendments.

This sentiment is widely shared. I have been contacted by such diverse groups as the League of Women Voters, the American Red Cross, the American Conservation Foundation, the Consumer Federation of America, the American Insurance Association, the Sierra Club, the Environmental Policy Center and still others. They all support the present flood insurance program and oppose the adoption of the proposed amendments.

Mr. President, I urge my colleagues in the strongest terms to reject these amendments. They would emasculate a highly successful national flood insurance program and expose millions of Americans to extremely hazardous conditions that can be and are being avoided. Rejecting these amendments will save lives, avoid pain and suffering and spare the taxpayers.

Mr. WILLIAMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### UP AMENDMENT 355

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. It would require unanimous consent for the amendment to be considered at this time, since an amendment is pending.

Mr. DOLE. Mr. President, I ask unanimous consent that the amendment may be in order at this time.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 355:

On page 6, line 2, after "settlement" insert "and, to the extent feasible, the completion".

Mr. DOLE. Mr. President, I have discussed this amendment with the distinguished floor manager and the ranking minority member of the committee. It simply clears up an ambiguity in the bill. It conforms the bill to the language in the House and Senate report.

My amendment is aimed at an ambiguity in the bill—which could leave the Department of Housing and Urban Development with more discretion than this Senator would like. I note that this is an ambiguity, and that my amendment does not alter the apparent intent of this legislation as expressed in the committee's report on the matter; rather, it clears up the matter in a way which will eliminate potential problems of interpretation in the future.

This bill authorizes \$100 million per year for 3 years to finish up uncompleted urban renewal projects. As a Senator from a State with uncom-

pleted projects of this nature, this measure appears to be a very important one which should be given careful consideration.

The text of the bill itself says only that the fund will be used for the "financial settlement" of such programs. The bill itself does not say the "completion" of such programs but says only "financial settlement." However, the Senate committee report says that the fund will be used to "assist localities in the completion and financial closeout of projects." The House report says substantially the same thing. I believe that the report language is clearer, and that we should make it clear that this money shall be used for completion.

The thrust of my amendment is to make it crystal clear to HUD that this fund is to be used for financial settlement and completion.

To illustrate my concern let me use the example which first drew my attention to this ambiguity. The city of Kansas City, Kans., is involved with a clearance program called the Armourdale neighborhood development project. Basically, this generally blighted area is first to be cleared and then redeveloped after improvements in lighting, sewers, and streets.

Here is the precarious status of that program today. It is in its third year of funding and about 50 percent of the area, and most of the residential area, has been cleared. What remains at Armourdale today is the commercial and industrial area and some cleared, but as yet unimproved, open space. The city is concerned because they are facing the prospect of either having vast open space at Armourdale or having to pay for the development themselves out of money which ought to be available for other purposes.

In addition the private merchants in the commercial area are left without the surrounding residential market. Some citizens are so disturbed by the situation that they have initiated a lawsuit in anticipation of noncompletion of the project.

The focus of this measure should be the completion of such projects. It would be technically possible to settle this problem with the Armourdale neighborhood development project financially, and still leave major problems for the city and for the local merchants.

The effect of my amendment would be to alleviate this problem and provide for the completion of such projects.

We encountered this question in connection with the Armourdale urban renewal project. Were they talking about final settlement or completion? The amendment would simply change the relevant phrase to read "settlement and, to the extent feasible, the completion." I think this clears up the ambiguity and any possible confusion.

Mr. PROXMIRE. Mr. President, the Senator from Kansas did take up this amendment with Senator BROOKE and myself. As I understand, the House does not have language of this kind in the bill, but it does have report language. I think it is desirable to have before us in con-

ference the language spelled out in the statute itself, and I will tell the Senator now that I will be happy to press for this change in conference, because I think it is a helpful, logical, clarifying amendment.

Mr. BROOKE. Mr. President, the chairman is quite correct. There is language in the House report, but not in the House bill. What the Senator from Kansas is doing by his amendment is making it statutory language.

I commend him for that, because there are many cities that have not completed their urban renewal programs, and want to do so. I think this language will be particularly helpful. I would hope that the Senate agree to it, and that the House would accept it in conference. That is the intent in the House report language, obviously, but I think the Senator from Kansas has performed a great service in offering this amendment to our bill. When we go to conference with the House we will have this statutory language, which is much stronger than report language.

I commend the Senator from Kansas for having introduced the amendment, and join with the Senator from Wisconsin in accepting it.

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time on the amendment.

Mr. DOLE. I yield back the remainder of my time. It might be possible, to have final settlement before completion. That is the only purpose of the amendment, to clear up that ambiguity.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment was agreed to.

Mr. BROOKE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of the amendment offered by Mr. EAGLETON tomorrow morning, the distinguished Senator from Rhode Island (Mr. CHAFFEE) be recognized to call up his amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats. The Senator from West Virginia may proceed.

#### APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Public Law 94-280, appoints the Senator from Louisiana (Mr. LONG), from the Committee on Commerce, Science, and Transportation, to the National Transportation Policy Study Commission, in lieu of the Senator from Indiana (Mr. HARTKE).

#### DESIGNATION OF PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the recognition of the two leaders or their designees under the standing order tomorrow, there be a period for the transaction of routine morning business not to extend beyond the hour of 10 o'clock a.m., with statements therein limited to 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### ORDER FOR JOINT REFERRAL OF A NOMINATION

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that the nomination of Roland Ray Mora to be Deputy Assistant Secretary of Labor for Veterans' Employment be jointly referred to the Committee on Human Resources and Veterans' Affairs.

It is my understanding that this matter has been cleared with both committees, and is acceptable to them.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### TRANSFER OF A MEASURE FROM THE UNANIMOUS CONSENT CALENDAR TO THE GENERAL ORDERS CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there is one measure on the Unanimous Consent Calendar that should go back to the General Orders Calendar. I ask that the clerk transfer back to the General Orders Calendar, Calendar Order No. 182.

The PRESIDING OFFICER. The bill will be so transferred.

#### PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at 9:45 tomorrow morning.

After the two leaders or their designees have been recognized under the standing order, if there is any time remaining before 10 a.m., there will be a period for the transaction of routine morning business in that interim, with statements therein limited to 2 minutes each.

At 10 o'clock, the Senate will resume the consideration of the housing bill, and the pending question at that time will be on the adoption of amendment No. 335 by Mr. EAGLETON. The yeas and nays have been ordered on that amendment.

and most of the time on the amendment has already been utilized. Mr. EAGLETON has 14 minutes remaining, and the manager of the bill has 13 minutes remaining, which would mean that the rollcall vote on the Eagleton amendment would occur at about the hour of 10:25 a.m.

Following the disposition of the amendment by Mr. EAGLETON, Mr. CHAFEE will be recognized to call up an amendment. There will be rollcall votes throughout tomorrow on amendments and motions in relation to the housing bill. The Senate will stay in late, if necessary, to complete action on that bill tomorrow.

#### RECESS UNTIL 9:45 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move in accordance with the previous order that the Senate stand in recess until the hour of 9:45 a.m. tomorrow.

The motion was agreed to; and at 7:21 p.m. the Senate recessed until tomorrow, Tuesday, June 7, 1977, at 9:45 a.m.

#### NOMINATIONS

Executive nominations received by the Senate on June 2, 1977, pursuant to the order of May 27, 1977:

## EXTENSIONS OF REMARKS

## NUTRITION IN SCHOOL LUNCH

## HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. MILLER of California. Mr. Speaker, whenever any of the various child nutrition programs is discussed in Congress, a major topic of discussion is plate waste. There has been a substantial amount of testimony concerning the poor quality and taste of many of the meals which are served our schoolchildren and which they, very naturally, refuse to eat. As is obvious, the nutritional requirements which we impose on school meals do little good to a child if they are contained in food so unpalatable or unattractive that a child refuses to eat it.

A recent article in the Contra Costa Times illustrates the manner in which a talented and innovative food program director is experimenting with new types of foods and methods of preparation to encourage children to eat better quality meals. In the light of the statistics quoted on the inferior quality of the American diet, as recently documented by the Senate Committee on Nutrition and Human Needs, such nutrition education is an absolutely essential ingredient in school feeding programs.

The article follows:

## THINGS KIDS WILL (AND WON'T) EAT

(By Marlene Michelson)

WALNUT CREEK.—"Plate waste" is a euphemism June Meyer deals with on a daily basis. It is the bane of her existence. And, it is also her challenge.

Meyer is the director of food services—another euphemism—for the Walnut Creek School District. That means she's in charge of the cafeterias.

In that job, the diminutive woman who has been with the district for 22 years, sees a lot of food wasted by youngsters, particularly those in the early grades.

"Buying their lunches is one thing," Meyer said, "but eating them is another."

The amount of food wasted depends on the day's menu. She estimates the range from 2 per cent to 40 per cent. On a day when 40 per cent is wasted, the menu usually has canned vegetables or a salad on it.

She thinks the biggest reason youngsters don't finish their meals is because they're anxious to get outdoors to play.

Whether a child buys his lunch (50 cents including milk) or brings it, plate waste runs just about the same.

"It's not necessarily the fact that they don't like the food," Meyer said. "They want to go outside. The kid at the end of the line has to eat twice as fast. That poor kid doesn't have a chance."

To combat plate waste, Meyer's battle plan involves education, downright trickery and letting kids plan the menus themselves.

Meyer and an aide will go into a school, give the youngsters samples, talk about food and the right kinds of food and show them examples of the dreaded plate waste.

One recent lunch menu—hot pizza pie, buttered corn, lettuce salad, canned pears and milk—was planned by the classes of Nancy Rossiter and Johanna Black at Parkmead School. Meyer said those youngsters ate practically everything on their plates.

Dorothy Jelly's Parkmead class also planned a district menu. Meyer's intern took samples of raw broccoli, which the youngsters tried. They included it in their menu of oven-fried chicken, mashed potatoes, bread sticks, sliced peaches and, of course, broccoli spears.

Meyer said some of them ate every bit of the broccoli, although others didn't touch it. You win some, you lose some, but Meyer keeps on fighting. When you serve some 1,100 lunches a day, 1,400 on a big day, you hang in there.

The big days in the cafeterias are when holiday meals are served. The traditional turkey for the Thanksgiving and Christmas lunches, for example.

Tacos were never on until relatively recently, but one class asked for them and now they're the favorite throughout the district. Hamburgers may be second, with pizza, spaghetti and hot dogs running close to the top of the favorites list.

Least popular foods are salads, which Meyer is working on by changing dressings and ingredients. Vegetables aren't that popular, either, but corn and green beans do get eaten. And beans, Meyer said, are accepted at some schools, but not at others. She doesn't know why.

Other mysteries she faces are the decline in popularity of stew, meat loaf and macaroni. They're served from time to time, she said, but the response isn't overwhelming.

Meyer thinks education is the best way to eliminate plate waste. She sees the school cafeteria as the learning lab, but needs backup from teachers and administrators in the classroom portion of nutrition education.

Meyer, who is armed with statistics in her nutritional battle, said Europeans have better diets than we do. Americans, for example, consume 100 pounds of sugar per person per year. We have too many convenience foods like cookies, cakes, etc., she says.

Although there haven't been more recent surveys on consumption, Meyer cites a 1969 survey that compares what we ate then to what we ate in 1947.

In 1969, Americans ate 21 per cent fewer dairy products, 25 per cent fewer vegetables, 25 per cent less fruit, 70 per cent more cakes and cookies and 23 per cent more refined sugar.

Television, which takes the blame for many of our vices, is also a villain in the nutrition war, according to Meyer.

The "tube" influences what a child eats. But she says a person can eat well at fast-food chains by simply carrying an apple or carrot sticks in their pocket and ordering milk instead of colas.

Meyer does sneak a few items into the menus. One of her trick foods is spice-raised bread, which is made with sweet potatoes.

"Of course," she said, "the kids wouldn't be caught dead eating sweet potatoes." So she disguises them.

Periodically, she sneaks spinach into a tossed green salad, and she has a new recipe for a cake made from such things as pinto beans, raisins and apples. (You'll find that recipe elsewhere on this page.)

Her source for that recipe is the Nutrition Education Project in San Ramon, a federally funded program.

From the same project she has learned of a plan that is helping reduce plate waste. Students are given their noon recess before lunch and it has been found that they are in a better frame of mind for eating.

Other similar experiments are being tried elsewhere and you can bet Meyer is keeping her eyes on them. Meanwhile, she dreams about the days when our eating habits are better and we aren't grabbing a bite here and there.

"We didn't get there in one day and we're not going to get back in one day," she said.

## COAL CONVERSION HEARINGS

## HON. BO GINN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. GINN. Mr. Speaker, the Energy and Power Subcommittee of the House Interstate and Foreign Commerce Committee is presently holding hearings on title I, part F, of H.R. 6161—the National Energy Act of 1977. One of the more instructive presentations on this question of industrial coal conversion was presented by the American Paper Institute.

I recommend the following presentation to my colleagues:

TESTIMONY OF THE AMERICAN PAPER INSTITUTE, INC., BEFORE THE ENERGY AND POWER SUBCOMMITTEE OF THE INTERSTATE AND FOREIGN COMMERCE COMMITTEE

## INTRODUCTION

I am Loren V. Forman, Vice President, Scott Paper Company. I appreciate this opportunity of appearing before you today on behalf of the American Paper Institute, the trade association of the pulp, paper and paperboard industry.

The 200 member firms of the Institute produce more than 90 per cent of the pulp, paper and paperboard manufactured in the United States. Net sales of the paper and allied products industry in 1976 were \$39 billion. The industry employs about 680,000 people in approximately 6,000 facilities. Last year, its outlay in wages, salaries and benefits amounted to over \$11 billion, and it paid approximately \$2 billion in federal, state and local taxes.

The industry welcomes the efforts being made by the Administration and the Congress to develop an effective national energy program with emphasis on energy conservation and reduced dependence on imported petroleum fuels.

With due respect to these considerable efforts, however, we believe that inadequate attention has been given to stimulating domestic supplies of appropriate fuels, and to the multiplicity of problems for industry in a program which would add to the regulatory role of government.

However, the paper industry is anxious to make a positive contribution to resolving the nation's energy dilemmas and I feel that I can be most helpful by giving you briefly some background on what our industry has achieved to date in its conservation of energy and in its efforts to shift away from petroleum-based fuels. I then plan to point out how the proposed amendments to the Energy Supply and Environmental Coordination Act of 1974 would affect the paper industry and suggest certain changes.

## THE PAPER INDUSTRY'S PATTERNS OF FUEL USE

While the paper and allied products industry ranks among the top five manufacturing industries in total energy consumption, it is unique because it generates 45 per cent of its energy requirements from non-fossil, self-generated, waste fuels. These fuels bark, hogged wood (chipped residues from forest and manufacturing operations) and spent pulping liquors from which chemicals as well as energy are recovered.

I want to emphasize the contribution of these process waste fuels because they are renewable, being derived from trees which themselves utilized solar energy.

The self-generated proportion of the industry's total energy requirements has been increasing—from 42 percent in 1972 to 45 percent last year. Over recent years, the industry has been substituting wood-waste fuels for oil and natural gas. This substitution has been made in response to market forces. We believe, also, that this is in line with the intent of the Administration's proposed program. In 1976, the substitution represented an equivalent annual saving of 8.4 million barrels of oil.

This trend has been revealed by API's monthly Energy Monitoring System in which 85 percent of the industry's capacity regularly participates. The system has also revealed other trends in fossil fuel and purchased energy use between 1972 and 1976. For example, the industry's use of natural gas has declined from 20 percent to 15 percent, fuel oils have increased from 23 percent to 24 percent and purchased electricity from 4 percent to 5 percent. We estimate electricity needs, approximately 75 percent of which was cogenerated, that is, generating electricity as a by-product of process steam production.

Since coal is the subject on which your Subcommittee is concentrating today, let me report that the paper industry's use of coal declined from 10.5 percent in 1972 to 9.1 percent in 1975, partly as the result of environmental requirements but also because, for many mills, it was simpler and cheaper to use natural gas or fuel oils. Natural gas was particularly attractive because government regulations had kept its price artificially low in interstate markets, and it is unquestionably the cleanest of all the fuels. By 1976, however, API's data show that the contribution of coal had begun to move up to 9.5 percent. A number of companies apparently concluded that, in the longer term, coal would be a more reliable source of energy than natural gas and oil.

As another indication of the industry's shift away from imported fossil fuels toward using more of its own wastes, we would call your attention to the following table, based on information compiled by the American Boiler Manufacturers' Association (ABMA).

BOILERS ORDERED BY PAPER AND ALLIED PRODUCTS INDUSTRY, 1974-76—BY FUEL TYPE

| Fuel type            | Number of units | Capacity              |                  |
|----------------------|-----------------|-----------------------|------------------|
|                      |                 | Pounds steam per hour | Percent of total |
| Spent pulping liquor | 20              | 7,200,000             | 43               |
| Bark and hogged wood | 15              | 4,085,000             | 24               |
| Fuel oils            | 27              | 3,947,000             | 23               |
| Coal                 | 4               | 983,000               | 6                |
| Natural gas          | 13              | 729,000               | 4                |
| Total                | 79              | 16,944,000            | 100              |

These figures are further evidence that with a total of only 27 percent of new boilers being based on fuel oils and natural gas, there has already been a considerable movement in the direction of the industry's own wastes and to some extent toward coal as energy sources.

#### PROBLEMS WITH COAL

Expanded use of coal by the paper industry involves a number of broad aspects which raise grave questions that this Subcommittee and the government should consider.

(a) Does the national interest warrant the mandatory use of coal by those pulp and paper plants in states which are remote from existing coal mines?

(b) Will the nation have the capability to produce the enormous amount of equip-

ment needed to mine, transport, handle, burn and clean up the air emissions from coal?

(c) Is it realistic for the Administration to expect the nation to almost double its production of coal between 1976 and 1985—from 7.9 to 14.5 millions of barrels of oil equivalent per day?

(d) Will the environmental consequences of expanded use of coal add substantially to the industry's already heavy burden of capital investments required to meet present and future air and water standards?

(e) Will many of the plants thought to be capable of conversion to coal be permitted to effect the change because they are located in non-degradation and non-attainment areas?

#### FEA'S CONVERSION ORDERS AND THE PAPER INDUSTRY

Under existing legislation, the Federal Energy Administration recently issued Notices of Intent, the first step in implementing its authority to prohibit oil and natural gas use in certain existing industrial boilers and to require that new boilers be built with alternative fuel-burning capability. Of the 24 existing facilities, 15\* are owned by pulp and paper companies, representing 11 percent of the industry's 1977 total paper and paperboard capacity.

It is ironic and totally contrary to the efforts designed to reduce dependence on imported fuels that at least two of these fifteen facilities are multifuel or combination boilers using bark for the major proportion of their fuel.

The ten pulp and paper companies that have been served with the 15 NOI's to convert to coal have individually estimated their costs of converting and meeting expected environmental standards. The combined total exceeds \$400 million. These additional and usually non-productive expenditures will seriously inhibit the ability of a significant proportion of the industry to add new capacity to meet the nation's future needs of pulp, paper and paperboard.

One API member company has been served with coal conversion NOI's for four of its 18 existing primary pulp, paper and paperboard mills. In public hearings earlier this week, this company pointed out that, on the basis of a cost-effective analysis, it has concluded that FEA has not selected the mills most appropriate for coal conversion. These conclusions were based on such factors as locations unfavorable to coal, approaching obsolescence and the availability of waste fuels. This company also expressed its determination to develop a strategy to systematically reduce its oil and natural gas requirements and to identify appropriate conversion opportunities. Obviously, more careful and expert analysis on the part of the FEA is called for in its current efforts to achieve expanded industrial use of coal.

#### THE POTENTIAL OF WOOD WASTES SHOULD BE RECOGNIZED

In its efforts to achieve a switch away from oil and natural gas by the pulp and paper industry, the Administration should not regard coal as the only major alternative fuel. Energy legislation should clearly and specifically recognize the potential of wood and the manufacturing wastes of the forest-based in-

dustries as logical, economic and environmentally acceptable alternatives.

We would suggest the following:

1. Any legislation which the Congress enacts as a means to encourage a larger degree of energy independence should contain provisions which allow for the specific use of non-fossil, renewable fuels such as bark, hogged wood and spent pulping liquors. Municipal solid wastes could also qualify as an appropriate alternate fuel to oil and natural gas in many boiler applications. Our industry favors the maximum economic recovery and recycling of the paper component of solid waste before the combustible component is burned.

2. Current legislation and proposed amendments, in our view, give the Federal Energy Administrator unnecessarily broad authority to prohibit industrial use of oil and natural gas as well as to require conversion to alternative fuels. Experience with recent NOI's clearly indicates that the FEA does not have the best available information as a basis for valid decisions in this area, especially in regard to the paper industry's combination boiler capable of burning non-fossil, process wastes. We would recommend that such combination boilers be exempted from prohibition orders if their average annual use of non-fossil, waste fuels is 75 percent or more on a Btu basis.

3. Expanded use of waste fuels and coal in the pulp and paper industry could be accelerated by appropriate incentives, particularly in the tax area. The API testified to this effect before the House Committee on Ways and Means on May 18, supporting the proposed 10 percent additional investment tax credit for energy-related facilities which would use more of the industry's own wastes.

#### THE PAPER INDUSTRY WANTS TO MAKE FURTHER CONTRIBUTIONS

Let me repeat my earlier statement—the pulp, paper and paperboard industry is anxious to make further contributions to resolving the nation's energy dilemmas and reducing our dependence on foreign sources of energy.

We feel that this can be done by the regulatory agencies working more closely with industry in order to develop sound information on which to base the nation's overall energy programs.

Business must make its decisions largely on the basis of free market influences and the government should recognize that its regulations add a high degree of uncertainty to those decisions concerned with energy.

Finally, let me reiterate the paper industry's strong preference for the free market mechanism rather than price controls on oil and natural gas. Much of our present problem is the direct result of past controls on natural gas. We believe that a free market approach to all the fuels available to industry will assure impressive results by bringing to bear on the problems the innovative and creative abilities that have brought this country to its enviable level of economic and social development.

#### SUPPORT FOR CONSUMER COMMUNICATIONS REFORM ACT OF 1977

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. LEDERER. Mr. Speaker, for the edification of my colleagues in the House, I would like to share the following resolution of the City Council of Philadelphia in support of the Consumer Communications Reform Act of 1977:

\*These 15 facilities are located in:

Alabama (1).  
Arkansas (1).  
Georgia (2).  
Maine (2).  
Michigan (1).  
Mississippi (1).  
North Carolina (1).  
Pennsylvania (1).  
South Carolina (1).  
Tennessee (1).  
Texas (1).  
Virginia (2).

## RESOLUTION

Memorializing the Congress of the United States of America to hold open hearings on the proposed "Consumer Communications Reform Act of 1977."

Whereas, There has been introduced into the Congress of the United States of America a bill known as "Consumer Communications Reform Act of 1977"; and

Whereas, Said Bill reaffirms the basic concepts of service enacted by the Congress in the "Communications Act of 1934"; and

Whereas, Under the concepts of the "Communications Act of 1934," there has developed the best and most economical communication service in the world; and

Whereas, The proposed "Consumer Communications Reform Act of 1977" protects the interests of the average telephone users; and

Whereas, The views of the average telephone users should be heard before the enactment of any bill affecting them; therefore

Resolved, By the Council of the City of Philadelphia, That we hereby memorialize the Congress of the United States of America to hold public hearings on the proposed "Consumer Communications Reform Act of 1977" so all interested parties will have the opportunity to present their views.

## FOR THE HATCH ACT

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. DERWINSKI. Mr. Speaker, despite the protective smokescreen of "reform" thrown around H.R. 10, the legislation to radically revise the Hatch Act, it is clear proponents are relying heavily on push-button public opinion. They have chosen to put the emphasis on procedure rather than ideology.

Like most Members, I have been bombarded with postcards urging a "yes" vote on H.R. 10. I would be properly impressed, were it not for the fact the opinions expressed were mass produced. A preprinted postcard with the salutation "Dear Representative" and a blank space for the appropriate Member's name certainly is not reflective of any deep-seated concern about a law which for 38 years has preserved the integrity of our civil service system.

Much more impressive are the thoughtful, individually written letters which have been sent to our offices and to the Nation's newspapers. A typical example of the genuine public concern for preserving the Hatch Act is the following "Letter to the Editor" which appeared in the May 31 Chicago Tribune:

## FOR THE HATCH ACT

PARK RIDGE.—Citizens have much at stake as Washington considers a proposal to relax the Hatch Act. Since 1939 that law has prohibited federal and postal service employees from active participation in partisan politics. Under the provisions of H.R. 10, such employees would be permitted to run as partisan candidates for elective office, to campaign for partisan candidates, take an active role in fund raising for partisan candidates and political parties, and serve as officers of political parties.

Proponents have raised 1st Amendment arguments for granting a wider political role

to such employees, but there are countervailing arguments. On three occasions, once as recently as 1973, the Supreme Court has upheld the Hatch Act, ruling that an impartial administration of the laws and freedom from all but the most blatant of political influences would suffer if it were to be relaxed.

The court said: "It is in the best interest of the country, indeed essential, that federal service should depend on meritorious performance rather than political service."

With the unlawful politicization of the civil service in the Nixon administration still fresh in our memory, even the strict penalties and prohibitions in H.R. 10 are plainly insufficient to protect against either coercion of employees or the unlawful influencing of elections, because both can occur in subtle as well as blatant ways. The risk of these disturbing consequences outweighs the arguments for heightened political activity by federal employees.

DANIEL T. SULLIVAN.

## A WEAKNESS IN OUR CHINA POLICY

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. SIMON. Mr. Speaker, each week I do a weekly column for the newspapers and radio stations in my district.

Recently, I did one on the perplexing China situation, which I hope we can resolve with honor.

I thought some of my colleagues might be interested in the column:

## A WEAKNESS IN OUR POLICY

In his recent address at Notre Dame University, President Carter said that he hoped to normalize relations with the People's Republic of China (Mainland China). He "sees the American-Chinese relationship as a central element of our global policy. . . . We hope to find a formula which can bridge some of the difficulties that still separate us."

I do not quarrel with any of that.

But I am troubled by some of our actions and attitudes on the China question. We seem to swing from one extreme to another.

For a long time we tried to pretend that Communist China did not exist, despite the fact that one-fourth of the world's population is there. We recognized the government of Taiwan (Republic of China) as the legitimate government of the mainland, a fiction that we maintained with increasing embarrassment. (The late Prime Minister Nehru of India once told me that he thought there would have been no war in Korea if we had recognized the government in power in China.)

With the bitter separation and antagonisms which later emerged between China and the Soviet Union, we suddenly found it to our advantage to visit and have top-level exchanges with the Chinese.

And now we turn our backs on the government of Taiwan—despite treaty agreements with that nation, despite the remarkable economic recovery that Taiwan has made, and despite the fact that there is appreciably more freedom on Taiwan than in Mainland China, though Taiwan has a long way to go by our standards.

The latest incident is the attempt of Taiwan's Ambassador to the United States James Shen to retire. Our government reportedly has made clear that if he steps down we will not recognize his successor. Ambassador Shen is not accorded with the opportunities for

visits with high U.S. officials usually given an ambassador. We apparently have decided to turn against Taiwan—a friend in fact, as well as by treaty—to curry favor with the People's Republic of China.

Governments will respect us if we stand by our treaties and stand by our friends.

We should tell the government on Taiwan that we intend to honor our treaty commitments, but we believe they should cease the occasional references to returning to the mainland to take over the government there.

If we continue to play the "shrewd" game of simply jumping to the side of those with power, we will gain little in the long run, for no country will trust us.

If we make clear our commitment to stand by our treaties, both Mainland China and Taiwan will gradually accommodate to that reality.

If we take on the appearance of a fair weather friend, if we give signals that we will turn our head the other way if China invades Taiwan, there is a possibility that there could be an armed invasion and bloodshed.

We ought to stop fudging on our allies, make clear our continued friendship for Taiwan, and make equally clear our willingness to develop a good relationship with Mainland China.

DRAFT STATEMENT IN SUPPORT OF AMENDMENTS TO H.R. 10, SECTION 7327 (c) (2) (D) AND (d) (1)

HON. ALLEN E. ERTEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. ERTEL. Mr. Speaker, today I am inserting two amendments to H.R. 10 into the Record, which I believe are essential to insure that the amendments contained in H.R. 10 will not violate the fifth amendment. I had initially expressed my concern about the operation of section 7327(c) (2) (D) on page 40 during the earlier debate on amendments to H.R. 10 (CONGRESSIONAL RECORD, May 18, 1977, p. 15424). Since that time, I have become even more firmly convinced of the need to alter the procedure authorized by subsection (D) when an employee fails to respond to charges in writing within the time specified.

Section 7327(c) (2) (D), on page 40 of H.R. 10, provides that an employee's failure to respond in writing to charges made against the employee may be construed as "an admission by the employee of the charges set forth in the notice and a waiver by the employee of the right to a hearing on the charges." Such a provision would violate the employee's right to remain silent, guaranteed by the fifth amendment's prohibition on involuntary self-incrimination. There may be any number of reasons why an employee would not respond to charges within the time specified—including for example, an attorney's failure to file a response within the specified time. Whatever the reason for an employee's failure to respond, the employee should not automatically be declared guilty of a violation simply because of the failure to answer the charges. If that were true, a groundless charge could be filed against an em-

ployee and that employee could be found in violation of the specified section simply because no answer was filed.

In order to prevent this from occurring, I will offer two amendments that will provide a reasonable alternative for the failure of an employee to answer charges within the specified time period. The first amendment would strike subsection (D) on page 40, replacing that subsection with a notice requirement. This notice requirement would advise the employee of the effect of his failure to answer the charges as defined in section 7327(d) (1).

The second amendment that I will offer specifies that the Commission must have a prima facie showing of the violation before it can proceed to a final decision against the employee, when that employee has failed to respond to the charges. This is the critical portion of these two amendments, requiring the Commission to examine the charges and evidence offered in support of those charges before it can issue a determination against the employee. With the deletion of the present subsection (D) and the insertion of these two amendments, H.R. 10's procedure for dealing with an employee's failure to respond to charges can be brought within constitutional limits and I urge the full support of the House for this critical amendment.

**ABORTION FUNDING PROHIBITION  
1978 FISCAL YEAR LABOR/HEW  
APPROPRIATIONS ACT**

**HON. HENRY J. HYDE**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. HYDE. Mr. Speaker, as the House will be shortly considering the Labor/HEW Appropriations Act for the 1978 fiscal year, and the whole question of abortion funding once again, I felt the following letter might be of interest to my colleagues on two of the most frequently asked questions with regard to the so-called Hyde amendment prohibition on abortion funding, enacted as part of the fiscal year 1977 measure. Some of these same points were recently raised in a Washington Post editorial, June 2, 1977, and need to be addressed.

In a letter to John P. Mackey, Esq., Washington, D.C., which addresses itself to first, the effect of the Federal court challenge to 1977 fiscal year prohibition, and the whole continuing question of Government funding of abortion, and second, the often raised equal protection argument, a distinguished law professor, David W. Louisell, who is the Elizabeth Josselyn Boalt professor at the University of California Law School—Berkeley, makes some very important and timely points, which are worthy of consideration when the fiscal year 1978 measure reaches the House floor.

The full text of Professor Louisell's letter follows, and I hope this information will be valuable to other Members of Congress in considering this whole difficult, yet timely and important issue,

which also goes to the very heart of our power of the purse under our constitutionally mandated Congressional Appropriations Power.

The text of the letter of follows:

DAVID W. LOUISELL,  
Carmel, Calif., June 2, 1977.

JOHN P. MACKAY, Esq.,  
Director, Washington Information Bureau,  
The Ad Hoc Committee on Defense of  
Life, Washington, D.C.

DEAR JOHN: The propaganda put forth by the abortion forces in their latest opposition to the Hyde Amendment, as reported by you to me, seems all but incredible. How abortion proponents can invoke the First Amendment, or Equal Protection, to keep Congress from prohibiting coerced violation of the conscience of the majority, is a mystery to me.

If you will pardon my reminding you, I predicted that the Roe and Doe decisions would let loose a rash of extremism that, reaching beyond permissive abortion as such, would threaten the very vitals of our constitutional system. Even the promoters of permissive abortion in candid moments must realize that it is one thing to permit it, and quite another to force the public to pay for it. I cannot believe that the Congress, directly or indirectly, by action or inaction, will turn over the country's purse strings to the judiciary, on the befuddled claim of a right to have permissive abortion paid for by public funds.

The Supreme Court certainly has not expedited review of Judge Dooling's decision. It seems to me that Congress would be well advised to let the tragic error of one judge rest in the limbo to which it was rightly consigned by its illogic, unprecedented affront to Congressional control of public funds, and disturbing implications for the rights of conscience of most Americans.

Sincerely,

DAVID W. LOUISELL.

**IN TRIBUTE TO REV. ORNULF  
AAGAARD**

**HON. GLENN M. ANDERSON**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. ANDERSON of California. Mr. Speaker, for the past 2½ years the Norwegian Seamen's church in San Pedro has flourished under the guidance and leadership of a unique and remarkable man. So when the Rev. Ornulf Aagaard leaves San Pedro for his native Norway on June 14, 1977, he will be missed by the entire Los Angeles-Long Beach Harbor community.

Reverend Aagaard was born in the town of Kristinsend on September 20, 1940. He entered the ministry of the Norwegian Lutheran Church and graduated from Menighetsfakultet, a private theology university in Oslo.

Following his graduation, Reverend Aagaard joined the Seamen's Mission and was sent to Antwerp, Belgium, for a brief period of time. Soon, he was transferred to the Norwegian Seamen's Church in New York City in 1970, where he was to spend the next 5 years. In March 1975, Reverend Aagaard arrived in San Pedro as pastor of the church there.

Fittingly, the Norwegian Seamen's Church in San Pedro stands near the

harbor, overlooking the waterfront of one of the world's busiest port complexes. Sponsored by the state church of Norway, the seamen's churches are located in most of the world's international ports, serving Scandinavian ships and their officers and crews as they travel around the world engaged in maritime commerce.

Under Reverend Aagaard's enthusiastic and able leadership, the San Pedro church has been extensively renovated and modernized to serve as a "second home" to Norwegian seafarers. On October 24, 1975, the San Pedro church was visited by King Olaf V of Norway. Reverend Aagaard was in charge of the occasion, hosting over 2,500 guests in the church. The visit, part of the 150th celebration of the Norwegian emigration to the United States, was a complete success.

Aside from his duties as pastor of the Norwegian Seamen's Church, Reverend Aagaard has in many ways become an ex-officio ambassador or good will for his native land. He has counseled many local residents planning to take vacations to Norway, often helping them make arrangements for their stay. When the California State University, Long Beach chorale visits Norway this fall for a concert in Bergen, many of their arrangements will have been made by the Reverend Aagaard.

Reverend Aagaard has been involved in his adopted community in many other ways as well. He often speaks before school classes, giving the students his first hand view of life in Norway. He is also an active member of the Sons of Norway, and has formed a committee to investigate the possibility of establishing a retirement center for Norwegians in the harbor area. It is unfortunate that the Reverend will not be here to see that project completed, since I understand that the committee has decided to proceed with this worthy goal.

When Reverend Aagaard returns to Norway, he will assume new duties as Res-Kap, or parish assistant, in the town of Aasane near the city of Bergen. He will be missed by the seamen whom he visited with when they came into port. In the brief time that he was with us, Rev. Ornulf Aagaard has become a trusted and valued friend. We hope that he will have the opportunity to visit our area again in the years to come.

My wife, Lee, joins me in expressing our best wishes to Rev. Ornulf Aagaard, his lovely wife, Aslaug, and their children; Bjarne, Oyvind, and Torel. I am sure that the memories which they will take with them are reflections of the good feelings and affection with which they will be remembered in San Pedro.

FRED WARING

**HON. JOSEPH M. McDADE**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. McDADE. Mr. Speaker, I have the distinct pleasure to submit this day a

joint resolution which calls for national recognition of a great Pennsylvanian, Mr. Fred Waring. For the past 62 years Fred Waring has applied his great talents to the singular task of bringing joy to music lovers in America and throughout the world.

In 1918 Mr. Waring formed a dance band while attending the Pennsylvania State University, which grew to be one of the most long-lived and famous choral groups, "The Pennsylvanians." Together with the Pennsylvanians, Fred Waring toured the world and still, Mr. Speaker, at the age of 77 continues to direct this magnificent singing group throughout America.

Mr. Waring and the Pennsylvanians have appeared on Broadway, radio, television, and film. From his appearance in 1923 at the Balaban Theater in Chicago, Fred Waring turned to radio in 1933 as a media which would allow many more Americans to enjoy the music he created. In 1948, he began television broadcasting while at the same time continuing his national tours. In addition to his already overburdened schedule, Fred took the time to create a music workshop so that others could share his mastery of musical direction and composition.

June 9 will mark his 77th birthday and has been declared "Fred Waring Day in Pennsylvania." On behalf of the entire Pennsylvania congressional delegation, I commend to my fellow Members, Mr. Fred Waring. May he continue through long life the richly deserved gratitude of his Nation.

#### REVISING THE HATCH ACT IS NOT THE WAY

**HON. E. THOMAS COLEMAN**

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. COLEMAN. Mr. Speaker, in the May 31, 1977, edition of the Kansas City Times newspaper, an editorial expressed grave concern over the potential hazards of revising the Hatch Act.

Inasmuch as I believe these thoughts should be considered by the entire Congress and made available to the public, I submit into the RECORD the text of this editorial:

#### REVISING THE HATCH ACT IS NOT THE WAY

In theory, the repeal of certain portions of the Hatch Act would serve to grant political freedom for the federal and postal service employees under the 1939 law. In fact, extensive revision of the law would serve to unleash a potentially vast politicization of millions of government and postal workers.

Sponsors of the Hatch Act revisions showed their true motives when they withdrew the bill from the House floor after an amendment was attached prohibiting the use of union dues, fees or other assessments for any political purposes. Ninety-four Democrats joined 135 Republicans, who are natural enemies of Hatch revisions, in adopting the amendment. It was a setback for Rep. William D. Ford (D-Mich.) and Rep. William Clay (D-Mo.), who had worked hard on the bill.

Even the constraints in the amended propo-

sals would not serve to curb the danger of coercion and potential political muscle that would be at the disposal of labor or the party in power.

There is little doubt that a law, almost 40 years old, cannot remain indifferent to changing times and the growth of government. The principles of the Hatch Act—which prohibit partisan political activity by federal employees, solicitation of political contributions, service as officers in political parties, convention delegates or partisan candidates for public office—are essential in keeping special interests out of government. This does not disenfranchise federal employees, nor does it take them out of participation in nonpartisan elections or public office.

Because of the far-reaching restrictions of the Hatch Act, many federal employees impose more rigid constraints on themselves than the law requires. The House proposal does not provide adequate safeguards and leaves the employees vulnerable to abuses of the law.

The Hatch Act has survived three tests in the Supreme Court. Opponents of the law say it infringes on First Amendment freedoms. Proponents say it represents the right of a federal employee to express political preferences at the ballot box without fear of reprisal.

If backers of the proposed revision think the change would not enhance the power of a boss's influence they are hallucinating. Employees cannot help but feel intimidated by a superior who is seeking office or working for a candidate. The law, to an extent, is being bent now if not broken.

Aside from the issue of political elections is the influence that already exists in government on granting funds and letting contracts. All that is needed is for every restriction to be lifted and the closets could become filled with political scandals.

The Hatch Act became law in 1939 before government employees' unions became strong. The possibility of a built-in lobby in the federal government is alarming. The proposal to repeal portions of the Hatch Act leaves the door open to the same practices that brought on passage of the law. To revert to that era, even though the language of the bill loosely addresses violations, would invite unneeded trouble and a dilution of the electoral power.

#### POSTAL SERVICE: A VIEW FROM RURAL AMERICA, PART III

**HON. JAMES ABDNOR**

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. ABDNOR. Mr. Speaker, service is too often the forgotten part of the title: The U.S. Postal Service—at least as far as the postal bureaucracy is concerned. At the local level dedicated postmasters and clerks for the most part do a creditable job, but they must respond to the dictates from the top.

Future service of the Postal Service is a subject of concern in rural America. Of particular alarm is the recent announcement by Postmaster General Ballar that come next year Saturday mail delivery will be a thing of the past—to save money, of course—but we are going to have to take a hike in postage rates, too, because the cut will not save enough money to solve the continuing financial problems.

Mr. Speaker, rural America is just as

anxious as Mr. Ballar to find a resolution to the postal dilemma. Some ideas toward this goal were voiced editorially in the May 23, 1977, edition of the Rapid City, S. Dak., Journal. I commend it to the attention of my colleagues:

#### POSTAL SERVICE TRADEOFF MIGHT PROVE ACCEPTABLE

One thing that can be said about Postmaster General Benjamin Ballar—he's got guts.

Flying into the face of congressional sentiment, Ballar told a U.S. Senate panel recently that Americans probably will pay higher postage charges and receive mail only five days a week by early next year.

Ballar said a first-class stamp will increase from 13 cents to at least 15 cents and will be 16 cents if six-day delivery is maintained.

Ballar also said the Postal Service soon will resume closing rural post offices in areas where it feels it can do so without hurting service.

An internal Postal Service study released this month said \$490 million could be saved by closing post offices in 17,000 of the 30,000 communities that have them now. More than 7,000 of these offices do less than \$5,000 in business each year.

Ballar told the Senate panel no such large scale closings are contemplated at present. The rate would be similar to the previous rate of about 300 post office closings a year.

The Postal Service has not been closing offices since Congress last year passed a law forbidding closings while the study commission deliberated. With the study completed, the Postal Service is now free to close offices again.

Saturday mail delivery and closing small offices are hot issues in South Dakota with its largely rural population.

Previous proposals to close post offices and replace them with contract station or rural mail carriers met with resistance from patrons and the congressional delegation.

However, some post offices in the area administered by the Rapid City post office were replaced with contract stations located in stores or private homes. Postmaster Robert Hart says costs have been reduced by two-thirds. Further, he has received no complaints about the level of service.

Dropping Saturday mail service would not have the same effect in metropolitan areas where much commerce shuts down on Saturday as it would in rural areas. While we have seen no evidence that continuing six-day service in rural areas while cutting back in metropolitan areas is being considered, we suggest it should be.

If it comes to a tradeoff, residents of rural areas might be inclined to drop resistance to post-office closings provided equal service can be provided in other ways, in return for Saturday mail service.

We think it's an alternative worth exploring.

#### AUCCOIN SALUTES THE PORTLAND TRAIL BLAZERS

**HON. LES AUCCOIN**

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. AUCCOIN. Mr. Speaker, as a proud Oregonian and an ardent Portland Trail Blazer basketball fan—two facts that almost by definition go hand in hand—I congratulate the Blazers for their dramatic National Basketball Association championship.

More importantly—and with due respect to the Philadelphia congressional

delegation—I want to suggest that there is meaning in this stunning championship that goes beyond basketball or the victory itself.

This young Portland team has given all of us a reminder that unselfish human cooperation and mutual respect can overcome high odds.

It has shown us that individual effort, blended in selfless team play, can surpass the handiwork of even the greatest of talents working alone.

It has shown again that the whole can be made greater than the sum of its parts.

Today, I salute each one of the Trail Blazers and Coach Jack Ramsey for their splendid individual and team effort in capturing professional basketball's world championship.

And I suggest to my colleagues, whatever part of the country they represent, that the triumph of the values and principles that went into this championship is something everyone can applaud.

And it is something from which each of us, and the country itself, can learn.

#### MAKING THE CASE FOR CONSUMERS

**HON. LESTER L. WOLFF**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. WOLFF. Mr. Speaker, in recent weeks there has been considerable debate over legislation to create a Consumer Protection Agency. In a recent editorial, the New York Times presented both the logic and the necessity of this agency. So that my colleagues may have the opportunity to read this editorial, I submit it for the RECORD:

#### MAKING THE CASE FOR CONSUMERS

For the fifth time in seven years, Congress is considering the creation of a separate agency to defend the interests of consumers. The idea is quite simply to inject a consumer perspective into governmental procedures. Federal departments and agencies make thousands of decisions each year that affect consumers, but they are rarely so well heard as equally interested business firms. Representation in Washington requires money and expertise. Business organizations maintain staffs of lawyers and lobbyists to monitor government actions. Consumer groups make an occasional splash on individual issues, but lack the resources to follow the hundreds of debates that occur throughout the bureaucracy.

That would become the job of the proposed consumer protection agency. Its staff would represent perceived consumer interests and seek to influence decisions. Like any private interest group, the agency would have the right of petition, to present testimony, and to appeal unwanted decisions through the courts.

Most business organizations oppose the agency, charging that it might abuse its mandate. Firms already hemmed in by Federal rules, and inundated by Federal paperwork, fear yet another layer of bureaucracy. They are particularly aroused by the proposal that the agency be empowered to demand information from private corporations and to use it in court appeals.

Such fears are not groundless, but certain safeguards have been built into the proposal.

All requests for information by the agency would need endorsement from the President's Office of Management and Budget and small businesses would be exempted entirely. Moreover, with only \$15 million to spend each year, the agency would not have the resources for fishing expeditions into corporate files or for pointless litigation. There is, however, no way to guarantee that every agency cause would be meritorious or worth the bother and expense.

Stripped of rhetorical flourishes, the debate over the agency comes to this: The consumer's cause is imperfectly represented in Federal administrative proceedings. A separate consumer agency would help to correct the balance, at the cost of some additional red tape. Is it worth the price? The potential benefits seem sufficiently great and the potential harm seems sufficiently limited to answer yes, let's try it.

#### H.R. 7010—COMPENSATING INNOCENT CRIME VICTIMS

**HON. PETER W. RODINO, JR.**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. RODINO. Mr. Speaker, some 20 States presently have programs to compensate innocent crime victims for unreimbursed losses resulting from physical injuries caused by crime. H.R. 7010, which the House is scheduled to take up on Tuesday, would provide Federal assistance to States that operate such programs.

Several organizations have expressed their support for such legislation, including the American Bar Association, the National League of Cities/U.S. Conference of Mayors, the National District Attorneys Association, the National Council on Crime and Delinquency, the National Retired Teachers Association/American Association of Retired Persons, Americans for Democratic Action, the International Conference of Police Associations, the Fraternal Order of Police, and the United Automobile Workers International Union.

Since the Committee on the Judiciary's vote to report favorably on H.R. 7010, several of these organizations have contacted the committee to underscore their support for H.R. 7010. In addition, two other organizations that had not previously expressed their support—the International Association of Chiefs of Police and the National Moratorium on Prison Construction—have written the committee to endorse the legislation.

So that the Members will be aware of the widespread support for the legislation, I am placing in the RECORD several of the letters and statements of support received by the committee:

#### INTERNATIONAL ASSOCIATION OF CHIEFS OF POLICE, INC.,

Gaithersburg, Md., June 1, 1977.

Hon. JAMES R. MANN,  
Chairman, Subcommittee on Criminal Justice, Washington, D.C.

DEAR CHAIRMAN MANN: It is with a great sense of purpose that I convey to you our Association's unqualified support of H.R. 7010. The proposed legislation is a comprehensive funding measure designed to be supportive of the 16 states which have already adopted legislation providing for compensa-

tion to innocent victims of violent crimes. Furthermore, in analyzing the requirements for state participation, H.R. 7010 acts as a true incentive for the remaining states to adopt victim compensation legislation.

As early as 1967, the International Association of Chiefs of Police adopted a resolution at their annual conference which was supportive of indemnification to victims of crime (a copy of which is enclosed).

The time has come for our state legislators and the Congress to express in fair, comprehensive and meaningful terms, the genuine concern we owe to the victims of crime and their families. For so many years the rights and concerns of victims have been paid mere lip service. However, it is now apparent that H.R. 7010 is representative of the type of legislative response the American people deserve.

On behalf of the International Association of Chiefs of Police and its over 10,000 members, I respectfully urge passage of this most important and long overdue legislation.

Sincerely,

GLEN R. MURPHY,  
Director, Bureau of Governmental  
Relations and Legal Counsel.

#### INDEMNIFICATIONS TO CRIME VICTIMS

Whereas, the Supreme Court of the United States has, in its recent rulings, expressed considerable concern for the rights of the criminal defendant; and

Whereas, more and more protection is being given to such persons, particularly indigent defendants; and

Whereas, little concern is expressed for the victims of violent crime and their families; and

Whereas, the image of justice could be materially enhanced by legislation which would indemnify the victims of crimes of violence and/or their surviving kin;

Now, therefore, be it resolved that the International Association of Chiefs of Police go on record as advocating that suitable legislation be enacted either in the states or on the federal level, to provide for reasonable indemnification to the victims of violent crime and/or their surviving kin.

MONTGOMERY COUNTY, OHIO,  
June 3, 1977.

Re The Victims of Crime Act of 1977.

HON. PETER W. RODINO, JR.,  
Chairman, Committee on the Judiciary, U.S.  
House of Representatives, Washington,  
D.C.

DEAR MR. CHAIRMAN: I wanted to thank you and Congressman James Mann for the opportunity to testify before your committee's "Criminal Justice Sub-Committee" regarding "The Victims of Crime Act of 1977."

In that testimony given on April 27, 1977, I indicated the strong support of the National District Attorneys Association for that Bill. I further indicated that the National District Attorneys Association had long supported, in principle, the concept of victim compensation.

The National District Attorneys Association Commission on Victim Witness Assistance feels that your Bill will provide the impetus for the creation of equitable victim compensation statutes in those states where they do not now exist. We think that fundamental justice requires that government provide equitable financial relief to those whose lives have been damaged and interrupted by criminal acts. Moreover, we strongly feel that victim compensation and other forms of victim and witness assistance will foster more citizen cooperation with police and prosecutors alike. It is our decided conclusion that in the long run sensible programs to assist crime victims will constitute a means for also assisting criminal justice agencies in their efforts to reduce crime.

Your Bill is a good one: We support it and trust that Congress will act with dispatch in approving it.

Respectfully,

LEE C. FALKE,

Prosecuting Attorney of Montgomery County, Ohio, and Co-Chairman, National District Attorneys Association, Commission on Victim Witness Association.

INTERNATIONAL UNION, UNITED  
AUTOMOBILE, AEROSPACE & AGRICULTURAL IMPLEMENT WORKERS  
OF AMERICA—UAW

Washington, D.C., June 6, 1977.

HON. PETER RODINO,

Chairman, Committee on the Judiciary, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Our new president, Doug Fraser, has asked me to express to you the strong support of the United Auto Workers for H.R. 7010, the Victims of Crime Act of 1977.

The principle that innocent victims of violent crimes should be compensated for economic loss is something in which the UAW has long believed. It is a principle that has gathered widespread support across the country in recent years.

The time has come for the Federal government to help states compensate innocent victims of violent crime, with the justified establishment of certain criteria for eligible state programs. H.R. 7010 does precisely this, and the UAW is delighted to endorse this legislation.

Sincerely,

HOWARD G. PASTER,  
Legislative Director.

INTERNATIONAL CONFERENCE OF  
POLICE ASSOCIATIONS,  
Washington, D.C., June 1, 1977.

HON. PETER RODINO,  
Chairman, House Committee on the Judiciary, Washington, D.C.

DEAR MR. CHAIRMAN: I am in receipt of a copy of H.R. 7010 and House Report 95-337 relative to the Victims of Crime Act of 1977.

Please be advised that we have reviewed this amended legislation and find it meets with our approval as per our recent testimony before your Committee.

Sincerely,

ROBERT D. GORDAN,  
Secretary-Treasurer.

#### STATEMENT ON VICTIM COMPENSATION

We strongly support H.R. 7010, to provide for grants to States for payment of compensation to victims of violent crimes.

We believe that it is urgent that the problems of victims of crime be addressed directly by Federal legislation. So far, victim compensation programs have been enacted by less than half of the states (17 states by September, 1976).<sup>1</sup> Furthermore, most states have inadequate funds to finance their victim compensation programs. It is important that victim compensation programs be established and adequately funded in every state, and that some national standards for victim compensation programs be established. The present bill, H.R. 7010, which would provide Federal matching funds to state programs (paying for half of most program costs), is a very good mode of Federal involvement.

Recognition of victim needs through victim compensation is an excellent way for

community concern for the victims of crimes to be expressed. Victims of violent crime are often poor and do not have adequate insurance. Compensation can alleviate some of the inconvenience and emotional trauma through providing payment for medical bills, which are often high, and providing some recompense for the victim's lost labor. It may also lessen the community's need for retribution and vengeance and contribute to the needed restoration and reconciliation of everyone involved.

Compensation, as a positive expression of community support for victims, stands in sharp contrast to the present U.S. overreliance on the negative expedient of incarcerating offenders for both violent and unviolent crimes in destructive prison settings.

Compensation can be a first step toward alleviating the economic and social problems of crime. As former Supreme Court Justice Arthur Goldberg has said, "Ultimately, society pays the costs [for victims of violent crimes] in terms of lost jobs, unemployment compensation, welfare, and a dangerous feeling of insecurity. It is only realistic that society, through a program of public compensation, address itself explicitly to costs it bears in the first place."<sup>2</sup> Of course, poverty, unemployment, and massive social injustice are not characteristics limited to victims of crime, but are characteristics also of a majority of the persons accused or convicted of crimes and then imprisoned. At least four recent studies have shown a very close correlation between changes in the unemployment rate and state and federal prison populations.<sup>3</sup> In a study for the Joint Economic Committee, Dr. M. Harvey Brenner estimated that an increase of 3,340 state prison admissions can be attributed to a one percent rise in unemployment sustained over a six year period. Ultimately, we would hope that Congress and the Administration would see fit to enact and implement comprehensive national programs, in order to attack the social injustices which are at the root of the problems for both victims and offenders. One particularly important objective should be full employment for all adults seeking work.

We would hope also that this bill, by dealing with the needs of victims, can serve as a beginning of an alternative way to cope with crime through the increased involvement by victims. We offer the concept of offender restitution to victims as a useful extension to programs of victim compensation. In a restitution program, an offender can work out an agreement to rectify or compensate for the damage he/she has caused, either through a supervised meeting with the victim, or indirectly through a probation officer. The offender is helped to find a job in order to meet his/her obligations. Restitution can be used as a means of diverting some cases from the courts, as in Tucson, Arizona, or it can be used in addition to very short prison sentences, as in Minnesota, Georgia, Oregon, Massachusetts, and Iowa. Conceivably, restitution might be a reason-

<sup>1</sup> Goldberg, Arthur, Preface, Symposium on Governmental Compensation for Victims of Violence, 43 Southern California Law Review (1970), pages 2 and 3.

<sup>2</sup> M. Harvey Brenner, "Estimating the Social Costs of National Economic Policy: Implications for Mental and Physical Health, and Criminal Aggression," a study prepared for the Joint Economic Committee, p. 88; Congressional Budget Office, "Federal Prison Construction: Alternative Approaches," Budget Issue Paper, January, 1977; Congressional Research Service, "Prison Population and Costs—Illustrative Projections to 1980," April 1974; and William Nagel, "A Statement on Behalf of a Prison Moratorium," *Crime and Delinquency*, April, 1977.

able alternative sanction for certain persons guilty of violent offenses who are not a risk for repeating their offense.

Offender restitution to victims has much of the same positive attributes as victim compensation programs, but it has some additional value besides. It can bring together the victim and the wrongdoer as human beings, not as stereotypes. It allows the lawbreaker to remain in the community, since he/she has agreed to rectify the original wrong. Also, it can save the community, the state, and the affected individuals the economic and psychic costs of trial.

We do have some small suggestions on ways to improve the bill. We hope that there could be an explicit requirement that state statutes provide compensation to rape victims. The state laws often fail to address the problems of pregnancies inflicted on rape victims, as well as nonphysical injuries. An extensive public education campaign would be helpful to alert persons, especially those who are poor, to the existence of victim compensation programs. Perhaps Federal matching funds could be provided for this purpose. Finally, although we support the provision that allows matching funds for compensating lost earnings up to \$200 per week per individual, we are uneasy about limiting this compensation solely to wage earners. The time and labor of all persons are valuable, including those occupations which are often unpaid, such as housework and child care. A more equitable provision would reimburse all adults for their lost time at a flat rate of \$100 to \$125 a week, possibly subject to some determination of need.

Finally, we wish to commend the program for its modest and reasonable costs. We note that the Committee has proposed an authorization of \$40,000,000 in 1978, \$50,000,000 in 1979, and \$60,000,000 in 1980. This is only a small portion of the three and a half billion dollars budgeted for law enforcement and justice expenditures by the Federal government in the first Congressional budget resolution for 1978. These sums are also less than unnecessary and harmful proposals for Federal prison construction which we have opposed in other statements.<sup>4</sup>

We urge that Congress promptly enact H.R. 7010.

STEPHEN W. ANGELL,  
Legislative Coordinator, National Moratorium on Prison Construction.

#### BIG BAD BUSINESS

#### HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. DEL CLAWSON. Mr. Speaker the editors of the Washington Star take a careful and objective look at the proposed "tiny" Agency for Consumer Protection in the lead editorial June 4, 1977. Their comparison of President Carter's comparison with ACP and HEW is worthy of each Member's serious and sober consideration before supporting a

<sup>4</sup> See the statement by Milton Rector, President of the National Council on Crime and Delinquency, in opposition to the \$67,588,000 proposed for constructing three new federal prisons and planning two others in fiscal year 1978, in Part 7, Hearings before the House Appropriations Subcommittee on State, Justice, Commerce, and the Judiciary, 95th Congress, first session, page 471. Other statements on the same issue appear on pages 458 to 497.

proposal with such an obvious potential for interagency infighting with tremendous cost to the consumer. Rather than help the consumer, this type of agency fighting agency may result in an uncontrollable Trojan horse in the Federal system. The editorial follows:

#### BIG BAD BUSINESS

An interpretation of President Carter's message to businessmen, during a pep rally for the consumer protection agency the other day, could well be: Stay home and mind the store, but don't come poking your noses into governmental affairs.

"Individually, the business leaders of our country are fair; they want to be sure that their own customers are protected," the President said. "Unfortunately, when business leaders organize and hire lobbyists, they lose that individual commitment to their customers. . . ."

Mr. Carter is upset over opposition from business groups, particularly the U.S. Chamber of Commerce, to legislation that would create an Agency for Consumer Protection. The President would have everyone believe that the ACP will be a "tiny" agency with no authority beyond "the right to be heard."

Well, \$15 million a year is small by Washington standards and it is, as Mr. Carter pointed out, less than the Department of Health, Education and Welfare spends in an hour. But if the ACP is created and follows the pattern of most governmental agencies, in a few years the infant agency will have grown into a bureaucratic giant. We might note here that the HEW to which Mr. Carter compared it started out less than 25 years ago with a budget of approximately \$1.7 billion while its latest budget runs to more than \$145 billion.

No authority? What does the White House call the right to intervene in the affairs of practically all other federal agencies and the right to sue them if ACP officials disagree with their decisions? What does it call the right to compel businesses to answer written interrogatories?

Business is rightly concerned about the legislator. Is it being "selfish," as Mr. Carter characterized the business groups, to oppose legislation that will create more bureaucratic red tape for businessmen who already are strangled in red tape, to oppose legislation that very likely will increase the cost of doing business and thereby increase costs to consumers, to oppose legislation that will add another unnecessary layer of government for which taxpayers (consumers) will have to pay the bill?

But the thing that bothers us most about Mr. Carter's statement is the implication that businessmen have no business organizing themselves to argue for what they believe in.

We are reminded of a memorandum written several years ago by Lewis Powell, before he became a Supreme Court Justice, in which he warned business leaders that they were too complacent about attacks from many quarters of the economic system. "One of the bewildering paradoxes of our time," he wrote, "is the extent to which the enterprise system tolerates, if not participates in, its own destruction."

Mr. Powell urged businessmen individually to "confront this problem," but more important, he said, was the need to organize. "Strength lies in organization, in careful long-range planning and implementation, . . . in the political power available only through united action and national organizations."

But Mr. Carter implies that when businessmen organize they become "unfair"; they become "selfish special interest groups."

So go home, businessmen. Leave the legislating and the lobbying and the formulation

of public policy and governmental programs to the White House, George Meany and Ralph Nader.

#### CUBAN GOOD FAITH NEEDED FOR DIPLOMATIC RELATIONS

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. BROOMFIELD. Mr. Speaker, with the administration's announcement that the United States and Cuba will exchange midlevel diplomatic personnel, it appears that we are moving toward reestablishing full diplomatic relations with the Castro regime, and lifting the 16-year-old trade embargo against Cuba.

Despite these administration initiatives, the Castro regime persists in a number of policies that are clearly unacceptable.

Two years ago, the Castro regime flouted the principle of self-determination by sending thousands of troops to fight in the Angolan Civil War and to impose a Communist government in that country.

Today, Castro maintains a force of more than 10,000 Cuban troops in Angola. At the same time, he is trying to expand his influence by deploying military advisers throughout the African continent—in Ethiopia, Mozambique, and elsewhere. Premier Castro's Communist revolutionary activism clearly has not abated.

Cuba still has made no effort to compensate American citizens for the \$1.8 billion in property and assets it expropriated following Castro's takeover in 1959.

In the area of human rights, at least 18 American citizens are incarcerated in Cuban jails, 7 of whom are being held on charges of espionage or allegations of a similar political nature. Others are being held on charges of drug use or hijacking. In this same vein, credible reports indicate that as many as 15,000 to 20,000 Cuban citizens are imprisoned because of their opposition to the Communist government. The United States must apply the same human rights criteria to Cuba that we apply to other nations and demand that the Castro regime take steps to resolve this concern.

Finally, the Cuban Government has announced that as of April, it will terminate the antihijacking agreement with the United States. This agreement has served as a strong psychological force to discourage the hijacking of American planes to Cuba. In unilaterally terminating one of the few ties between our two countries, and by refusing to assure us of the future security of our naval base at Guantanamo Bay, the Castro regime calls its good faith into question.

Mr. Speaker, because these problems persist between our two governments, and because I believe the Congress and the American people should be partners in this proposed major change in U.S.

policy, I am joining, today, the distinguished Senator from Kansas, ROBERT DOLE, in introducing a resolution expressing opposition to the normalization of U.S. relations with the Cuban Government until the Cuban Government demonstrates its good faith by meeting certain conditions.

These conditions of good faith are:

First, compensation for U.S. property confiscated by Cuba in 1959;

Second, release and repatriation of U.S. citizens currently imprisoned in Cuba on political charges, along with progress toward observance of the human rights of Cuban citizens;

Third, withdrawal of Cuban military troops and military advisers from Africa; and

Fourth, renewal of an antihijacking agreement with the United States and guarantees for the future security of the U.S. naval base at Guantanamo Bay.

Mr. Speaker, the United States cannot unilaterally restore political and economic relations with Cuba. If there is to be a sound relationship between our two countries, both governments must show good faith.

If the Castro regime is unwilling to meet us halfway by adjusting its policies and eliminating these problem areas, then the United States need not rush to extend Cuba recognition or trade considerations.

I urge my colleagues to join in supporting this resolution which will outline a sound basis for reestablishing ties with the Government of Cuba.

#### ETHIOPIA—A TURN FOR THE WORSE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. DERWINSKI. Mr. Speaker, the unruly and undemocratic behavior of the current Marxist regime in Ethiopia has been the subject of much international attention of late. Hardly a day goes by without some new report of the ruling military junta's political oppression that now appears to have reached pervasive proportions.

The recent seizure by Government forces of the Radio Voice of the Gospel, Africa's most powerful broadcasting station, illustrates just how sweeping the crackdown has become. Owned and operated by the Lutheran World Federation, it was the only independent media source in Ethiopia. Since its nationalization, the station has been renamed Radio Voice of Revolutionary Ethiopia and is now transmitting Ethiopian propaganda throughout Africa.

Mr. Speaker, it is now quite clear that the expropriation of the Radio Voice of the Gospel was part of the Ethiopian Government's policy of placing all forms of media under its control to further the social, economic, and political objectives of the Ethiopian revolution. Although it

may be stretching it a bit to suggest that this takeover is directly linked with Ethiopia's recent decision to close five U.S. facilities in Ethiopia and expel the associated personnel, I believe the two actions demonstrate that the present Ethiopian regime does not wish to maintain the close relationship that historically has existed between our governments and people.

Unfortunately, what is emerging today in Ethiopia is quite similar to what we have seen take place in recent years in such other African Marxist states as Angola, Mozambique, and Somalia. In fact, I think it is fair to say that the Ethiopian junta has "gone to school" on what has occurred in those countries and is implementing—with the assistance of its Cuban tutors—a well thought out scenario that is culminating in the termination of Ethiopia's close ties with the Western world and the establishment of a very cozy political, military and economic relationship with their new found Marxist brothers and sisters in the socialist East.

Such a turn of events is, indeed, lamentable and, when coupled with all the other bad news we have been receiving lately from Africa, cause for real concern. Moreover, it points up dramatically the tough questions confronting the current administration as it shapes its African foreign policy. Tough questions require tough calls and I hope this administration can summon the courage to make them, and with one voice. If it does, I am confident this Congress will lend its full support.

**MARK F. JONES III IS HONORED  
BY ALHAMBRA JAYCEES**

**HON. JOHN H. ROUSSELOT**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. ROUSSELOT. Mr. Speaker, it affords me great pleasure to join in paying tribute to a young man who has made a fine contribution to his community and to the Jaycees' cause in Alhambra and the San Gabriel Valley. On Friday, the 10th of June, Mark Jones III will be honored for his outstanding leadership not only in the Alhambra Jaycees, but also in the State of California as Alhambra president, as State Jaycee director and, most recently, as lieutenant governor of district 2. Mark is being recognized for his many efforts for the betterment of our society on this occasion because he is being transferred by his company, Pacific Telephone, to the Sacramento area. He will be very much missed by his fellow Jaycees who have said:

Mark's efforts over the last seven years have been an inspiration to many new Jaycee members. His enthusiasm for the Jaycees and Alhambra has been a primary cause for the resurgence of the Jaycees in this town.

I am sure the people of Sacramento will have much to benefit when this dynamic young man and his lovely wife, Deborah, take up residence in their area.

Mark Jones III at age 30 has made his presence felt in other activities as well. He is an ex officio member of the Alhambra Chamber of Commerce, and through his interest in youth he has served on the board of directors of the San Gabriel Valley Boy's Club.

While somewhat after my time, Mark grew up in my hometown, the city of San Marino. He was active in his high school student government and was a letterman on San Marino's football team. He attended California State College, Los Angeles, where he served on the intrafraternity council and was a member of then Sigma Alpha Epsilon Fraternity where he received the order's most prestigious award, the Order of the Phoenix.

It is with a great sense of pride that we part with these fine citizens, Mark and Deborah Jones. The excellent qualities which distinguish Mark as a leader have left their imprint on our community and we know that these same characteristics will spirit him on to greater success in his new venture, but we hope he will always feel that he has a home in the 26 Congressional District.

#### ASSASSINATIONS

**HON. CHRISTOPHER J. DODD**

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. DODD. Mr. Speaker, I am pleased to bring to the attention of my colleagues a portion of an article written by our former colleague, the Honorable Al Lowenstein, on the assassination of Robert Kennedy.

This article which appeared in a recent issue of Saturday Review, is one of the most thoughtful and articulate expositions I have seen on why the investigation of his death should go forward.

As a member of the House Select Committee on Assassinations, I believe it will be of great interest to any who yet have lingering doubts as to the purpose of our committee's probe into the deaths of John F. Kennedy and Martin Luther King, Jr.:

For a long time now, we have been trying to explain that what commands the reexamination of the Kennedy and King murders is not ghoulish curiosity, or vengefulness about dishonesty or incompetence, or devotion to abstract concepts of justice, or sentimentalism about the men who died, but simply the urgent question of whether disasters may loom ahead that could be averted if we found out more about disasters past.

Years have been squandered in ugly, stupid brawling about whether to face legitimate questions about seminal events. One result is that some people have come to see conspiracies everywhere, and some invent them where they can't see them. Some who have poked around these skeletons for a long time have capsized somewhere along the way into a kind of permanent overwroughtness that makes them easy to ridicule. Matters that require dispassion and open minds have become polarized, while everything hangs in limbo and suspicious keeps oozing around that things are more sinister than may actually be the case. It may turn out that the hardest part of dealing with the

new realities of the arrangement and use of power in America is to modify our sense of what America is without modifying the sense of what it can and should be.

Sensible people keep asking if it is really worth the time and effort to dig into the difficult past in this difficult way. Some time ago, near the beginning of this long journey, I tried to explain my own reason for pressing ahead. "Assassinations of national figures are not ordinary murders," I wrote. "When bullets distort or nullify the national will, democracy itself has been attacked. When a series of such events changes the direction of the nation and occurs under suspicious circumstances, institutions seem compromised or corrupted and democratic process itself undermined." It was Robert Kennedy's special gift that he understood the new realities of power in this country and could make people believe that if they roused themselves to the effort they could, as he liked to put it, "reclaim America." Perhaps that helps explain why the pain of his loss remains so great after so long a time.

We have made a good start toward preventing the repetition of some past abuses of power, especially government abuses, because we have learned about those abuses and have set out to guard against them. But there are other abuses we cannot yet guard against because we do not yet know enough about them to know how to guard against them. It seems elementary, for example, that if groups do exist that can eliminate national figures and get away with it, they are unlikely to spring into existence only on occasions of state murders: How are they occupied between-times?

James R. Hoffa did not vanish after a rendezvous with a James Earl Ray "acting alone," loose nuts did not do in the Yablonskis, new editions of Lee Harvey Oswald or Sirhan Sirhan did not murder Sam Giancana in the basement of his home while he was under twenty-four-hour guard by the FBI. It is time to accept the fact that the question is not whether groups with such power exist, but how these groups use their power, who their allies are—in and out of government—and what if anything can be done to protect democratic process against forces and alliances that operate out of sight and often beyond the limits set by the law.

That is a fitting question for the elected representatives of the people to deal with, since nothing less than the strength of government of, by, and for the people rides on the answer. And finding out all we can about the assassinations is an important part of trying to answer that question.

**WINIFRED McPHERSON, THE LADY  
WITH A BIG HEART**

**HON. GEORGE E. DANIELSON**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. DANIELSON. Mr. Speaker, a most respected constituent whom I greatly admire is being honored this week in my congressional district. Winifred McPherson, who for 20 years has spearheaded the American Heart Association fund drives in Montebello, Calif., will be honored at a testimonial dinner on Wednesday, June 8, 1977 at the Montebello Country Club.

During the last 20 years, Winifred McPherson has recruited the participation of more than 6,000 residents of

Montebello to participate in the great fight against heart disease and has raised more than \$15,000 for research and education. She also conceived and made reality of the Montebello queen's debutante ball through which more than 350 young ladies of Montebello have joined the Las Rosas debutantes and help provide many needed community services. Small wonder she has become known as "The Lady With a Big Heart."

Winifred McPherson is one of those essential and wonderful persons who see and recognize the needs of the community and then, willingly and without question, take on the task of trying to meet those needs. Without people like her the quality of our community life would be poor indeed.

Mrs. McPherson is noted for her leadership and participation in many civic activities, guiding young people and others in the community in giving service to their fellow citizens. I am proud to represent Winifred McPherson and to bring her accomplishments to the attention of my colleagues.

#### THE IMPERIAL PRESS

### HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. WHITEHURST. Mr. Speaker, in recent months, numerous articles have appeared outlining congressional perquisites. For the most part, these have been more concerned with sensationalism than with objectivity or factuality. The latest of these, a four-part syndicated series on "The Imperial Congress," has recently been appearing in the Norfolk (Va.) Virginian-Pilot, and it has been refreshing, to say the least, to find this particular series accompanied by a set of articles by Morris Rowe, a member of the news staff of the Virginian-Pilot, who has made a serious effort to research and present facts.

One of Mr. Rowe's articles, which appeared in the May 25, 1977, edition of the Pilot, dealt with the corresponding perquisites available to the Washington press corps who cover the Congress. I am delighted to take this opportunity to share this with my colleagues and other readers of the Record, and I want to commend Mr. Rowe for his thorough research, his objectivity, and his willingness to present the other side of the coin. Such an effort to set forth all the facts is truly professional reporting:

PRESS, TOO, SHARES IN GRAVY  
(By Morris Rowe)

The press in Washington, which occasionally exposes the luxuries of congressional office, is not without its own privileges, perks, and taxpayer subsidies.

While the public and sometimes congressmen have to stand in line for a table in the House and Senate restaurants, reporters do not. They have their own reserved tables in each place. They pay the same prices as congressmen and the public, however. They are also entitled, by being accredited to either the Senate or House press galleries, to use any government agency cafeteria.

They work out of seven taxpayer-funded

press galleries in Congress. The taxpayers supply them with typewriters, telephones, copy paper, electricity, heat, and air-conditioning.

A staff of 11 in the House galleries attends the needs of the media, taking messages, keeping reporters informed of House activities, arranging press conferences, and reserving them special seats at committee hearings.

A staff of 14 does the same thing in the Senate.

Some of the 1,200 accredited journalists get free parking in 128 reserved spaces on Capitol Hill.

The press galleries are under the control of the respective sergeants at arms and were initially established by Congress in 1856.

A radio-television gallery in each house was created in 1939, and in 1947 special galleries for writers of periodicals were established.

Benjamin West, superintendent of the House galleries, said, "Since then, Congress has provided space, equipment, legislative documents, typewriters, staff, and all that is required for a legislative news office to function."

Any special news transmission equipment or long-distance calls must be paid for by the news agency using it.

All of the perks are justified by staffs of both galleries on the ground that it helps keep the public informed.

"I personally think that after 35 years' experience," West said, "that it is a necessary and vital facility."

He said that if each news organization paid its own way, it would cost \$10,000 a year each to keep a reporter in Washington. "And I don't think too many dailies could survive that."

"I personally think there is perhaps a legislative obligation to provide the press a facility to enable it to enhance public awareness."

"Not all coverage is commendable, but it is vital and Congress should contribute to it, even if it means funding it."

Some news organizations and reporters have tried to pay their own way, a Senate gallery staffer said, but such attempts are frowned on. "There's no way of breaking down the costs."

"Some reporters claim they don't want to be subsidized by the government, but they don't complain when they ride a subsidized bus to work," he said.

West was unable to say how much it costs to run the House press galleries because of fragmented accounting procedures, but Ron Martinson, administrative assistant to the sergeant at arms for the Senate, said \$325,000 represents the salaries of the 14 staffers whom he oversees.

Martinson said other figures on costs are not available "because they aren't kept in the form people want."

"You would have to figure air-conditioning-heating costs, electricity, depreciation on desks, chairs, and so on, and we just don't have that information broken down that way."

With the possible exception of the House gymnasium, congressional sources said most of the perks that Robert Shrum detailed in "Imperial Congress," are available to the news media and the public—at the same prices.

#### AIRCRAFT REPAIRS

### HON. WILLIAM M. KETCHUM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. KETCHUM. Mr. Speaker, today I have introduced a bill which seeks to require that all repairs on an aircraft

be preceded by a written, signed estimate.

Over the years plane owners have endured many abuses while having repair work completed on their aircraft. Not only has this been costly, but it has been time consuming as well.

The bill which I have submitted states that prior to the performance of any maintenance, alteration, overhaul, or repair work on an aircraft or aircraft component for which a customer is to be charged more than \$100, the customer must be given a signed, written estimate for the work involved. This includes the estimated completion date of the work to be performed, the estimated price for labor and parts, and a statement of any work to be performed by another facility. For this estimate a reasonable fee may be charged by the mechanic.

Furthermore, the bill provides that a customer may not be charged in excess of 10 percent of the written estimate unless he has been notified of the additional costs and has given his consent in writing. Any violation of this section may be brought to a U.S. district court to recover treble the additional costs incurred.

Similar laws pertaining to auto repairs have worked well and I firmly believe that enactment of this bill will meet with the same success. Mr. Speaker, it is my sincere hope that my colleagues will join me in this effort.

FORMER SENATOR ROBERT F. KENNEDY

### HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. KOSTMAYER. Mr. Speaker, June 6 is the ninth anniversary of the death of former Senator Robert F. Kennedy of New York.

For America, June 6, 1968, was a day of terrible sadness. For me and for millions who labored on behalf of the late Senator's Presidential candidacy and believed in his cause, it was a terrible time.

The anniversary of Senator Kennedy's death comes just a week after Memorial Day, a time when Americans honor those who have given their lives for the land we love. For the late Senator's family, and for his wife and children especially, this is a difficult time—for them the wound will never heal. But perhaps the expressions of our love for Bobby can somehow ease the loss.

He was struck down in perhaps his greatest hour and on the eve of what I believe would have been his Presidency.

We can keep his memory and his mission alive. For he was truly an American revolutionary, filled with a vision of a land at once mighty and compassionate.

And so, Mr. Speaker, I have written to the Postmaster General recommending that he commission an American postage stamp commemorating the life of the late Senator Robert F. Kennedy. The stamp is to be initially issued on the 10th anniversary of his death, June 6, 1978. I

have also written to the Citizens Stamp Advisory Committee, asking them to recommend the Kennedy stamp to the Postmaster General.

I ask that my colleagues join me in advising the Postmaster General of their support for this stamp.

Mr. Speaker, let us remember the life and death of this great American who willingly challenged the greatest of odds on behalf of justice at home and peace throughout the world.

#### **SOUTH KOREANS REITERATE CALL FOR RETURN TO DEMOCRACY**

**HON. DONALD M. FRASER**

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. FRASER. Mr. Speaker, I would like to insert in the RECORD the Charter for Democratic National Salvation and the Declaration for Suffering. The Charter for Democratic National Salvation was issued on March 22, 1977, and signed by a number of prominent South Koreans who have called upon President Park to restore democracy and human rights to South Korea. Many of the persons who signed this statement have since been harassed and arrested.

Attached also is the Declaration for Suffering which was signed by a number of students of Hankuk Theological Seminary in South Korea. It also calls for return to democratic government. Many of the signatories of this statement have also been arrested and many of them are still detained by South Korean authorities.

It is my view that in shaping our policy toward Korea that we cannot ignore and, indeed, we must give greater attention to the gross injustices which are occurring in South Korea.

The documents follow:

#### **CHARTER FOR DEMOCRATIC NATIONAL SALVATION, MARCH 22, 1977**

Our freedom to speak and act is severely restricted. Since November 1976, and particularly since February this year, the whole country has been placed on strict police surveillance; democratic citizens of all walks of life including those in religious professions have been arrested and detained by intelligence and police agents, and the meetings and speeches planned for the restoration of democracy have been completely blocked. Such a situation shows the newly emerging passion for democracy among our people, and at the same time explains how severe is the suppression imposed upon our struggle for democracy.

Under such suffocating circumstances, only a few citizens could be contacted to sign this charter. We hope that this document will be widely communicated to democratic citizens and we furthermore eagerly expect a great many efforts to realize it.

1. The March First Declaration for Democratic National Salvation and the January 23rd Wonju Declaration are declarations of the whole people. We are proud of being together with those who participated in the declaration at the very court that suppresses the people's declaration. The statement of reasons for the appeal case submitted by the March First defendants is indeed one that has been submitted to the court of history

and truth of the whole people longing for democracy.

2. The whole situation which has developed around the Korean Peninsula—arguments for the withdrawal of the American troops, human rights issues, deterioration of international goodwill and relations through bribery and scandals—is entirely due to the dictatorship and human rights violation of the present government and therefore, the responsibility lies with the government. We believe restoration and realization of democracy, for which the whole people are truly united, is a historical mission which ought to precede the issue of the withdrawal of the American troops.

3. For the present government to overcome the challenge of our national history, the following points should be put into practice:

(1) Repeal of the Yushin Constitution and Emergency Measures and declaration of their invalidity.

(2) Full Restoration of the human rights of all the political prisoners and abolition of undemocratic systems and laws.

(3) End to repression and intelligence politics including torture and surveillance.

(4) Freedom of speech, freedom for universities and for religion and guarantee of judicial independence.

(5) Guarantee of people's rights to livelihood: workers, peasants and fishermen.

(6) Wiping out of injustice and corruption, and the establishment of a just and open diplomatic stand based on goodwill.

4. We, who strive for peace and the common good of humankind, firmly believe that the rights of men and women and the struggle for those rights transcend national boundaries. Democratization of South Korea leads not only to the achievement of peace on the Korean peninsula, but also to world peace. Therefore, it is a just right as well as responsibility as human beings that people all over the world who love freedom and peace give solidarity to the Korean People's suffering struggle for democracy and the promotion of human rights.

5. Today it is the greatest responsibility for the whole people of all walks of life to fight for democracy, national autonomy and national unification. Workers, peasants, salarymen, civil servants, intelligence agents, students, religious personnel, intellectuals, small merchants and manufacturers—We appeal to all the people whose human dignity, freedom and right for survival were trampled, to demonstrate their utmost courage and creativity, to prove their attitude as democratic people by arousing their passion to strive for democracy.

By this statement we promise to form a united movement for democratic citizens.

Long Live Democracy!

Youn Po-sun, Former President.

Chung II-hyong, Assemblyman, New Democratic Party.

Ham Sok-hon, Editor, The Voice of the People, Quaker leader.

Chung Ku-young, Former Chairman ruling Democratic Republican Party.

Yung Hyung-jung, Catholic priest.

Chon Kwan-woo, Former chief editor, Dong-a daily.

Yang II-dong, Head of Democratic Unification Party.

Chi Hak-soon, Catholic bishop of Wonju.

Park Hyung-kyu, Minister, Chell Presbyterian Church.

Cho Hwa-soon, Chairperson, Korean UIM.

#### **DECLARATION FOR SUFFERING, APRIL 7, 1977**

(By Hankuk Theological Seminary)

We pray that the suffering of Christ will contribute to the recovery of democracy, freedom and peace.

We, the students of Hankuk Theological Seminary, confess that our Saviour is Jesus Christ who come into this world as a man to save us from sin and eternal death, and to

liberate us. He suffered by himself on the cross and we now light the torch of justice to remember his suffering to follow him in this time of darkness and to recover our true nature, given by God in His image. The suffering of Christ will never be a myth or a legend but will always be real among us, even here and now. Therefore, we believe that participation in His suffering is the only way in which Emmanuel brothers and sisters can carry out their responsibility as disciples of our Lord.

Behold! Spring has come, though the cold wind still blows. The morning of a new history is dawning in the midst of injustice and evil. We remember the experience of the unusual October just five years ago. The Yushin Constitution, passed through the use of all kinds of threats and injustice in an atmosphere of terror in which rifles and tanks were rattled, was a fabrication made by force under martial law, the principle of democracy—government of the people, by the people, and for the people including separation of the three branches of government was struck out. This conduct has countered the supremacy of God and world peace, which the people of God aim to realize. We know that nowhere in history can we find such an evil and inhumane law as the Yushin Constitution. The outrageous and unbelievable "Emergency Decrees," have become known all over the world, particularly for their viciousness and cruelty. Besides these, the laws for national security and for social safety are barbarously suppressing human rights in this country. The present government, which is attempting to perpetuate its dictatorial power through the suppression of human rights, wastes national resources on behalf of their own safety by giving enormous bribes to high officials in the United States via Park Tong Sun, and in Japan. The government knows that it is impossible to avoid being despised in international society and from becoming an international orphan, the government has suppressed the press in order to mislead public opinion and has endeavored to establish a league of international evil doers through international relations with other dictatorial governments. Therefore, the diplomacy of this government has been humiliating and the policies for national unification clearly aimed at freezing the division of the peninsula rather than at national unification, which is the hope of the people. We recognize that the people truly hope for democratic and peaceful unification.

The Korean economy and the people's standard of living are in a miserable condition because of the daily increase in prices and taxes. The distrust of laborers and farmers of the government is extreme because of the polarization of the differences between the poor and the rich. This beautiful land has become a garbage can. The government has imported pollution from Japan and promoted exploitation of the people by comprador capital. However, those things are not announced to the people because of the systematic suppression of the press which is done in the name of national security. This was demonstrated when the authorities suppressed the Dong-A and Chosun daily newspapers. We are sorry that the people, who were pure and good, have become individualists through mammonism and uncritical acceptance of western culture and lack of trust because of the evil policy of information manipulation. The power is using all forms of news media to instruct the people in a propagandistic motto and distorted values.

Recently, when there was criticism of the New Community Movement (Saemaul), the government presented a new movement, the New Mind (Saemaemum), and began to propagate the thought of loyalty and filial piety as the means to force the people to obey the

dictatorial system. In its educational policies the government often changes its regulations for the benefit of some members of the power. Through surveillance on the campus, illegal treatment of students, suppression of college presses which are the students' forum, establishment of a student defense corps which acts to direct students in uniformity and ignores the freedom and independence of the campus, the government has succeeded in systemizing the campus as a political instrument. All the student textbooks have been transformed into an instrument for propagating the ideas of the present government. We especially feel that we are responsible in this situation where our younger brothers and sisters are being forced to receive their education under this system.

Artists are also being restricted in their expression by vicious government suppression. The suppression of religious meetings is now extreme. The authorities investigate prayers, which are our confession, and through surveillance of religious meetings, shadowing, detainment, illegal arrest, and wire tapping the authorities have indescribably suppressed religious groups. Besides these, the authorities have bought-off religious organizations through which they now propagate against the religious leaders who are opposing the present government, saying these people are communists. Furthermore, recently, through a certain bulletin, the authorities claimed that Hankuk Theological Seminary and our professors are pro-communists. We recognize that conduct such as this is purely a political play and our trust and respect of the professors will not be altered. Starting our long march for suffering carrying the cross, and as we consider these facts, we claim the following:

1. The present power should resign, taking responsibility for all these things;
2. In this country, true democratic constitution should be established on the basis of the separation of the three branches of government and through a government elected by democratic process;
3. The educational system should be reformed and educational policies should be consistent with the true education of the people and should establish proper values;
4. The welfare of the people should be improved on a real level and just distribution of the interest should be accomplished through promotion of pure national economy and exclusion of comprador capital;
5. All Christians should take responsibility for the present situation and should endeavor to create a new history and to reform the present situation.

#### CONGRATULATIONS TO GRADUATING HOUSE PAGES

#### HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. MOAKLEY. Mr. Speaker, tonight many of our House pages mark the culmination of their service in the impressive Capitol Page School graduation ceremony in the caucus room of the Cannon Building. That ceremony grants due recognition of the high academic achievements of these fine young men and women. I think that it is most appropriate for us as Members of the Congress to grant our own recognition of the excellent and loyal service which our young pages have performed in so many important and often unnoticed ways.

We have invested great trust and responsibilities in our pages who are our very youngest Federal employees. Most of them have come to Washington to take their first real job with all the implications of adult responsibility. They find themselves at the very seat of the Government dealing face to face with those entrusted with the leadership of our Nation. We make large assumptions about their capacity to perform and they have not disappointed us. Through their enthusiasm, dedication, and cheerful attitude they have brought great credit to themselves and to the House.

Mr. Speaker, I am including for the RECORD the names of the 32 House graduates:

#### GRADUATING SENIORS

Steve Abraham, Lindlee Baker, Peter Bell, Margie Berg, Bobby Blackstock, Cathy Chromulak, Maura Connelly, Sara Crowe, Ruth Duranczyk, Marion Elliott, Amy Eskin, Mike Fanning, Byron Galle, John Ghrist, Kirk Harness, Ken Johnson.

Ron Jolly, Ellen Kerley, Mark Kobelinski, Annette Maglione, Kent Markus, Fritz Neil, Tim Riffle, John Russell, Peter Schupp, Norma Siegert, Mike Thorson, Sharon Williams, Steve Wolfe, Lori Shurman, Mike Gunison, Randy Krzesinski.

#### STATEMENT TO THE WORLD

#### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. SIMON. Mr. Speaker, in the fine publication of the Overseas Development Council, called "The United States and World Development Agenda 1977," there appears the inaugural statement of the President of the United States to the nations of the world.

I had not seen it published anywhere prior to its publication in this book.

It is a statement that all of us would do well to read.

I am taking the liberty of placing in the RECORD, at this point, the statement of President Jimmy Carter, which he labeled "Statement to the World," on the day of his inauguration:

#### STATEMENT TO THE WORLD

I have chosen the occasion of my inauguration as President to speak not only to my own countrymen—which is traditional—but also to you, citizens of the world who did not participate in our election but who will nevertheless be affected by my decisions.

I also believe that as friends you are entitled to know how the power and influence of the United States will be exercised by its new government.

I want to assure you that the relations of the United States with the other countries and peoples of the world will be guided during our administration by our desire to shape a world order that is more responsive to human aspirations. The United States will meet its obligation to help create a stable, just, and peaceful world order.

We will not seek to dominate nor dictate to others. As we Americans have concluded one chapter in our nation's history and are beginning to work on another, we have, I believe, acquired a more mature perspective on the problems of the world. It is a perspective which recognizes the fact that we alone

do not have all the answers to the world's problems.

The United States alone cannot lift from the world the terrifying specter of nuclear destruction. We can and will work with others to do so.

The United States alone cannot guarantee the basic right of every human being to be free of poverty and hunger and disease and political repression. We can and will cooperate with others in combating these enemies of mankind.

The United States alone cannot insure an equitable development of the world resources or the proper safeguarding of the world's environment. But we can and will join with others in this work.

The United States can and will take the lead in such efforts. In these endeavors we need your help, and we offer ours. We need your experience. We need your wisdom. We need your active participation in a joint effort to move the reality of the world closer to the ideals of human freedom and dignity.

As friends, you can depend on the United States to be in the forefront of the search for world peace. You can depend on the United States to remain steadfast in its commitment to human freedom and liberty. And you can also depend on the United States to be sensitive to your own concerns and aspirations, to welcome your advice, to do its utmost to resolve international differences in a spirit of cooperation.

The problems of the world will not be easily resolved. Yet the well-being of each and every one of us—indeed our mutual survival—depends on their resolution. As President of the United States I can assure you that we intend to do our part. I ask you to join us in a common effort based on mutual trust and mutual respect.

JIMMY CARTER,

President of the United States of America.

#### GRAIN RESERVES AND A WHEAT CARTEL

#### HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. ABDNOR. Mr. Speaker, the issue of instability of world grain supplies and prices is of vital importance to the Nation, our consumers and producers, and perhaps even more so to our export customers.

I would venture a guess there is not one among my colleagues who does not support the idea of stability in the commodity markets at price levels which are fair to all concerned. Unfortunately, reality is not so idyllic.

Anyone who has an opinion on this issue should bear in mind the points raised by Mr. William D. Hagerty, Jr., chairman, and Mr. Warren W. Lebeck, president, of the Chicago Board of Trade, in their position paper "The Wheat Cartel: An Idea Whose Time Has Gone." Certainly, they are not unbiased observers, but their arguments must be weighed on their merits.

The paper follows as does the May 23, 1977, reply I received from Mr. David L. Hume, Administrator of the Foreign Agricultural Service, in response to my May 5, 1977, letter to Secretary Bergland requesting his assessment of the views expressed by Messrs. Hagerty and Lebeck:

### THE WHEAT CARTEL: AN IDEA WHOSE TIME HAS GONE

Late last month Secretary of Agriculture Bob Bergland met with Otto Lang, a representative of the Canadian government, for preliminary discussions aimed at establishing a minimum price agreement for exports of wheat by the United States and Canada. Such an agreement, the Secretary said, would stabilize the market and make it serve a broader public interest.

We believe such an agreement would be a serious mistake. We call on the government to abandon the idea immediately for at least four reasons:

1. The plan will not work.
2. It is contrary to basic American ideas, and represents a philosophy we can hardly explain to our citizens, our children, or a hungry world.
3. It would cost American agriculture, the consumer, and the taxpayer dearly.
4. A free marketing system is the most efficient means of distributing food and thus of serving the public interest in the best and broadest sense of that term.

#### I. A PLAN THAT WILL NOT WORK

The economic graveyards already contain the bones of many international attempts at price manipulation, such as those for rubber, wheat, sugar, wood and tea. Even when efforts at establishing and maintaining price schedules are well intentioned, they have inevitably ended as economic failures.

The economic creatures of international agencies cannot make the forces of supply and demand disappear. In the short run those forces may be checked, shifted, blunted or even temporarily suspended. But the consequences cannot be evaded forever.

The last International Grains Agreement, with maximum and minimum prices, was an international economic disaster, especially to U.S. wheat growers. President Johnson, in signing on behalf of the United States, said, "The new arrangement thus will provide new price insurance to U.S. wheat farmers."

However, the Honorable J. D. Anthony, Australian minister for primary industry, expressed the results better when he frankly admitted later that his country had been able to take advantage of the agreement and gain more than her traditional share of the world market.

We do not, however, have to rely on Mr. Anthony to tell us how disastrous the agreement was. In mid-1975, the Subcommittee on International Trade of the Senate Committee on Finance asked the United States International Trade Commission to undertake a study of the experience of the United States with international commodity agreements.

Let us examine the conclusions of this independent governmental body:

The failure of the 1967 agreement, during which prices remained below the minimum, was due primarily to the accumulation of burdensome stocks which the national governments would no longer carry. The agreement was powerless to require importing countries to pay minimum prices or to prevent exporting countries from selling below minimum prices.

The United States, as the major exporter, also subsidized commercial exports at levels below the agreements' minimum prices as world market prices declined. The failure of the 1967 agreement casts doubt on the effectiveness of purchase and sales contracts as a mechanism to maintain prices within specified limits. Member governments have generally not been willing to buy and sell within agreed price ranges unless the natural and usually unpredictable market forces of supply and demand happen to result in equilibrium prices within that range."

The failure of the 1967 agreement was not due to defects unique to that plan. Rigged international marketing is inherently bad. To quote the International Trade Commission again:

"International commodity agreements take various forms, but in general they are agreements between governments of both producing and consuming countries that attempt to raise and stabilize the prices of commodities."

"In the pursuit of these objectives, such arrangements impose restrictions on the free movement of commodities in international trade. They often result in economic waste and the misallocation of scarce productive resources, and historical experience has demonstrated their frequent failure to achieve their objectives."

There are several factors which make the current proposal especially failure-prone. The following are logical projections of this proposed price-fixing scheme.

1. The United States will need to reinstitute import controls on wheat and flour. The 21-cent-per-bushel duty may not be sufficient to preclude wheat from entering the United States.

2. Assuming that a basic price agreement is reached with the Canadians, then there must follow a market-sharing agreement. How this will be implemented is not clear. The various types of wheat which the United States produces do not fluctuate in any constant relationship with each other. Actually, even qualities of wheat within the same type are subject to premiums and discounts which change daily.

3. There is a serious question whether the Russians will decide to (a) become heroes to the rest of the world by underselling the United States-Canadian cartel, and/or (b) abridge the United States-USSR agreement as being designed for a free-market situation. Article II of that agreement provides:

"During the term of this Agreement, except as otherwise agreed by the Parties, the Government of the USA shall not exercise any discretionary authority available to it under United States law to control exports of wheat and corn purchased for supply to the USSR in accordance with Article I."

4. Higher loan rates will reduce the capabilities of the United States to provide wheat and flour under the Food for Peace Program without a sharp increase in budget costs.

5. The current Canadian initial price of \$3.00 per bushel for No. 1 Canadian wheat does not even support a loan rate in the United States at \$2.25 per bushel average price to farmers for all types and grades. There are discounts for the Canadian dollar, plus the sharp discounts for lower grade wheat which the Canadian Wheat Board authorizes.

The economics of the wheat industry cannot be confused with those of, for example, the oil industry, where cartel tactics have had significant success. We do not believe that either Mr. Bergland or Mr. Lang see their contemplated agreement as another OPEC, but we want to develop this point a little further so that citizens do not confuse the issue either.

Wheat renews its supply every year. Thus, at home, unless cartel leaders control their own producers, a modest oversupply one year becomes a glut the next because (1) the surplus carries over, and (2) the artificially high price calls for continued high production. Outside the cartel, substantial amounts of the world will be able to increase wheat production in reaction to the price insurance umbrella that the cartel's self-imposed minimum price will provide.

Alternatives to wheat already exist—rice, oats, barley, rye, and for some purposes, corn and potatoes. Utilization of these will not require the vast amount of technology that,

for example, solar energy will require; expanded production of these will not engender the citizen opposition that nuclear reactors have spurred; and the eating of these will not entail the considerable conversion problems that, for example, making autos electric would present.

Thus, a cartel in the image of OPEC would fail—within, at best, a few years.

However, a cartel with significantly lower aims would still present a host of practical problems. The Canadian Wheat Board is the sole seller of that country's wheat, and probably could adapt fairly easily. Here, however, grain exporting is largely in the hands of the private sector—private companies and farmer cooperatives, for the most part. Would the government socialize this business? Or would it merely create a vast new bureaucracy to "oversee" this multi-billion-dollar industry?

Several of the grain exporters are multinational in nature. If a European or South American affiliate sells wheat below the fixed price, is this a violation? What if after selling that wheat, the affiliate buys corn, oats, barley or rice from the United States to replace domestic needs?

A policing system would be difficult to devise. And one can only surmise that even if devised, it would fail. The last thing we want to face is the spectre of sending men to prison for selling food too cheaply.

#### II. A NON-AMERICAN IDEA

Americans have a deep and well-founded disgust for cartel tactics. This feeling has its roots in the nation's founding. It was artificial controls over trade, imposed in the name of mercantilism, which prompted this nation to independence 201 years ago.

In the same era, there arose a new school of economic thought which repudiated mercantilism and led to rapidly increased economic development, through a free enterprise system in which international trade played a key role. That system and that trade have been very good to America. We have a degree of wealth greater than other nations that also have bountiful natural resources.

A wheat cartel would be a giant step backward from our commitment to free enterprise and our efforts to improve international trade. It would be nothing more than a thinly-veiled, modernized version of the nation-state trading system we rebelled against two centuries ago. It is an idea whose time has gone.

As a nation today, we spend some \$27 million a year on a Department of Justice anti-trust division designed to prevent this sort of behavior. If the contemplated agreement were adopted, would we face the ironic situation that those who fix prices on cardboard containers should go to prison while those who fix prices on food should not? The very thought offends one's sensibilities.

Nor can we ignore the messages, moral and economic, that America would send to other nations by participation in such a cartel. Of key importance here is the absolutely vital role cereals play in developing nations. In the Philippines, for example, cereals provide 65 percent of the calories and 56 percent of the protein in the people's diets. The figures are even higher for nations such as India and Bangladesh. In the United States both figures are about 19 percent. Thus, we are talking about something much more serious than just increasing the price of bread—or even of gasoline—as Americans know those items.

To be sure, the contemplated agreement would allow prices to be considerably lower than the all-time highs of a few years ago. That is some consolation, perhaps. But it does not negate the fact that the United States now would be denying its customers the opportunity of buying at low prices that logically goes with the burden of having had to pay high ones. Nor will it negate the

inference, which consuming nations are sure to draw, that a cartel which demands \$2.25 today may want \$3.25 tomorrow and \$4.25 next year.

If America becomes a nation willing to cartelize food, the most basic of commodities, we shall stand smaller in other nations' eyes—both as a people and as a market upon which they can rely in the future.

### III. THE COSTS WE WOULD PAY

Exports of wheat and flour brought the United States more than \$5 billion in 1975, and preliminary figures indicate that despite the depressed market conditions the total was over \$4 billion last year. The proposed agreement directly endangers this vital source of income—in the short run by insuring that other nations will have first call on the world market by selling at slightly lower than the cartel price, and in the long run by spurring and in effect subsidizing competitive production.

Indirectly, other export revenue would be jeopardized. For reasons outlined in Part I, it is likely that some sort of controls on other foodstuffs would have to follow those on wheat. Here the stakes become even larger. Exports of grains and soybeans brought us \$15 billion in foreign currency last year, and other agricultural products added another \$8 billion. Farmers cannot afford to have these vital sources of income endangered.

Moreover, the entire nation badly needs agricultural exports to help offset its deficit in trade of non-agricultural items. That deficit was \$19 billion last year. The consumer pays when America's trade is imbalanced, because the dollar is cheapened and it takes more dollars to buy the goods we need from other lands, while nations with stronger currencies find it easier to buy our goods.

Furthermore, a wheat cartel scheme means a sharp retreat from the liberal trade policy we have been supporting in Geneva at the Tokyo Round trade negotiations. Exactly what reaction it may provoke from other nations can only be speculated, but it will not be good for an America which increasingly depends on foreign goods.

At home, of course, all indications are that the Secretary's interest in putting a floor under international wheat prices stems from his desire to put a floor under domestic prices. Having condemned those who three years ago blamed wheat prices for spiraling bread costs, when wheat comprised only 6 cents of the cost of each loaf, we do not intend to engage in similar tactics now. Suffice to say the Secretary's plan will not help lower food costs.

Perhaps the most important cost will be in the Agriculture Department's budget. Blunting the fall of prices will dampen the market's signal to cut back production. Surpluses will accumulate. History shows that such surpluses bring some combination of government subsidies, production controls, and loan programs under which farmers end up selling their grain to the government because the loan rate is higher than the market price.

In the long run, farmers have never done well under such policies. Despite their current problems, they have done very well under the relatively free market policies of the 1970s. In the long run, their best interests lie in continuing those policies.

The Chicago Board of Trade is not opposed to high prices for the farmer. High prices serve a vital economic function of spurring production when that production is needed. Price provides the reward for those who produce what the people need.

(The language of price is speaking even as we issued this paper. Future prices above \$8 per bushel for soybeans in Chicago represent more than \$7 per bushel local prices throughout the heartland of this nation. The world badly needs the protein and fat which soybeans provide, and is willing to pay farmers to produce it. Artificial floors under prices interfere with the market's pricing signals.)

What the Chicago Board of Trade opposes is artificial high prices. The success of current agricultural legislation is due to the fact that its loan and target prices have been low and surpluses small and temporary. Those surpluses have been sold before it became necessary for government to take ownership. However, if loan rates were too high and surpluses too great, farmers would elect to turn their grain over to the government when loan repayment time arrived. This would force upon us the kinds of policies we had in the 1960s.

Because the cartel would lose us export business without cutting production, it represents a dangerous step toward that situation. Some salient facts are important to remember in this regard:

Subsidy payments to farmers were once \$3.5 billion a year. In 1975 they were less than a tenth of that amount.

The government once invested as much as \$8 billion in crop surpluses, either through outright ownership or through loans to finance others who held those surplus stocks. In recent years the figure has been about an eighth of that amount.

Storage costs alone were once a \$3-million-per-day drain on the Treasury. Today storage is in the private sector.

Government payments once constituted more than 25 percent of realized net farm income, but in recent years have been about 2 percent.

Such a course seems diametrically opposed to the present Administration's announced priorities of creating jobs, rebuilding cities, and fighting inflation. The siphoning off of federal funds into agricultural policies does not create jobs, build cities, or lower food costs, directly or indirectly.

We seriously doubt whether the American people want to move back to the policies of the 1960s—and whether the federal government could financially afford to do so even if they did. The best route to avoid that situation is to let the market take its course, so as to get rid of our currently modest surplus of wheat and to shift production patterns to other crops for the coming growing season. In the long run, the farmer, the consumer, and the taxpayer all will pay dearly for controls such as the cartel would entail.

### IV. FREE MARKETS AND THE PUBLIC INTEREST

The Chicago Board of Trade prides itself as being a free market that serves the public in the broadest sense of that term.

Our futures markets are a source of protection against price risks for most free-world nations' grain merchandisers. Our futures prices are an index—a barometer of supply and demand—reflecting pricing carried on in cash markets throughout the world. Buyers and sellers send orders into the central marketplace from around the globe. We serve the world efficiently, and can continue to do so.

We are disturbed by the statement attributed to the Secretary of Agriculture in which he is alleged to have described an attitude that prices could best be established in "free markets" as a "dream world." And he is quoted as saying "we're replacing the Chicago market interests with broader public interests." These market interests are certainly not private interests but a reflection of conditions as they actually exist, not as someone somewhere would like them to be.

When a commercial user of the markets wants to minimize his risk through futures trading, someone must accept that risk. The speculator performs that function. He does so in anticipation of profit, true—and many times he is disappointed. It is a rare commercial who would rather keep a risk he doesn't want than give it to a businessman who is only taking it in the hope of profit. The two need each other. Together they make our markets work.

Those markets serve the public more quickly and more efficiently than any inter-

national cartel agreement ever could. The government should abandon the cartel idea now, while it is still in an embryonic stage and while the Administration is young, with many options remaining. Before it ties itself to a program that creates farm problems rather than solves them, it should consult the professional staff at the Department of Agriculture, which has the technicians who know the true facts. For as George Santayana said: Those who cannot remember the past are condemned to repeat it.

WASHINGTON, D.C.,

May 23, 1977.

HON. JAMES ABDNOR,

House of Representatives.

DEAR MR. ABDNOR: Thank you for your letter of May 5 to Secretary Bergland enclosing the statement of Mr. Lebeck concerning a possible agreement with wheat exporting countries.

Secretary Bergland has indicated that he favored exploratory discussions with major wheat exporters to see if practical ways exist to reduce the incidence of extreme fluctuations of the world price of wheat. Such discussions would be a first step in an effort to bring more stability to the world wheat market.

A meeting of representatives of the four principal wheat exporting countries was held in Ottawa on April 21. A copy of the communiqué from that meeting is enclosed.

During the months ahead, the Department of Agriculture will engage in new efforts to make arrangements with other countries that would result in an international food reserve compatible with the interests of both rich and poor nations. Negotiations toward this end will likely be long and difficult, in part because current surpluses in production have eased the sense of urgency created when world grain stocks were tight a few years ago.

We appreciate receiving your views and hope the foregoing information will be useful to you.

Sincerely,

DAVID L. HUME,

Administrator.

### DAVID BRINKLEY ON CONSUMER PROTECTION AGENCY

#### HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. DEL CLAWSON. Mr. Speaker, in a typically frank and succinct radio commentary on NBC Wednesday, June 1, David Brinkley called attention to the incongruity which is basic to the proposed Consumer Protection Agency. It is a defect which should certainly receive the full light of public attention. Therefore I obtained the transcript of Mr. Brinkley's remarks and am including it at this point in the RECORD:

#### DAVID BRINKLEY ON CPA

David Brinkley, NBC News, New York ... with a few comments about President Carter's speech today to 200 people involved in the consumer movement, at a sort of pep rally where he, himself, was the cheer leader. Congress, he said, should move now to set up a new Federal agency ... an Agency for Consumer Protection. He's advocated this before ... the idea has been around for several years ... and in fact Congress passed it once before, but President Ford threatened to veto it, and that killed it. Now, it's about to be revived. Its job would be to appear at Government hearings, representing the con-

sumer . . . and to file lawsuits to force Federal agencies to consider the interests of the consumer.

Now, think about that. Everyone is a consumer, of course. But a lobbyist in Washington is not there in his role as a consumer. He's there representing a union, or a business, or a profession. And the idea of a consumer agency basically is to be a lobby for the consumer. There is much opposition to it, but a great many people are in favor of it. Is it not regrettable that people feel a need for a new agency to push the old agencies into doing what they should have been doing along—that is, acting in the best interest of the entire American people?

If government does not do that on its own, what does it do? What good is it? It's as if you hired a carpenter to build a front porch for you . . . paid him . . . and then had to hire and pay someone else to push him to build the porch.

Is the Federal bureaucracy just another interest group, looking out for itself? Sometimes you might think so. However useful a new consumer agency might be, my own opinion is that a Federal agency that has to be pushed by another agency to do its job ought to be just closed down, and its front door locked.

### THE HATCH ACT

**HON. EDWARD J. DERWINSKI**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. DERWINSKI. Mr. Speaker, I direct the attention of the Members to a commentary, appearing in the April 1977, newsletter of the Federal Professional Association, on the subject of the Hatch Act.

The Federal Professional Association is a highly respected organization, dedicated to career civil service, and their analysis of H.R. 10 is quite revealing. The article follows:

#### HOUSE COMMITTEE CLEARS HATCH ACT (REVISION)

The House Committee on Post Office and Civil Service approved, April 27, H.R. 10 (William Clay, D-Mo.) for a major revision of the Hatch Act which now limits the participation of Federal employees in partisan primary and general elections.

President Carter, as a candidate, indicated that he would approve a "revision" of the Hatch Act. President Ford vetoed a bill similar to the Clay bill; the House failed to override by a vote of 243-160.

H.R. 10 permits, with certain exceptions, Federal employee participation at all levels of government, asserting: "It is the policy of the Congress that employees should be encouraged to fully exercise, to the extent not expressly prohibited by law, their right of voluntary participation in the political process of our Nation."

Under the present Hatch Act, Federal employees may:

AFL-CIO holds that the enactment of H.R. 10 is a "high-priority objective." All Federal employee unions see enhanced power over Congress from the highly populated Federal employment areas in key electoral states; also in key cities in other states which generally determine the election of many congressmen.

Most professional organizations, including the FPA, oppose any significant changes in the Hatch Act. The National Civil Service League, the International Personnel Man-

agement Association, and the citizens lobby, *Common Cause*, were among those expressing strong objections to various provisions in the bill during the two days of hearings in February. Federal professionals feel that H.R. 10 would politicize the civil service; they would find their careers determined more by political activity than by performance on the job.

Register and vote; and express opinions as private citizens, but not as active political campaigners;

Wear political buttons and display political bumper stickers, except when having contact with the public during work hours;

Participate in non-partisan elections and serve as election judges;

Be politically active in referendums, constitutional amendments, approval of municipal ordinances, etc.

Participate in nonpartisan activities of civic associations;

Belong to political organizations, but not as officials;

Attend political conventions, rallies, etc., but not as organizers;

Sign petitions and nominating petitions, but not as initiators or collectors;

Petition a Member of Congress or local or state official;

In other words, what is there that Federal employees cannot do now? They cannot run for partisan public office, collect monies for candidates and campaign funds, or manage political party committees in election campaigns.

Advocates of H.R. 10 include the largest industrial labor unions as well as all Federal employee and postal unions. They foresee 2.8 million Federal employees as a new political work force in national politics.

### PUBLIC TRANSIT AS AN ENERGY SAVER

**HON. ROBERT W. EDGAR**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. EDGAR. Mr. Speaker, the President's energy message to Congress emphasized the importance of conservation and the reduction of waste in our use of energy. Twenty-six percent of the energy consumed in this Nation is attributable to transportation, and transportation will figure prominently in the President's announced effort to slow the rate of growth in our use of energy to below 2 percent per year.

In light of this, I was disappointed that the President's energy message did not recognize the important role that public transportation and paratransit can play in our energy conservation program.

Not only did the President ignore public transportation in his address to Congress: The administration thus far has declined to support pending legislation to increase Federal support for transit. Just the other day, Transportation Secretary Adams did make some encouraging remarks concerning the possible use of energy taxes for public transportation, so perhaps the administration is beginning to see the light.

A recent editorial in my district's only daily newspaper, the Delaware County Daily Times, eloquently described the need for better public transportation, recommending that Congress recognize

the relationship between energy conservation and the need for alternative means of traveling within our urban centers. I commend this editorial to the attention of my colleagues:

#### NEED FOR PUBLIC TRANSPORTATION

The message was long in coming, but it was finally delivered: shape up or freeze.

Actually, the first mutterings on that subject had been issued by a variety of sources for some time; but Americans have a hard time comprehending the concept of finiteness. Rather than try to grasp the fact that there is indeed a bottom to the barrel of familiar energy forms, they have been busy blaming everyone and his brother for energy shortages: the greed of the OPEC countries, the profit mentality of the oil companies, a plot to sit on supplies until the price is right, and so on. This is easier to understand and consequently easier to attack than some fuzzy notion the earth's fuel indicator is inexorably sliding to "empty," whether oil producers and refiners sit on supplies or not.

The point now is no longer who sits on what and why, but rather how to survive until new forms of energy are available. To that effect, President Carter has given us his blueprint for thrift.

With one glaring omission.

Public transportation.

It does seem incredible that while the President rightly pointed out this country's mammoth waste, specifically of petroleum, he completely dismissed our undeniable need for driving—a situation in which we have cornered ourselves. It would be pointless to ascribe blame as to why that is so, because it's already happened and instant reversal is simply not feasible. The hard fact remains that most Americans can't go anywhere without a car.

Children cannot go to music lessons.

Or to after-class sport practices.

Or to the dentist.

Or anywhere without someone driving them there.

People can't go to work.

Can't visit each other.

Can't attend school, entertain themselves, or even shop, without a car.

Programs known as WHEELS have become necessary because older or poorer persons can't even get to lifesaving medical care or to a market without a car.

Why? Because there is no public transportation.

It is remarkable to note that there is not one country in the civilized world—not one—where it is so impossible for citizens to move about without private transportation as it is here.

Prompt, fast, and regular buses and trains will take any Englishman, Italian, Japanese, Russian, Frenchman or Swede anywhere he needs to go on a schedule by which one may set his watch. These systems are continuously upgraded and expanded, and are run on a non-profit basis by government. And the prices are within anyone's reach.

And here? Try to figure out the fastest way you could get to work in Clifton Heights, for example, from Claymont, without driving your own car. Unless you want to go by way of New York!

The fact is that public transportation in the suburbs, not to mention further out in the country, is either non-existent or so limited in routes, frequency or reliability as to be totally useless. Trains have the same limitations, only worse. Even bicycles are forbidden on major highways, and if they weren't, pedaling to work on I-95 in the morning and evening rush hours would be suicidal. Moreover, in a country built exclusively for cars and trucks, even trying to establish bike paths requires years of argu-

ments and a Supreme Court order. Similarly, the delivery of goods has been effectively limited to the dictates of trucking concerns, while freight trains sit rusting away on crumbling tracks; and while trucks are gobbling fuel at the rate of five miles a gallon, they can also bring the country to a standstill with one strike.

The Presidential energy conservation package will surely cramp America's driving style, but it offers no alternative for that style, and while it will eliminate some unnecessary driving and tone down Detroit-built inefficiency, it will also impede much of the absolutely needed driving. Moreover, without an alternative, the plan may not work at all: when the average worker finds that even getting to his job is eating away even more of what he earns, he will strike for higher wages. When his salary catches up, he will then look at the \$1 a gallon pump as unconcerned as he now looks at the 59-cent tag, and the consumption will rise again until the next round.

Congress is sure to fight many of the Carter proposals, but with the ultimate survival of this country in mind, Congress must offer the President some reasonable alternatives. Because Congress, presumably, is our voice, it is incumbent upon us to let our representatives know what is needed.

And the obvious need is another way of mobility if we are to park our cars as much as we should.

Much of the money raised through the proposed gasoline taxes, and the so-called "guzzler tax" could be used to create a whole new system of public transportation. Cities, counties, states—indeed the entire country—must be blanketed with an efficient bus, train, and subway network similar to those found in Europe and Japan. Our representatives, so fond of junkets abroad, should be delighted to take a few that would serve a purpose, bringing back and combining the best ideas into one that would fit our needs. The automobile industry need not lose in such a conversion, if it were employed to design, build and maintain the equipment that is needed.

In addition, and because we are told this is no longer fun and games, but survival, we envision public transportation being run by the federal government and its employees being civil servants—as they are in Europe—subject to the same benefits, protections and striking regulations as any other federal employee.

While it is true the federal government has not shown itself to be especially brilliant in its efforts to run any kind of business, leaving a service vital to the welfare of the nation in the hands of private enterprise probably would be disastrous.

We were told a few years ago to buy a car, buy a home in the suburbs, spark the home building business, help create a boom for malls and new business, get away from it all. So we did all this obediently to help sustain the economy.

It would seem now to be unfair, and unwise, to leave us stranded.

The average American understands the need for conservation. But he cannot be immobilized. Public transportation must be part of the answer.

**REPRESENTATIVE DAVID OBEY DISCUSSES CONGRESS AND THE PRESS**

**HON. MORRIS K. UDALL**

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. UDALL. Mr. Speaker, on May 27, our colleague, Dave Obey, addressed the

Western Wisconsin Press Association, with one of the most important and revealing speeches about Congress in recent years. In his usual forthright manner, Representative Obey goes to the heart of the conflict between Congress and the press, with a frank discussion of weaknesses on both sides and some commonsense prescriptions for improvement especially in the very necessary but often overlooked area of educating the public.

He decries the easy method indulged in by both sides—of legislating by press release or reporting by "cheap shots." Neither serves the public interest by avoiding serious scrutiny of the issues and conflicts that constitute our jobs here in the Congress.

Having undertaken the unenviable task of chairing the Commission on Administrative Review, Representative Obey in a short time has become one of the leading experts on the shortcomings of this institution. The Commission, under his strong leadership, produced the code of financial ethics which we incorporated into the House rules earlier this year. The Commission has now turned its attention to the archaic management and personnel practices of the Congress, and I am sure that much good will come from its recommendations.

The courage and foresight displayed by Chairman Obey are seen again in his speech, which should be required reading for our colleagues and responsible members of the press. I include Representative Obey's remarks in the RECORD at this point:

**SPEECH BY CONGRESSMAN DAVID OBEY, WESTERN WISCONSIN PRESS ASSOCIATION, EAU CLAIRE, WISCONSIN**

When I was contacted to be with you tonight, I was asked to speak about my view of the National Press. Ordinarily that is not a smart thing for a politician to do, but since you asked, I'm willing to try.

To do that in a responsible way, however, I think it's necessary that we all try to forget political labels, forget that some of us may be Democrats and some of us Republicans, some of us Liberals, and some of us Conservatives and some just confused.

What I want to talk about tonight has nothing to do with political philosophy. It is an institutional problem. There have always been tensions between the press and politicians. That's normal. And if that tension does not degenerate into superficial cynicism or contempt it can be a healthy thing.

But I want to talk about something that goes beyond that. The problem I want to talk about is not so much related to local press as it is to National Press—although I would like to speak frankly for a moment about some short-comings that I see in the way local press I know deals with national issues.

I know that the first responsibility of local press is to report local news. Your readers and viewers can get information about national problems from other sources. If they don't get local news from their local press, they're not going to get it from anybody.

But I must say in all honesty that I am distressed when I go back into a few communities back home and the first question I get is always "What are you going to do for — County or — city?" Any Member of Congress has a responsibility to do what he can to represent each locality and to help get its share of government programs.

But in the long run, actions that I take on national issues will have greater impact on local people than whether or not I get

HUD or EDA to approve a local construction project.

We need to be held accountable by the local press not only on the basis of whether or not we bring home the bacon, but also on questions that will determine the shape of the national economy, the quality of our water and air, education and health programs that affect the well being of the communities you serve every bit as much as a local public works project.

In short, I would hope that in addition to being questioned on important local problems with which I deal every day, I would also be questioned on national and international questions which affect people's lives in each of your communities importantly and directly.

But my main job here tonight is to talk about my impressions of the National Press. Let me say that on balance the people I've dealt with in the National Press are bright, hard working, dedicated, fair and thoughtful.

I've said many times that I believe the legislators I have worked with both in my days in the state legislature in Madison and in the eight years I have spent on Capitol Hill have exhibited a higher standard of ethics, a greater degree of concern about the country and a greater dedication to our country's welfare than almost any other group in society.

I think the same can be said for the vast majority of the members of the press with whom I have worked. It is a privilege to work in the company of many of the people who report and interpret the actions of the government to the country.

What disturbs me most when I think about the National Press is that I see the same developing pattern in the National Press that I see within the Congress itself.

You know, both the political profession and the news profession have the same potential weakness. We both need continuing public approval in order to survive. If I don't have it, I don't get re-elected. If you don't have it, you don't sell newspapers or you don't get a very healthy share of the viewing or listening audience.

Because of that dependency, we are both susceptible to the same temptation—the temptation to overdramatize, to over-reach for stories and headlines and, I am sorry to say, pander to popular prejudices.

In Congress we see a growing number of politicians who legislate by press release, who are far more comfortable issuing daily denunciations and exposes about some stupid act of government than they are in doing something effective to change these acts.

These press releases are usually good for headlines but in most cases there is no follow-up, no action taken and the next day there is always a new revelation, a new expression of outrage, and a new headline.

It is disturbing to me to see that same tendency, that same cheap-shot, one-a-day style growing in the National Press. More and more, you see story after story of a titillating nature, carrying this or that revelation which upon investigation turn out to be something far different, far less dramatic, and far less important than they first seemed.

That kind of journalism generates tremendous amounts of misinformation and it shrinks the ability of thoughtful journalists to write and be heard about these same subjects. Let me give you an example.

Since the adoption of the new Congressional Code of Ethics, Gaylord Nelson and I are probably the two most unpopular men on Capitol Hill. My Commission on administrative reform has now turned to the job of reorganizing the way the House of Representatives is administered.

Right now we have the Clerk, the Doorkeeper, the Property Custodian, the Architect, the Sergeant-at-Arms, and many more

who each has a separate job to do for the House.

The use of computers is growing like topsy at a cost of hundreds of thousands of dollars but we have no one in overall charge.

The administrative services and the administrative offices of the House are not coordinated in any thorough way.

We have no personnel policy.

If a Member's office is being painted, that Member has to call one office to have the nails pulled out of his walls before painting, and another office to have them put in again.

And there are other far more important problems.

There is no decent sick leave policy for employees. If my Administrative Assistant were to have a heart attack tomorrow and be out of commission for three months, I would have the choice as of the first of the month of either letting him go or being in violation of the law for keeping on the payroll someone who is not in the office performing his duties.

Salary structures allow committees to pay higher salaries than individual Members can. They allow the Senate to pay higher salaries than the House. That creates a situation in which different divisions within the same institutions are continually outbidding each other for the services of qualified people.

That is a stupid situation.

In short, the House is mismanaged. That is an important story. My Commission is trying to do something about it. But are these the stories that get reported?

No.

What usually gets reported are out-dated stories about out-rate meals (in fact, the House restaurants and cafeterias make money—they don't lose it)—free haircuts (there have been no free haircuts since I went to Congress—we pay \$3.00 and usually \$1.00 tip—about the going rate around town).

We see The Reader's Digest attack Congress for being the billion dollar Congress.

Well, that's sure true if you think it is fair to charge to Congress all the cost of the Government Printing Office which does printing for the entire Government.

If you think it's fair to charge to Congress the entire cost of operating the Library of Congress when, in fact, only \$23 million of the Library's \$173 million budget is directly attributable to the cost of serving Congress. The rest of the cost supports a research center which serves scholars and researchers across the nation and around the world.

We can call it a billion dollar Congress if you think it's also fair to count the entire cost of the General Accounting Office—the GAO—which is the financial watchdog of the Government.

Or the entire \$13 million cost of the Botanical Gardens which is primarily a Washington tourist stop and which spends only approximately \$64,000 of its budget on matters directly relating to Congress.

We can count the \$8.1 million for the U.S. Tax Court which has traditionally been included in the legislative budget although it has no connection whatsoever with Congress.

You can count the cost of the Capitol Guide Service which, the last time I looked, guided taxpaying visitors around Capitol Hill, not Members of Congress. It costs \$390,000 to show the public around the Capitol without charge.

When you subtract from that billion dollars the costs which are attributable to other government-wide functions, the costs related directly and exclusively to running the Congress are no more than half of that figure which is bandied around by people who don't let facts get in the way of making a point.

You know, the Congress is damned if they do and damned if they don't. For years, while

the bureaucracy and the executive grew in power and numbers Congress limped along with 18th Century procedures and staff.

When Congress lagged behind and did not equip itself to deal adequately with other branches of Government, it was called the sapless branch. Now that Congress has begun to equip itself in a modern way, it is attacked as being the billion dollar Congress.

Well, let me give you an example to show you why Congress often doesn't know what's going on in Government. Right now, the Labor-HEW Appropriations Subcommittee on which I serve, deals with the budget of the Department of Labor and the Department of Health, Education and Welfare. That is a \$130 billion budget. Every time the Secretary of HEW comes up to testify, he brings with him an army of 15 or 20 assistants to help him answer every question about the way he is spending your money.

For just the National Institutes of Health alone, over 57 staff assistants accompanied the institute Directors to Capitol Hill to plead for their budgets.

Do you know how many staffers that subcommittee has to deal with that \$130 billion budget—four people.

Do you really think money is saved when the Congress denies itself staff to probe into the spending of the public money?

Can you imagine the president of a major company with a budget of \$130 billion making decisions on the basis of the policy analysis of four assistants? If you were a stockholder in that company, how confident would you feel in the quality and depth of the staff work done before those decisions were reached?

You will also see stories bemoaning the cost of running individual Congressional offices. "Can you imagine," the stories shout, "Members of Congress actually have offices, and desks, and typewriters and telephones and parking spaces!"

Well, what is so shocking about that?

Do you know of any business executive who doesn't consider that a normal part of doing business? Each Member of Congress, after all, represents 500,000 people.

I vote approximately 1,200 times a year in committee and on the floor. I receive about 50,000 letters from people from home each year and you know, it is funny. They have the damndest notion that the votes I cast should be well thought out and they expect me to answer their letters—occasionally they even expect a thoughtful response.

It doesn't get done with mirrors.

Last week I won passage of an amendment that increased by 400% the share of counter cyclical revenue sharing money which comes into my district. That just didn't happen. It took two weeks of hard work by a Legislative Assistant who worked with the Wisconsin State Office in Washington, badgered the committee staff, put the information together, drafted the amendment, explained it to me—that was the hard part—and figured out which other Congressional districts were similarly affected so that I could get additional support on the floor.

It took me ten minutes to win House approval. It looked easy. But, without the preliminary staff work it could not have been done. The money that amendment will bring to local units of Government in my district is enough to run my entire Congressional office for 4 years.

Congressional staff is not a perquisite of office. It is a necessity if a Member of Congress is to do a decent job of representing the interests of 500,000 people from home. But to some Members of the National Press they're defined as perks.

But you know, it is surprising how fast the definition changes when one reviews the accommodations of the Press Gallery rather than the accommodations in a Congressional

office. There are not many stories written about the amount of taxpayers money spent to support the Washington press.

Let's look at some of those costs:

Twenty-four employees of the House and Senate Press Galleries plus special doorkeepers and messengers, at a total cost during 1977 of \$592,517.

One-hundred eighty-one free, reserved parking spaces in choice locations on the Capitol grounds at a cost, based on comparable parking downtown of \$130,000.

About 180 free telephones, adding up to approximately \$23,000 a year in phone bills. Desks, chairs, typewriters, and other equipment worth about \$40,000.

Semi-private elevators (in the Capitol the same elevators that are reserved for Members of Congress are frequently reserved for members of the press as well).

Exclusive press tables in the House and Senate Dining Room.

Free stationery with Congressional letterhead.

Access to the same office supplies, meals, barbers, subways, and check cashing facilities available to Members of Congress.

Some of these privileges are hard to measure, but the cost to the taxpayer comes to way over \$1 million a year.

Having told you what the cost of the Congressional Press Gallery is to the taxpayer, let me hasten to add that I think that cost is irrelevant. A million dollars is a lot of money and I don't want any of it wasted.

But a million dollars is a small price to pay to enable the press to do its constitutionally protected job of reporting to the American public of the activities of their elected public servants. They have an important job to do, and we ought to make it as easy as possible for them to do it well.

But the same is true of Congress.

I don't mind serious stories about Congressional waste. I welcome them because with a \$60 billion deficit we cannot afford waste anywhere.

What I do mind is the misplaced sanctimony of some of the reporters who have populated the House and Senate Press Galleries in increasing numbers the last few years.

What I do mind is the national TV reporter who does a three-minute network clip on Congressional "perks" such as free parking without ever getting around to telling his viewers that he himself has a free space on the same Capitol Hill.

What I do mind is the celebrated habit of virtually all of the National Press of telling the nation that Congress has taken another "vacation" when we shut down the legislative shop to go home for a week of Easter, or Labor Day Recess, or Memorial Day. If anyone thinks I'm on vacation tonight, for instance, then they have a different understanding of the word than I do.

I remember a year ago when the press both in Washington and Wisconsin was shouting the story that Congress was on another "vacation." I finally sent a copy of my ten day schedule in the district to every newspaper editor in the state inviting them to accompany me on my "vacation" provided that they stick with me for the entire ten days.

I think that the National Press has been educated on that score, however, by the poll which my Commission did which showed that more than anything else the public wants us back in our districts more. They don't think the republic will crumble overnight if Congress is not in session.

And what I do mind is the national reporter who produced a drumbeat of stories about the necessity of tough financial disclosure measures for Members of Congress but recoiled in shock at the suggestion that

financial disclosure for those who write the news is just as important as it is for those who make the news. Doesn't the public have a right to know if a science writer has large holdings in drug company stocks?

What I do mind is the well-known Washington reporter who writes a column of opinion opposing the effort of Congress to limit outside income for Members of Congress and then shifts roles and writes a series of supposedly objective news accounts of that same Congressional activity.

And what I mind even more is the knowledge that it has become far easier for working reporters to get the stories aired or printed if they are associated with private scandal than it is if they are about serious legislative struggles.

The most thoughtful man to serve in Congress in a generation was Bill Fulbright. I'd like to read you something he wrote in the *Columbia Journalism Review*:

"The press and television gave something like saturation coverage in 1974 to Congressman Wilbur Mill's personal misfortunes; by contrast I do not recall reading anything in the press about the highly informative hearings on the Middle East, and another set on international terrorism, held in the spring of that year by Congressman Lee Hamilton's House Foreign Affairs Subcommittee on the Near East and South Asia. The crucial ingredient, it seems, is scandal—corporate, political, or personal. Where it is present, there is news, although the event may otherwise be inconsequential. Where it is lacking, the event may or may not be news, depending in part, to be sure, on its intrinsic importance but hardly less on competing events, the degree of controversy involved, and whether it involves something 'new'—new, that is, in the way of disclosure as distinguished from insight or perspective.

"The national press would do well to reconsider its priorities. It has excelled in exposing wrongdoers, in alerting the public to the high crimes and peccadilloes of persons in high places. But it has fallen short—far short—in its higher responsibility of public education. With an exception or two, such as the National Public Radio, the media convey only fragments of those public proceedings which are designed to inform the general public. A superstar can always command the attention of the press, even with a banality. An obscure professor can scarcely hope to, even with a striking idea, a new insight, or a lucid simplification of a complex idea. A bombastic accusation, a groundless, irresponsible prediction or, best of all, a 'leak,' will usually gain a congressman or senator his heart's content of publicity; a reasoned discourse, more often than not, is destined for entombment in the Congressional Record. A member of the Foreign Relations Committee staff suggested that the committee had made a mistake in holding the 1974 detente hearings in public; if they had been held in closed session and the transcripts then leaked, the press would have covered them generously."

That makes the point better than I can. Working reporters have told me that it is far easier to convince their editors back home to make room for stories about the personal lives of Members of Congress than stories about the misdirection of OSHA, the waste of research dollars at the National Cancer Institute, or the immense social consequences of the hundreds of policy decisions found in an appropriation bill for the Health, Education, and Welfare Department.

One reporter came up to me after filing one of his cheap-shot stories and said to me, "I know it's crap, but it'll get printed."

One inherent problem we have, I suppose, is that the main job of legislating is to resolve conflicts while the main interest of some segments of the press seems to be to dramatize conflicts.

Well, I've said enough for now, but let me end as I began, by making clear once again

that I condemn the press no more than I condemn the Congress. Let me make it clear that I believe cheap-shot artists in the press are a distinct minority, just as I believe that the charlatans are a distinct minority in the Congress.

Members of Congress are expected to deal—if not intelligently at least adequately, with budgets, taxes, economics, environment, energy, foreign affairs, civil liberties, agriculture, health, education, housing, and a whole maze of other issues. You have to deal with the same issues. Both our jobs are almost impossible.

Members of Congress have essentially three functions: a legislative function, a service function, and an educative function. We do not do the latter very well. Although in a democracy that is perhaps the most important part of our job.

The public needs both its public servants and its press to do more than simply entertain them. It needs to have both of us deal with the stories that are important to tell, not just those that are easy to tell. It needs, from both of us, a sense of balance, a sense of fairness and, most importantly, a sense of perspective.

I hope that you and I and the people we both work with will do more in the future than we have done in the recent past to see to it that they get it.

#### WANT TO KNOW ABOUT EXITS? DON'T ASK!

**HON. G. WILLIAM WHITEHURST**

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. WHITEHURST. Mr. Speaker, the foibles of the Occupational Safety and Health Administration have become legion, but it is not too often that we are able to draw humor from the straight-faced regulations issued by that agency.

I am, therefore, for the amusement of my colleagues and the other readers of the *RECORD*, introducing a bit of satire taken from the Saturday, June 4, 1977, edition of the *Norfolk, Va., Ledger-Star*. Bill Burke, a member of the news staff of that paper, has included these barbs, which were cleverly compiled by Andy Alford, an aide to my good friend and colleague, the Honorable ROBERT W. DANIEL, JR.

WANT TO KNOW ABOUT EXITS? DON'T ASK!  
(By Bill Burke)

Labor Secretary F. Ray Marshall recently ordered the federal Occupational Safety and Health Administration to get rid of "Mickey Mouse" job safety rules, and nowhere were the huzzahs louder than in the office of 4th District Rep. Robert W. Daniel Jr.

Daniel has long been a critic of the voluminous and verbose regulations promulgated by OSHA. He claims that if all the OSHA rules compiled since the agency was formed in 1970 were stacked one atop another, they would make a pile 14 feet high. (Which would constitute a safety hazard in itself. Imagine a 14-foot high stack of government regulations toppling over on you.)

Daniel's Washington office aide, Andy Alford, compiled a collection of some of the regulations Daniel has been fussing about for years. A few samples follow, with editorial comment:

"Wood ladders, when not in use, should be stored at a location where they will not be exposed to the elements, but where there is good ventilation."

Ladders need fresh air, too.

"No furnishings or decorations of an explosive or highly flammable character shall be used in any occupancy."

Don't build end tables from dynamite sticks.

"Regardless of height, open-sided floors, walkways, platforms, or runways above or adjacent to dangerous equipment, pickling or galvanizing tanks, degreasing units, and similar hazards shall be guarded with a standard railing and toe board."

Pickled and galvanized employees perform poorly.

"Fixed stairs shall be provided for access from one structure level to another where operations necessitate regular travel between levels. . . ."

If you erect a two-story building, it's a good idea to have stairs to get from the first floor to the second.

"Extension ladders should always be erected so that the upper section is resting on the bottom section."

It's not a good idea to put the bottom on top of the top, or vice versa.

"Knots shall not appear in narrow faces of side rails (on wood ladders). Knots, if tight and sound and less than one-half inch in diameter, are permitted on the wide face provided they are at least one-half inch back from either edge and not more frequent than 1 to 3 feet of ladder length."

What does your daddy do? He's a ladder-knot counter for the government.

In case you thought an exit is simply a door you walk through to get outside, OSHA will set you straight. An exit, OSHA tells us, is a "means of egress," and has three component parts.

First, an exit access: "Exit access is that portion of a means of egress which leads to an entrance to an exit."

Second, the exit itself: "Exit is that portion of a means of egress which is separated from all other spaces of the building or structure by construction or equipment as required in this subpart to provide a protected way of travel to the exit discharge."

Which brings us to the exit discharge: ". . . That portion of a means of egress between the termination of an exit and a public way."

Or in Labor Secretary Marshall's case, the door these and other such regulations have been instructed to take a walk through.

#### UNIVERSAL VOTER REGISTRATION

**HON. DAN MARRIOTT**

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. MARRIOTT. Mr. Speaker, President Carter's proposed Universal Voter Registration Act of 1977 (H.R. 5400) appeared to be a good idea designed to make it easier for more individuals to vote.

However, a careful examination of this proposal shows that this measure would be an open invitation for fraud. Registration before election day is an important safeguard against voter fraud. If we remove this protection, we are preparing the way for widespread vote stealing.

State officials of both political parties have courageously opposed this measure. Rather than being a universal voter registration bill, it would provide for universal voter fraud.

I would like to enter into the CONGRESSIONAL RECORD a perceptive letter from the Secretary of State of Ohio, Ted

Brown. The letter was written in response to a request from Vice President WALTER MONDALE on the same-day election bill and has been printed in the April 1977 edition of the American Conservative Union publication *Battle Line*. Mr. Brown emphasizes the effect of one illegal vote per precinct and discusses the weaknesses of President Carter's proposal. He points out not only the fraud possibilities but the confusion and chaos which could result from election day registration. I urge my colleagues to read this letter carefully.

#### OHIO SECRETARY OF STATE RAPS CARTER VOTE PLAN

(The following letter has been sent to Vice President Mondale by Ohio Secretary of State, Ted Brown, regarding President Carter's proposal which would allow a person to register to vote when he goes to the polls on election day by simply presenting some form of identification.)

Dear Mr. Vice President:

Thank you for your letter and enclosures of March 19, 1977, regarding a Federal plan to "open up" voter registration by promoting election day registration. As an election official, I am unable to agree that this proposal constitutes "election reform". On the contrary, I feel that this plan represents a regression to the days of bought and bartered votes and stolen elections which an effective voter registration program has helped put far behind us.

The impact of "just one illegal vote" should not be underestimated when tinkering with election safeguards. In 1974, less than one vote per precinct defeated an incumbent Ohio governor, a margin later confirmed by recount. In 1976, less than one vote per precinct in Ohio gave you and President Carter Ohio's 25 electoral votes and your early morning victory, again confirmed by recount. Elections, like banking, can never become an approximate business.

Many American citizens are already skeptical about the value of their single votes. Can you imagine their disillusionment and disaffection if our elections system makes it possible for an individual's vote to be negated by one illegally cast? To capture and hold the faith of the American electorate, our elections system must be like the behavior of the pastor's wife—not only proper in fact, but also in appearance.

It is not enough to say that stiff penalties are included to punish those who cast illegal ballots. In any secret ballot election an illegal vote counts as much as a proper one; and once cast, the identity of that vote is lost forever.

The punishment aspect of any program can easily be overvalued. As you know, it is not the severity of the penalty which deters criminal activity, but rather the certainty of punishment. Detection and apprehension of illegal voters under an instant registration system would, at best, be a very uncertain proposition. Prevention of illegal voting in this day of widespread and easily obtainable false identification documents would be even less likely.

Our experiences in Ohio have shown that severe penalties for illegal voting can, in fact, work against effective enforcement because of the reluctance of courts and prosecutors to pursue felony convictions against fraudulent voters for "just one illegal vote."

Ohio is considering legislation which involves election day registration; and therefore, the Ohio Senate Elections Committee invited the Secretary of State of Minnesota and the Milwaukee, Wisconsin, Administrators of Elections to testify on the merits of election day registration. They were told that in Milwaukee the people had to wait in line two and one-half hours to vote while polling place officials handled election day registra-

tions. Although the Administrator of Milwaukee, Wisconsin, did not think a two and one-half hour voter wait was a serious problem, it seems to me that it would prove a severe irritant and that it may actually discourage some people from voting who did not want to take the time to wait.

In her testimony before the Ohio committee, the Secretary of State of Minnesota stated that because of election day registration there were insufficient ballots to handle all of the voters in some precincts and that ballots had to be photocopied. This procedure increases the possibility of election fraud. Forcing voters to wait until ballot shortages could be communicated and photocopies made and delivered to the polling places is bound to cause a serious slowdown in voting.

I am also concerned that election day registration would actually serve as an inconvenience to voters who had registered prior to the day of the election and that the concept could cause serious administrative problems for election officials. If those officials make an incorrect guess as to the number of people in a precinct who will turn out to register and vote on election day, too many or too few ballots or too many or too few voting machines would be provided for such precincts. The consequences are obvious. It is a waste of expensive equipment or printing if too many voters are anticipated, but don't appear, and long voter lines will occur if the voter turnout is seriously underestimated.

In 1972 the United States Supreme Court ruled that a state residence requirement for voters of longer than 30 days was unconstitutional. The court gave its approval to 30 days only because the state was able to show that it took that long to complete the clerical function of registration before an election. Presumably if voters are allowed to register and vote on the same day, a pre-election clerical operation would not be involved; and the argument for a 30-day voter residence requirement may no longer be valid. If no period of residence could be required, another important safeguard will have fallen because of enactment of the Federal law.

For the last 27 years the citizens of Ohio have entrusted the care and preservation of their sacred franchise to me as their Chief Election Officer. During that period and with the help of conscientious and dedicated local election officials of both parties, we have built in Ohio an elections system widely regarded as the best in the country. It is from that point of view that I wholeheartedly urge abandonment of any plan to compel the various states to accept a dangerous plan of election day registration for Federal elections and to "bribe" the states with taxpayer money into acceptance of such a plan for state and local elections.

Sincerely yours,

TED W. BROWN,  
Secretary of State.

#### ONE MORE CONSUMER AGENCY IS TOO MUCH

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. MOORHEAD of California. Mr. Speaker, I should like to bring to the attention of my colleagues an article written by Dave Joergenson of the Glendale News-Press in my district concerning the proposed Agency for Consumer Advocacy.

[From the Glendale (Calif.) News-Press, May 19, 1977]

#### ONE MORE CONSUMER AGENCY IS TOO MUCH (By Dave Joergenson)

With 33 federal agencies and approximately 400 government bureaus and subagencies running more than 1,000 consumer oriented programs, what this country needs more than anything else in the whole world is another consumer agency.

Accordingly legislation has been introduced in the House of Representatives and the U.S. Senate to create the Agency for Consumer Advocacy (ACA).

It is estimated that the existing agencies and their procedures are costing the taxpayer and business from \$80 to \$100 billion a year, having increased by more than \$600 million in the last two years.

If the ACA becomes fact, the cost of its operation will be \$60 million in the first three years, and that is only the beginning.

Ralph Nader, who says this is the most important legislation in the history of consumerism, believes the ACA is needed because the existing agencies are not doing the job.

So if federal agencies are the problem, the obvious and logical solution is the creation of another federal agency.

The idea behind the legislation, and it is a terribly clever one at that, is to create a watchdog to watch the watchdogs.

This is essential, say proponents of the measure, because existing consumer agencies and big business are now in the same bed, between the same set of sheets playing patty cake.

Besides, say agency advocates, the consumer is gullible and needs help. Further business is avaricious and needs watching as do other government agencies because they tend to believe in governmental infallibility.

In other words, we all need the ACA to unscrew us.

Now, it must be understood that in order for the ACA to do the job of representing all of us throughout government and the private sector, it must be independent.

In fact, the wording creating the agency gives it so much independence that there exists in it considerable potential for disruption of the political system.

The stability and effectiveness of government depends upon balance among its institutions. Political power inadequately confined creates imbalance and invites abuse.

Leon Jaworski of Watergate fame, said the ACA would be vested with authority so broad that it could easily be turned to the political advantage of those who control it.

He says there are no checks sufficient to harness that authority, therefore, the potential for abuse.

The stated authority is to "protect" and to "represent" the "interests of consumers" in virtually every activity of the federal complex.

To accomplish this goal, the director would have the right to appear before agencies and bureaus in the government; the right to collect information by compulsory process in and out of government; the right to sue government and the right to speak from any platform on behalf of the vaguely defined "consumer."

Theoretically, the agency represents every man, woman and child in the country.

Says Jaworski, "This conclusion leads to the question of how the interest of the people will be determined in any given matter. There are no criteria in the bill for defining that interest, nor could there be."

"Definition of the national interest is the most difficult and most fundamental objective of government; and ultimate responsibility for its accomplishment is placed by the Constitution upon the elected members of Congress and the President."

"I have severe reservations about the delegation of so broad and basic a role to one unelected official," said Jaworski.

June 6, 1977

He says the political authority inherent in such an assignment is "literally enormous."

"But more importantly," says Jaworski, "there is no effective check against abuse of that authority by the elected branches. The bill contains no provision for a term of office or for the circumstances under which the administrator may be removed."

Because advocates of the agency claim the director needs to be independent of executive or legislative branches of government, he is not under their control.

"Power would be vested in the director that could be wrongfully manipulated," said the former Watergate prosecutor.

"That alone is sufficient to justify laying the concept to rest once and for all. It is contrary to the most fundamental of our democratic principles to vest in one unelected person the authority to represent, legally and politically, the interests of all the people."

It is also contrary to the wishes of a majority of Americans who want less government, less cost, and less intrusion.

But that shouldn't stop government, because its desire to grow and spread is greater than its desire to listen and respond.

#### CONTINUING CRISIS IN FOSTER CARE

### HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. MILLER of California. Mr. Speaker, since introducing the Foster Care and Adoption Reform Act of 1977 last March 31, I have periodically discussed, in the extensions of remarks, various studies which clearly necessitate an immediate substantive reform of the Federal role in foster care and adoption. In the past, I have provided excerpts from reviews conducted by the General Accounting Office, the Department of Health, Education, and Welfare, the Regional Institute of Social Welfare Research, the Congressional Research Service of the Library of Congress, and others.

Last week, the Ways and Means Committee overwhelmingly reported to the full House H.R. 7200, which contains many of the reforms of the foster care and adoption program contained in my own legislation. Last week, also, as if to bolster further an already solid case for the enactment of such reforms, yet another highly critical report on foster care was published.

This most recent study was released on May 26, 1977, by the office of the comptroller of the city of New York. The Report on Foster Care Agencies' Achievement of Permanent Homes for Children in Their Care, not only paints a tragic picture of the foster care system in one city, but illustrates that the problems which have been uncovered in New York are basically identical to those documented in other studies in other areas of the country. Nor is this the first review of the program in New York City. Just last year, a study by the State board of social welfare revealed that over half the children placed in foster care were inappropriately placed originally, and concluded that such original misplace-

ments become self-fulfilling prophecies as children continue to languish for years in needless and inappropriate placements, often institutions.

The most recent report, completed by the Office of Comptroller Harrison J. Goldin, concluded that a majority of the children reviewed had been kept in foster care "for excessively long periods to the detriment of the children and at enormous cost to the taxpayer." Comptroller Goldin used words like "deplorable" in describing a condition which he termed "avoidable" in most cases.

#### SUBSIDIZING FAMILY BREAKUPS

In the past, I have said that the Federal emphasis on open-ended maintenance payments through title IV-A of the Social Security Act, while severely restricting funding for preventive and family reunification services which could reduce the need for foster care, amounts to a Federal subsidization of the breakup of the American family. Apparently, Mr. Goldin found similar results, because he noted that the system has "a fiscal incentive structure that pays agencies for keeping children in foster care, but does not reward them for discharging children" to their parents or for adoptive placements. In fact, the Goldin report found that in 1976, only 15.3 percent of the foster children were discharged to permanent homes, and that only 953 children were placed for adoption, although 5,727 were planned to be adopted by the agencies.

#### WILDSREAD INAPPROPRIATE PLACEMENTS

A 1955 New York study found that 41.6 percent of the children in foster care in that city had been in care 5 years or longer, and identified many familiar problems in the placement and review processes. Sixteen years later, in 1971, the number of children in this supposedly short-term placement program who had been in care longer than 4 years was 58.2 percent. In the 1977 Goldin study, the comptroller found that 65 percent of the children in foster homes had spent an average of 5½ years more than necessary in foster care, at a total cost to the taxpayer of \$233 million; that is a total of 11,000 children.

A system which was planned to give children a greater sense of permanency has, in fact, become a prime source of impermanency itself. The Goldin study found that 29 percent of the children had been in three or more foster homes, and that nearly 30 percent of these "had seriously deteriorated during their many years in such care. By comparison, only 13.9 percent of the children who had been in one foster home evidenced such deterioration."

#### STAGNATING ADOPTION PROGRAM

The Goldin report found that 64 percent of the foster children had spent at least 18 months in placement, and ought to have been freed for adoptive placements. In fact, only 4 percent were freed on a timely basis, and an additional 12.8 percent "after many years of care [were] eventually freed." The comptroller's auditors found that many child-caring agencies made "little effort" to place children in adoptive homes, and even

"positively discourage" potentially adoptive parents. The auditors also found incidents of discrimination against prospective adoptive parents on the basis of marital status, race, religion, and geographical region, and found incidents of "expensive adoption fees" being used to discourage adoption. They also cite cases of caseworkers who describe available children in "highly negative terms" rather than encouraging their adoptive placement. In fact, it was found that 23.5 percent of the freed children were not even registered with the State adoption service agency, as currently required by State law.

#### INADEQUATE PROVISION OF SERVICES

Like most other studies, the Goldin report found that most children are placed in foster care because of a parental problem, not because anything is wrong with the child which necessitates removal from the natural home. Yet, after the child has been removed—often before the offering of appropriate preventive services which could have mitigated the need for removal in the first place—both the child and the natural parent are often ignored by the agency. The Goldin report found that only 57.6 percent of the cases indicated "adequate social casework services in terms of foster home visits and working with the natural parents. Many children needing psychological or psychiatric service did not receive them on a timely basis at all," a figure nearly precisely matched in other areas by GAO.

In reviewing the case plans, on the basis of which a child's progress in the foster care system is measured and future services are decided upon, the Goldin auditors found that adequate plans existed for less than 40 percent of the children.

Clearly, the lack of adequate Federal support for the development of such service programs plays a major role in the failure of New York and most other cities to have such cost-effective systems in place. H.R. 7200 would greatly increase such Federal supports by fully funding the long-bypassed title IV-B program.

#### EFFECTIVENESS OF COURT REVIEWS

Current Federal law requires a semi-annual review of federally-claimed foster children. The General Accounting Office study of foster care in four States, which I commissioned in 1975 with my colleague from Indiana, Mr. BRADENAS, indicated that such reviews were often not conducted and when they were held, often were inadequate, lasting only a few minutes. Such reviews clearly cannot adequately review the appropriateness of a child's placement or properly plan for the disposition of a case.

H.R. 7200, drawing on recently enacted State laws which attempt to introduce a greater degree of accountability into the review processes, would clarify the procedures which must occur during the semiannual review, and would introduce a requirement for a dispositional review—no later than 18 months after a child had entered foster care—to determine the long-range placement of the child, including a return to the natural family or terminating parental rights in expecta-

tion of adoption. This review would be conducted either by a court of competent jurisdiction or by a court appointed officer.

It is therefore interesting to note that the Goldin report endorses a "presumptive 18 month limit in all cases" of foster care. This is particularly wise since child psychologists note that placements of longer duration can be seriously detrimental to a child's development. Moreover, statistics clearly show that a child remaining in foster care longer than 18 months stands a better than 80 percent chance to remain in placement until age 18.

The Goldin investigation noted, in this regard: "We have found the family court to be a significant factor in prodding agencies via its 18 month case reviews" to make a final decision regarding the child's future placement. Over 43 percent of the cases reviewed by the court resulted in a case plan modification and/or the placement of the child in a permanent home. These statistics correlate closely to figures developed by the National Council of Juvenile Court Judges program, children in placement—CIP. In four States—Ohio, Oregon, Texas, and Rhode Island—the CIP court review moved from 8 to 67 percent of the children reviewed out of foster care, at tremendous savings to taxpayers and great benefit to the children.

The authors of the Goldin report close by advising:

We hope . . . that this report's findings and recommendations will provide a significant impetus to the reform of foster care not only in New York City, but also in other sections of the country.

As we have seen from comparable studies, the problems of New York are not unique to that city, but are very similar nationwide. Those provisions of H.R. 7200 which refer to foster care and adoption reform, and child welfare services, will provide the renewed Federal support for the improvement of this system which today not only holds 350,000 children annually in impermanent limbo, but which costs taxpayers billions of dollars annually for a system which achieves none of its professed objectives, either for the society at large, or for the children.

I urge my colleagues to give H.R. 7200 their strong support when it comes to the House floor next week.

TRIBUTE TO MR. EMIL HEIN: A  
"GUARDIAN ANGEL" TO MANY  
ELDERLY

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. HYDE. Mr. Speaker, I am proud of all of my constituents, but I take special pride in representing Mr. Emil Hein, whose very useful activities were the subject of an article in the Chicago Tribune of May 27, 1977.

I am sure Mr. Hein does not seek publicity or notoriety, but nevertheless his

great kindness in bringing a little cheer to the lonely elderly should serve as an example to all of us.

I am pleased to share with my colleagues the article about Mr. Hein written by Anne Keegan:

HE DELIVERS A BREAK IN LONELINESS

(By Anne Keegan)

Around 11 a.m. they start looking for him. Sitting in their bungalows, listening for the slam of his car door or his foot steps on the walk. Peering through the curtains, lifting up the shades to see if he's in front.

Sitting on the sofa, surrounded by their knickknacks, the pictures of their grandchildren, pillows, and dollies—they wait alone with the heavy quiet of the house.

For some he is their only visitor. The only one they will see all day. The only one they have to talk to. To crack a joke with or shed a tear with.

He breaks the tedium of loneliness. Gives a routine to their long and open days. Sets a pattern where yesterday's patterns seem to have faded away.

And, he brings them something good to eat, perhaps their only hot meal of the day. For when you are old and alone and can't get around very well, it's hard to cook.

So, by mid-morning they are ready. They are looking for him. Listening for him. Glancing at the clock. Waiting for Emil Hein.

And by mid-morning, Emil Hein, 74, is on the road in his gray Chevrolet, heading out for his route. He delivers hot meals in Berwyn and Cicero to senior citizens who cannot leave their homes or cook for themselves. It is called Meals on Wheels and is run by the Berwyn-Cicero Council on Aging.

There is a serious need for this service in Berwyn and Cicero. For the area has the largest concentration of senior citizens in the county.

Most of Emil's people are Bohemians—immigrants whose tidy bungalows mean a lot to them. And although they cannot get around too well, or cannot take care of themselves, and their mate is gone and they live alone, they won't leave the house they worked so hard for so many years of their lives.

"These people just don't want to go into nursing homes," said Emil as he headed toward the seven houses on his route in Berwyn—a town where one-fourth of the population is elderly.

"And for many of those who do, it just doesn't seem to work. I had two women on my route and they were put in a nursing home. One lived two months; the other lived three.

"Taking them out of their homes of 40 or 50 years is like pulling an old plant out by its roots. Some of the transplants take but most of them wither up and die."

He pulled up to his first house—a brick bungalow next to a parking lot. He pulled out a tray with goulash, salad, noodles, broccoli, a carton of milk, some bread, and a desert of fruit.

"For most of them, this is the only hot meal they get," he said. "And when they just eat cold foods, this is a chance for a well rounded meal."

He went to the first house. The door was open. The woman inside was waiting for him, sitting next to a fan that had not been turned on.

"Where's your husband?" Emil asked. "He fell down and hurt his head," she said, leaning forward on her walker. "I had to call the police to take him to the hospital."

"Who's going to come in and check on you?" asked Emil setting her meal down on the table.

"Oh, my niece is supposed to come," she said, her chin starting to quiver.

"But you can't depend on her. You can't depend on relatives these days."

She rubbed the tears out of her eyes.

"You see, my daughter is in another state, and she's sick. My sister told that niece, 'It's a damn shame you kids can't take care of us.' We did it when you were their age."

They talk a few minutes and Emil says goodbye and promises to see her tomorrow.

"You can see," Emil said getting back in the car, "that for most of them, it is a lonesome life. When I was young there was respect for grandfather—anybody's grandfather. But I guess kids now feel the government will take care of their parents, why bother?"

The next stop was three blocks away.

"I found this man lying on the floor a year and a half ago," said Emil as he walked up the back steps. "He'd fallen and broken his hip. I don't know how long he would have lain there if I hadn't come by."

A lanky, boney man in a T-shirt leaned on a walker on the other side of the screen and reached to unlock the door. Then he collapsed without a word in a chair.

The kitchen where he sat was barren except for photographs of children behind the glass in the china cabinet. An ashtray was within reach and the rooms smelled of strong tobacco.

Emil said a few words of cheer and the man nodded back. He cannot hear.

At the third house was a little woman with a cane. Emil had found her a year before lying on the bedroom floor. "I was scared," Emil recalled. "She was as white as a sheet. I'd thought we'd lost her."

She calls Emil "The Russian" because during their daily chats she learned where he was born. She leaned heavily on her cane in her house that is cool and tidy.

"How are you today?" Emil asked.

"Not so good," she said, looking down at the floor.

"Oh," he joked, "you say that all the time. But you look as good as the day I met you."

The fourth house call took more time. The man inside with the cane could not move fast when he opened the door.

"How are you?" asked Emil, putting down the meal.

"I'm slipping, Emil, I'm slipping," the man said. "Every day you get stronger and I get weaker."

"This cancer of the bones, it has so much pain. I'm taking these drugs and so I don't want to eat. And now it seems I'm getting used to the drugs 'cause every day I feel more pain. My God, it's terrible. This is just the beginning. How am I going to make it to the end?"

The man ran his hands slowly through his full head of hair.

"Why don't somebody give me a few pills and spare me this pain? Last night it was so bad I couldn't sleep; I broke down and cried. If I'd have a few pills around that could do the job, last night I would have taken them and ended it all."

"Take care now," Emil reassured him. "I'll be back tomorrow."

"I do this to keep active," Emil said as he headed for the next house. "And I like to talk to old people. It helps them just to be able to talk to somebody. When they can tell someone how they feel, they seem better afterwards. They're so lonely. You can see the appreciation every day in their eyes."

Emil ducked into the fifth house—an elderly couple who were getting their first delivery. And at the sixth, up in the second floor of an apartment, a woman named Ann welcomed him with a big smile.

"This last little lady," Emil said, "has nobody but she's got lots of spirit. She is 89 years old and she's the healthiest one on the route."

"That you breaking my bell, Emil?" cracked a voice behind the door.

"Sure is, Minna. Come on and let me in."

"Okay," she said chuckling. "I'm still young at heart and hearty, you know."

She padded in her house slippers across

the carpet through a darkened dining room where a "Senior Power" button protruded from the top of a pin cushion.

"You know what I was doing, Emil, just now?" she asked. "I was just having myself some strawberry jam on coffee cake. That's what I was doing. And I won't get fat 'cause I'm not good natured."

She cracked a laugh and slapped her leg. "Let me tell you, what Emil's doing is the best thing that ever happened in Berwyn and Cicero," she said. "If there was another Emil in town we'd be at the top of the world. You know, he took me out for my birthday."

"But listen here now, Emil. You got to fix my gate. You said you'd do that."

"I will, Minna, I will," he said. The two chatted for 10 minutes and then Emil headed for the door.

"Happy sailing, Emil," Minna chanted through the screen. "That's the song I'm singing today."

"Happy sailing, Minna," said Emil starting up his car.

Tomorrow, he will be back and they all know it. He will bring another hot meal and some more words of cheer, give them some attention, break the monotony of the day.

The same time tomorrow he'll knock on their doors. And they'll all be there—waiting.

#### CONGRESSMAN SYMMS ON MEDICAL FREEDOM OF CHOICE: DON'T EASE THE SYMPTOM, ATTACK THE PROBLEM

**HON. LARRY McDONALD**

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. McDONALD. Mr. Speaker, on June 3, 1977, the Washington Post published an excellent article by our colleague STEVE SYMMS, which was written in response to a Post editorial attacking his medical freedom of choice bill.

Since the passage of the 1962 food and drug amendments, the Food and Drug Administration has required proof of effectiveness as well as safety before allowing a drug to be made available to the public. Because medical efficacy is very difficult to define and prove, the result has been an enormous increase in expense, a sharp drop in the number of new drugs reaching the market, and a long delay in the availability of new drugs that do reach the market. The FDA is preventing the American public from acquiring a wide range of safe and effective drugs which are available outside the United States.

Congressman SYMMS' legislation goes directly to the root of this problem by repealing the effectiveness requirements of the 1962 amendments. The FDA would still require proof of safety, but the American public would have a much wider freedom of choice in the selection of drugs available to them through their physician.

The movement to legalize Laetrile, a substance used to treat cancer, has apparently given impetus to the medical freedom of choice bill. Although Laetrile has now been legalized in at least six States, the FDA continues to rely on the 1962 efficacy provisions to ban Laetrile from interstate commerce. Not only are cancer patients winning the battle to legalize Laetrile in State legislatures, but Federal courts are issuing injunctions

to prevent the FDA from interfering with the right of individual cancer patients to obtain Laetrile.

Consequently, those who want the Government to control and regulate peoples' lives, even to the point of denying a dying patient access to medical treatment which may save or prolong his life, recognize the battle is all but lost regarding Laetrile. Their big fear is that the movement for freedom of choice in medical treatment will spread across the board.

Thus the Washington Post called for legislation to legalize Laetrile, apparently hoping that appeasing cancer patients will prevent an easing of the FDA's grip on patients with heart disease, epilepsy and many other diseases. The Post's position is an intellectual cop-out. Instead of dealing with the moral and political issues involved, the Post advocates pragmatic appeasement. If the Post feels patients do not have the right to select their medical treatment, then why do not they defend their position instead of making an exception for cancer patients?

If there was an FDA for the news media, the Post editorial would be banned for lack of efficacy.

Mr. SYMMS' reply, however, very effectively demonstrates the need for solving the entire problem instead of merely easing the currently most obvious symptom. As a medical doctor, I congratulate him on his thorough grasp of the often complex issues involved in medical treatment and Government drug regulation.

Congressman SYMMS' untiring efforts in behalf of medical freedom of choice have the opposition running scared, as clearly illustrated by the Post editorial. This is a good indication that the success of the SYMMS' legislation is not far off. The benefits of the victory will be enjoyed by countless medical patients in the years to come.

The article follows:

#### DON'T EASE THE SYMPTOM—ATTACK THE PROBLEM

(By Steven D. Symms)

Your contention, in the May 22 editorial on Laetrile, that my Medical Freedom of Choice Bill is "being advanced in the emotional atmosphere generated by Laetrile" and your suggestion that it would be better to legislate strictly on Laetrile are ludicrous. Rather, it appears that your policy, the policy of a great deal of the media, is being advanced by the Laetrile issue.

Your "solution" to the overall problem of a "drug lag" and a government take-over of the American physicians' responsibilities addresses itself not to the problem but to a very small symptom of it. Laetrile should not be legislatively singled out. The Post, it seems, has succumbed to political pressure on the issue and is attempting to either ignore or hide the basic problem—excessive government regulation—by appeasing a small, but vocal, segment of the population.

The American consumer has clearly been placed at an economic and medical disadvantage as a result of the effectiveness provisions of the 1962 amendments. You stated in your editorial that the Medical Freedom of Choice Bill "frankly . . . scares us" because it would leave "just the question of safety for all new drugs."

Does it not scare you that the consensus is that penicillin, digitalis, aspirin and insulin, would not make it to the market under current Food and Drug Administration regulations if they were developed today?

Does it not scare you that sodium valproate, a drug marketed in most of the world's developed countries today but which will not be available in the United States until mid-1978, at the earliest, could prevent one million epileptic seizures this year, if it were available?

Does it not scare you that tested, life-saving beta blockers, available in Europe, are still not available to the American medical profession?

Does it not scare you that Xylocaine, originally approved and marketed as a local anesthetic, was later found to be extremely effective in controlling cardiac arrhythmias but took a full 10 years to be sanctioned by the FDA after the original reports of its effectiveness appeared? This list goes on *ad infinitum*.

I would have thought that you would also be interested in preserving competition and free enterprise. Are you unconcerned that the 1962 amendments have made it virtually impossible for all but the largest drug companies to develop and test new drugs? Have you no sympathy for the American consumer who is forced to pay 50 cents more for every prescription written as a result of government regulations? Are you unaware that in 1962 the average drug required two to four years to gain FDA approval at an average cost of \$1 million with as few as 1,000 pages of documentation and that now, as a result of the efficacy provisions, approval takes 10 to 20 years, \$40 million and as many as 200,000 pages.

With this huge increase in time and money, has the FDA caused today's drugs to be more effective? Unequivocally no. The 1975 Economic Report of the President stated that there is no evidence that the average efficacy of drugs introduced after 1962 is any higher than that of drugs previously introduced.

Instead, the FDA has slowed the entire drug flow by over 60 per cent, discouraged innovation and research, exempted all the but the biggest drug companies from the market, and denied the American consumer available, safe and effective treatment.

The FDA is not faced with the urgencies of patient care and, therefore, finds it easier to say no than yes. It is unquestionably open to attack if it approves an ineffective or unsafe drug, but the greater damage done by delaying approval of an effective drug will not be laid at its door. The value of a new drug is often clear to the expert in the clinical field before it is formally recognized by a reviewer at the FDA. The Post fails to realize and appreciate that stringent drug regulation for society as a whole limits therapeutic choice by the individual physician, who is better able to judge the risks and benefits for his patients.

The Medical Freedom of Choice bill has gained the cosponsorship of 105 members of Congress. The bill has also gained the support of numerous, highly qualified doctors and economists. Fear of this bill can only stem from the pervasive attitude in Washington that "the bureaucracy must exist, enlarge and engulf."

I, for one, am not willing to make the Congress of the United States into a second Food and Drug Administration by legislatively singling out a "hot" topic. We need to solve the problem, not ease the symptom.

#### TAX REFORM

**HON. BARRY M. GOLDWATER, JR.**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. GOLDWATER. Mr. Speaker, I was recently given the opportunity to read

one of the most cogent and thought-provoking articles on tax reform ever to come across my desk.

I want to bring this excellent article to the attention of my colleagues:

#### TAX REFORM

(By Carl A. Stutsman, Jr., Valentine Brookes, Robert K. Jewett, and Donald L. McCaskey)

In analyzing the revenue effect of any proposed taxation changes, let us also avoid as the Plague, a new term which has been widely employed lately by the predecessors of those now in the Congress. This term is "tax expenditure." One would think from the meaning of the two words that it signified money collected in taxes and then paid out by the government, but this is not what it means to those who use it. To them, "tax expenditure" means income or wealth which has been allowed to remain with the taxpayers instead of being exacted from them in taxes. Let us remember, but not emulate, that famed philologist, Humpty Dumpty, who announced that any word meant exactly what he intended it to mean, neither more nor less, and not what the listener thought it meant. Undoubtedly this is the explanation of the derivation of the term "tax expenditure," and it is being accepted and employed by others who have not troubled to analyze it and do not understand that in employing it they are talking about the concept of communism. It is dialectic materialism compressed into two words.

As we have said, what the term "tax expenditure" means is that income permitted by the government to remain in the hands of the taxpayers is deemed to have been exacted from them in taxes and then paid back to them. Implicit in that concept is the understanding that all income and all property in the United States belongs to the government and any property or income which happens to be in the hands of citizens is there at the sufferance of the government and because it, in its generosity, made that expenditure of its tax revenues. Hence the recipient is supposed to be grateful for favors received. He is supposed not to object to the amount of taxes which have deprived him of much of his hard-earned income; but instead, to be grateful for the portion which the beneficent government has permitted him to retain as a "tax expenditure."

The same tax thinkers have given us other phrases, which also mean exactly what their users intend them to mean, and not what the listeners would think they do. One of these, which has been used to a fare-the-well is "tax loophole." In case one does not know what a tax loophole is, it is a provision of the tax law whereby some of the taxpayer's income or property is not taken from him in taxes. Thus the fact that the maximum capital gains rate will not exceed 41% is called a "tax loophole," because if the tax rate were higher the government would get more taxes, and since it does not get those taxes, the provision whereby the tax is not exacted is a "tax loophole."

By the same token, anyone seeking to attain universal tax equality might assert that the personal exemptions and the credit for dependents are also "tax loopholes," because they allow taxpayers a measure of relief from the full impact of the progressive tax rates. But these are not referred to by the typical users of this magical phrase as a "tax loophole," because anything from which all voters, as a universal class, may benefit is not a "tax loophole," but is instead a "measure of tax equity."

Another term filled with implications is "tax reform." "Tax reform" consists of closing "tax loopholes." Both admirable expressions are used to describe features of the law in effect for many years in the U.S.

Every change in the statute being considered as a means of increasing taxes is praised as "tax reform" designed to plug a "tax loophole," even though the feature of existing law proposed for change was deliberately adopted for reasons of the tax policy, and was not inadvertent at all.

To employ the phrases, "tax loophole," "tax reform," and other phrases of similar meaning to describe a fundamental reversal of tax policy about which there can be differences of opinion is, of course, to wittingly or unwittingly distort the truth, and redundancy will not change the facts. Unfortunately, there are enough people to whom phrases such as "tax reform and tax loopholes" mean some kind of magical cure, thereby guaranteeing proponents of such measures instant sympathy.

Another example of the substitution of phrases such as these for thought and of their effect in beguiling the listener was in last year's debate over the question whether the gift tax and the estate tax should be merged into a single rate schedule, with a single exemption. That was thought by the Congress to be a good idea, but to refer to it as a "tax reform" is to state a lawyer's argument. The differences in rate schedules and exemptions were deliberate, not accidental. They were motivated by the feeling that the country would be better off if family fortunes were broken up in advance of the death of the owner by making it attractive to the owner of the family wealth to give some of it away to his children and grandchildren, thereby making them economically self-sufficient earlier in life, producing maturity in handling financial affairs which they would need later when the full impact of the family fortune was settled upon them. The consequence that tax revenues would be lower was understood, because without that understanding no one would expect the purpose of the rate differential to be accomplished, and so was the expectation that some taxes would be paid sooner, because the policy encouraged gifts. Today, in different times, we may feel that the social purpose of the rate differential was mistaken, is obsolete, or has fulfilled its purpose, but if that is what we think we should say so, instead of pretending that we have recently discovered a rate differential which is a "tax loophole," and which must be eliminated or modified in the interest of "tax reform."

Another example is the recently-coined phrase, "revenue lost to the Treasury." Those who regularly deal in tax matters may understand its sophisticated meaning, but to most people, the phrase is sadly misleading. "Revenue lost to the Treasury" is not really revenue which escapes the Treasury's net by accident. It is tax revenue which is not due under the law. It is tax revenue which has never been due, because the Congress has not imposed the tax. It is misleading if it is intended to be used to refer to income and property the taxpayers rightfully own and retain because Congress has not passed a law to tax it away from them. It is an accurate phrase only in the same sense that the phrase "tax expenditure" is an accurate one: it is accurate only if one adopts the concept that all income and property in the U.S. belongs rightfully to the government, and anything which the government permits the citizenry to retain for its own use and administration is the same as an expenditure by the government of monies and properties belonging to it, and hence is a "tax expenditure," and since, in fact, the income and property did not reach the Treasury, to be beneficially dispensed thereafter by it to the citizenry, it is "revenue lost to the Treasury."

It is time to re-think and re-define the current notion of "tax reform" if we are to have any meaningful reform at all.

#### CONGRESSMAN DRINAN COMMEMORATES SIXTIETH ANNIVERSARY OF PRESIDENT KENNEDY'S BIRTH

#### HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. DRINAN. Mr. Speaker, on May 29 I had the great privilege of participating in a program commemorating the 60th anniversary of the birth of John Fitzgerald Kennedy. The ceremony took place in Brookline, Mass., in my congressional district outside the home where John Kennedy was born and where he resided during the early years of his life.

I present herewith the statement I made in Brookline honoring one of the greatest leaders this Nation has ever produced, John F. Kennedy.

STATEMENT BY CONGRESSMAN ROBERT F. DRINAN

Today is the day for everyone's memories of President Kennedy. I recalled this morning, as I have often in the past, the day when President Kennedy came to the Centennial of Boston College back in 1963 at a magnificent event with 30,000 people outdoors. The President was introduced and immediately won everyone's hearts by opening his address at this magnificent occasion by saying, "I'm delighted to be back in Boston where people pronounce words like they're spelled." John F. Kennedy learned to speak good English in this neighborhood and in this historic house. Joseph Kennedy, John the second born, Kathleen, and Rosemary, were born here. And it was here in these few blocks that John F. Kennedy learned some of the basic ideals that changed the entire history of the world. When we look back and recognize that today he would be sixty, we can look at his entire life—and especially on the thousand days of his presidency—and recognize it as an inspiration and as a model to everybody in public life today. It is fourteen years now since we lost him. But his moral leadership does not fade away; it becomes more present to all of us. The moral imperatives which he articulated are more meaningful now than they were a decade and a half ago. When President Kennedy said, "Ask not what your country can do for you—ask what you can do for your country," he ignited a spark of idealism in the American people and across the world. Whether he was asking distinguished scholars to leave Massachusetts and come to work in Washington, or whether he was inspiring young men and women across America to come and join the Peace Corps, John Kennedy's message came across loud and clear: We all have a duty to make this world a better place than it was when we entered it. At a time when material comfort frequently obscures the spiritual values which we should cherish; at a time when Vietnam and Watergate have bred a generation of cynics who tune out politics; the message of John Fitzgerald Kennedy holds even more validity and appeal than it did when he was our President.

My dear friends, it is not fanciful to think that these ideals that changed the history of the world were fostered right here in this neighborhood. Early in John Kennedy's life, during the first years, the most formative years, he went to the Devotion School less than four blocks from this place. During those years, the schools and citizens of Brookline contributed in very important and unique and indispensable ways to the formation of an individual who is obviously one of the most compelling moral and po-

litical figures in this entire century throughout the globe.

Along with his brothers, Robert and Edward, President Kennedy believed that public service and politics could be the most honorable calling of all callings, and from the day that John Fitzgerald Kennedy opened his first Congressional campaign with an address to the Gold Star Mothers in Charlestown, people believed in this young man. They believed John Kennedy when he said that America must stand for something noble and selfless, when he said that America must shine as a beacon of liberty in a world beset by tyrants.

Our minds go back today to the famous time when President Kennedy was cheered in West Berlin. At that time he began the crusade for human rights which once again we are beginning to carry across the globe. One need only remember the Alliance for Progress in Latin America to appreciate the fact that it was John Kennedy who for the first time alerted us to carry out our responsibilities to the Third World.

We honor President Kennedy and his memory in our present human rights campaign. As long as men and women around the globe are tortured, imprisoned, or harassed for their political beliefs, the struggle for freedom and dignity will go on, and we will find ourselves more and more going back to be guided by the moral standards initiated and established by John Kennedy.

We honor his memory also, and carry on his most precious legacy when we say we have to have a halt to nuclear proliferation, because it was President Kennedy, in 1962, who engineered the miracle of all miracles, the Nuclear Test Ban Treaty.

John Kennedy not only promoted peace and political liberty in his foreign policy, but he faced up to the toughest domestic issues of the day. He put the full weight of the White House behind the drive for Civil Rights.

Today is a day of memories, and I have recalled all day a visit I had to the White House in June, 1963 with two hundred leading members of the bench and bar of America. President Kennedy told us that the storm was coming, that the law simply had to protect the civil rights of blacks and minorities. In the Rose Garden I remember well the inspiration that this man gave to those who were judges and jurists and professors of law and attorneys. I recall particularly that when I talked with President Kennedy the first thing he said—"We Have a Pope". Pope Paul had just been elected and President Kennedy related to me that he and Mrs. Kennedy had just sent a telegram to the new pontiff.

President Kennedy challenged the American conscience. He brought new hope to the people of Appalachia. These people who had been victims to the mindless philosophy which wanted them to fade away. President Kennedy began Medicare. He began the war on poverty. He passed a tax cut to revitalize the economy. And most of all, he was dedicated to fighting discrimination.

I recall well that President Kennedy in late June at this conference in the Rose Garden openly indicated that he expected a drop in his personal popularity because he intended to achieve access to public accommodation for minorities and he wanted fair employment and fair housing for our black citizens. Today those issues may have changed. They may have become more serious. It is no longer a question of sitting in the back of the bus. Today the need for courageous leadership in the John F. Kennedy mold is more critical than it was at the time when we had this man as our President.

It was in this home, it was in this neighborhood, that the beginning of this great man began. John Kennedy learned all of these things at the dinner table in the house behind us; at the school down the street. He

learned them from the neighbors whose kids still reside on Beals Street and he learned them from the people of Brookline.

There was rejoicing in this house sixty years ago today. Another child was born, the second to the Kennedy couple. They could not have known that he would have a career like Moses, that he would lead a nation to the promised land but that he himself would not see all that he had achieved. This family worked and prayed and gave him and his family a dream and a vision and that vision became the vision and dream of all Americans.

If President Kennedy were alive today, he would have assumed the role of elder statesman. One can imagine John Kennedy, still vigorous at sixty with a sense of humor even more developed than when he was President. He would be younger in spirit than many of the presidential aspirants and he would still be urging America to strengthen its moral commitments at home and abroad.

The highest form of tribute, my friends, that we can pay to John Fitzgerald Kennedy is to determine here today that things can never be the same again because we want, in his memory and out of veneration for him, to carry on that fight for the moral causes he served so well.

#### THE MECKLENBURG DECLARATION OF INDEPENDENCE, MAY 20, 1775

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. MARTIN. Mr. Speaker, each year on May 20, residents of Mecklenburg County in North Carolina's Ninth Congressional District celebrate the anniversary of a significant historical event in the State's history. It is an event significant in the history of our Nation. Though subject to some historical controversy, Mecklenburg County, called a hornet's nest by Lord Cornwallis during the Revolutionary War, is proud of its heritage of being the first in proclaiming itself "free and independent" of the Crown. This occurred May 20, 1775. During the anniversary this year, it was my pleasure and honor to have been invited to keynote the celebration by offering some observations on the authenticity of the Mecklenburg Declaration of Independence. Permit me to share with you the text of those remarks:

Thank you, Frank Whitney.

Chairman David Ritch, Mayor John Belk, Chairman Liz Hair, and all the members of the Alexander, Avery, Brevard, Davidson, Balch, Graham, Polk, Phifer, Wilson and other families who have assembled here to honor this day.

I want to talk with you about three historic fires.

Two hundred years ago 27 members of the Mecklenburg Committee of Public Safety began a great historical tradition for independence which we honor here today. They had convened on May 19th, the day before, for regular business, only to be interrupted by the arrival of a messenger on horseback with the shocking news of the Battle of Lexington a month earlier. It is worthy of passing historical note that a diary preserved by Mr. Traugott Bagge in Salem, North Carolina, confirms that the rider passed through there on May 17th.

This news generated great and virtuous anger among the people in Mecklenburg at what they regarded as a further example of characteristic ruthlessness of British rule. They had long had to deal with the experience of religious persecution in the form of the "Marriage Act" which was a tax levied on all weddings.

They still retained bitter memories of 1771 when the Regulator Rebellion was put down by officers of the King and six North Carolinians were hanged as an example. This had taken place at Alamance Courthouse.

The Mecklenburg Committee, chaired by Tom Polk and later by Abraham Alexander and with John McNitt Alexander serving as Secretary, was ripe to commit a rash act and so on May 20th they adopted, and to a cheering throng waiting outside publicly declared, a Resolution of Independence. At memorial celebrations even 50 years later, survivors were to recall with pride that first vote.

And so it was on May 20th that the Mecklenburg Declaration of Independence came into being 13½ months before the Continental Congress enacted a declaration of independence for all of the colonies on July 4, 1776.

May 20th, 1775: surely even with all the controversy surrounding it, there is no more celebrated date in the history of the State of North Carolina than this, the acclaimed date of the signing of this revolutionary document!

This event and the April 12, 1776 Halifax Resolves, instructing the North Carolina delegation to the Continental Congress to vote for independence, again in advance of all other provinces, clearly secured for our state the proud title of "First in Freedom".

And that was not the end of it. In the excitement that seared this small community, the Committee continued in session until May 31st, at which time a set of 20 resolves were adopted:

They suspended the laws of Great Britain.

They suspended the Royal Constitution.

They established local militia independent of Great Britain.

They set up courts of law.

They provided for the arrest and trial of anyone not obeying these resolves or anyone who was working for the King.

All of this was to be in effect until "Great Britain resigned its unjust and arbitrary pretensions with respect to America."

A somewhat cooler attitude perhaps than that of May 20th, but a clear statement of independence in its own right. These 20 resolves of May 31 were published in several contemporary newspapers and prompted Chairman Cogdell of the Craven County Committee of Safety to write: "The Mecklenburg Resolves exceeds all other Committees or the Congress itself." Clearly, this County had separated itself from the British Empire.

They then dispatched Captain James Jack to Philadelphia with their news. Records of the Court in Salisbury show that he stopped off there for refreshment and reported his message, and the aforementioned Salem Diary proves that he stopped there on the way back to tell of "free and independent Mecklenburg."

The reception in Philadelphia was cool—you see they were prepared to send a conciliatory letter to England and could not allow this rebellious county to give the wrong image. So they sent Captain Jack back home to cool things off.

Thomas Jefferson later claimed that he had never heard of the Mecklenburg Declaration, but it must be borne in mind that Thomas Jefferson was not in Philadelphia at the time Captain Jack arrived or departed.

So it was that Mecklenburg made its bold move, only to be told by all that it was premature. Yet, unrestrained on September 1st, just three months after the Committee had

met, it sent a delegation to the North Carolina Provincial Congress with written instructions to vote that "North Carolina is, and of right ought to be, a free and independent State."

Once again, this happened months before any other community would dare so bold and risky a step. There is no doubt these people believed in their cause of independence and made no pretense about it.

Some recent historians have raised doubts about the authenticity of existing copies of the May 20th Declaration, the original having been lost in a fire at Alexandria in 1800. Yet there is no doubt whatsoever that the Mecklenburg Committee:

- (1) met in protest,
- (2) declared their independence,
- (3) set up their own local authorities against the crown, and
- (4) sent Captain Jack to report it.

The records of 1775 newspapers and letters showed clearly that Mecklenburg was known to have declared itself independent. Governor Stokes claimed he saw a copy of the May 20th Declaration in 1973, seven years before the fire. So clearly, it was not originated after the fire.

Furthermore, we have what appear to be notes taken for the Minutes of the May 20th meeting by the Committee Secretary, John McNitt Alexander. And so we can be certain.

On April 6, 1800, fire swept the Alexandria home of Secretary Alexander and its contents, destroying nearly all of the existing records of the independence movement in colonial Mecklenburg. Since then, another fire of doubt has smoldered and flared alternately, threatening to consume the remnant that passed through the fire. It cannot prevail because too much evidence exists, proving the first claim of independence to be that of Mecklenburg.

Thus it is today that we here commemorate that first "solemn and awful vote" taken on May 20th, 1775. Truly we are, and of right ought to be, proud to honor the memory and the courage of these ancestral patriots. That faith in our proud heritage cannot and will not be consumed by the fires of historical dispute, anymore than memory could be erased or charred by the 1800 fire at Alexandria. So that faith will last for as long as the spirit of independence continues to burn with that earlier fire that first kindled here in Mecklenburg this very day in 1775.

## SALUTE TO WILO RADIO

**HON. JOHN T. MYERS**

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. JOHN T. MYERS. Mr. Speaker, I take this opportunity to salute the broadcast industry which responded in a very positive way to the intense weather crisis of late January and February in many parts of the country.

I am particularly proud of the performance of WILO Radio in Frankfort, Ind., which served the public interest beyond the normal requirements. WILO owner Vern Kasper has earned the plaudits of his colleagues around the Nation for the example he set in meeting the challenges during the weather crisis.

I share this account of WILO's "service to the people" as it appeared in "Radioactive," a monthly publication of the National Association of Broadcasters:

## THE WINTER OF 1977

The Winter of '77 will long be remembered in many parts of the country. In this feature of our series, "Weather," we look at how several radio stations in the Midwest dealt with the crisis-producing winter. During a February blizzard, which froze the Frankfort, Indiana area for days and created some real life and death situations, WILO AM & FM abandoned its regular programming for 85 hours to open its telephone lines to its listeners.

Vern Kasper, general manager of WILO, explains that "during the emergency our staff relied upon the helpful attitude of the public. Without a doubt, the greatest contributors to gathering information were our citizens, through the use of radio and telephone." Vern continues, "we aired endless calls of people sharing emergency weather facts as they saw them in their part of the area."

Because of the usefulness of the telephone, Vern has drawn the conclusion that "during certain emergencies, telephone talk show techniques, when correctly done, provide a highly efficient news gathering process that lends itself to solving and preventing problems as well as reporting news in the classical sense. The telephone plays a key part in this type of journalism and its uses must be convenient, have good quality transmission, and a total line conferencing capability."

He cautions that this isn't applicable to, or good for, all stations or all situations; and adds that in this type of journalism, the staff must be ready to bear extra responsibility. "The time to prepare for emergency service is certainly not the day of the emergency," Vern explains that what is required is a total philosophy of problem solving at all levels of operation.

## COMMUNITY EFFORT

One example of community effort was a one-and-a-half hour "watch." Listeners tracked three snowmobilers transporting medical supplies in blowing snow with a -60 degree chill factor and phoned in progress reports to WILO until the snowmobile team arrived safely.

Other examples of community effort included the discovery of fourteen missing persons by listeners, a family of six which received material and monetary relief after their home burned down, people who spotted cars covered by snow for rescue crews and families receiving heat and food. And so it went for the six day vigil.

Writing to Vern Kasper after the crisis, one listener described WILO's emergency operations: "You were the hub of a giant wheel—the police, sheriffs, National Guard, Civil Defense, REACT CBers, Red Cross, snowmobilers and private citizens were the spokes." Another listener's comment summed up the WILO coverage: "I'm certain that for those persons who were marooned and isolated during the storm, their radio was a real comfort, and in some instances, a real life saver."

## HATCH ACT REPEAL PAVES WAY FOR TOTAL GOVERNMENT CONTROL BY ORGANIZED LABOR

**HON. ELDON RUDD**

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. RUDD. Mr. Speaker, I understand that the House will tomorrow complete consideration of H.R. 10, organized labor's bill to repeal prohibitions against

partisan political activities of Federal employees.

I hope the House will defeat this bad proposal.

Syndicated Columnist Nicholas Von Hoffman pointed out the essential dangers of this bill in his May 23 column in the Arizona Republic. As reported out of the House Education and Labor Committee, H.R. 10 will allow organized labor—already heavily involved in the public sector—to pressure, coerce, or intimidate Federal employees into political action for passage of legislation demanded by labor bosses.

This could include legislation requiring forced unionization of Federal, State, and municipal employees—including the military. It could also include legislation giving Government workers the right to strike against their employers, the taxpaying public, or demands for further Federal bailouts of city or State governments brought to the brink of bankruptcy by irresponsible pension programs and other benefits for government workers demanded by organized labor.

Mr. Von Hoffman further points out that repeal of the Hatch Act will effectively eliminate executive or congressional control or supervision over the Government bureaucracy. Government workers, through organized labor, will take over the Government, and will not be answerable to the White House, to Congress, the people, or anyone except their big labor bosses.

Mr. Speaker, I would like to include Mr. Von Hoffman's column at this point in the Record, and urge all my colleagues to seriously consider these real dangers to our system of representative government through passage of H.R. 10 and repeal of the Hatch Act. Let's defeat this bad bill: [From the Arizona Republic, May 23, 1977]

## HATCH ACT REPEAL MAY BE DANGEROUS

(By Nicholas Von Hoffman)

WASHINGTON.—Under the label of reform, a bill repealing most of the Hatch Act is making its way through Congress and toward the Oval Office where the President has said he'll sign it. Oddly enough, the Hatch Act, which prohibits government employees from taking part in partisan, electoral politics, was considered a reform measure when it was passed in 1939.

Its purpose was to prevent a president from using the large numbers of recently hired government employees as campaign workers. The Roosevelt Administration was often accused of winning elections via this route, but national administrations weren't set up to run huge battalions of campaign workers at the precinct level; unless the patronage could be turned over to state and local officials it was not very useful for winning elections.

Despite his enemies' accusations, FDR didn't try this use of federal employees so he had no trouble living with the Hatch Act. In actuality, the law was superfluous because the protections and job securities afforded by the civil service robbed politicians of the weapons of coercion to make employees into campaign workers. How can you force a postal clerk to work for Gruntz for President if the clerk knows you can't fire him?

In the years after the passage of the Hatch Act, electoral politics underwent a change. In the language of economics it swung from being labor intensive to capital intensive. The costly armies of precinct workers were re-

placed by television campaigning, which allowed a candidate to reach more people per dollar spent than the knock-on-the-door method. Thus it's questionable these federal employees would have been used by presidential incumbents even if there had been no law.

Nevertheless, the Hatch Act has been accomplishing another unintended good. If the political use of federal employees by presidents was never likely, the use of the same employees by labor unions is a much more real possibility.

Without the right to strike or take part in political campaigns, federal employees are already the highest-paid people in the country. Without a Hatch Act they would have long since extorted the right to strike from Congress and along with it even greater advantages in pay, pensions and other fringe benefits. That's not mere supposition, as the record of the county and municipal workers' unions attests.

When public employees are given the right to strike, as well as the right to engage in partisan political activity, there is delivered into their hands a combination of levers no other group of workers gets. The members of the automobile workers union can strike to enforce their wage demands, but what would the price of cars look like if the union could also participate in the election of the auto manufacturers' boards of directors? In addition, for many years public employee unions have had to negotiate with a pussy cat management; to wit, public officials who weren't spending their own money when they voted wage increases and productivity decreases.

In the last few years the pussy cats have stiffened somewhat because the rest of organized labor, the part that works in the private sector, has gotten so angry. The repeal of the Hatch Act, however, will make it more difficult to keep government salaries in line with those of the rest of the world.

That may be the least of it. It is already close to impossible to fire a government employee because of the civil service. People on the public payroll are given, by law, greater security and tenure than workers in the private sector can get through collective bargaining. Now, by repeal of the Hatch Act, civil service employees will get so much more protection, and all coercive power to make them work will have been de facto abolished.

Repeal of the Hatch Act will demolish any good that may come from Jimmy Carter's zero-based budgeting or contemplated departmental reorganizations. It doesn't make any difference if a federal program is good or bad in concept if it is to be administered by a bureaucracy in which all supervisory control over the employees has been extinguished.

The lowest price that should be exacted for the repeal of the Hatch Act is a repeal of the Civil Service Act. Instead, President Carter will sign the measure proclaiming as he does that this is the political emancipation of the enslaved bureaucrats. But the first time he tries to put this creaking government to some good and efficient use, they'll thank him by shoving their fists down his mouth.

#### AMENDMENT TO HATCH ACT REFORM BILL

**HON. WILLIAM (BILL) CLAY**

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. CLAY. Mr. Speaker, on Wednesday, May 18, the House added a provision regulating employee organizations

to H.R. 10 sponsored by Mr. ASHBROOK. In order to perfect that provision I have offered an additional amendment to the bill.

The one point that commands general agreement is that no one should have the power to intimidate or coerce a public employee or, indeed, any citizen in the exercise of his political rights. I am delighted that Mr. ASHBROOK has embraced that simple basic principle, for the purpose of H.R. 10 is to free public employees who wish to exercise their inalienable right to participate in political affairs from the coercive force of a Federal law which prohibits such participation.

Unfortunately, however, the Ashbrook amendment is both too narrow and too broad. It is too narrow in that it only relates to employee organizations; it is too broad in that it goes beyond the regulation of intimidation and coercion.

Mr. ASHBROOK has not explained why public employees should be specially protected from employee organizations, and not from restraint and coercion by other organizations and individuals. Nor has he explained why it is wise or necessary to pass new regulations on noncoercive activities by employee organizations.

If employee organizations were not presently regulated by Federal law to the same extent as others or, if H.R. 10 increased their rights, that would perhaps provide a basis for a prohibition addressed specifically to those organizations. But, in fact, as Mr. ASHBROOK explained:

Numerous laws are already in effect to prohibit intimidation of voters and other attempts to wrongfully influence voting.

Moreover, as he went on to note:

2 U.S.C. section 441 \* \* \* bars labor organizations from making any contribution or expenditure from their institutional funds in connection with a Federal election, primary, convention or caucus. The only exceptions are internal communications by a labor organization to its members and families; nonpartisan registration and get out the vote campaigns by a labor organization aimed at its members and families; and the establishment, administration, and solicitation of contributions to a separate segregated fund to be utilized for political purposes.

Thus, there is no vacuum that must be filled. Nor is there any exception in favor of employee organizations from these sound prohibitions. All of these laws regulate not only employee organizations but all those who stand in the same position. And, with regard to the law on corporate and union political activity, it should be emphasized that the Congress has amended the Federal Election Campaign Act in 1971, 1974, and 1976. On each occasion, in the House Administration Committee and on the floor we gave special attention to what is now section 441 of title 2, United States Code. Not once in those deliberations was it suggested that we should break the pattern followed since 1941 of treating all labor organizations and corporations according to a single uniform rule of law.

Certainly H.R. 10 does not provide a predicate for a change in that sound policy. The bill does not grant public employee organizations any rights whatsoever, nor does it grant public employ-

ees any rights not presently enjoyed by employees in the private sector.

The short of the matter is this: Public employees like all citizens should be well protected from intimidation and coercion. And, employee organizations should be subject to some strong restrictions on political activity that are imposed on corporations and private sector labor organizations. Both of these goals are already achieved through the body of law stated in title 18 of the United States Code and in the Federal Election Campaign Act. We must be sure that in revising the Hatch Act we do not weaken these prohibitions. At the same time, we must be certain that we do not undermine the uniformity of regulation that presently obtains. The proper solution is to forthrightly state, as my amendment does, that in revising the Hatch Act we are neither subtracting from or adding to the restrictions already imposed on employee organizations. Those charged with interpreting the law will then know that in order to protect public employee rights they are to continue to apply the restrictions in title 18 and the Federal Election Campaign Act, as that law is presently stated in title 18 and in the Federal Election Campaign Act. This is in precise accord with Mr. ASHBROOK's announced intention:

Passage of H.R. 10 would permit many activities previously prohibited by law, thereby removing some of the protections employees now have against intimidation and activities they may not agree with. The Ashbrook amendment will preserve these protections for the worker.

H.R. 10 will "preserve these protections for workers" and will so state in explicit statutory language if the House adopts the amendment I have offered.

#### FOX LANE STUDENTS SIDE WITH DOLPHINS

**HON. RICHARD L. OTTINGER**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. OTTINGER. Mr. Speaker, last week the House considered, and approved, the Marine Mammal Protection Act amendments and attempted to resolve the ongoing problem of tuna fishermen capturing dolphins in their nets.

It was my hope that the final bill enacted by the House would include Representative McCloskey's strengthening amendments in fact. The compromise language which was ultimately accepted requiring the Secretary of Commerce to see to it that the tuna fleets reduce the number of dolphins killed in tuna nets and to continue with successive reductions in the death quota, hopefully will bring us to a near-zero death rate for dolphins by the early 1980's.

I would have preferred to see adoption of amendments for a higher fine for the killing of the rare eastern spinner dolphins to \$100 per animal and for the placement of observers on boats at the expense of the tuna fleet as well as the international provisions proposed.

There is a vast amount of interest in the tuna/dolphin problem, and a great deal of concern to that great friend of man in the sea, the dolphin. The eighth grade class of West House, at the Fox Lane Middle School in Bedford, N.Y., expressed their concern via petition. I was extremely impressed at receiving the petition—with a whopping 1,600 signatures. I would like to share with my colleagues the letter I received from the Petition Committee, Robin Bush, Karen Schardt, Julie Sanders, and Barbara Coddington, and also the actual text of the petition which they circulated so successfully:

BEDFORD, N.Y.,  
May 19, 1977.

HON. RICHARD L. OTTINGER,  
Congress of the United States, House of Representatives, Washington, D.C.

DEAR REPRESENTATIVE OTTINGER: The eighth grade class of West House at the Fox Lane Middle School in Bedford, New York, has taken great interest in the tuna-porpoise controversy, and especially in the Murphy Bill that is before Congress at this time. Our initial interest originated as a result of a presentation to our class by the Executive Director of the Environmental Defense Fund, Mr. Arlie Schardt.

The enclosed petition represents over 1,600 signatures of people from age twelve and up who are in agreement with the 1972 Marine Mammal Protection Act. We sincerely hope that our efforts will help persuade Congress to take action against the Murphy Bill.

Sincerely yours,

ROBIN BUSH,  
KAREN SCHARDT,  
JULIE SANDERS,  
BARBARA CODDINGTON,  
Petition Committee.

This petition fully supports the Marine Mammal Protection Act which directs the reduction of the dolphin kill to nearly zero by insisting that the Yellow-Tuna industry adopt new methods of catching schools of Yellow-fin Tuna. Since 1972 over one million dolphins have been killed by this industry's present method of fishing. If you are in favor of requiring new netting techniques for the tuna industry, designed to protect the dolphins, please sign below.

#### BUFFALO FBI AGENT TO RETIRE JULY 1

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. NOWAK. Mr. Speaker, the local newspapers in my home town of Buffalo, N.Y., recently carried reports announcing the retirement, effective July 1, of Richard D. Rogge, special agent-in-charge of the Buffalo office of the Federal Bureau of Investigation.

Mr. Rogge's distinguished career in law enforcement involved three decades of service with the FBI, including the last three as head of the Buffalo field office.

The following articles that appeared in the May 25, 1977, editions of the Buffalo Courier-Express and the Buffalo Evening News detail some of the highlights of Mr. Rogge's career:

[From the Buffalo Evening News, May 25, 1977]

#### FBI CHIEF IN BUFFALO TO RETIRE

Richard D. Rogge, special agent in charge of the Buffalo FBI office, who marked his 30th anniversary with the Bureau Saturday, will retire July 1.

Mr. Rogge, 51, who has headed the FBI here since January 1974, will move to Los Angeles, where he was once agent in charge and where his children now live.

His successor here has not been named.

Born in the Bronx, the 6-foot, 4-inch Mr. Rogge was a football lineman at New York University and served in the Marine Corps.

He joined the FBI in 1947 and became a special agent after receiving his BS degree in 1952. He had assignments in Philadelphia, Washington, Richmond and Los Angeles before taking command of the Honolulu office in 1969. He headed the Richmond, Va., office for 2½ years before coming to Buffalo.

During his career, Mr. Rogge, played a key role in the investigation of President John F. Kennedy's assassination, and, as head of the Los Angeles office, supervised the arrests of 10 "most wanted" fugitives.

He investigated extortions and kidnappings, was involved in high-speed auto chases and escaped death in suburban Washington when a bank robber fired at him point-blank and missed.

During his months here, Mr. Rogge tried to offset some of the criticism the FBI got for its role in the Watergate scandal by playing up the crime-busting bravado that made the bureau famous.

One of his first moves was to hold a press conference disclosing an undercover investigation that led to the breakup of two West Side gambling operations.

Under him, the Buffalo office became the first FBI unit to investigate nursing-home abuses.

[From the Buffalo Courier-Express,  
May 25, 1977]

#### RICHARD D. ROGGE TO RETIRE JULY 1; FBI CHIEF HERE

Richard D. Rogge, special agent-in-charge of the Buffalo FBI office for the last 29 months, is retiring on July 1, it was announced on Tuesday.

The 50-year-old Hamburg resident, who celebrated his 30th anniversary with the bureau Saturday, will be moving to Los Angeles, Calif.

During his stay in Buffalo, which began in December 1974, Rogge developed a reputation as a strong and independent investigator.

Asked about the highlights of his lengthy career, Rogge recalled the extensive investigation into the assassination of President John F. Kennedy.

The entire investigation was broken into several phases.

While other groups of agents worked on various phases, Rogge, working out of FBI headquarters in Washington, headed up the phase of the investigation dealing with the actual slaying of the president.

"It was basically a murder investigation," Rogge recalled. "We worked seven days a week for 13 months on that phase of the investigation . . . it was probably the most thorough investigation in the world."

Much of the Warren Commission report on the assassination was assembled and written by Rogge. The information came from facts dug up by agents working in Rogge's phase of the investigation and from other agencies.

Rogge, because of the long days and nights he spent on the case, has formed his own opinion about the assassination, but refuses to comment on it.

"There is still a congressional enquiry going on . . . it would be presumptuous of me to say anything at this time."

Under his direction, the Buffalo office became the first FBI unit in the nation to investigate nursing home abuses, ultimately leading to the indictment of three nursing home owners.

Also undertaken during Rogge's tenure in Buffalo was the first widescale investigation of an area law enforcement agency, the Erie County Sheriff's Dept.

The latter probe, sparked by numerous citizens complaints alleging civil rights violations, resulted in no criminal charges.

When asked for his thoughts upon leaving office, the Buffalo FBI chief said:

"I've been so busy lately that I've not gotten my thoughts together on leaving. I don't think it will hit me for months. The extremely fast pace I've lived will come to a screeching halt. Maybe I'll sit down and cry later on. I just don't know."

He claimed he has yet to chart his future, adding that he will definitely take up some occupation but probably not in law enforcement.

Rogge has no regrets over the life he chose, saying he would not hesitate to do it all over again.

"Mr. Hoover (J. Edgar Hoover, the late FBI director) made a gentleman out of me. I was a poor New Yorker. He told me to go to school and become a gentleman. I feel most proud of being one of 59 agents in charge in the country," he said.

On the FBI after he departs, Rogge said:

"I drive myself hard and like to think of myself as indispensable, but the organization will survive. Any administrator has an ego, but the bureau will survive just fine."

Before heading the Buffalo office, Rogge was agent-in-charge of the FBI's Richmond, Va., and Honolulu, Hawaii offices. During his career, the New York City native served in the Philadelphia, Pa., Los Angeles, Calif. and Washington, D.C. offices.

A successor to Rogge is not expected to be named until after July 1.

Mr. Speaker, as these articles clearly indicate, Mr. Rogge has demonstrated the high qualities of dedication, determination, courage, and integrity that the Nation must demand of its law enforcement officers charged with the maintenance of public order and the protection of our internal security.

I know I echo the sentiments of the citizens of western New York in commending Dick Rogge for a job well done and wishing him well in his future endeavors.

#### WIC PROGRAM IN CONTRA COSTA COUNTY

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. MILLER of California. Mr. Speaker, the women, infants, and children supplemental feeding program, WIC, has been documented to greatly improve the health and well-being of many thousands of pregnant women, infants, and new mothers. In a study completed last year, the benefits of the WIC program for participants was clearly established by means of a national survey.

Recently, the WIC program in my home county has similarly written an

admirable record of serving the people of Contra Costa. As indicated in the responses, the impact of the program in improving the health of the participants is unquestionable. These types of results, which can be repeated throughout the United States, are the best testimony for the continuation and extension of the WIC program. In addition, I congratulate the Contra Costa Human Resources Agency, and the WIC program director, Dr. Orlyn H. Wood, for designing and operating this program so successfully.

The material follows:

#### WIC PROGRAM EVALUATION REPORT

In November 1976, the staff of the Contra Costa County WIC Program distributed a questionnaire to participants to assess their feelings regarding the program. Efforts were made to have each participant receive a copy of the questionnaire. Responses were not marked for identity. The per cent returned questionnaires were based on parent or guardian units and 62% of the participants responded.

Length of time of participation in the program: 56% had been on the program for less than one year, 44% for over one year. Ninety (90) percent of the participants said they used all of the vouchers each month, eighty-three (83) percent said their grocery stores where they usually shopped accepted the coupons and ninety-two (92) percent had no problems with the vouchers in the store. From verbal responses we have received comments that those stores which do not accept the vouchers or where there is a problem it is a Short Stop, Seven Eleven or where an uninformed clerk usually has not received instructions from the store manager. Pretesting of participants on how well they complete filling out the voucher showed that many participants rely on a grocery clerk to complete the cost of the item. Part of this is because of lack of adequate reading and writing skills and some do not read or understand the English language.

There were many comments from participants regarding the foods in the voucher packet. The food items usually left at the end of the month were cereals—baby cereals and regular cereal. Some people (criticized) the cereals as to variety, sugar content, size of the package and lack of acceptability to young children and also unavailability of some cereals, such as Corn Total, in the market.

Other foods which were suggested to also be included or substituted were:

More variety of juices, more eggs, baby foods—meats, vegetables, fruits etc., more hot cereals—oatmeal, Shredded Wheat, crackers, beans, tuna, yogurt, cottage cheese, apple juice, organic peanut butter, fresh fruit, raw milk.

Responses concerning use of the vouchers: Seventy-four (74) percent said the whole family used the foods purchased with WIC coupons; fifty-nine (59) percent said they ran out of money for food or food before picking up vouchers. The major increases of foods purchased after receiving the vouchers were: (twenty-five (25) percent or more) juice, cheese, breads and cereals, eggs, milk, meat, fish or poultry and vegetables.

One of the questions asked was noticed changes in health, fifty-one (51) percent said they had noticed such changes as:

"Less colds"  
"Increase iron in blood"  
"Eating better"  
"Weight gain"  
"Increased growth"  
"More alert and active"  
"Less illness"  
"Less tired"  
"Healthier skin"  
"Sleeps soundly"

"Eats better breakfast"  
"More active."  
Other comments from participants included:

Benefits of the program:

- (1) Better nutrition
- (2) Additions to food budget
- (3) Better nutritional knowledge
- (4) Better snacks
- (5) Less trips to the doctor

A number of people wanted to have the program extended beyond 5 years of age for children, concerns for children with allergies and advance notice of voucher changes.

To answer some of the questions, to correct inaccurate information and hopefully to inform all participants of the results of the questionnaire, the WIC newsletter in April will deal with some of these issues.

#### CONTRA COSTA COUNTY, WOMEN, INFANTS, AND CHILDREN PROGRAM, PROGRAM EVALUATION

We would like to know your feelings about our WIC Program so that we may be able to serve you better.

Please take a minute to answer the following questions: (Please circle)

1. Have you been receiving WIC Coupons for: (Circle one only)

- Less than 6 months, 20 percent.  
Less than 1 year, 36 percent.  
Less than 2 years, 27 percent.  
More than 2 years, 17 percent.

2. Do you have problems getting WIC foods at the store? If yes, which foods?

Percent  
Yes ----- 8  
No ----- 92

3. Do the grocery stores where you shop accept WIC coupons? If no, which stores do not?

Percent  
Yes ----- 83  
No ----- 17

4. Do you use all of your WIC coupons during the month? If no, which ones do you usually have left?

Percent  
Yes ----- 90  
No ----- 10

5. Have you noticed changes in your health (mothers or pregnant women) or your children's health since receiving WIC vouchers? If yes, what changes?

Percent  
Yes ----- 51  
No ----- 49

6. Does the whole family use WIC foods?

Percent  
Yes ----- 74  
No ----- 26

7. Do you run out of food or money for food before you pick up the WIC coupons?

Percent  
Yes ----- 59  
No ----- 41

8. On days you come to pick WIC coupons, would you stay for demonstrations or discussions on nutrition?

Percent  
Yes ----- 77  
No ----- 23

9. Do you read the WIC newsletter?

Percent  
Yes ----- 95  
No ----- 5

10. What items are you buying now that you were not buying before you were receiving WIC coupons?

Percent  
Snack foods, 178 ----- 13  
Meat, fish, poultry, 379 ----- 28  
Milk, 437 ----- 32  
Juice, 738 ----- 54

Soda pop, 81 ----- 6  
Eggs, 449 ----- 33  
Cheese, 688 ----- 50  
Breads and cereals, 499 ----- 37  
Entertainment, 37 ----- 3  
Clothing, 187 ----- 14  
Vegetables, 322 ----- 27  
Other, 72 ----- 5

11. How many in your family are on the WIC program (Write in number)

Women 317.  
Children (birth-1 year) 438.  
Children (1-5 years) 1,322.  
Please comment on any points you think our staff should know.  
Thank you for your time for completing this questionnaire.

#### WORDS IN THE CONSUMER BILL THAT WORRY BUSINESS

HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. DEL CLAWSON. Mr. Speaker, the more exposure to public view of the specifics in the wording of the legislation establishing an Agency for Consumer Advocacy, the greater becomes the opposition from all sides. Perhaps the Congress and individual Members of the House and Senate should be exempted from its provisions and broad authority by appropriate amendment or the services of our offices performed for our constituencies may be a target of the Agency's action.

Consider the following excerpt from an article on the subject in the June 1977 issue of Nation's Business:

#### WORDS IN THE CONSUMER BILL THAT WORRY BUSINESS

While those urging creation of an Agency for Consumer Advocacy try to minimize its potential impact on business, the language of their bill demonstrates why business remains highly concerned about a consumer protection agency.

Here are key excerpts from the legislation:

"It is the purpose of the Agency for Consumer Advocacy to represent the interests of consumers before federal agencies and courts, receive and transmit consumer complaints, develop and disseminate information of interest to consumers, and perform other functions to protect and promote the interests of consumers."

"It is the purpose of this act to promote protection of consumers with respect to the—

"(A) safety, quality, purity, potency, healthfulness, durability, performance, repairability, effectiveness, dependability, availability, and cost of any real or personal property or tangible or intangible goods, services, or credit;

"(B) preservation of consumer choice and a competitive market;

"(C) price and adequacy of supply of goods and services;

"(D) prevention of unfair or deceptive trade practices;

"(E) maintenance of truthfulness and fairness in the advertising, promotion, and sale by a producer, distributor, lender, retailer, or other supplier of such property, goods, services, and credit;

"(F) furnishing of full, accurate, and clear instructions, warnings and other in-

formation by any such supplier concerning such property, goods, services, and credit."

#### ADMINISTRATOR'S AUTHORITY

The Agency for Consumer Advocacy would be headed by an administrator with authority to:

Promulgate "rules regulations, and procedures as may be necessary to carry out the provisions of this act and assure fairness to all persons affected by the agency's actions, and to delegate authority for the performance of any function to any officer or employee under his direction."

Intervene in proceedings or activities of other federal agencies "that may substantially affect an interest of consumers."

Initiate federal court civil proceedings for the "review of a federal agency action that the administrator determines may substantially affect an interest of consumers."

"Interest of consumers' means any health, safety, or economic concern of consumers . . . involving real or personal property, tangible or intangible goods, services, or credit, or the advertising or other description thereof, which is or may become the subject of any business, trade, commercial, or marketplace offer or transaction affecting commerce, or which may be related to any term or condition of such offer or transaction. Such offer or transaction need not involve the payment or promise of a consideration."

#### CONSUMER COMPLAINTS

The Agency for Consumer Advocacy would serve as a clearinghouse for consumer complaints that included allegations of "a commercial, trade, or other practice which is detrimental to an interest of consumers."

The administrator would forward complaints "to any federal, state, or local agency which has the authority to enforce any relevant law or take appropriate action." The administrator would also have to notify promptly producers, distributors, retailers, lenders, or suppliers of goods and services of all complaints of significance concerning them unless the administrator determines that to do so is likely to prejudice or impede an action, investigation, or prosecution concerning an alleged violation of law.

"The administrator shall maintain a public document room containing, for public inspection and copying . . . an up-to-date listing of all consumer complaints of significance which the agency has received . . . provided that the party complained against has had a reasonable time to comment on such complaint, and such comment, when received, is displayed together with the complaint."

#### GIVE ENERGY-SAVING IDEAS A CHANCE

**HON. PAUL SIMON**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. SIMON. Mr. Speaker, in my district, alone, there are, probably, 40 people who have one kind of invention or another which they believe will save energy.

At least two of those are substantial. One is substantial enough that we have put it on our home heating unit, and the early indications are that it will save about 30 percent of our fuel bill.

One of the things the new Department of Energy must do is to more aggressively examine all these ideas which are floating around the Nation, which could save tremendously on the Nation's energy expenditure.

I hope that James Schlesinger and his assistant, Fred Hitz, will make a careful evaluation of how they can more effectively move on these ideas which are all over the Nation.

I am attaching the weekly column I do for the newspapers in my district which mentions the device of one of the residents of my district:

#### GIVE ENERGY-SAVING IDEAS A CHANCE

His situation is as uncommon as his name is common: Don Smith.

He's from Salem, Illinois, birthplace of William Jennings Bryan.

And he has had some first-hand experience with the energy crisis.

Don has a creative mind and a few years ago came up with an idea for saving natural gas and oil in heating furnaces in homes and factories.

He patented his idea after testing it.

Then he was advised by the utility companies that he could not install his heat-saving device on furnaces until the mechanism had the approval of the American Gas Association laboratories.

The American Gas Association has as its members the gas pipeline companies, the utilities that sell gas, and the furnace manufacturers.

Smith went to the American Gas Association and, even though the device tested out completely safe (he reports to me), they turned him down.

He then did two things: sued the American Gas Association for \$20 million (the suit is still pending) and went to the highly respected Detroit Testing Laboratory, which tested the device by standards of the American National Standards Institute and certified his invention as safe.

Some of the utility companies now recognize his invention as both a means of saving fuel and a means of making furnaces even safer. Chicago and New York City—two cities with some of the tightest regulations—now approve his device.

I have in front of me some correspondence he has received. One company says his invention will save about 41 per cent on their fuel bill. A laundromat showed savings big enough to pay for it in two months. Don has told a church in Chicago that if they do not save at least the cost of his invention (which he calls Thrifty-Vent) the first year, he will give them their money back. Others show similar savings.

We took the liberty of having one installed in our home (cost \$300 approximately). We've been doing some testing and the early indications are that there will be a savings of at least 30 percent in fuel. We'll pay for the Smith device in two years.

It has not been on our furnace long, and perhaps a year from now we'll have some complaints. But not so far.

To write this column I've talked to some satisfied customers, but no dissatisfied ones. There may be some. The purpose of this column is not to sell his invention.

The significance of this one invention goes far beyond Don Smith and a few people saving on fuel bills, for reportedly more energy is lost in our homes and factories than we consume in our automobiles.

The Don Smith case provides several lessons:

(1) There are perhaps 40 people in my district alone with inventions of one sort or another, and at least three or four appear to be substantial. Multiply that by 435 congressional districts and we should have the resources for some tremendous changes in energy conservation and utilization. I hope that James Schlesinger and the new Department of Energy will aggressively do more to look at this potential.

(2) Let's not fool ourselves; some of those who preach conservation aren't really for it. If Don Smith were not such a bulldog, his

idea would have been buried by the very people who carry newspaper advertisements urging readers to save energy.

(3) The problem in the energy field is not only research, but getting the word out once that research has produced a good product.

We should utilize every practical possible means of saving heat in our homes, including things like the Don Smith invention; we soon should be able to produce big cars that go 50 miles on a gallon of gas (or maybe even water); we should be much more creative than we have been in moving on this energy problem.

This nation did not achieve greatness by drifting into it, nor will it solve problems that way.

#### TRUTH IN LENDING REFORM AND SIMPLIFICATION ACT

**HON. BENJAMIN S. ROSENTHAL**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 6, 1977

Mr. ROSENTHAL. Mr. Speaker, consumers, creditors, and regulators agree the Truth in Lending Act should be amended to enhance the consumer protection it affords and to make the act less costly for creditors to comply with and for Government agencies to enforce. On June 10, 1977, I intend to introduce the Truth in Lending Reform and Simplification Act to accomplish these goals.

On pages 17472-17473 of the June 3, 1977, CONGRESSIONAL RECORD, I briefly explained the need for truth-in-lending reform and provided a section-by-section analysis of the Truth in Lending Reform and Simplification Act. Today I am including the text of this important legislation and urge other Members of the House of Representatives to join me in sponsoring it:

#### H.R. —

A bill to amend the Truth in Lending Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Truth in Lending Reform and Simplification Act".

#### AGRICULTURE CREDIT

SEC. 2. (a) Section 103(h) of the Truth in Lending Act is amended by striking out "household, or agricultural" and inserting in lieu thereof "or household".

(b) Section 104(1) of such Act is amended by striking out "or commercial" and inserting in lieu thereof a comma and "commercial, or agricultural".

(c) Section 104 of such Act is amended by striking out paragraph (5).

#### CREDIT INSURANCE

SEC. 3. (a) Section 106(b) of the Truth in Lending Act is amended by striking out "and" at the end of paragraph (1), by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and", and by inserting at the end thereof the following new paragraph:

"(3) the person to whom the credit is extended is given until midnight of the thirtieth day commencing after the consummation of the consumer credit transaction to cancel the insurance and to receive a full refund of any charges and premiums paid for the insurance."

#### FINANCE CHARGE ITEMIZATION

SEC. 4. (a) Section 128(a)(6) of the Truth in Lending Act is amended to read as follows:

"(6) Except in the case of a sale of a dwelling, the amount of the finance charge, which shall be itemized if it contains more than one charge."

(b) Section 129(a)(4) of such Act is amended to read as follows:

"(4) Except in the case of a loan secured by a first lien on a dwelling and made to finance the purchase of that dwelling, the amount of the finance charge, which shall be itemized if it contains more than one charge."

(c) Section 106 of such Act is amended by striking subsection (d) and by redesignating subsection (e) as subsection (d).

#### CIVIL PENALTY AND CEASE-AND-DESIST ORDER AUTHORITY

SEC. 5. Section 108 of the Truth in Lending Act is amended by adding at the end thereof the following new subsection:

"(e) Any institution described in this section which violates any requirement imposed under this title (including failure to comply with an order under subsection (f)), or any director, officer, employee, or agent of such institution, or other person participating in the conduct of the affairs of such institution who violates any requirement imposed under this title shall forfeit and pay a civil penalty of not more than \$1,000 per day for each day, commencing with the first day of the violation, during which the violation continues. The agency which enforces the requirements of this title with respect to such institution (or director, officer, employee, or agent of such institution, or other person participating in the conduct of the affairs of such institution) shall have the authority to assess such a civil penalty giving due consideration to the appropriateness of the penalty with respect to the size of financial resources and good faith of the institution or person charged, the gravity of the violation, and the history of previous violations of requirements imposed under this title or regulations promulgated thereunder.

"(f) If the appropriate Federal agency finds that any institution described in this section, or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is engaging or has engaged, or the agency has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is violating or has violated, or the agency has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to violate any requirement imposed under this title, the agency may issue and serve upon the institution or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations, and shall fix a time and place at which a public hearing will be held to determine whether an order to cease and desist therefrom should issue against the institution or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or later date is set by the agency at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the agency shall find that any violation specified in the notice of charges has been established, the agency may issue and serve upon the institution or the director, officer, employee, agent, or other person participating in the conduct of the affairs of

such institution an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the institution or its directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such institution to cease and desist from the same and restate those borrowers injured by the alleged violation or practice."

#### BORROWER NOTIFICATION

SEC. 6. Section 108 of the Truth in Lending Act is further amended by adding at the end thereof the following new subsection:

"(g)(1) Whenever any agency described in this section discovers an apparent violation of any requirement to which section 130 applies by any institution with respect to which it has enforcement authority under this section and if the actual damage sustained is in excess of \$5, then the agency shall order the institution to notify, in writing and within thirty calendar days of receipt of the order, the affected consumer that a Federal agency with enforcement authority under this title has found an apparent violation and of his rights under this title.

"(2) Whenever an institution fails to comply with paragraph (1), the agency which has enforcement authority under this section shall notify, in writing, the affected consumer of the apparent violation and of his rights under this title."

#### ANNUAL REPORTS

SEC. 7. (a) Section 114 of the Truth in Lending Act is amended by striking out "January 3" and inserting in lieu thereof "June 1".

(b) Section 18(f)(5) of the Federal Trade Commission Act is amended by striking out "March 15" and inserting in lieu thereof "June 1".

(c) Section 707 of the Equal Credit Opportunity Act is amended by striking out "February 1" and inserting in lieu thereof "June 1".

#### MODEL FORMS AND CLAUSES

SEC. 8. (a)(1) Chapter 1 of the Truth in Lending Act is amended by adding at the end thereof the following new section:

##### "§ 116. Model forms and clauses

"(a) The Board shall issue model forms and clauses for common transactions to facilitate compliance with the disclosure requirements of this title and to aid the borrower in understanding the transaction by utilizing readily understood language to simplify the technical nature of the disclosures.

"(b) Such forms and clauses shall be adopted by the Board after notice duly given in the Federal Register and opportunity for public comment in accordance with section 553 of title 5, United States Code."

(2) The table of sections of chapter 1 of the Truth in Lending Act is amended by adding at the end thereof the following:

"16. Model forms and clauses."

(b) Section 130(f) of the Truth in Lending Act is amended to read as follows:

"(f) No provision of this section or section 112 imposing any liability shall apply to—

"(1) any act done or omitted in good faith in conformity with any rule, regulation, or interpretation thereof by the Board or in conformity with any interpretation or approval by an official or employee of the Federal Reserve System duly authorized by the Board to issue such interpretations or approvals under such procedures as the Board may prescribe therefor; or

"(2) any failure to make disclosures in proper form if the creditor utilized any appropriate model form or clause issued by the Board, notwithstanding that after such act omission has occurred, or after the use

of such form or clause, such rule, regulation, approval, or model form or clause is amended, rescinded, or determined by judicial or other authority to be invalid for any reason."

#### STATE EXEMPTION

SEC. 9. Section 123 of the Truth in Lending Act is amended by inserting "(a)" immediately before "The" and by inserting at the end thereof the following new subsections:

"(b)(1) Whenever the bank regulatory agency of a State requests of the Comptroller of the Currency that its bank examiners be allowed access to make examinations of the affairs of national banks located in such State respecting credit transactions of such banks which may be subject to the law of that State which imposes requirements substantially similar to those imposed under this chapter in order to establish to the satisfaction of the Board that there is adequate provision for enforcement of such law of the State, the Comptroller of the Currency shall establish procedures to permit bank examiners of the bank regulatory agency of such State to make thorough examinations of the affairs of national banks located in the State respecting credit transactions of such banks which may be subject to the law of that State which imposes requirements substantially similar to those imposed under this chapter.

"(2) Whenever the savings and loan regulatory agency of a State requests of the Federal Home Loan Bank Board that its examiners be allowed access to make examinations of the affairs of associations chartered by the Federal Home Loan Bank Board located in such State respecting credit transactions of such associations which may be subject to the law of that State which imposes requirements substantially similar to those imposed under this chapter in order to establish to the satisfaction of the Board that there is adequate provision for enforcement of such law of the State, the Federal Home Loan Bank Board shall establish procedures to permit examiners of the savings and loan regulatory agency of such State to make thorough examinations of the affairs of associations chartered by the Federal Home Loan Bank Board located in the State respecting credit transactions of such associations which may be subject to the law of that State which imposes requirements substantially similar to those imposed under this chapter.

"(3) Whenever the credit union regulatory agency of a State requests of the Administrator of the National Credit Union Administration (hereinafter in this paragraph referred to as the 'Administrator') that its examiners be allowed access to make examinations of the affairs of Federal credit unions located in such State respecting credit transactions of such credit unions which may be subject to the law of that State which imposes requirements substantially similar to those imposed under this chapter in order to establish to the satisfaction of the Administrator that there is adequate provision for enforcement of such law of the State, the Administrator shall establish procedures to permit examiners of the credit union regulatory agency of such State to make thorough examinations of the affairs of Federal credit unions located in the State respecting credit transactions of such associations which may be subject to the law of that State which imposes requirements substantially similar to those imposed under this chapter.

"(c) A State which establishes to the satisfaction of the Board that the law of such State imposes requirements substantially similar to those imposed under this chapter and that there is adequate provision for enforcement of such law of the State, shall be authorized to conduct examinations of the affairs of national banks located in

such State for the purpose of enforcing the law of such State which imposes requirements substantially similar to those imposed under this chapter."

#### RESCISSION RIGHTS

SEC. 10. The first sentence of section 125(a) of the Truth in Lending Act is amended by striking out "residence" and inserting in lieu thereof "dwelling".

#### OPEN END CREDIT PLANS

SEC. 11. (a) Section 127(a) of the Truth in Lending Act is amended by striking out paragraph (5).

(b) Section 127(b) of the Truth in Lending Act is amended by striking out paragraph (7).

#### CREDITOR IDENTIFICATION

SEC. 12. (a) Section 127(a) of the Truth in Lending Act is amended by adding at the end thereof the following new paragraph:

"(9) The complete name and address of the creditor."

(b) Section 128(a) of the Truth in Lending Act is amended by adding at the end thereof the following new paragraph:

"(11) The complete name and address of the creditor."

(c) Section 129(a) of the Truth in Lending Act is amended by adding at the end thereof the following new paragraph:

"(9) The complete name and address of the creditor."

#### DEFAULT CHARGES

SEC. 13. (a) Section 128(a) (9) of the Truth in Lending Act is amended to read as follows:

"(9) Any monetary charge payable in the event of a late payment or delinquency."

(b) Section 129(a) (7) of such Act is amended to read as follows:

"(7) Any monetary charge payable in the event of a late payment or delinquency."

#### SECURITY INTERESTS

SEC. 14. (a) Section 128(a) (10) of the Truth in Lending Act is amended by striking out "A description of any security interest held or to be" and inserting in lieu thereof the following: "A security interest will be held."

(b) Section 129(a) (8) of the Truth in Lending Act is amended by striking out "A description of any security interest held or to be held" and inserting in lieu thereof the following: "A security interest will be held."

#### LIMITED CIVIL LIABILITY

SEC. 15. (a) The text preceding clause (1) of section 130(a) of the Truth in Lending Act is amended to read as follows: "Except as otherwise provided in this section, any creditor who fails to comply with any requirement imposed under this chapter with respect to the amount financed; the finance charge; the annual percentage rate; the cost of and the borrower's ability to refuse to purchase optional credit life, accident, or health insurance; the number, amount and due dates or periods of payments scheduled to repay the indebtedness; monetary default, delinquency, or similar charges; the existence of a security interest and the identity of the securing property; and the consumer's rescission rights; or any requirement imposed under chapter 4 or 5 of this title, with respect to any person is liable to such person in an amount equal to the sum of—"

(b) Section 130(b) of the Truth in Lending Act is amended by striking out everything after "requirement imposed under this chapter or chapter 5" and inserting in lieu thereof the following: "If within thirty days after discovering the error or being informed, in writing, of the error by an agency pursuant to section 108(g) (2), and prior to the institution of an action under this section or the receipt of written notice of the error from someone other than an agency pursuant to section 108(g) (2), the creditor—"

"(1) notifies, in writing, the person concerned of the error that it or an agency re-

ferred to in section 108, whichever is appropriate, has discovered the error; and

"(2) provides disclosure statements that satisfy the requirements of this title; and

"(3) (A) with respect to finance charge and annual percentage rate errors makes whatever adjustments in the appropriate account are necessary to insure the person will not be required to pay a finance charge in excess of the amount or percentage rate actually disclosed; or

"(B) with respect to credit insurance errors cancels the insurance and refunds in full all charges and premiums paid for the insurance, if the person so requests, in writing, within thirty days after receipt of the creditor's notification; or

"(C) with respect to rescission notice errors rescinds the transaction, if the person so requests, in writing, within thirty days after receipt of the creditor's notification.

#### LIMITATION ON CIVIL ACTIONS

SEC. 16. Section 130(e) of the Truth in Lending Act is amended to read as follows:

"(e) An action under this section may be brought in any United States district court, or in any other court of competent jurisdiction, within three years from the date of the occurrence of the violation.

#### SET-OFF RIGHTS

SEC. 17. Section 130(h) of the Truth in Lending Act is amended by adding at the end thereof the following new sentence: "This subsection may not be construed to prohibit such person from raising a creditors violation of this title by way of recoupment, offset, or counterclaim in an action before a court of competent jurisdiction where permitted by law."

#### EFFECTIVE DATE

SEC. 18. Except as otherwise specified, the provisions of this Act take effect on the date of enactment.

### SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, June 7, 1977, may be found in the Daily Digest of today's RECORD.

#### MEETINGS SCHEDULED

JUNE 8

8:00 a.m.

Judiciary

Improvements in Judicial Machinery Subcommittee

To continue hearings on S. 1612 and S. 1613, to expand the jurisdiction of U.S. Magistrates.

2228 Dirksen Building

8:30 a.m.

Finance

Health Subcommittee

To continue hearings on S. 1470, Medicare and Medicaid Administrative and Reimbursement Reform Act.

2221 Dirksen Building

9:00 a.m.

\*Commerce, Science, and Transportation Science, Technology, and Space Subcommittee

To hold hearings on S. 421, to establish a program to educate the public in understanding climatic dynamics.

5110 Dirksen Building

9:30 a.m.

\*Agriculture, Nutrition, and Forestry Agricultural Research and General Legislation Subcommittee

To hold hearings on proposed legislation to extend the authorization of the Federal Insecticide, Fungicide, and Rodenticide Act.

Until 10:30 a.m. 324 Russell Building

10:00 a.m.

Banking, Housing, and Urban Affairs

To continue hearings on S. 1397, to increase from 16 to 19 the size of the Board of Directors of FNMA.

5302 Dirksen Building

Commerce, Science, and Transportation

To continue oversight hearings on the cable TV system.

235 Russell Building

Energy and Natural Resources

Parks and Recreation Subcommittee

To hold hearings on S. 975, to improve the administration of the National Park System.

3110 Dirksen Building

Energy and Natural Resources

Energy Research and Development Subcommittee

To receive testimony on proposed legislation authorizing funds for fiscal year 1978 for nuclear programs of ERDA.

1114 Dirksen Building

Foreign Relations

International Operations Subcommittee

To hold oversight hearings on the role of the media, business, banking, labor, national security, etc. in the current and future international flow of information.

4221 Dirksen Building

Government Affairs

Intergovernmental Relations Subcommittee

To continue hearings on S. 600, the Regulatory Reform Act of 1977.

6226 Dirksen Building

Human Resources

Health and Scientific Research Subcommittee

To hold oversight hearings on environmental toxins in mother's milk.

Until 12:30 p.m. 357 Russell Building

Human Resources

Labor Subcommittee

To mark up S. 995, to prohibit discrimination based on pregnancy or related medical conditions.

4232 Dirksen Building

Judiciary

Criminal Laws and Procedures Subcommittee

To continue hearings on S. 1437, Criminal Code Reform Act of 1977, and the following criminal sentencing bills: S. 31, 45, 181, 204, 260, 888, 979, and 1221.

2228 Dirksen Building

Joint Economic

To hold hearings to review economic conditions, and to discuss the future outlook.

6202 Dirksen Building

10:30 a.m.

Judiciary

To hold hearings on the nomination of

Finis E. Cowan to be U.S. district judge for the southern district of Texas.  
2228 Dirksen Building  
Select Intelligence  
To hold a closed business meeting.  
224 Russell Building  
2:00 p.m.  
Appropriations  
Public Works Subcommittee  
To mark up proposed appropriations for fiscal year 1978 for public works projects.  
S-126, Capitol  
2:30 p.m.  
Foreign Relations  
Arms Control, Oceans, and International Environmental Subcommittee  
To resume hearings on S. 897 and 1432, proposed Nuclear Nonproliferation Act.  
4221 Dirksen Building  
JUNE 9  
8:00 a.m.  
Agriculture, Nutrition, and Forestry  
Agricultural Research and General Legislation Subcommittee  
To continue hearings on proposed legislation to extend the authorization of the Federal Insecticide, Fungicide, and Rodenticide Act.  
Until 10:30 a.m. 32 Russell Building  
8:30 a.m.  
Finance  
Health Subcommittee  
To continue hearings on S. 1470, Medicare and Medicaid Administrative and Reimbursement Reform Act.  
2221 Dirksen Building  
9:00 a.m.  
Commerce, Science, and Transportation  
Science, Technology, and Space Subcommittee  
To continue hearings on S. 421, to establish a program to educate the public in understanding climatic dynamics.  
5110 Dirksen Building  
9:30 a.m.  
Banking, Housing, and Urban Affairs  
To hold hearings on the nomination of John Heimann, to be Comptroller of Currency.  
5302 Dirksen Building  
Energy and Natural Resources  
Energy Research and Development Subcommittee  
To hear a panel of experts in connection with proposed funding for nuclear breeder reactors.  
3110 Dirksen Building  
Human Resources  
To hold joint hearings with Committee on Veterans' Affairs on the nomination of Roland R. Mora, to be Deputy Assistant Secretary of Labor for Veterans' Employment.  
4232 Dirksen Building  
10:00 a.m.  
\*Energy and Natural Resources  
Energy Production and Supply Subcommittee  
To hold oversight hearings on strategic petroleum reserves.  
6226 Dirksen Building  
Foreign Relations  
International Operations Subcommittee  
To continue oversight hearings on the role of the media, business, banking, labor, national security, etc., in the current and future international flow of information.  
4221 Dirksen Building  
Governmental Affairs  
Reports, Accounting, and Management Subcommittee

To resume hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Government, are established.  
6202 Dirksen Building  
Judiciary  
Criminal Laws and Procedures Subcommittee  
To continue hearings on S. 1437, Criminal Code Reform Act of 1977, and the following criminal sentencing bills: S. 31, 45, 181, 204, 260, 888, 979, and 1221.  
2228 Dirksen Building  
Joint Economic  
To continue hearings to review economic conditions, and to discuss the future outlook.  
1202 Dirksen Building  
10:30 a.m.  
Commerce, Science, and Transportation  
To hold hearings on S. 687, 121, 1187, 182, and 898, bills to establish a comprehensive national law to govern oil pollution liability and compensation.  
235 Russell Building  
JUNE 10  
8:30 a.m.  
Finance  
Health Subcommittee  
To continue hearings on S. 1470, Medicare and Medicaid Administrative and Reimbursement Reform Act.  
2221 Dirksen Building  
9:00 a.m.  
Commerce, Science, and Transportation  
Science, Technology, and Space Subcommittee  
To continue hearings on S. 421, to establish a program to educate the public in understanding climatic dynamics.  
5110 Dirksen Building  
Judiciary  
Improvements in Judicial Machinery Subcommittee  
To continue hearings on S. 1612 and S. 1613, to expand the jurisdiction of U.S. Magistrates.  
2228 Dirksen Building  
9:30 a.m.  
Human Resources  
Health and Scientific Research Subcommittee  
To continue oversight hearings on environmental toxins in mother's milk.  
Until noon 4232 Dirksen Building  
\*Energy and Natural Resources  
Energy Research and Development Subcommittee  
To hold hearings on S. 1432, proposed Nuclear Non-Proliferation Act of 1977.  
6226 Dirksen Building  
10:00 a.m.  
Energy and Natural Resources  
To hold hearings on the nomination of Robert R. Nordhaus, to be a member of the Council of Economic Advisers.  
3110 Dirksen Building  
Foreign Relations  
International Operations Subcommittee  
To continue oversight hearings on the role of the media, business, banking, labor, national security, etc., in the current and future international flow of information.  
4221 Dirksen Building  
10:30 a.m.  
Commerce, Science, and Transportation  
To continue hearings on S. 687, 121, 1187, 182, and 898, bills to establish a comprehensive national law to govern oil pollution liability and compensation.  
235 Russell Building

JUNE 13  
9:00 a.m.  
\*Energy and Natural Resources  
To resume hearings on part D (natural gas pricing) of S. 1469, National Energy Act.  
3110 Dirksen Building  
9:30 a.m.  
Commerce, Science, and Transportation  
Science, Technology, and Space Subcommittee  
To resume hearings on S. 657, to establish an Earth Resources and Environmental Information System.  
235 Russell Building  
Finance  
Taxation and Debt Management Subcommittee  
To receive testimony on proposals which seek to encourage economic growth and employment.  
2221 Dirksen Building  
10:00 a.m.  
Banking, Housing, and Urban Affairs  
To hold hearings on S. 1594 and H.R. 5959, to revise and extend the Renegotiation Act of 1951.  
5302 Dirksen Building  
Governmental Affairs  
Reports, Accounting, and Management Subcommittee  
To resume hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Government, are established.  
6226 Dirksen Building  
Judiciary  
Criminal Laws and Procedures Subcommittee  
To hold hearings on S. 1566, Foreign Intelligence Surveillance Act of 1977.  
2228 Dirksen Building  
JUNE 14  
9:00 a.m.  
\*Energy and Natural Resources  
To continue hearings on part D (natural gas pricing) of S. 1469, National Energy Act.  
3110 Dirksen Building  
9:30 a.m.  
Commerce, Science, and Transportation  
Science, Technology, and Space Subcommittee  
To continue hearings on S. 657, to establish an Earth Resources and Environmental Information System.  
5110 Dirksen Building  
Finance  
Taxation and Debt Management Subcommittee  
To receive testimony on proposals which seek to encourage economic growth and employment.  
2221 Dirksen Building  
Select Small Business  
Monopoly and Anticompetitive Activities Subcommittee  
To hold hearings on the safety and effectiveness of over the counter sleepaids.  
6202 Dirksen Building  
10:00 a.m.  
Agriculture, Nutrition, and Forestry  
Rural Development Subcommittee  
To hold oversight hearings on the implementation of the Rural Development Act of 1972.  
322 Russell Building  
Banking, Housing, and Urban Affairs  
To continue hearings on S. 1594 and H.R. 5959, to revise and extend the Renegotiation Act of 1951.  
5302 Dirksen Building  
Governmental Affairs  
Energy, Nuclear Proliferation, and Federal Services Subcommittee

To resume hearings on a report of the Commission on Postal Service.

3302 Dirksen Building

#### Joint Economic

Economic Growth and Stabilization Subcommittee

To resume hearings on economic development in rural areas.

1202 Dirksen Building

#### Judiciary

Criminal Laws and Procedures Subcommittee

To continue hearings on S. 1566, Foreign Intelligence Surveillance Act of 1977.

2228 Dirksen Building
